THE CURRANT TRADE OF THE MOREA.

Since the enforcement of the Retention Law in the Morea the currant trade of that province has become more profitable to all concerned in it. Mr. Consul F. B. Wood in his report states that since 1895, the first year of the law, about 45,000 tons have been retained in the Government stores at Patras, instead of as formerly being exported to become a glut on the market, with a consequent fall in prices. The Government is not allowed to export the percentage of currants given it by the shippers without first reducing them to pulp or syrup, or it may sell them locally for distilling purposes, and so cheaply can it afford to do so that great stimulus has been given to the manufacture of wines and spirits in the country. It is hoped that very shortly all the retention currants will be bought and used by the local distillers.

The old law forbidding the shipment of currants before August 28 will, in all probability, shortly be renewed, and, if so, will greatly benefit the shippers, and also place on the market a better quality than is at present given. The growers during the lapse of this law have gathered their crops before thoroughly matured, and hurried them to the markets in order to obtain the high prices given for first fruits, while the shippers, not knowing when the first shipments would be ready, have wasted much time in port awaiting their cargoes.

To a Maori rising we have long been strangers; but one has occurred among the Hausau natives, and is said to be serious. They have risen in protest against the dog tax. A detachment of artillery, with quick-firing guns, has been sent against the Hausaus, who were threatening the town of Reewene.

An English syndicate has been granted 250,000 acres of land in New Guinea. For what?

According to the *Japan Herald* Japan cotton yarns are better in quality than Bombay spinnings, and also somewhat cheaper. As a consequence, they are said to be superseding the Bombay article in China. They were first shipped from Japan during the prevalence of the plague in Bombay.

The statement of the foreign trade of the United States for March shows continuous progress. The total exports for the month were valued at $112,817,863, an increase of fully $25,000,000 over March, 1896. The imports, however, showed a decrease of $14,800,000, the total value for the month being $61,507,437. How will the totals for April look after a few weeks of war?

Having recently picked up a knicknack marked "Made in Germany," the Ameer of Afghanistan gravely remarked to Sir Salter Pyne, "Your country is degenerating. England has been sending out bad things, and so, to protect themselves, France and Germany and Russia have decided to mark everything that they manufacture." This is certainly regarding the matter from a novel point of view. What do the "fair" traders say to it?

Early strawberries are being largely exported from France to England. Last year about a thousand tons were landed at Plymouth and Southampton. This year a much larger quantity is expected.

The Victorian Government contemplate carrying out several public works, including an extensive irrigation scheme, at a total cost of over £2,000,000. The money will be raised annually at the rate of £750,000.

The gold exports from Western Australia in April amounted to 84,083 oz., valued at £319,517, as compared with 39,660 oz., valued at £150,709, in the corresponding month of last year.

The gold yield of Tasmania for the quarter ended March 31 amounted to 9,300 oz., being a decrease of 4,000 oz., as compared with the corresponding quarter of last year.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

Working-Capital Column.—In working-capital column, D stands for *debit*.

* Company formed this year. † Interim dividends are given as actual distribution made. ‡ *Total* div. § Crop 1896.

NOTICES.

The numbers are announced of thirty-four 5 per cent. debentures, amounting to £6,800, of the Land and Mortgage Company of Egypt, Limited, which have been drawn for payment at par on May 16.

The Right Hon. W. Lidderdale has been elected Chairman of the Council of Foreign Bondholders, in place of Sir John Lubbock, Bart., M.P., resigned.

The rate of exchange for payment of the coupons of the Chinese 7 per cent. silver loan, due May 1, has been fixed by the Hong-Kong and Shanghai Banking Corporation at 2s. 6d. per tael.

The United Railways of the Havana and Regla Warehouses, Limited, being about to issue debenture stock certificates in exchange for the scrip certificates, have instructed Messrs. J. Henry Schröder & Co. to inform holders of the 5 per cent. (1890) bonds of the United Railways of the Havana who have not yet converted that they should forthwith, and not later than Friday, May 13, send in their bonds for exchange into the 5 per cent. consolidated irredeemable debenture stock in order to enable arrangements to be made for the issue of interest warrants on July 1.

The numbers are announced of 125 bonds of £100 each of the Imperial Government of Persia 6 per cent. loan, 1892, which have been drawn for payment at par on May 14 at the Imperial Bank of Persia.

The Council of Foreign Bondholders have received advices from the agents of the Paraguay bondholders at Asuncion, remitting the instalment of the debt service, due on April 1, paid by the Government for account of the coupon payable on July 1, 1898.

The London Joint Stock Bank, Limited, announces that branches will shortly be opened at 11, Station-parade, Muswell Hill, and 2, Railway-approach, Lower Edmonton, with which latter will be connected sub-branches at Palmer's Green and Winchmore Hill.

The Commissioners of Inland Revenue have entered into an agreement with the Corporation of Bath for the composition of the stamp duties payable on transfers of £68,432 Corporation of Bath 3 per cent. stock. Transfers executed on or after April 1, 1898, will be exempt.

Messrs. J. S. Morgan & Co. inform holders of the Baltimore and Ohio Railroad Company 6 per cent. sterling mortgage bonds (loan of 1874) that the company having made default in payment of the coupon due 1st inst., they think it necessary that holders should forthwith deposit their bonds with them in order that steps may be taken for the protection of their interests. They have also arranged with Messrs. J. P. Morgan & Co., of New York, to act as committee and depositary of the bondholders under the bondholders' agreement of this date, and to issue their negotiable receipts for the bonds deposited. A copy of the agreement, together with the requisite lists to be filled up on deposit, can be obtained at 22, Old Broad-street, E.C.

Baring Brothers & Co., Limited, are prepared to deliver provisional scrip for the new Argentine Government 4 per cent. bonds to be issued for the conversion of the bonds of the City of Buenos Ayres 6 per cent. loan, 1888, deposited with them up to April 30, and represented by their receipts Nos. 1 to 1,280 inclusive.

Messrs. Glyn, Mills, Currie, & Co., announce that they have received cable advice from the London and River Plate Bank at Monte Video announcing the despatch by mail of a remittance amounting to £7,000 for the service of the Uruguayan 5 per cent. loan of 1896.

Messrs. Brown, Shipley, & Co., notify to the holders of the 5 per cent. first mortgage gold bonds, dated April 1, 1890, of the West Virginia and Pittsburgh Railroad Company that the time for depositing bonds with them is extended to June 1 next.

Dundee Natal Coal and Estates Company, Limited.—This undertaking has been reconstituted, and such shareholders in the former Dundee Coal Company as there are in this country are to send in their certificates to the London office, receiving for their £1 shares, £3 10s. in the new company, payable as to £2 10s. in shares, 10s. in cash, and 10s. in cash or shares. The capital of the old company was £100,000 in £1 shares, of which 91,030 were issued.

The Grand Trunk Railway Company of Canada informs holders of the Hamilton and North-Western 6 per cent. first mortgage bonds that all bonds not exchanged for debenture stock by May 10, under the conditions already advertised, will be paid off in cash at par by the company on and after June 1. Bonds must be deposited at the company's offices three clear days before the date of payment.

Baring Brothers & Co., Limited, publish the numbers of 196 bonds of the City of Buenos Ayres 4½ per cent. loan of 1888 which have been drawn by lot. By the terms of the arrangement made in November, 1892, these bonds are payable at par on June 1, 1903, and continue to bear interest until that date.

Holders of certificates for the old first and consolidated mortgage bonds of the Colorado Midland Railroad Company are reminded that the new securities to be given under the plan of reorganization can now be obtained in exchange for such certificates at the banking house of Messrs. Glyn, Mills, Currie, & Co., 67, Lombard-street, E.C. Certificates must be presented by the holder in person, or by his banker or agents. Securities will not be sent by post.

Shareholders in the Suez Canal Company possessing twenty-five or more shares who are desirous of being present at the general meeting to be held on June 7 next must deposit their shares with Messrs. N. M. Rothschild & Sons before June 1, in exchange for which a card of admission to the meeting will be given in due course.

The numbers are published of twenty-three debentures amounting to £2,300 of the Chicago and North-West Granaries Company, Limited, which have been drawn and will be paid off at 10 per cent. premium on July 1 next.

The new issue of 22,000 deferred ordinary shares of £10 each recently offered to the holders of preferred ordinary stock in Samuel Allsopp & Sons, Limited, has been fully subscribed.

The Secretary of Champagne Frères, Limited, begs to notify that the transfer register of the preference shares will be closed from the 7th to the 14th inst., both dates inclusive, for the payment of the half-yearly dividend.

Mr. Lawrence Rawstorne and Mr. Oliver Ormerod Walker have been elected members of the board of directors of the Lancashire Insurance Company, Manchester.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 19. New Series. FRIDAY, MAY 13, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the INVESTORS' REVIEW, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investors' Review.

A Chartered Company for Sale, Price £10,000,000.

They want a deal of explaining, these ten millions of Earl Grey's. Mr. Rhodes made still another effort to elucidate them at the meeting of the Bechuanaland Railway Company on Friday last. And from his words we infer that the Chartered Company, being nearly played out as money distiller from British grubs, is to be offered to the nation "cheap at ten millions." No, Mr. Rhodes says, at least not yet—but take the reporter's summary of his own words :—

In the course of his speech at the recent meeting of the shareholders of the Chartered Company, he stated that the debt of that company was, roughly, about £6,000,000, and that his colleague Lord Grey, had stated it at £10,000,000. There appeared to be a contradiction there, but that was not really so, for this reason. He thought that Lord Grey said that the investments in connection with the country had been £10,000,000. They must remember, although the debt of the Chartered Company was £6,000,000, that that company was a guarantee for their railway for £2,000,000. Then there was the Mashonaland Railway, together with the Beira Railway, which was built without guarantee, and there had been telegraphic expenses and other items which would make up £10,000,000. At the same time the real debt of the country was only £6,000,000, and he thought it was wise to clear up the apparent contradiction. The debt, of course, was the money expended in the country in excess of receipts. Of course, the debenture debt of the country was only £1,200,000. He used the word "debt" in the sense of money spent in the country.

Now, in the first place, Lord Grey did not say that the investments "in connection with" Rhodesia had been

£10,000,000. What at all events he is reported to have said was that "the Chartered Company has found £10,000,000 and upwards for developing Rhodesia." We challenged that statement at the time, and the successive explanations of it have only deepened the mystery. Instead of throwing more light on it last Friday, Mr. Rhodes leaves us in greater bewilderment than ever. Assume that the Mashonaland Railway and Beira Railway ultimately cost between them £3,000,000; add this £3,000,000 to the £2,000,000 guaranteed for the Bechuanaland Railway and still we cannot find the figures of Lord Grey. According to the balance-sheet issued with the last report of the Chartered Company, the actual expenditure on what may be called administrative account left a deficit of £1,145,502 at the end of March, 1897, after all the revenues since the company began operations had been credited against the gross outlay. None of the other items in this balance-sheet can be looked upon as expenditure for the development of the country. Amongst the assets held are £25,000 African Lakes Corporation shares, £314,000 Bechuanaland Railway debentures, £500 De Beers' shares, 9,305 Shashi and Macloutsie Exploration and Mining shares, costing £5,788, £895,327 nominal of shares in a variety of mining companies and stocks, stores, &c. Debtors, including the Bechuanaland Railway Company, which owed £329,418, and sundry minor expenditures on concessions go to make up a total of nearly £7,000,000, in large part promoters' flim-flam. Some of the items ought to be written off against the gross expenditure mentioned by Mr. Rhodes and Earl Grey, and boiling the thing down, exclusive of the cost of the Matabeleland rebellion, we cannot discover that £3,000,000 has genuinely been spent in the "development" of the country. Add £3,000,000 to the extra liberal £5,000,000 arrived at above, and the gross total is only £8,000,000. In reality the outlay to date has been very much less, and does not attain to £10,000,000 even if we clap on £3,000,000 for the Matabeleland rebellion. This last amount, as we have repeatedly insisted, ought not to be charged against the Chartered Company at all; it ought to be paid by Mr. Rhodes and his associates, who made what Mr. Chamberlain is now pleased to describe as the "mistake" of raiding into the Transvaal, or of organising a raid from the consequences of which they bolted.

Turn the matter the other way round and deduct from the share capital the £2,000,000 nominal given to the promoters, out of which they may easily have netted their £12,000,000 to £15,000,000, and we cannot find that the company has had more than £5,000,000, up to the date of the share issue last week, to handle in the shape of debenture money, shares, and share premiums subscribed for by the public. If an additional £5,000,000 had been spent on railway extension, then Lord Grey's £10,000,000 would be about reached, but it has not been the custom hitherto to class the railways as a direct expenditure of the company. By doing that there would have been no necessity for the existence of the separate undertakings by which the lines have been, or are being constructed. Indeed, from the point of view of Chartered shareholders it would have been surely much more to the purpose for the company to have built railways with its own money, so that it might have enjoyed the whole of the wonderful net income expatiated upon by Mr. Rhodes at last Friday's meeting. Why were these Mashonaland and Bechuanaland railway companies created, if the Chartered Company is to include their expenditure among its assets, to be claimed for against the British Government when the day comes to saddle upon us the monstrous waste which has been the characteristic of this undertaking from its inception? Taxpayers will be well advised to keep an eye upon this business. They are going to be made to pay for it, of that they may be quite sure; and one of the aims of the promoters of the Chartered Company is unquestionably to keep well before the public a claim of large magnitude to be one day sprung upon the English people, and rushed through Parliament; a Parliament more or less in the hands of the band.

Just consider the attitude of Mr. Chamberlain in this matter. The weakness of his speech on Friday night would have been deplorable had we not already had abundant evidence that in all that relates to Charterland he is the abject tool of Mr. Rhodes. Although he repudiated any compact with that gentleman in regard to this enormous claim, and denied that the Government had sanctioned a guarantee upon a capital of £2,000,000 to extend the Bechuanaland Railway to the Zambesi, it was perfectly evident from the tone of his observations that he only waited to be asked in order to surrender. Look at the manner in which he endeavoured to draw a parallel between this railway—through a barren tropical country totally unfitted for European occupation, where labour must be performed by blacks, practically slaves, if performed at all—and the Canadian Pacific Railway, running through the icy and half-desert wastes of western Canada. His utterances at this point are so remarkable that we think they ought to be quoted here for purposes of future reference. There can, as a contributor demonstrates on another page, be no analogy whatever between these two undertakings, and we go so far as to say that Mr. Chamberlain could not have discovered his pretended analogy except for one of two reasons. Either he is hand and glove with Mr. Rhodes in a plot to engage British credit in this "wild-cat" Central African enterprise, or he was eager for an opportunity to give a good rousing puff to the Canadian Pacific Railway Company, in which he is understood to be a large shareholder. Neither motive was creditable to him. He is attacking Sir William Harcourt, and, in the course of his harangue, speaks as follows:—

> Then the right hon. gentleman goes on to deal with the railway proposal which has been made by Mr. Rhodes and which is under the consideration of her Majesty's Government. The time has not yet come; we have not had time ourselves to consider this proposal. No doubt it will want a great deal of consideration, and I will not anticipate in any way what our decision upon it may be; but this I will say—that to treat a scheme of this kind, even in its inception, as a wild-cat scheme is characteristic of the right hon. gentleman, but is not justified by our colonial history. (Cheers.)
>
> Sir W. Harcourt.—I spoke of the speech. My remarks were not applied simply to the railway. I spoke of the possession of the whole of Africa as a wild-cat scheme. That is the point.
>
> Mr. Chamberlain.—I did not know that cats could scheme, especially wild cats. (Laughter and cries of "Oh.") Then does the right hon. gentleman think that this scheme is one which her Majesty's Government may fairly consider?
>
> Sir W. Harcourt.—They may consider it.
>
> Mr. Chamberlain.—Yes; but I understood the right hon. gentleman represented it as ridiculous from the first. I ask, Sir, is it one atom more ridiculous, for anything the right hon. gentleman knows, than the original proposal to make the Canadian Pacific Railway? (Cheers.) The Canadian Pacific Railway has made the Dominion of

Canada. (Cheers.) What was it before? Indeed, it was nothing but "our lady of snows." At that time the greatest wheat-producing area in the world was nothing more than a desert of prairie, which not even the Indians themselves had passed over. That has been entirely changed by this great railway carried through by a poor colony under extraordinary circumstances, with the greatest enterprise, and, fortunately, with most absolute success. (Cheers.) If the right hon. gentleman wants my opinion, there is nothing more ridiculous and nothing more improbably successful in the proposal now made by Mr. Rhodes than in the proposal of the Canadian Pacific Railway.

Language of this sort compels us to bow the head and blush with shame. Has Parliament indeed fallen so low as to cheer such words, to treat the man who uttered them as intelligent, honourable—a man to respect? Will it swallow this balderdash—insincere, and politically absolutely dishonest balderdash—and vote the guarantee Rhodes demands? Will it endorse the "preferential trade" absurdity and allow the Charterland potentate to embroil us with other nations should the thing he "governs" ever get so far as to have any trade? Yes, we fear it will do all that and more, for it is a Parliament of cravens and hypocrites over this matter. Because "courtly influence" of the highest is said to be behind Mr. Rhodes, no chosen of the free and enlightened electorate dares to speak a word of the truth, unless it be Mr. Labouchere. Side issues are descanted upon, the core of the subject ignored always. What, for example, could be more hollow than the denunciations of slave labour with which Mr. John Ellis opened the debate last Friday. We do not mean that Mr. Ellis was consciously insincere, but he was conscious that this was a safe aspect of the Rhodesian imposture to wax eloquently wroth upon. But his words were vanity, and he ought to know it. We are founding a black slave empire in South Africa, if founding anything at all. Whites cannot labour with the hand there, on the land or in the mines. The labourer must be black, and black labour, for generations to come, perhaps for ever, will in Africa be more or less forced labour. It is so at the De Beers Mine, in the Witwatersrand, among the Boers. Preach and snivel as we may, the fact cannot be gainsaid. A black slave empire! How does that consort with British ideas of freedom? Shall we be eager to buy it up when the group who founded it have—like the two Dukes who have pocketed their share of the "profits" and scuttled off—ceased to care for it because it yields no more plunder?

Our Foreign Trade in April.

Last month the value of our imports rose to £40,246,716, being an increase of £5,110,161 or 14½ per cent. on the figures for the corresponding month in 1897. This is the largest increase yet recorded, much larger than that of the three preceding months of the year put together. Indeed, the total increase for the four months is only £6,552,842, or 4·2 per cent., the total being £159,317,623, against £152,764,781. This would be all right if exports were developing at a corresponding speed, but that is not the case. On the contrary, exports decreased £2,204,111 last month, compared with the corresponding month, or 11·1 per cent., the total having fallen to £17,496,011, against £19,700,122 a year ago. Here again the decline was larger last month than in the whole of the preceding three months taken together, for the total shrinkage, including that of April, is now no more than £3,795,180, or 4·8 per cent. In other words, we sent out goods last month to the value of £75,203,129 as against £78,998,309 in April, 1897. Nor does the decline stop here. Our exports of foreign and colonial merchandise fell off last month by £1,168,928, the total being only £6,139,253. This decline wipes out the previous improvement, and leaves the four months with a decrease of £708,132. As a consequence of this increasing divergence between the two sides of our trading account, the current balance against us has risen from £41,808,315 at the end of April, 1897, to £62,864,469 at the end of last month, a difference the wrong way of £21,056,154.

Before inquiring into the causes of this unfortunate change it may be well to point out its serious effect upon our money market. We cannot flatter ourselves that the great swelling out of our imports is due to the increased profitableness of our investments abroad, for that is not the case. These investments are rather decreasing in value, or, at any rate, there is good reason to believe that they are declining in amount. It may be, indeed, that we are taking payment in goods for some securities, American railroad and other, which we have been exporting of late, but on this point it is impossible to obtain statistics. We shall, therefore, be more prudent in regarding the large gap of nearly £63,000,000 now visible between the value of our imports and that of our exports as a debt which is to be paid in money. Some portion of it must certainly be so paid, unless the balance is redressed soon. Therefore the reasonable presumption is that we shall see drafts made upon our slender stock of gold at no distant date. Already, from one cause and another, these drafts have been very material. Last month we imported gold to the value of £5,072,794, but our exports in the same time amounted to £5,948,806, and since the year began we have imported only £1,532,001 more than we have exported; that is to say, out of £14,331,635 received, £12,799,624 has gone abroad again. These figures are much larger than those for the same period of time in either of the two previous years, and show that if the supply of precious metal is large, the demand also has increased to a very significant extent. The large supply that comes from the mines, at any rate, is in a manner capital returning home, which we are employing as revenue with which to pay our current debts. It may be all right for some time, if this large supply keeps up, but should it not do so, and it has been recently an artificially forced supply to some extent, then a very serious position lies ahead for our money market. We shall have to encounter a heavy export of gold with no adequate set off against it either in the value of goods exported or in fresh supplies of the metal.

Leaving this subject, which will be continually cropping up as the weeks pass, let us now look a little into the causes at work to produce the present somewhat alarming state of our foreign trade. Naturally, one ascribes the heavy increase in import values to the rise in the price of wheat and other cereals, and it partly is so, but not wholly. There has been no increase in the quantity of wheat imported this year up to the end of April; on the contrary, it is smaller than for the same period in either 1897 or 1896, and wheat-flour has not risen in quantity to a compensating extent. Neither have prices as yet much affected

values, although it is true that on all kinds of grain, except maize, the total values to date are rather heavier than those of a year ago. On wheat alone the increase on the month has been £716,000, and on the four months £732,000. The full effect of dearer grain, in short, has yet to be felt, and this coming effect makes the present statistical position of our trade all the more significant in the way of a warning. If a slight increase in prices has produced an increase of £2,500,000 in the value of articles of food and drink imported duty free in April, what may we not expect in May, June, and July?

The two largest increases which go towards producing an augmentation of £2,306,194 in the value of raw materials for textile manufactures imported are raw wool and cotton. Wool has risen upwards of £1,340,000 in the month, and cotton about £950,000. It is quite possible that this may be a transitory increase, since for the four months both cotton and wool will show a shortcoming in value, and wool a shortcoming also in quantity compared with a year ago. We need not, therefore, insist upon this excess in one month's figures as a point of danger. In other respects, imports jog on much as usual, with no great swelling out in any total. We wish the same could be said about the decline in exports, but this is decidedly more unsatisfactory from many points of view. Looking through the detailed tables presented by the Board of Trade, it is rare indeed for us to come across a progressive increase in the value of any leading article of British manufacture exported. We are still losing trade with France, Italy, Dutch India, China, Central America, Chile, the Argentine Republic, British West and South Africa, and the foreign West Indies in cotton goods exported. But for the larger shipments to British India our trade in this class of goods would be in a bad way. Even the United States, great as the falling off there has been, shows up better than some of these countries. The position is not quite so bad with linen yarn and linen tissues, but we cannot pronounce the trade in these, or in the similar productions of jute, as in any sure degree progressive; although exports of jute yarn this year considerably surpassed those for the first four months of 1896. Still more unsatisfactory is our woollen trade. In woollen tissues the past three years have exhibited progressive declines on our exports to Germany, Holland, the Argentine Republic, and, of course, the United States, with which our trade in woollen and worsted fabrics is almost ruined by the tariff. There is no progress either with our own dependencies, whether in South Africa, India, Australasia, or North America. Canada has indeed this year taken more worsted tissues from us than in either of the two previous years for the same period of time, but there is a progressive decrease in our exports to Australia and to South Africa. Nor do China and Japan give us any consolation or any European country, except perhaps Belgium, where the export of worsted goods is larger than usual. Germany, Holland, France, Spain, and Italy all take less from us now than they did last year or the year before. Our exports of carpets are non-progressive, and there is little that can be called encouraging in our heavier commerce in iron, copper, or the manufactures thereof. Steel has indeed gone up, but although the total exports of iron and steel, in whole or in part manufactured, are about £400,000 higher in value than for the same time in 1896, they are £527,000 below those for the first four months of 1897. Altogether, the prospect is not particularly cheerful, and unless a change for the better soon ensues, the country has trying times ahead of it—times not at all in harmony with the extravagant scale of national expenditure now fashionable—thanks to the way the nation is dominated by militarism, and misled through a Parliament which inspires anything but respect among thoughtful citizens.

Dear Bread and Revolution.

Is the great boom in wheat checked? There is a lull undoubtedly in the upward rush of prices; but it might perhaps be rash yet to conclude that this lull will be lasting. But it exists, and we cannot help thinking it probable that—barring some unexpected sign that the war is to be more prolonged and desperate than there is any indication of at present—the lull will continue, and that we may soon see at least a slight turn downward in prices. It should not be forgotten that this is not the first lull that has occurred in the feverish speculative excitement in the wheat market so largely caused by the war. For days before the French Government announced the suspension of the import duties on cereals, English markets had been very quiet. In many the price had gone down—not much, but still down—and the tendency seemed likely to continue, when the French suspensory notice afforded a pretext to speculators to send prices bounding up again. No doubt French wheat supplies had run down considerably, and the suspension of the cereal duties was a great inducement to send France as much wheat as she would take. She took a good deal, and is still taking; but in ordinary times the effect of this upon our markets would hardly have been appreciable. It was the war excitement, and the anxiety of speculators to revive the upward movement that supplied the lever that has been forcing up prices during the last eight or ten days. We are somewhat sanguine, then, that this second lull having come upon us, it will not be disturbed so soon as the last, if at all. There is nothing in the war prospects at present that can afford a pretext. Speculators seem to have exhausted themselves—perhaps they are a little frightened. There has been a "slump" in Liverpool, another in New York, and one in Chicago. Our "visible supply" of wheat is only about a million quarters less than it was this time last year, certainly not sufficient to justify such a rise as has recently occurred in wheat. The shipments to Europe have been steadily increasing during the last three weeks; while from India we last week received 195,000 quarters, against 79,000 in the previous week. These supplies from India are the more notable, in that last year at this time we were receiving none at all from that country. There never has been any suggestion that our wheat supplies would give out before the new harvest was gathered in—and it promises to be an excellent one. Our ordinary supplies this year have, no doubt, been sufficiently shrunken to have justified a moderate rise in price, though certainly nothing like the upward rush that has been caused by a skilful use of the war scare by speculators and "corner" men. Although for one brief mad moment the price of wheat in New York touched 190 cents per bushel, equivalent to 63s. per quarter, the highest

price at which business has been done in English markets was 57s., and that deal was small and exceptional; 55s. has been occasionally asked, but very rarely conceded. Indeed, the top figure for business dealings may be stated at 50s. to 52s., and at that buyers have only purchased enough for their immediate wants, so confident were they of an early return to lower prices.

Whatever may be the upshot of this pause in the speculative fever, the dearness of bread caused by the really unnatural rise in the price of wheat has brought about a crisis in Italy which is very serious and may be disastrous. It is about three months since the bread riots broke out there, and compelled the Government to suspend until May 1 the duties on cereals. Before May arrived, however, the war had given another turn to the screw, wheat went further up in price, and bread in proportion. The rioting was renewed, and the suspension of the cereal duties had not only to be continued, but the Government had in many cases to supply money to provide food for the famishing rioters. For a time these disturbances, though annoying, were not regarded as formidable, because it was evident the rioters were not organised. It was the cry of the hungry; temporary supplies of bread might have satisfied them, and stopped the fighting. But within a week the aspect of affairs has changed. The Government have no longer to deal with mere bread rioters, but with organised and armed revolutionists. A state of siege has been proclaimed in four of the leading cities. Officially, we are assured that quiet has been restored, and that work in the factories has been resumed. But no confidence is placed in such assurances. The independent news channels are stopped up by the official censor. Parliament is only to be allowed to sit for a fortnight's session. Perhaps this decision was prudent. It will certainly be a relief to the Government, who must have been overwhelmed by interpellations, and might have been overturned in the scrimmage of wordy Parliamentary warfare. But the decision must also be taken as the Ministerial measure of the extreme gravity of the situation. To take, so to say, a whole nation by the throat in this way is, to say the least of it, perilous, and may rather encourage than repress revolution.

To many of us this condition of affairs in Italy is no surprise. Close observers have seen the crisis coming for years. About four years ago, as readers of the Investors' Review may remember, we wrote:—"To save the country and give it a chance to recuperate, a powerful Ministry should reduce the cost of the naval and military services to about one-fourth of its present amount, suspend for ten years all debt amortisation, and pay for a like period only 3 per cent. on the whole of the public debt. . . . . Far better take a manly course of this kind and give the inhabitants of the country contentment, than go forward, with the risk of complete bankruptcy and perhaps revolution ahead." But there was no such powerful Minister then, nor is there one now. The revolution is no longer "ahead." Italy appears to be in the midst of it. There is no way out of it but retrenchment and consequent relief to the taxpayers, freedom and encouragement of trade and industry, and a steady regard for the social welfare of the people, instead of that blasting anxiety to pose as a Great Power which has almost brought ruin to Italy. What has the Triple Alliance done for Italy? Why should she cling to it? She cannot afford such luxuries until she has set her business house in order. But where is the Minister to be found powerful and sagacious enough to initiate and carry out such a programme as is essential for the salvation of Italy—one that must also include negotiations with the Vatican for the settlement of the differences with the Church, at present a ruthless enemy to Italian progress? Such a Minister may, perhaps, yet be found in Italy, but he is not known. Her "statesmen," so far as we know anything of them, are merely rather commonplace officials, ready, like the Marquis di Rudini, to obey the orders of political cliques, but incapable of initiating or carrying out a strong policy. This it is which makes the Italian outlook so black at present.

Spain also has been suffering by the boom in wheat. Bread riots have been very numerous there, but of course, the existing misery has been terribly intensified by the hopeless war into which the Government have been rushed to a considerable extent because of their weak dread of popular indignation if they adhered too tenaciously to a peaceful policy. But the root troubles in Spain are very similar to those of Italy—reckless expenditure and constant borrowing, with a crippled, unhealthy, and declining trade to support it. Spain has very great natural resources, but apparently a hopeless incapacity for making the most of them. She, too, wants strong administrators, with some business capacity, and a turn for the useful rather than the merely ornamental. But the tendency to revolution seems ingrained in the population. They have had a remarkably prolonged time of quiet; but at present they seem waiting for a new revolutionary outburst. It is in the air, visible in the quick-gathering clouds: it may break out at any hour. That it will break out soon there is no doubt; what or who may be thrown to the surface in the *débâcle* is not so clear.

Matabele Gold Reefs.

Now that Rhodesia is supposed to have been quieted and the hardy pioneers in that wonderful area are able to do as they like, the market is paying more attention to the Matabele Gold Reefs group. Although we have no great faith in the gold-bearing character of the reefs of Matabeleland, we are bound to admit that the shareholders in the Matabele Gold Reefs and Estates Company will have a fair run for their money. Formed in October, 1894, with the moderate capital of £112,000, of which only £30,000 was "considered as paid," the company took over 488 gold reef claims and thirty-six farms, aggregating about 221,550 acres, and since then it has acquired a variety of rights, town stands, coal areas, and other concessions, which acquisitions have only caused the capital to be increased to £115,500. The company has not yet paid a dividend owing to the grievous condition of affairs in Matabeleland, but it has floated three subsidiary companies within the last three years: the Matabele Mines, the Geelong Gold, and the West Nicholson. It is an amusing characteristic of the company-creating mind that each of these three companies, which were to work only small sections of the property, had a larger capital than its parent, the amount "considered as paid" in the last named being the mere bagatelle of £170,000. The group who operate the property were not content with

subsidiary mines, but they opened their hands widely, and floated in 1895 two companies, the Rhodesia Goldfields and the Rhodesia Concessions. The first named was to invest in shares, and has an issued capital of £100,000 in preferred, and £255,000 in ordinary shares, dividends being paid for about a year on the preferred shares, and then ceasing. The Rhodesia Concessions was to acquire lands and claims, and a small matter of land and mineral grants covering 600 square miles north of the Zambesi was actually acquired. An expedition was sent out, but apparently nothing much more has been done. In the same year—the group was very busy that year—the Rhodesia Agency, Limited, was formed to take over from Messrs. Partridge and Weston Jarvis the agencies of their companies, and to act generally as milking maid to the richly endowed creations of those two gentlemen, who seem to have been the soul and marrow of the affair. For this agreeable purpose a capital of £192,000 was considered necessary, of which £100,000 was presented to the vendors. Through this Rhodesia Agency a complete union was made with the Willoughby's Consols, a group that had been working slightly apart from the Matabele Gold Reefs coterie. Willoughby's Consols owed its inception to Sir John Willoughby, one of the leaders to defeat at Krugersdorp, who kindly transferred concessions obtained by him to two joint-stock affairs—the Willoughby's Mashonaland Expedition Syndicate and the Mashonaland Development Company, and then arranged to amalgamate these concerns into the Willoughby's Consolidated Company with a bloated capital of £713,960, of which £508,500 was "considered as paid." We fail to find any dividend distributed by this company, but it floated two subsidiary concerns—the Matabele Central Estates and the Buluwayo Waterworks. The Matabele Central Estates was strong in land and cattle (it was not explained how the cattle were obtained) and needless to say nothing is heard about its doings. The Buluwayo Waterworks has been building its works, so that little more than the spending of money has been accomplished. In addition, the group took a share with outsiders in the Bembesi District Gold Claims and White's Consolidated, so that the full list of the companies in the group is as follows :—

——	Date of Registration.	Capital issued.	Capital considered as paid.
		£	£
Matabele Gold Reefs ...	30 Oct. 1894	115,500	30,000
Willoughby's Consolidated	12 Dec. ,,	713,960	508,500
Rhodesia Goldfields... ...	1 Jan. 1895	355,000	—
Rhodesia Concessions ...	1 Mar. ,,	150,000	100,000
Buluwayo Waterworks ...	3 April ,,	92,138	62,500
Matabele Central Estates ...	4 April ,,	100,000	70,000
Bembesi Dist. Gold Claims	29 Aug. ,,	49,841	13,500
Rhodesia Agency	12 Sept. ,,	192,000	100,000
Matabele Mines	19 Dec. ,,	180,000	80,000
White's Consolidated ...	26 June 1896	325,000	275,000
Geelong Gold Mine... ...	29 Jan. 1897	130,000	115,000
West Nicholson Company...	— April 1898	210,000	170,000
		2,609,939	1,524,500

A great fuss is made in the market about the prospects of the subsidiary concerns of the Matabele Gold Reefs; but we must confess that the manner in which they have been capitalised does not lead one to expect very much from them. The Matabele Mines had certainly £100,000 of working capital, but that was more than two years ago, and in the hands of the military men who form the larger number of this group, such an amount cannot be expected to last long. The Geelong Company only seems to have had a working capital of £15,000, while the recently floated West Nicholson Company was endowed with £40,000 for its own purposes. These companies have at the same time to bear the weight of heavy masses of paper capital created in the happy company-promoter's style, and unless the mines prove wonderfully productive they are likely to break down from over-capitalisation. To further handicap the unfortunate concerns they have, we presume, to pay for the attentions of the Rhodesia Agency and Rhodesia Goldfields concerns, whose services would not be lightly valued. Whilst there is a narrow market in them, the shares of these subsidiary concerns are kept at high premiums, but then the hard practical test of regular crushings has not been applied to them, and until that is done, any one who is supplied by the public with the requisite funds can do what he likes with the quotation for a mine.

Although a military group as a whole, the delicate London operations of the coterie seem to be a good deal in the hands of two civilians—Messrs. H. Partridge and A. Weston Jarvis. One or other of these two gentlemen appears upon the Board of each of the companies, and the Rhodesia Agency, which acts as London secretary for the lot, bought up the business of Messrs. Partridge and Weston Jarvis. The members of the group are as follows :—

Mr. H. Partridge, Director of the Matabele Gold Reefs, Matabele Mines, Geelong Gold Mining Company, Rhodesia Agency, Rhodesia Goldfields, Bembesi District Gold Claims, Rhodesia Concessions, Willoughby's Consols, West Nicholson, and White's Consolidated.

Mr. A. Weston Jarvis, Director of the Rhodesia Agency, Buluwayo Waterworks, Willoughby's Consols, and Matabele Central Estates.

Colonel the Hon. C. G. Gathorne Hardy, Director of the Matabele Mines, Geelong Gold Mining, Matabele Gold Reefs, Rhodesia Goldfields, Bembesi District Gold Claims, West Nicholson, and Buluwayo Waterworks.

Major S. Wynne Finch, Director of the Rhodesia Agency, Rhodesia Goldfields, Bembesi District Gold Claims, Buluwayo Waterworks, Willoughby's Consols, and White's Consols.

Sir John C. Willoughby, Director of the Rhodesia Goldfields, Buluwayo Waterworks, Matabele Central Estates, White's Consols, and Willoughby's Consols.

Major W. T. E. Fosbery, Director of the Rhodesia Agency, Rhodesia Concessions, and Matabele Central Estates.

Lord Harris, Director of the Matabele Mines and Rhodesia Agency.

Major Maurice Heany, Director of the Matabele Gold Reefs, Matabele Mines, Geelong Gold Mining, Rhodesia Goldfields, and West Nicholson.

Mr. F. C. Selous, Director of the Matabele Gold Reefs, Geelong Gold Mining, and Rhodesia Goldfields.

Mr. J. J. Hamilton, Director of the Matabele Gold Reefs, Geelong Gold Mining, West Nicholson, and Willoughby's Consols.

At the last meeting of the Matabele Gold Reefs Company, the burden of the chairman's speech was the number of fresh companies to be floated this year; at

least eight were mentioned. But ordinary men of business would be inclined to wait and see how the dozen already floated in the years 1894 to 1898 got on before adding to the list. Only one of the collection seems to have paid a dividend in that time, and that one was the stock-jobbing concern, which probably grasped a profit in the last Rhodesian "boom." That was the time when Chartereds went up to nearly 10; but let us hope the public will not suffer from such another fit of frenzy, and if that is avoided, the Matabele Gold Reefs group may be asked to show more practical proofs of the riches of their properties than it has hitherto done before money is again given to it to play with.

A Wild-Cat Scheme.

The House of Commons appears to be losing its powers of criticism in respect of geographical and commercial questions. Sir William Harcourt declared the idea of a railway from Cairo to Capetown to be "a wild-cat scheme." Mr. Chamberlain sought to answer him by drawing a parallel between the proposed line and the Canadian Pacific Railway. A more fallacious parallel it would be impossible to imagine; yet no member of the House of Commons made any effort to expose the folly of Mr. Chamberlain's argument.

What is the position of the Canadian Pacific Railway? To begin with, it lies entirely within British territory. It starts, as one may say, from a British port on the east coast of North America, and terminates at a British port on the west coast of North America. It lies throughout in almost the same latitude. It traverses throughout a country which, though cold in the winter months, is perfectly adapted for a population of European origin. From a strategical point of view, it is invaluable, forming as it does a sort of "covered way" between the resources of the east and the west. From a commercial point of view, it is even more invaluable, seeing that the only sea-routes from Nova Scotia to British Columbia are round Cape Horn, or through the Arctic Sea, the former impracticable by reason of its distance, the latter by reason of its interruption by ice. In these conditions is to be found the justification for the trans-continental railway in Canada. There are other trans-continental railways which are similarly justified; for example, the Russian line through Siberia and the trans-continental lines in the United States.

Thus the proposition is perfectly tenable that trans-continental railways are often justifiable, and are capable of being of immense service, both commercially and strategically. But to assert that because certain trans-continental railways are justifiable all trans-continental railways are justifiable is to assert an absurdity. Let us suppose the state of things in Canada to be different. Let us suppose that the greater part of the route from the Atlantic to the Pacific lay through a tropical and unproductive country. Let us suppose that at various points along this route the line touched on the territory of foreign Powers. Let us suppose that the central States of the American Union did not exist, and that they were replaced by an open sea, from the edge of which railway lines from two to three hundred miles in length could be carried to all the points which the Canadian Pacific line now traverses. Under such conditions as those, would any one have regarded a trans-continental line as a sane and reasonable project? Would any one travel by it who could accomplish the journey from the Atlantic to the Pacific in a first-class mail steamer? Would any one send goods along it who could send them by sea? Would any one make use of even half its length who could reach the same point by, say, a voyage of a thousand miles by sea and carriage over three hundred miles by rail? Strategically, moreover, such a line would be more of a danger and anxiety than anything else. To what interruptions might it not be subject! What diplomatic difficulties might it not create!

All this, and much worse than this, it is proposed to do in respect of the line from Capetown to Cairo. It is spoken of in some quarters as a "grand idea." Well, it is a big idea, certainly; but then megalomaniacs have also big ideas—ideas which do not find acceptance because they are obviously insane. This idea of a Capetown to Cairo railway ought, in spite of Mr. Chamberlain's patronage and approval, to be recognised as insane. In order to arrive at this conclusion it is only necessary to consider a few figures.

Regard the line in the first place as a through line from Europe to South Africa. Who would be such a fool as to travel by it, or to forward merchandise by it? At an inside estimate the distance could not be less than 5,000 miles. If you convey goods at the absurdly low rate of a penny per ton per mile, the freight from Cairo would be at least £20 per ton, not including the cost of getting the goods on to the railway first. Well, you can land goods in Capetown from England by steamer for between 50s. and 60s. per ton, and probably in less time than would be occupied in forwarding the same goods, first of all to Cairo, and thence from Cairo to Capetown. The problem would be very little altered if you made Johannesburg your terminus instead of Capetown. Beyond this, unless you are going to raise a diplomatic hurricane by charging considerably more for Continental manufactures than for British, you will be putting an advantage into the hands of your mercantile competitors. At the present time, German manufactures for Africa start from Hamburg, and have to be carried past British shipping ports. How would the case stand if they could be shipped to the northern terminus of your trans-African railway from Trieste, or even Salonika? As regards passengers, what sane person would be willing to exchange a voyage from Southampton to Capetown in a 10,000-ton steamer for a ten or eleven days' roasting in a railway carriage from Port Said to Table Bay? There would be little, if any, gain in point of time; for, even at the best, the journey to Port Said from London would occupy some five days, whereas the newer class of mail steamers now reach Capetown in sixteen days.

Then consider the Capetown-Cairo line in connection with the trade of the interior districts through which it is to pass. At no point will it fail to be in competition with some very much shorter route from the seaboard. Take, first of all, the Soudan. You have a more or less navigable Nile which you are going to make more navigable. You have, moreover, the prospect of a railway from Suakin to Berber even if the Nile below Berber were to fail you. As for the lakes of Central Africa, there is already a railway under construction from Mombasa, and it is much more than likely that the Germans will build a line towards the interior from Dar-es-Salem. Coming further south, the Zambesi is

navigable considerably above the point where it is to be crossed by the trans-continental line. The whole of Rhodesia will be supplied from Beira the moment Mr. Rhodes allows the Beira line to be completed. No one ought to know all this better than Mr. Rhodes. Mr. Rhodes, however, is singularly ignorant of all figures that do not square with any job he has on hand. To show the extent to which railways are handicapped wherever there is even partial competition by sea, reference need only be made to what happens at this day in the Cape Colony. From Capetown to Kimberley direct by rail is 647 miles; yet Kimberley merchants prefer to have goods from Capetown sent by sea to Port Elizabeth (450 miles) and thence by rail to Kimberley (484 miles), a total of 934 miles against 647. Even the sixty odd miles difference between the routes to Johannesburg from Port Elizabeth and from East London gives a most decided advantage to the latter port.

From a diplomatic and strategical point of view, the proposed trans-continental line presents most formidable difficulties and disadvantages. The northern terminus of the line in Egypt can never be regarded as safely defensible, having regard to complications that may any day occur through the action of France or Russia, or both. The line itself would be, in fact, a source of weakness to the Empire, requiring the protection of a naval and military force which might well be wanted elsewhere. Beyond this there would always be the possibility of German interruption in the centre of Africa. Some day or other the hold which Great Britain has on the Mediterranean will undergo diminution, and that diminution will come about all the sooner if Great Britain follows the absorptive policy indicated by the proposal for an African trans-continental railway. As for the reports of coal mines on the Zambesi, if they are there they might doubtless be useful for supplying coal to steamers on the Zambesi. But does any reasonable person really suppose that such coal could ever be economically available for export, or that, in respect of South African consumption, it could for an instant compete with known coal mines in the Transvaal and Natal?

In the face of all these facts, a question might well be asked as to the reason for pressing such a proposal on the attention of the nation. The object would seem to be to give to the adventure of an unsuccessful and semi-bankrupt joint-stock company the dignity of a vast and important national enterprise. The Chartered Company evidently desires—this is plain from Mr. Rhodes's speech at the Cannon-street meeting—to be bought out on as advantageous terms as possible; and, with the present balance of parties in the House of Commons, this object can best be secured by extolling and magnifying the greatness and the Imperial importance of the company's achievements and of the gentleman who, as the *Daily News* took care to impress upon us the other day, "*is* the Company." It all comes to this, then—that grave national responsibilities are to be undertaken, national expenditure incurred, national risks encountered, for the sole benefit of Mr. Rhodes, whose previous performances have violated international law, compromised the reputation and honour of the country, and stirred up, in a not unimportant province of the British Empire, enmities and irritations which it will require years to get rid of.

F. Reginald Statham.

Economic and Financial Notes and Correspondence.

The French Elections.

The final opinion about these cannot yet be given, as a large number of second ballots must take place on Sunday week. So far, however, as they have gone returns indicate a serious check to the Méline administration. We cannot call it a defeat just yet, but it is in some respects worse than that, because M. Méline and his Cabinet will have in the new Chamber an uncertain and much weakened majority—no majority at all, in fact, unless the "rallied" Monarchists and Bonapartists habitually vote with M. Méline's avowed supporters. The Radical Republicans and Socialists have increased their numbers at the expense of the Moderate and Progressive Republicans, and what the new Chamber promises to show us is an accentuation of that chaos of parties which made the last Chamber such a futile one. Out of the electoral contest, in short, no party has arisen strong enough to lay hold of power and to carry out a definite programme, be it socialist, monarchical, or honestly republican. Hence what we must expect is a period of wrangling and weakness, where ministries will come and go, combinations form and dissolve, with even greater rapidity than we have been accustomed to see them do in France. Needless to say, weakness, legislative impotence, absence of definiteness of policy in any direction, may prove most disastrous for France. What she requires at the present is a strong and enlightened Government, emancipated from parochial conceptions of statecraft, and delivered from servitude to class interests and factions—a Government able to take the direction of the country's affairs in a bold manner, and capable of lifting them out of the rut where they now crawl. There is no hope of any such arising out of the class of men returned to the new Chamber, and what we should dread is that the civil powers will grow weaker and weaker in the near future, until a dangerous militarism arises to seize power on the pretext of putting down social disorder.

Greek Finance.

Now that the guaranteed Greek loan has been launched in London, Paris, and St. Petersburg, Greek finance will possess fresh interest to investors. The report of Major Law, who has been appointed British delegate to the new Commission of Control, will therefore be read with interest. It has just been issued as a Parliamentary paper, and forms a very careful study of Greek resources. The sum of it is that from now down to 1901, deficits may be looked for under the new arrangement, that for the current year being 10,929,186 drachmi. In 1901 the tide turns, and a slight surplus is estimated to accrue, rising in the succeeding year to 3,647,818 drachmi. This, however, falls to 2,360,120 in 1903, owing to the increase in the amount required to meet the charges undertaken by the Commission of Control. The ordinary expenditure of Greece has to be kept down under 65,000,000 drachmi, except in the current year, when, for various reasons, it will amount to 65,501,326 drachmi. Debt charges will amount on the old loans to 14,218,750 drachmi, the exchange being taken at 1·60 drachmi per franc. This is exclusive, apparently, of 1,440,000 drachmi per annum required by the 1833 loan, which is also guaranteed by France, England, and Russia; and in 1903 the total will rise for the old gold debt to 1,462,530 drachmi as a result of the increase in the sinking fund from 1 per cent. to 2 per cent. Any recovery in the rate of exchange, raising the value of the Greek coin, will take effect in an increase of the amount devoted to debt redemption. From 1900 onwards a minimum annual sum of 2,000,000 drachmi will be devoted to the withdrawal of the forced currency. The accumulated deficit of this and the next two years, amounting to over 17,000,000 drachmi, will be covered by appropriations from the new loan, £800,000 of which is held in reserve for this purpose. There has been no Budget for

the past year owing to the war, and 1898, therefore, embraces really twenty-two months, so that the large deficit on that period is not likely to cause serious inconvenience to the Treasury until the beginning of next year, when some money from the guaranteed loan will be employed in filling the gap. By 1903 it is expected that there will be a surplus of about 5,000,000 drachmi even after providing for the supplementary charges, for which the International Commission undertakes no direct responsibilities. The gross revenue for the current year is estimated at 85,556,500 drachmi, and it is calculated that by 1903 the total will have risen to 100,266,500 drachmi. We have no doubt whatever that Greek finance will improve under the new *régime*, and shall be disappointed if the results are not better than this forecast. Of course, much will depend on the recovery of Thessaly from the effects of the late war and the Turkish occupation. But it is a fertile country and possesses an industrious people; and if the farmers are not taxed too severely or robbed, and they certainly will not be robbed under the rule of the Commission, the future promises well.

The Standard Oil Company.

Mr. George Rice, of the Ohio Standard Oil Company, has sent us several publications dealing with the *néfaste* aspect of American commerce presented by the history of this company and the Standard Oil Trust. We dealt fully with the subject in an article last year, founded upon Mr. Demarest Lloyd's book "Wealth and Commonwealth," and need only now mention the fact that Mr. Rice was therein cited as one of the most courageous, indomitable, and unwearied opponents of the abominable combination between railway officials and the Oil Trust group to crush out all opposition and to fill their own pockets. Those interested in this question will find some very valuable documents quoted in the principal pamphlet before us, and at the end of that pamphlet there is a statement showing that the Standard Oil Company in the twenty-five years of its existence has made profits to the extent of $1,000,000,000. Supposing this true, how much did the presidents, vice-presidents, directors, and other officials of the railways in league with this company absorb as theft pure and simple in the same time? Was it another $1,000,000,000, or twice as much? Some enormous amount it certainly was, and a few months ago, Mr. Lloyd wrote to us from Chicago to point out that if English bondholders who have been defrauded by this league were to combine, and bring actions for restitution against these thieves, some of whom rank as amongst the most honoured, as they are the most wealthy, of American citizens, large sums of money might be disgorged. We did not publish that suggestion at the time, because we did not believe a combination of the kind possible, nor that American law courts could be trusted to render speedy judgment in favour of the defrauded railway proprietors in this country or in America. But if the money is there, and if it is recoverable from these men, or their heirs, let the American stock and bond holders themselves commence the fight. People here might then be encouraged to join. Meanwhile, all we can do is to note the fact that this system of robbery and extortion continues to the present hour, that no law, not even the Inter-State Commerce Law, has proved effective to break it down. There are, to-day, railroad presidents in the United States in receipt of large revenues drawn out of the rebates given to the Standard Oil Trust and denied to its rivals. "Exclusive dealing," in short, and fraudulent combination between traders and carriers are as rife to-day in the American Union as ever. Consequently, we have no faith in the lower grades of securities issued by any American railroad. They may seem to afford substantial guarantee of solvency one year and the next prove bankrupt. Only the very best class of bonds are things to be permanently invested in.

The Gas Light and Coke Company.

An elaborate reply has been issued by the board of this company to the strictures made upon its policy by Mr. George Livesey, of the South Metropolitan Company, at the recent half-yearly meeting of shareholders. To a considerable extent it is an effective reply, because Mr. Livesey has so many inconsistencies, and has advocated such a variety of views at different periods in his long career that he affords easy game. When the discussion, however, is brought to the point we do not think that it can be very encouraging to Gas Light and Coke stockholders. There is in the directors' reply a sort of undercurrent of admission that things are not going well with the company, and the inference we should draw is, that dividends must decrease rather than increase in the near future. There is no getting over the fact that the company has had to raise the price of gas, after depleting large reserves accumulated out of past profits in a manner which, as we have already pointed out, can hardly be looked upon as fair to the consumer. To raise the price of gas at the very time when electric light competition is, by the directors' own admission, depriving them of a large amount of business, is to decidedly weaken the company's power of effective competition. Nor is there any getting over the further fact that the company is overloaded with capital. We are quite willing to admit that Mr. Livesey does not seem to have been fair in his handling of the capital account. It remains true, none the less, that the expenditure upon new appliances to meet the extension of business has of late years been very heavy, and that the company has now upon it a load of capital amounting to something like £12,000,000, the market value of which is about double this sum. There is no danger, of course, that the company will fall within any measurable period of time into such a position as the London Docks, for instance, now occupy; but there does seem to be a danger that its affairs will slip from bad to worse unless most energetic measures are taken to arrest the decay, and an advance in the price of gas at the present time is decidedly not amongst these measures. Stockholders should come together and appoint a competent committee to look into their affairs while there is yet time.

The "Brotherton Group" of Frauds.

It seems to us that the Registrar in Bankruptcy could have come to no other decision than he did in refusing to allow Mr. J. D. Linton and Mr. A. C. L. Fuller their expenses in connection with the inquiry now adjourned. Both these gentlemen were probably innocent of any thought of fraud, but they allowed men intent upon committing fraud, and very gross fraud too, to use them as their tools. That being the case, they cannot complain if now made to suffer pecuniary loss. One consolation should at least be theirs. The fate they now suffer makes them a warning to similarly endowed gentlemen to avoid the toils of the company promoter. Nothing looks easier than to carry on the occupation of a director. It is nice to seem to handle large sums of capital, to execute "contracts," to declare "dividends," and all that sort of thing, but danger lurks beneath the surface often, and the simple-minded man, who is as innocent of a knowledge of business often as of the Chinese language, comes into the City some morning to discover that knaves have used his name to cloak their stealing. A good many more lessons of the kind now taught to these two gentlemen will, we fear, be required before the class from which they come learns effectually the meaning of the monkey, cat, and chestnuts fable. Why has no warrant been applied for and issued against Messrs. Brotherton and Van Ee?

The City of London Electric Lighting Company and Its Calls.

Dilatory individuals who will not pay their calls must often be a burden to a company secretary, but, at the same time, such official ought to be slow to threaten punitive measures. The secretary of the City of London Electric Lighting Company, however, has been insisting upon the payment of an extravagant penalty for the lapse of memory of certain of his shareholders.

Last November this company issued 10,000 ordinary £10 shares, at a premium of £8 per share, a considerable proportion of which was paid up on allotment, and the first "call" for the balance fell due in March. The usual custom in such cases is to issue a notice of "call" to those who hold the provisional certificates, although such certificates bear upon them the date of said call. Apparently, this was not done in this case, and the first reminder an unfortunate shareholder who had forgotten to pay up received from the company was the following letter :—

City of London Electric Lighting Company,
May 3, 1898.

Issue of 10,000 Ordinary Shares (November, 1897).

Dear Sir,—I notice that, according to the returns of our bankers, you have not paid the instalment of £6 per share due on the 30th ultimo on your holding of four shares of the above issue. I have to request that the instalment be paid forthwith, together with interest at the rate of 10 per cent. per annum thereon, calculated from the 30th ultimo up to the date of actual payment by you. This payment of interest is necessary as the dividend commenced to accrue on the instalment as from the 30th ultimo, and, as you will remember, the rate of dividend paid last year on the ordinary shares of the company was at the rate of 10 per cent. per annum.—Yours faithfully, (Signed) J. Cecil Bull,
Manager and Secretary.

For a gentleman who professes to be so exact as Mr. Bull, it is remarkable that two important errors should appear in the above letter. The first is that the 30th ultimo would mean April 30, and interest would therefore accrue for only three days. That, however, is a mere clerical blunder, for March 30 was evidently meant. The assumption that the shareholder will receive 10 per cent. upon his money is, however, radically wrong, for as the £10 shares were issued at £8 premium, the yield of a 10 per cent. dividend upon such a payment would only be a little over 5½ per cent. The shareholder, therefore, will presumably receive this yield upon his money, and why should he be asked to pay 10 per cent. upon his call?

As a matter of fact, the laggard shareholder at once tendered the amount called and interest at 5 per cent. on the amount for thirty-five days, but his cheque was rejected, and two days' further interest demanded at the exorbitant rate of 10 per cent. Such cavalier treatment savours of thoughtless insolence, and is, at least, unnecessarily irritating to shareholders who are prone to look upon the secretary as a servant of their company, not its master. Mere courtesy demanded that some premonitory warning should have, in this instance, been issued as to the danger of neglecting a "call," and without having done this, to ask for 10 per cent. interest upon a share that will presumably yield under 6 per cent. is neither politic nor fair.

The Brinsmead Swindle.

On Saturday last, at the Old Bailey, Mr. Justice Phillimore dealt out to those who were responsible for this gross fraud well-deserved punishment, varying from five years' penal servitude to six months' hard labour. A sum of no less than £40,000 had been obtained from the public by the accused. Early in 1896 the business of Thomas Edward Brinsmead & Sons had been turned into a company with a capital of £8,000, but after the existence of about a month was wound up voluntarily. The affairs then came into the hands of the present gentlemen, who arranged to bring out a company with a capital of £100,000. £5 was to be the magnificent remuneration of the vendor, who was a clerk of no means whatever, but who signed the necessary documents. He was to allow the new company to acquire his valuable rights for £76,650, which as a matter of fact was to go straight into the pockets of the Consolidated Contracts Corporation, alias Messrs. Ainsworth & Bernard, the promoters. As we have stated above, the public were only fleeced of some £40,000. This worthy vendor, by the way, had guaranteed 8 per cent. to investors in the concern for several years. Another clerk was the purchaser on behalf of the company, and received the like remuneration of £5. We entirely endorse the remarks of the learned judge that this was a fraud of the most gross and monstrous kind. That the public should be ready to subscribe to such concerns as these is wonderful in the extreme, but we are afraid that as long as gullible persons are to be found ready to advance money on such flimsy pretexts, so long will frauds of this kind be committed.

Idle Fads and Foolish Faddists.

The wheat boom has set all sorts of Protectionist hobbyists to work; but especially has it given energy to the good but unreflecting people who try to work on public anxiety by picturing the starving condition of England in case of her being at war, unless we at once set up national granaries for the storage of wheat. These gentlemen have themselves chosen a committee, sent witnesses before it to be examined, and now they have published the report of these unbiassed investigators. Of course they are, with a marvellous unanimity, in favour of these national granaries. They think we ought to have at least 8,000,000 quarters of wheat stored up, and strictly preserved for use in war time. If there were any difficulty about its keeping, portions could be sold off and the stock renewed, say, every three years. In other words, the State would become a huge dealer in grain, and a constant source of disturbance in markets, with a perpetual tendency to increase the price to ordinary consumers. But this, of course, is the real object of this movement. It would be as pleasant to the faddists as a duty on imports. Then, what about the expense? We already pay some seventy millions a year in "war insurance" on our army and navy. But if we set up these granaries, the initial cost would be at least £20,000,000, with a steady and not easily calculable yearly drain thereafter. And there would be endless appeals to sell the stored grain at a cheap rate, or to appropriate it for nothing in case of distress arising anywhere in the country. In short, it would be an infallible measure for keeping up the price of wheat at a cost to the taxpayers of perhaps two or three millions a year, with a tolerable certainty that the stores would be depleted, or out of condition, when war broke out. If we cannot depend on our navy to guard our grain ships in war, what is the use of it?

The Telephone Inquiry.

We are not surprised that Sir James Fergusson withdrew his name from the list of the House of Commons Committee to inquire into the administration of the National Telephone Company as soon as he saw it. What does surprise us is that he, a director of the company, should have allowed his name to appear on the list at all. His excuse is that he was urged to do so by several members of the Government. It would be interesting to know who these Ministers were, and what their reasons could be for making so extraordinary a suggestion. The inquiry has been ordered by the Government itself. It is to be held because of the bad service rendered to the public by the company and because of their obstinate refusal to permit of any improvement in that service. The suggestion that Sir James Fergusson should occupy a seat on the committee was thus a suggestion that he should "inquire and report" to the House of Commons upon his own conduct. What were the motives which prompted those particular Ministers to press Sir James to occupy such an anomalous position even against his own inclination? If the Government generally approved of the nomination, it suggests grave suspicion about the whole inquiry.

This Telephone Company, which probably has not a single friend among the commercial men who are perforce its main support, seems to have an inexplicable fascination for politicians and ex-Ministers, as well apparently as actual Ministers. Sir Henry Fowler's election as a director of it was announced about the same time as the Committee of Inquiry was being nominated. Did Sir Henry take office in the interests of the public or of the company? We all know that he is an honourable man, and that he most scrupulously avoids recording his vote in a matter affecting any concern with which he is connected. That is as it

ought to be so far as it goes; but is it a judicious step on the part of one of the "great, wise, and eminent" occupants of the Front Opposition Bench to join the directorate of a company whose administration of its affairs has been so unsatisfactory that strongly expressed public opinion has forced the Government and the House of Commons to institute an investigation into its ways? Is Sir Henry Fowler hopeful of improving the administration or of organising a better telephone service for the public? If so, we can only applaud his courage and pray for his success. But a more prudent man and eminent politician would have deferred acceptance of such a directorship until he had seen what might come of the Parliamentary inquiry.

Great Northern Telegraph Company.

In dealing with the preliminary figures of the year's working of this company, we noted that the sum received for interest had fallen markedly. A study of the full report discloses that this falling off was a mere matter of account, the board having preferred to carry the interest on investments belonging to the reserve and renewal fund directly to that fund, instead of bringing it into the revenue account. This policy is decidedly the better one, and ought to be pursued by all companies with a large invested reserve. It is stated that in the course of a twelvemonth the whole debt of the company will be extinguished, but it is not clear how this will be effected. The revenue of the company has kept up well, in spite of the reduced rates that followed the decisions of the Buda Pesth Conference; but, of course, events in China have helped the cable traffic. The company advocates strongly a cable being laid to Iceland, for which it has obtained an annual subvention of £5,000 per annum for twenty years from Denmark, but this is not sufficient, and the company has approached the Governments of Great Britain, France, and Russia, with a view to obtaining a veiled subvention from each in the shape of a fixed yearly payment for the transmission of meteorological telegrams. The proposal is ingenious, but a high price cannot be paid for such information.

Lagunas Nitrates.

After a lapse of some months we have the judgment in the action brought by the Lagunas Nitrate Company against the Lagunas Syndicate and the executors of the late Colonel North and Maurice Jewell, which to all intents and purposes amounts to a defeat of the plaintiffs. True that Mr. Justice Romer has held that the company is entitled to such damages as they have suffered by the maquina not being ready between June and December, 1894, and by the defects in the water supply up to that time, but that will prove poor consolation to the company, who will have to bear the general costs of the action, which, if rumour speaks correctly, amount to some £30,000.

The action was brought by the company for rescission of the contract of purchase from the syndicate on the ground of misrepresentation in the prospectus, and for damages for breach of contract. Fraud, however, was not alleged against any of the defendants, but it was alleged that they had not shown good faith. The distinction seems to us a very fine one. What in fact the plaintiffs said was, "You have not acted in good faith, and we don't charge bad faith." The present judgment entirely exonerates the defendants from any imputation of want of good faith, and the learned judge has found that they at the time believed, and had reasonable grounds for believing, that the company was acquiring the property at a reasonable price. He has further found that although on June 30, 1894, the property did not in every respect answer to the statements in the prospectus, yet all the defects were remedied by December in that year, and at that time the company had such a property as they bargained for. Any loss that the company may have suffered during that time the defendants are to make good.

Such is the result of the action, which lasted for sixteen days, and it will not be amiss to refer shortly to the circumstances out of which it arose. Colonel North had, prior to 1889, purchased some 4,000 acres in Chili, and in that year sold it to the syndicate for £700 in cash and £109,300 in shares. In 1894 the plaintiff company was formed, and a contract was entered into with the syndicate for purchase at the price of £850,000, which contract it was now sought to set aside. This purchase price was to be paid £300,000 in cash and the balance in shares, which consideration was actually handed over, but it should be mentioned that the vendor syndicate had expended some £360,000 in cash on the property. These facts clearly show how the actual value of speculative properties such as these can rise and fall; but the company having discovered that nitrates are by no means such trumps as they expected, have sought to go back on their arrangement of 1894. It should be further added that the company have continued to work the nitrate right down to the present time, notwithstanding the disputes, and that, too, not only when the syndicate directors were the company directors, but even since they obtained an independent board, and this has been on a commercial scale for the dividend purposes of the company, and not merely to keep the factory open as a going concern. This was amply borne out by the fact that in April, 1897, the directors declared an interim dividend of 4 per cent., the payment of which was only stayed on the suggestion that it might prejudice the action. This being so, without a doubt we think that Mr. Justice Romer came to a right conclusion. The company have certainly, as facts have turned out, not got a good bargain, but in speculations of a kind such as this those who enter on them must expect to take some risk.

The Pardy Group of Mines.

"A Mining Prospector" in Massi Kessi, South-East Africa, writes to us, under date March 31, to make some statements in regard to these properties which we think it well to lay before shareholders and the public. He deems it remarkable that before passing the amalgamation scheme the shareholders did not send a trustworthy expert to give them a true report upon the properties and upon the work done, to see whether the things bought were really worth the money given or to be given for them. Further, he challenges Mr. Pardy's statement that the Guy Faux reef had been traced through the properties on the range. This, he says, is a mistake, although it is true that drives have been put in in most of the properties, some very nearly through the boundary, and others from three to six hundred feet in length. The reef, however, he asserts has not been cut in any one of them. What they have got of this reef in the Guy Faux property itself is very good, but how far the reef extends to the other properties is a point not yet proved, and its presence in them seems to be doubted on the spot. There are good reefs in that locality, the writer goes on to say, and three have been cut, carrying payable gold three miles north-west of the Guy Faux mine, but these are not yet proved to be in what he calls "Pardy's Ground." The writer also questions the statements made at the shareholders' meeting by the chairman in regard to future expectations, now that the new battery has been erected. The mine, he alleges, has been badly worked and cut about to try to get rich stone, and he doubts whether sufficient of such stone can be found to supply the new battery, at any rate under the present condition of the mine. He further questions the estimate put forward as to the value of the tailings, and does not think Mr. Pardy justified in putting it at £20,000. These are the principal points in this letter, and they deserve to be considered.

An Amende to the Indian Frontier Army.

On February 4 last, a stinging paragraph appeared among our notes attacking the humanity of British

officers in India, and roundly asserting that they had let the troops fire on women and children in bed at night. The charge was founded on a telegram to the *Times*, published some weeks before, describing how a village had been fired on at night after its inhabitants had come back from the hills. It made no mention of "women and children." We put these there in our ignorance of the frontier people and their habits of life. Naturally, the accusation of cruelty such as this caused indignation, and brought forth evidence that we were wrong. Some of this evidence we now lay before our readers in extracts from a letter from the front written by an officer in command of one of the regiments. It is a very interesting letter, and throws much light on the spirit animating the men who do the fighting. In printing it, we have to apologise and express regret that we should have cast so ugly an imputation upon a service whose traditions have ever been honourable and humane—so far as the business of making war can be humane. Readers may be assured that had we not believed our army to be degenerating and growing savage in these hateful frontier scrimmages, we never should have written as we did. This officer, writing as follows, takes occasion, in rebuking us, to give a most interesting outline of the nature of these frontier operations :—

The case of the Investors' Review is an instance of one of the defects of the telegraph as a channel for information. In the first place, there were no women or children anywhere near the Khyber at the time the paragraph you quote was printed. All true frontier tribes remove their women, children, cattle, and property to some place of safety before troops can arrive, and as they have sentries on the tops of their hills always watching our movements, and a system of beacon signals at night, they are rarely, if ever, surprised. There have been instances (not in this compaign) of our surprising villages when we suddenly crossed the border to punish raids—but in these cases the villagers, if they refuse to surrender, are given time to remove their women and children before the village is fired at. The Afridis of the Khyber had removed their women and children into Afghan territory, to Ningrahar and Jellalabad, long before our troops appeared on the scene, and only three or four weeks ago the Zakka-Khels petitioned that they might be allowed to bring back their families to the Khyber, as they were suffering from the cold and damp of the low-lying ground about Jellalabad. Permission was given, although the Zakkas had not complied with our terms.

No soldiers or camp followers are allowed near Afridi villages where there are women, and this order is very strictly enforced.

An Afridi village is not what Europeans picture to themselves, a collection of smiling cottages, each with its little garden. It is a collection of ten or twelve mud houses, windowless and chimneyless. The backs of the houses form a continuous wall, some 12 ft. or 15ft. high, and in a corner of the centre is a very strongly built tower, some 30 ft. or 40 ft. high, crenellated, and with machicoulis, embrasures, &c.

The entrance to these towers is a small door 15 ft. from the ground, and you ascend by a small ladder, which is drawn up and the door closed. In large villages every fifteen houses have their tower, because not only are there constant feuds between villages, but between sections of villages, and men are constantly besieged in their towers for weeks together. Provisions are drawn up by a rope, and if a head shows itself it is immediately potted at from the hostile tower. After a time, both sides call a truce for a certain period.

Not many lives are lost in this game as a rule, but now the Afridis have got such good rifles, either they will wipe themselves out or they will get sick of the reign of disorder, and invite the Government to take their country.

The game the Afridis played in the Khyber was similar to that they played in Tirah Maidan, where the camp was surrounded by these little hamlets. The young bloods come down at night, and with their Sniders, Lee-Metfords, and Martinis, shoot into the camp from the towers. Until all these towers were destroyed there was no peace or safety in camp.

No one who has not experienced it himself can realise guerilla warfare in a country like this.

The hillmen in their sandals get about their hills like goats, and from behind good cover shoot into the mass of troops and baggage which have to move along the beds of the ravines. To crown the heights with troops moving parallel to the column is impossible, as the hills are too broken and precipitous. You must send small parties to occupy points on each side while the baggage column passes through. As these parties descend the precipitous hills to join the rear guard, they are followed up by the agile enemy. Ghurkas and frontier troops are best at this work, in which they have practice.

Britishers are helpless bullocks on such hills as these. As for the miserable wives of the hillmen whom Mr. Wilson speaks of—may he never fall into their hands: where mutilations occur, the men are generally incited to it by women.

Yet another officer of still higher rank comes down on us and raises a point which was implied perhaps, but certainly not brought directly forward in our unhappy paragraph. His defence of war is vigorous, and it would be our own, if wars must come: the more ruthless and cruel they are, as war, the sooner will they end. But the sternness and cruelty should be in the open fighting, between army and army, not by armed men on the defenceless and weaponless. We do not agree with this writer as to the origin of the recent trans-frontier troubles, but that is not now the question. The question is, did the Army and its leaders pass beyond the bounds of fair warfare in dealing with the hillmen the Civil Government of India had sent them to "punish." On the testimony before us we must frankly admit that so far as women and children went, it did not, and these extracts satisfy us that, given the nature of the war to be waged, the cruelty exhibited towards non-combatants was probably in most cases unavoidable. But let the reader clearly understand that if this exonerates the officers and men in the campaign, as we gladly admit it does, it is in no sense a justification of the Afridi War. The guilt of that, however, lies elsewhere. This second officer says :—

I assume the telegraphic information given as the basis of the comments to be accurate, and I justify it. We are at war with the tribes; it was provoked by them, not by us; the terms which we have declared we will impose are essentially moderate; they are not cruel. The tribes must be brought to submit to them; the sterner the pressure the shorter the agony, and in the end less cruel. . . . If they take refuge in inaccessible hills and snipe our troops and raid our convoys, the only pressure we can bring upon them is by denying them the use of their houses and farms in the cultivated valleys till they submit; . . . but to say that we ought to let them occupy their villages because it is cruel to shell them is about as reasonable as to say that we ought to shoot with blank cartridge from pity at the ghastly wounds our dum-dum bullets cause in the enemy.

War is cruel, and we ought to impose the minimum of cruelty necessary to secure its ends. Mr. Wilson's false assumption is that to deny the use of the lower villages to the tribesmen and their wives and children is not a necessary means of bringing the requisite pressure on the tribes. No one doubts the cruelty of the means any more than one doubts the cruelty of the wounds caused by our shells and bullets.

To justify Mr. Wilson it is necessary to prove, not only the cruelty, but the uselessness of the measure from a military point of view. This he does not attempt to do.

The Fight for the Central Pacific.

We hope shareholders who have not yet done so will lose no time in joining this committee, and in helping it to rescue the property :—

To the Editor.

Sir,—I am instructed to inform you that the Right Hon. Sir William Marriott has joined the Central Pacific Shareholders' Protection Committee.—Yours faithfully,

W. C. Gunner, Secretary.

124, Chancery-lane, Room No. 12,
May 12, 1898.

Drucker *v.* Hooley.

We must say that we entirely agree with the verdict in this case. The charges made against Mr. Hooley, which in substance and fact amounted to fraud, were unsupported by a tittle of evidence. Doubtless, Mr. Hooley got the best of the bargain with Drucker, but it seems absurd that when, in a business transaction, one person gets the better of another, the one who has the worst of the deal shonld turn round and impute all kinds of *mala fides* to the other without evidence to support the imputation. Both these gentlemen are not unknown in the world of finance. Mr. Drucker admitted he was not a novice, and that he wanted to get rid of these shares. Mr. Hooley simply made the best bargain he could. That was the view of the jury, and we suppose that is the view of all sensible men.

The United Railways of Havana.

We are not responsible for the wording of the notice referred to in the following letter. It did not reach us as an advertisement, but as one of those notices which come to us in shoals through advertising agents for gratuitous insertion. Some effort is made to weed or condense them, but they are not otherwise interfered

with, if printed at all. None the less do we regret it, should this particular notice have misled anybody :—

To the Editor.

Dear Sir,—I beg to draw your attention to an advertisement appearing among the notices on page 664 of the last issue of your Review, in which 1890 bondholders of the United Railways of Havana are informed that they should forthwith send in their bonds for exchange into irredeemable debenture stock. You are probably acquainted with the circumstances of the late issue of irredeemable debenture stock, and the option given to 1890 bondholders to come into the scheme; and you will probably agree with me in thinking that this advertisement is designed, and I am afraid intentionally designed, to create the impression that the conversion is now obligatory. A word of warning from you would prevent the bondholders from being misled. There appears to me to be something very wrong in the form of the present advertisement.—Yours, &c., E. S. C.

The West African Trouble.

It was just as well that Mr. Davitt orced on a discussion in the House of Commons on the West African trouble. It has relieved the tension and anxiety felt in this country at the prospect of another "little war" in a quarter of doubtful national value, though of undoubtedly pestilential climate. All accounts agreed in describing the situation as serious, and the crisis as critical. Mr. Chamberlain thinks the newspaper reports exaggerated. We hope so. But the most assuring statement he made was that the rainy season, which has almost arrived, will render a fighting campaign impossible for the next four months. This will give time for reflection; and as a special commissioner is to be sent to the disaffected districts to investigate the matters in dispute, it is probable that no future campaign will be required. The special commissioner, not having a personal interest in enforcing the hut tax, may be able to discover a different way of raising the necessary revenue without hurting the *amour-propre* of the Governor, who seemed to consider that the prestige of Great Britain was bound up in enforcing this hut tax of his—at least until a sufficient number of the natives had been killed to coerce the living remainder into submission.

The World's Output of Coal.

It is a pity that the interesting figures just issued by the Board of Trade in reference to the world's coal supply only come down to 1896; but there seem official difficulties in the way, and we must be content with what we can get. One of the first things that strikes us in perusing these pages is that, though Great Britain still heads the list by a long way, both as producer and exporter, the United States is advancing upon her with accelerated strides, and must by and bye take the lead in her turn. The production in Great Britain increased from 164 million tons in 1883 to 195 millions in 1896, or an increase of about thirty million tons. The United States, however, advanced from 103 millions in 1883 to 171 millions in 1896, which is an increase of about sixty-eight millions. The German output increased from fifty-six to eighty-six millions, or about the same increment as in Great Britain. France, however, only rose from twenty-one to twenty-nine millions, and Belgium from eighteen to twenty-one millions. Although much the heaviest consumer of her coal per head, England, as compared with other countries, seems an almost reckless exporter, as if she were hurrying to get to the end of her reserve of coal. In 1896, for example, she exported forty-five million tons, while Germany limps slowly after with a modest six millions, Belgium being next with four millions, while the United States —like a giant reserving his strength—sends abroad a trifling two and a half millions, precisely the same amount as New South Wales, and half a million more than Japan, whose total production in 1895 was 4,849,000 tons. It should be noted, however, that Canada imports from the United States about half the quantity of coals she consumes. Her own output is now 3,750,000 tons a year, not quite up to New South Wales, which stands at the top of our colonial production with four million tons. But though the amount is yet small, the coal output in the colonies of Victoria, Queensland, and Tasmania is slowly increasing. Even in the Cape and Natal it is steadily advancing, while in India and Canada it has about trebled since 1883. So the bases of the world's coal supply are extending. Every country where the mineral can be found is beginning to bring up at least enough to satisfy its local wants. As Japan's own demand is yet comparatively small, it has entered upon exportation with characteristic energy. Italy is the heaviest importer, taking 90 per cent. of her supply from the United Kingdom; Sweden takes 87 per cent.; Spain 48 per cent.; and Russia, 15.

Lord Salisbury at the Country Bankers' Dinner.

He did not raise their spirits on Wednesday night; on the contrary, his utterances were decidedly more gloom-producing than those in the Primrose speech, and seemed to point to a belief on his part that the business of expanding the Empire was in danger of being carried too far. The nation, he said, might be in danger of suffering as bankers suffer when they trade beyond their capital. It is a pity the speech was not reported in full: it would have been such a nice cold douche to the Jingoes, and might have helped to check the wild spirit of aggrandisement, at all or any cost, now so fashionable. As it is, bankers, after hearing what his Lordship said, are less disposed than ever to lend money cheap.

Critical Index to New Investments.

LONDON COUNTY BILLS.

Tenders will be received at the Bank of England on Tuesday next for London County bills to the amount of £500,000. They will be dated May 21, and will be payable at six months after date. Payment in full must be made by the 21st inst. This is not a favourable time for the Council to have to borrow, and the discount may be a little higher than usual.

GREEK GUARANTEED 2½ PER CENT. GOLD LOAN OF 1898.

The total amount is £6,800,000, of which £5,004,900 was offered in third parts in London, Paris, and St. Petersburg. Price of issue 100½, 20 per cent. on application, similar instalments on May 24, June 8, and July 5, and 20½ per cent. on August 5. A coupon for six months' interest is payable October 1 next, and a discount of 1½ per cent. per annum is allowed on payments in advance, so that the net price would work out but a shade over par. Scrip issued in any of the three countries may be exchanged for bonds in that, or in either of the other countries, which should facilitate early dealings. The bonds, both principal and interest, will be payable in gold, free of all taxation by the Hellenic Government, and coupons will be payable April 1 and October 1 in pounds sterling, at 25 francs per £, or at roubles 9·375 per £. The loan is guaranteed by the Governments of France, Great Britain, and Russia, and, according to the terms of the convention, the Bank of England and the Russian Banks agreed to take in equal shares £3,333,333 6s 8d., and they undertook that the same should be subscribed at the price fixed. The Banks of England and Russia and the French banks get a commission of ½ per cent. on the amounts received for their guarantee and services, and an annual commission of ½ per cent. on the coupons and drawn bonds paid by them. The amortisation of the loan will be effected by the International Commission of Control, either by drawings at par, commencing in January, 1903, or, if the price is below par, by purchases. These are the essential particulars. From the public point of view the loan has little attraction; it is dear, but it is a trustee investment and should be good for the post-office. Owing to high exchanges and to the prices fixed in the various capitals, it was more profitable to subscribe in Paris and St. Petersburg than in London, and the London portion of the loan was not taken by the general investor, although well covered. Subscriptions were sent to Paris and St. Petersburg because, as Mr. Gibson Bowles stated in his question to Sir M. Hicks Beach on Tuesday, there was a saving in the price of 1½ per cent. in Paris and of 1¾ per cent. in St. Petersburg by doing so. In the end the loan will probably all come to London, as neither France nor Russia can afford to lend at 2½ per cent.

FINE COTTON SPINNERS AND DOUBLERS' ASSOCIATION, LIMITED.

This combination, of which Sir W. H. Houldsworth, Bart., is chairman, is formed to amalgamate thirty-one firms and companies, the factories and mills acquired being upwards of sixty in number. No endeavour to create a monopoly is contemplated, it is said, but the centralisation is expected to lead to considerable economy. Share capital, £2,000,000 in ordinary and £2,000,000 in 5 per cent. cumulative preference shares of £1 each, with first mortgage 4 per cent. debenture stock to the amount of £2,000,000, redeemable after September, 1918, at par, or before then at 10 premium on six months' notice. Two-thirds of each class of capital is issued at par, and of this one-third, with £2,794,250 in cash, goes to make up the purchase price of £4,127,584, of which £774,779 is for stocks and the remainder for the properties. No valuations are supplied, the basis upon which the undertakings have been united being that of profit-earning capacity, computed on a three years' average. Even on the best showing of the accountants, the profits for the last three years, which give an average of £234,337, would only leave 8½ per cent. for the ordinary shares now issued. We are not much impressed with the prospects. The vendors take 66 per cent. of the purchase money in cash, and the absence of valuations is not fair to the public. But the capital has been subscribed, for there are some excellent businesses in the bunch, and with economy the thing may pay.

LEE-METFORD SMALL ARMS AND AMMUNITION COMPANY, LIMITED.

To arms! to arms! ye brave. Hurry up, for Mr. E. T. Hooley has something to sell—fifty-seven patent rights and applications for patents for various rifles, &c. The Lee-Metford patents have from four to five years to run, and those covering the rifles of the new types have on an average a life of from ten to twelve years. The capital is £350,000 in £1 shares—all offered for subscription it will be noticed—and there is an issue of £50,000 4½ per cent. debentures, redeemable after ten years at 110. Mr. Hooley acts as middleman between the Lee Arms Company of America, and the British Magazine Rifle Company, Limited, on the one part, and the present company on the other, and sells the patent rights to the latter for £250,000. The new company also buys from Mr. Hooley works in Birmingham and machinery therein. These were recently purchased for £45,000 in cash, and now the company gives £50,000 for them, payable in the debentures now issued. Very short life the principal patents, did you say? May soon be replaced by a new invention. Quite so; that is why the public are to buy them at this high figure. I don't see any statement about valuations or profits made in the past. My dear sir, you seem to forget this is a Hooley prospectus. Confidence, confidence, sir; if you have not that you are useless for such promotions. But did not Mr. Loraine Fuller give some interesting and straightforward evidence about this rifle before the Registrar in Bankruptcy the other day? Was not the main patent offered to the public for less money a year or so ago?

MANCHESTER LINERS, LIMITED.

This is another of Sir Christopher Furness's projects, which are becoming numerous. Its object is, in the first instance, to run three cargo-carrying steamers between Manchester and Montreal in the summer, and between Manchester and St. John, New Brunswick, in the winter. The share capital is £1,000,000 in £10 shares, half ordinary and half 5 per cent. cumulative preference, and the present issue consists of 17,500 shares of each class. Sir Christopher is to be chairman, and he and his friends will, if necessary, apply for 15,000 of the ordinary shares now issued, or will take a portion of that amount in preference shares if all the ordinary are applied for. A contract has been entered into between Furness, Withy, & Co., Sir Christopher Furness, and the present company, giving option of purchasing three steamers, now being built, for £90,000 each, and Furness, Withy, & Co., of which Sir Christopher is chairman, are to have a commission of 2½ per cent. on the purchase price for services rendered. Moreover, so long as Sir Christopher is chairman of "Manchester Liners," Furness, Withy, & Co. are to prepare plans, &c., and to superintend the construction of new steamers which may be ordered, at a commission of 2½ per cent. on the purchase price, as well as the same commission for valuing and surveying any steamers purchased by the company. We do not see why the new company should be saddled with this arrangement; in fact, we do not at all like this system of linking together various interests in which Sir Christopher is a sharer. But apart from this we should doubt whether the line will get sufficient business to make it a success.

UNITED GRAIN ELEVATORS, LIMITED.

With a capital of £100,000 in £1 shares, 60,000 being ordinary and the remainder 5½ per cent. cumulative preference, this Liverpool promotion is formed to take over as a going concern three businesses, two of which were only started last year, one as recently as October. Profits of two of them for one year and of the other for six months are given at £8,616, after allowing £8,602 for depreciation. There is now offered for subscription 30,000 ordinary and 26,667 preference shares and £20,000 4½ per cent. debentures, all to be had at par. The latter can be redeemed at 105 on six months' notice. Elevators and barges are valued at £62,841, and land and machinery at £4,833, while the purchase price is £100,000, including £71,667 in cash, so that the vendors should get the best of the deal. But if more than ordinary doubts are felt about the debenture interest, the Liverpool Mortgage Insurance Company will ensure the due payment of principal and interest of the debentures at a premium of ½ per cent. We never thought much of Liverpool promotions.

THE SPIRAL GLOBE, LIMITED.

This company is formed to purchase the British, foreign, and colonial patents and rights of Messrs. Dunlap & Quain for their spiral glass cover for electric incandescent lamps. The invention is simple, and consists of a spiral glass rod, having lens-like qualities, and of about one-eighth of an inch in diameter, closely coiled round the bulb of an electric incandescent lamp, the chief advantage claimed being that it more than doubles the effective light emitted, and therefore insures a corresponding economy in the consumption of electric current. Whatever prospect the company had, however, is spoiled by over-capitalisation, the capital being £150,000 in £1 shares, of which one-half is now issued, and the purchase price is as much as £65,000, of which £40,000 is to be cash. In addition, the company has to pay the vendor a further sum of £25,000 in cash on the sale of the foreign patents. Some vendors never know how to ask enough.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Lankapara Tea Company.—The crop of 643,125 lb. fell 37,000 lb. below the estimate, and the average price of 7⅛d. per lb. was ⅜d. per lb. below that of 1896, while the higher exchange increased the working charges. The accounts, however, were helped by a rather large sale of tea seed, but this is not a reliable sort of revenue. After meeting charges of all kinds the profit was £4,294, or £944 less than 1896, which must be considered good in view of the unfavourable character of the year. With the sum of £799 brought in, the available total is £5,094, of which £4,000 will be distributed in a dividend of 8 per cent., and £1,084 used to write off the cost of new grants, machinery, and permanent buildings. We are glad to see the property written down to this extent, for it is still highly capitalised, but the trading balances are not in favour of the company, and in all probability the money for a portion of the dividend had to be borrowed, for no less than £10,451 was due to creditors and on "bills payable," while cash only represented £252, and the crop came to £11,283, of which the dividend represented £4,000.

Chardwar Tea Company.—Owing to bad management the working of this company last year was unprofitable. The crop of 179,684 lb. was 56,316 below the estimate, and the price realised per lb. was less. With a revenue of £7,774, expenditure came to £7,974, so the deficit on working the season was £200. The balance of £1,276 was brought forward, and out of this the preference dividend of 6 per cent., requiring £300, was paid, leaving £976 to be carried to the new year. The capitalisation appears to be moderate, but the cost of production is high, that for this year being estimated at 8 7/16d. per lb.

Compagnie Générale des Asphaltes de France.—The profit of this company last year amounted to £9,243, and, including £12,493 brought forward, there was an available total of £21,736. Preference interest absorbed £2,600, and 7s. per £6 share, or about 7 per cent., was distributed in dividends upon the ordinary shares, leaving £12,536 to be carried forward. The profit and loss account is very meagre, so that one cannot tell how the item of depreciation is dealt with year by year. In the balance-sheet, however, there appears £25,120, which has been written off altogether from buildings, plant, machinery, and mines. The total amount standing to the credit of that account is £78,862, of which £33,000 is represented by freehold property and buildings. There is, however, an item of £60,000 for French shares, which we presume represents the concession and mines, and it would be interesting to learn if these shares require to be written down in any way.

Santa Rita Nitrate Company.—After meeting debenture interest and administrative charges, the net profit of this company last year was £3,996. The sum of £3,865 was absorbed by redemption of mortgage debentures, and although £7,690 was brought forward, the board prudently refrained from paying a dividend, carrying the balance of £7,822 forward. They promise, however, an interim dividend later on, as they have made profitable sales for the current year. The debentures are now reduced to £31,500, but the liquid balances of the company are brought very low, and it would be imprudent to expect much in the way of dividends, especially as the prospects of an agreement amongst the producers are not bright.

Trust and Agency Company of Australasia.—The profit of £91,913 earned last year was £148 less than in 1896, and in order to provide for a special loss of £7,712 on realisation of a mortgage, £7,500 had to be taken from the reserve. After administrative charges and taxes had been met the net balance was £80,090. Of this £43,750 was absorbed by preference dividend, £18,570 by interest on ordinary capital paid in advance, and the remainder permitted of 20 per cent. in dividends being paid on the ordinary shares and £269 was carried forward. The debentures were reduced in the year by about £10,000 to a total of £382,352, and their amount, compared to the mass of £1,357,870, represented by paid-up share capital, is almost insignificant. The company, however, has felt the burden of the depression in Australia, and it is fortunate that the board were so prudent in the past. As it is, the reserve tends to diminish, and the 20 per cent. dividends (they used to be 22½ per cent.), become more difficult. Last year, however, the company increased its loans, which led to a reduction in the investments in London, but naturally loans in Australia ought to pay it best. There is, however, one startling fact in regard to this concern, and that is, that with £1,722,141 invested on its own account in loans on mortgages, there should be no foreclosure account. In good years such an account might well be absent, but in the time of stress and storm through which Australia is passing some such account must exist. Its absence from the balance-sheet is not a sign of strength, and the sooner it is included the better we shall like it.

The Scottish Union and National Insurance Company.—In its fire department this company had a net premium revenue of £552,703 last year and paid £305,846 in claims. Expenses, including commission, took £186,389, or about 30 per cent. of the premium income. Deducting these two items from the premium revenue there was a net surplus of £60,469, which was carried to profit and loss account. Shareholders will receive a dividend of 16 per cent. and a bonus of 1½ per cent. out of this, which will absorb £52,000, so that the whole of the net surplus is not paid away; but the company also received over £37,000 for interest on shareholders' capital and reserve and a balance of £26,099 was brought forward from the previous year; therefore the directors are able to carry £5,000 to the fire premium reserve and £35,000 to the general reserve, and still have £30,965 left to carry forward. The business is thus very prosperous in this branch. It is also prosperous in the life branch, where 1,036 policies were issued, insuring £521,262, and yielding £21,055 in new premiums; £40,000 of this total was reinsured. Claims by death took £291,497, and commission and expenses about £42,000, or 13½ per cent. of the premium income. The increase on the life and annuity funds for the year amounted to £108,660, a sum of £15,093 having been received for fresh annuities sold. The company's total funds amount to £4,785,469, a considerable portion of which is invested abroad, £669,687 in United States railway bonds and guaranteed shares, £253,436 in United States municipal and State bonds, and £454,058 in terminable debentures and fixed deposits, besides Colonial and Indian securities of various sorts.

The General Life Assurance Company.—The board of this company, which now only does life business, having sold its fire business, adopted a prudent course in its quinquennial valuation by reducing the rate of interest to 3 per cent. on all their policies, except assurances effected under special tables and annuities, which are valued at 3½ per cent. In this way 96·4 per cent. of the entire liabilities of the company come under the finer valuation, and the result is an apparent loss to participating policy holders and shareholders of £60,532, which is the difference between the surplus to be anticipated under a 3½ per cent. valuation and one at 3 per cent. In other words, £80,788 is the actuarial surplus, instead of £141,320. Nevertheless, this policy is the right one, and will strengthen the company in the future. It actually earned £4 0s. 3d. on its investments as an average during the past five years, and in the year just closed the rate earned was £4 1s. 3d. Going to the accounts of that year we find the company issued 1,230 policies, insuring £556,703, and yielding £25,468 in premiums. Claims, &c., absorbed £112,330, of which £20,115 was paid by other companies with whom the General Life had effected reinsurance. The deaths were twenty-four below the number expected by the tables of mortality, and £29,831 less was paid away under them than had been estimated for. Nevertheless, the expenses of the company were rather high, being over 19·6 per cent. of the premium income, excluding of course the capital of £11,093 received for seventeen new annuities sold, and notwithstanding the receipt of £58,283 from interest and dividends and £13,557 as profit on investments sold, the life fund was only increased during the year by £117,882. It now amounts to £1,620,319. Shareholders received £7,500 in a dividend and bonus amounting together to 15 per cent. for the year, their share of the surplus being £19,436, which leaves £61,352 for participating policy holders, whose bonus this time will not be large. The money accumulated by the company appears to be very carefully and soundly invested almost entirely in home securities.

Yorkshire Fire and Life Insurance Company.—The seventy-fourth annual meeting of the shareholders of this company was held on the 10th inst. at York, Lord Wenlock in the chair, when the report and balance-sheet for the year ending February 28, 1898, were adopted. The net fire premium income amounted to £105,136, against £102,592 in 1897, showing a net increase of £2,544. The losses were £57,577, against £56,166 in 1897, the ratio in both years being almost identical, viz., 54·7 per cent. on the premium income. The net amount carried to profit and loss account, after providing for expenses and outstanding losses, was £21,087. The fire reserve fund remains at £240,000. In the life department 421 new policies were issued for £256,695, against £236,521 last year. The total net premium income was increased to £67,509 from £65,285 in 1897. The claims in this department amounted to £40,654, compared with £30,641 in 1897, and the total funds of the department amounted to £812,971, against £754,728, a net increase of £58,243. The ratio of expenses to premium income was 15·7 per cent. A dividend at the same rate as last year, viz., 9s. per share, or 25 per cent., is paid. The total assets of the company now amount to £1,149,217.

Imperial Continental Gas Association.—The profit of this semi-private concern for the half-year ended December 31 was returned as £245,152, or £11,000 less than the corresponding half of 1896, but we note that the contingencies account increased by £109,400, whereas a year ago the addition was only £80,000, so that the gross profit must have been fairly well maintained, and the usual 5 per cent. dividend for the half-year was declared. The sum of £34,000 was added to depreciation, or a little less than a year ago, and the reserve had the usual addition, these funds having stood in the last four half-years as follows:—

	Depreciation.	Reserve.	Contingencies.
	£	£	£
June 30, 1896	911,238	382,000	607,267
December 31, 1896 ...	949,481	387,228	693,205
June 30, 1897	999,099	392,441	761,342
December 31, 1897...	1,033,340	397,335	872,749

The reserve fund is specially invested in Consols, and the depreciation fund in high-class securities, but the contingencies fund is in the business. Trading balances and liquid assets, however, are so favourable that the huge sum is almost all held by the company apart from the general undertaking. Nothing fresh was added at the meeting about the Vienna business, but the chairman seemed to lean to the view that an amicable arrangement was not outside the range of possibilities. At Amsterdam, the undertaking of the association will be taken over by the local authorities next August, who pay 25 per cent. premium upon the capital sunk in the undertaking there. The money thus received will be employed in the redemption of the 4 per cent. debentures, whose amount now is £376,000. The association seems to be extending its operations in Germany, and generally the business appears to be progressive.

Investment Trust Corporation.—This corporation has done much better than the average trust. In the last five years the deferred stock has received an average dividend of 5 per cent., and the securities are stated to have only a moderate depreciation upon them. This last year the Trust earned upon its investments of £2,753,281 an income of £117,606, or, roughly speaking, 4¼ per cent. upon their cost price. As the total capital is £2,600,000, the rest having been found out of reserve, and £2,080,000 of this capital receives a fixed interest at the rate of 4 per cent., the board were able with this income to meet £10,580 of administrative expenses, pay 5 per cent. in dividend on the £520,000 of deferred stock, and carry £1,500 more forward, raising the total of that item to £25,760. The changes of investments during the year resulted in a small profit, which has been applied in reduction of cost of securities. Apparently the corporation does no loan business, while the board distinctly state that no securities with a liability upon them are held. The reserve amounts to £115,000 and the balance forward to £25,760, and after these sums have been deducted from the book cost of the investments, a valuation of the latter made at the date of the report showed a depreciation of 6½ per cent. Upon the total this represents £175,000, so that the item of depreciation is not one to be despised, but a year ago it was 9½ per cent. In spite of this depreciation, the Trust must be considered to have done well, but our commendations must stop at this point, for no list of investments is given, so it is utterly impossible to speak with the slightest degree of accuracy about the position. By an effort we may imagine that past experience proves the investments to be well placed, but who is to say that views have not changed upon the board, leading to the holding of an altogether different class of securities now from those in the hands of the Trust a few years back?

Chicago Packing and Provision Company.—The report of this company tells one little about its position. Last year it apparently earned a larger profit than the year before, as out of the net balance it was able to pay 12 per cent. or one and a half years' interest upon the preference shares, thus wiping off arrears, and then distribute 2 per cent. upon the ordinary shares, leaving £1,050 to be carried forward. In the circumstances we should have thought it would have been prudent to forego the dividend on the ordinary shares, but the directors seem to prefer dividing up closely. The balance-sheet tells nothing, as the chief asset is shares in one or two American companies—it is not clear which—and the balance-sheets of these companies ought to be included in the report. But we have no faith in these Anglo-American industrial concerns, which generally bring loss to the British investor.

The Liverpool and London and Globe Insurance Company.—In its fire department this company received a premium income of £1,540,706 last year, and it paid, or will pay, £857,714 in losses arising within the year. Losses, in other words, took 55·6 per cent.

of the premiums, and expenses and commission took a further 31 per cent. These deductions left £165,169 as profit, without counting interest earned. In the life department 765 policies, insuring £472,206, were issued, yielding £24,030 in new premiums. The total premium income was £242,139. Claims paid, including bonuses, took £204,262, and expenses amounted to just 10 per cent. of the premium income. The total of the life and annuity funds was increased during the year by £182,943, and now amounts to £5,190,245, but £155,254 of this represents capital received against new annuities amounting to £14,917 sold. The profit and loss account discloses the splendid character of the business as a whole, the net balance being £1,217,733, out of which dividends and a bonus aggregating 36s. per share, or 90 per cent. have been paid, or declared, for the year. The total funds of the company amount to £10,236,133, including not only the life and annuity funds, but the Globe Perpetual Annuity Fund, and the various funds of the fire department. This money is invested to the extent of £1,083,945 in mortgages on property outside the kingdom, and another £1,250,000 or so is invested in United States and Foreign Government securities.

Sun Insurance Office (Fire).—Last year this office's premium income was £1,012,340, or £42,655 more than in the previous year. Losses took £588,296, or 58·11 per cent. of the premiums, and expenses, commission, &c., absorbed £343,252, or 33·91 per cent. of the premiums. After providing the usual reserve of 40 per cent. of the premiums to cover liabilities under current policies, £142,401 is left to be carried to profit and loss. The total amount at the credit of profit and loss amounts to £270,750, and £100,000 of this has been carried to special reserve fund against large individual risks. Out of the balance a dividend of 4s. per share was paid in January last, and another of 4s. 6d. per share will be paid next July, making 85 per cent. on the par value of the share for the year.

The Nitrate Railways Company, Limited.—Adversity seems to have done this company good. Gross receipts last year came to £443,427, and the net income was £211,043. Measured by percentages, expenses show an increase on the previous year, but measured by the work done they have been reduced, so that the board can claim to have effected considerable economies without impairing efficiency. That is to say, while the total working expenses were 52·34 per cent. of the income last year, against 48·49 per cent. in 1896, the cost per quintal of traffic carried was reduced from 4·10d. to 3.42d., an economy in absolute cost of nearly 17 per cent. A dividend of 3 per cent. is declared on the unconverted ordinary and the preferred shares, which will leave £136,121 to be carried forward, against £119,760 brought in. The directors report that exports of nitrate have not increased since the combination to limit output was dissolved, and they do not anticipate much variation in the volume of traffic to be carried during the present year. The abundant years 1889, 1890, and 1891 are, in short, gone for many a day, if not for ever, and therefore the watchword must be economy, reduction of expenses at all points, and absolute cessation of plundering by officials or anybody else.

The Scottish Amicable Life Assurance Society issued 735 new policies last year, insuring £515,944, and yielding £35,008 in new premiums. Also it sold annuities to the capital value of £71,431. Claims took £226,146, which was "considerably less" than actuarial probabilities indicated. The total income for the year was £456,377, and the total outgo £298,383, which left £157,000 to be added to the net funds, bringing their total up to £3,830,932. Expenses of management, including commission, came to 13·95 per cent. of the premium revenue. The average rate earned on the funds was £4 0s. 9d. per cent. before deducting income tax. No less than £1,744,000 of the funds is invested abroad.

Clement, Gladiator, and Humber (France), Limited.—The first report, which only brings us up to September last, hardly fulfils the rosy prospects with which the prospectus abounded. Earl De La Warr, chairman of the Dunlop Company, is also chairman of this undertaking, and amongst its directors is Martin D. Rucker, the managing director of Humber & Company. Clément, Gladiator, &c., is the outcome of the amalgamation of three French cycle businesses, and in the prospectus reference was made to the advantages which must accrue from the amalgamation. The statement about past profits was presented in anything but a clear way, but the profits of the two companies—the Clement and the Gladiator—for the year ended October 1, 1896, were guaranteed by the vendor at £80,000. The results of the French business of Humber & Company had not been ascertained, or at least were not given, but, said the prospectus, "judging from the turnover and the popularity of Humber machines in France, the profits should be very considerable." The prospectus then showed that the preference dividend and 9 per cent. on the ordinary shares would require only £75,000, and added that "the calculation was made without taking into account any profits of the French business of Humber & Company, Limited, which should materially increase the dividend on the ordinary shares." Results do not bear out these anticipations. The actual net profit for the year is only £51,727, the Humber branch, from the date of the incorporation of the company, showing a loss of £8,392, which proves that the statements in the prospectus, to say the least, were beside the mark, and instead of any 9 per cent. dividend, which was to have been materially increased by the profits from the Humber branch, only 5 per cent. is paid, and £4,738 is carried forward. The balance-sheet is not at all encouraging. Amongst the assets, land, buildings, plant, patent rights, and goodwill stand at £714,780, the magnificent sum of £7,694 having been written off for depreciation. If this item was written down by 50 per cent. we should not think it would stand too high. Fixtures, fittings, and stables, less £1,485 written off, represent £13,290, and in addition to all this the works at Nantes and the cycles known as "Phebus" are a separate item for £29,159. Stock-in-trade bulks largely for £71,274, while book debts and bills receivable stand at the terrible total of £119,036, against which there is a reserve for doubtful debts and bills amounting to £9,181, an item which, did it stand at five times the amount, would probably not be too large for its purpose. But perhaps we are wrong, for the auditors tell us they have compared the balance-sheet and profit and loss account with the books and vouchers, and find them in accordance therewith, which is kind of them. Another reassuring statement is that the stock has been certified by the managing directors, so of course it would not be put too high. Still we must say that the position of Clément, Gladiator, & Humber (France), Limited, if not up to promise, compares very well with most of the cycle companies over here, though we would just make the remark that Mr. Ernest Terah Hooley and his friends displayed keen judgment when they took the £900,000 of purchase money in cash.

National Provincial Bank of England.—Our premier bank did very well last year, the profits, with £67,008 brought in, being £714,649 compared with £667,008 for 1896, when £53,996 was brought in. The directors are therefore able to increase the dividend from 19 to 20 per cent., and while £30,000 was last year transferred to credit of bank premises account, the amount transferred now is £40,000 as well as £5,000 to the provident fund, while the balance carried forward is £2,600 larger at £69,649. Deposits have further grown from £46,788,000 to £48,810,000, and acceptances have increased from £552,000 to £564,000. Cash at Bank of England and at head office and branches has risen from £5,749,000 to £6,459,000, and at call and notice from £4,240,000 to £4,482,000. Amongst the investments, English Government securities have increased from £8,097,000 to £8,132,000, and Indian and Colonial Government, railway debenture, and other securities, from £8,290,000 to £8,599,000. Bills discounted, loans, &c., are some half million up at £25,709,000. This is one of the two great bill-buying banks in London, the other being the London and County, and we wish for statistics' sake it would separate bills from advances in the balance sheet. Thomas George Robinson, Esq., and Selwyn Robert Pryor, Esq., have been elected directors in place of Richard Blaney Wade, Esq., and Duncan Macdonald, Esq., deceased.

West India and Panama Telegraph Company.—This undertaking is still lamenting over its subsidies. The subsidy of £2,000 per annum from the Government of Jamaica ceased last March, and now the financial crisis has caused Antigua and St. Kitts to reduce their subsidies from £800 to £600 each for the current year. Under the influence of the depressed condition of West Indian trade the little company, naturally, has not had a good time, the receipts for the half-year ending December 31 being £32,228 against £34,053 in 1896, and the expenses £19,772 against £21,398, being a reduction of about £200 net. The sum of £1,243 is brought forward, but to pay the preference dividends and 6d. per share on the ordinary, £1,000, has to be taken from the reserve, leaving £721 to be carried forward. Having lowered rates to meet the competition of the Bermuda and Jamaica line, the prospects are not at all promising.

Imperial Russian Cotton and Jute Factory.—The gross profit of this concern last year amounted to £28,165, and after setting aside £2,494 for depreciation and meeting administrative charges, the net profit was £18,022, to which add £7,270 brought forward. A dividend of 10 per cent. absorbed £13,000, the sum of £5,000 was placed to reserve, and £7,293 was carried forward. The reserve will now amount to £25,000, and with the balance forward, and a debenture premium redemption fund of £1,200, the company has about £33,000 of accumulated profits. Depreciation to the extent of £20,111 has been written off the properties during its history, and their total now stands at £131,222. The trading balances of the company are therefore in a sound condition, and only £29,000 of debentures are out. It is, however, intended to issue at least £20,000 of second debentures in order to provide for the completion of the twine and rope factory, mangling machinery, and other plant in a new department of the business. This will cost about £35,000, the balance being found, we presume, out of the resources of the company.

Southern Brazilian Rio Grande do Sul Railway Company.—Like most of the Brazilian guaranteed railways, this one works at a loss. Last year its total receipts came to £45,722, and expenditure to £47,365, so that the loss on working was £1,641. This is better than in the two previous years, the loss in 1896 being £3,433, and in 1895 no less than £8,465, but in those years revolutions and floods affected the traffic of the line. The guarantee of the Brazilian Government is, of course, the salvation of the company, and as this amounts to £103,896 for the year, the dividend is relatively high. Including £21,446 brought forward, the sum pays the debenture interest and dividends amounting to 5½ per cent. upon the shares, leaving £26,757 to be carried forward, of which £10,177 has been invested in high-class securities on this side. Apparently nothing is done in the way of debenture redemption, and as the debenture stock amounts to £1,002,384, the prospects in case of whole or even partial default by the Brazilian Government makes one shudder.

Scottish Australian Investment Company.—There is a miserable tale repeated by this company in its half-yearly report. A net profit of £33,578 is shown, of which £26,061 is absorbed by preference and debenture interest, and the balance of £7,692 permits of a dividend at the rate of 2½ per cent. per annum on the ordinary stock, and the carrying forward of £1,442. The drought in Australia is said to have broken up, but losses of stock at the Gaumain and Nivê Downs Stations have been so severe that the board deem it advis-

able to take £35,000 from reserve. This latter item is then reduced to £115,000, as against £170,000 a few years back, but it does not matter much, as it never was a very satisfactory item, being wholly in the business. If it were wiped out, and some of the pastoral property written down, it might be better for the concern.

Diary of the War.

May 6.—No war news, unless we regard the landing of ammunition for the Cuban insurgents at a point about seventeen miles from Havana as war news. The expedition consisted of seven men and two horses. They were conveyed in a tug-boat, which was fired upon by some Spanish cavalry from the island. But expedition and ammunition, with several boxes of dynamite, were safely given over to the insurgents commanded by General Gomez. No casualties. Considerable anxiety in United States about the continued silence of Admiral Dewey at Manila. It seems inexplicable. The movements of the Spanish fleet from Cape de Verde are equally mysterious. It is not at Cadiz, as was reported yesterday. The only warships there are preparing to sail in some unknown direction. Admiral Sampson, while aiming at the capture of Puertorico, is to keep a look out for the returning American warship *Oregon*, and an eye on the Spanish fleet when it becomes visible ; but at present

"The Spanish fleet cannot be seen,
Because 'tis not in sight."

May 7.—The war continues to present us with but meagre fare in the shape of news. The morning papers, as a rule, devote a large amount of space to rumours, which, in the main, are merely tantalising ; while the ingenuity of the evening papers in discovering "startling" intelligence, which is rarely confirmed, is really remarkable, though wearisome. A French liner, sailing for Havana, was brought to and boarded by men from the American warship *Annapolis*. Her captain was warned not to attempt an entry, but he immediately resumed his course ; and a shot was then fired across the ship's bows. The vessel itself was seized and taken to Key West. Then the French ambassador at Washington sought her release on the ground that she did not sail on April 23, and could not know of the war, which was only declared on the 25th—though dating from the 21st—and was not notified to foreign Powers until the 27th. These arguments seem to have impressed the United States Government, for orders were issued to release the steamer, and to convey her under escort to Havana. It was only prudent thus to avoid what must have proved an ugly, and perhaps serious, international difficulty. No news from Manila, and American anxiety increasing. One suggestion is that Admiral Dewey may, after destroying the Spanish fleet, have found that his supply of ammunition was not sufficient to reduce the forts, and is thus caught in a sort of trap. Some such notion seems to be entertained at Madrid, and Senor Sagasta talks of sending reinforcements to the Philippines, and still contesting their possession. We must wait for enlightenment. No public hint of peace in Spain, but privately, it is said, moderate and far-seeing politicians are found to suggest that a way should now be sought to open peace negotiations. Probably the only obstacle to action on such suggestions is the fear of ignorant and ill-informed popular indignation. Serious rioting in Murcia. The town hall set on fire the law courts pillaged and fired, the prisoners set free, the telegraph wires cut, a dynamite store looted, and its contents distributed. A serious situation indeed !

May 8.—At last there is news direct from Admiral Dewey. It is brief. He destroyed the Spanish ships ; he destroyed the forts at Cavite ; has the whole place "in his grip" ; but cannot take possession of Manila for want of men. His munitions also, it seems, need replenishing. Not an American sailor was lost, nor an American ship damaged. A most complete victory.

May 9.—The details now received of Admiral Dewey's great achievement at Manila give us as perfect a picture of what occurred as may be desired, and it is but right at once to acknowledge that the American accounts now published fully confirm, in the main, the early reports supplied to us exclusively through Spanish sources. With the exception of the first unfortunate announcement of victory sent out from Madrid, the original story as told in the Spanish despatches is now entirely confirmed. There is no question of the courage of the Spanish forces employed ; their skill, however, has not been so conspicuous. Their fleet was no doubt antiquated and worthless as compared with the American fleet, which also included a far larger number of ships than the Spanish. But it is also evident that the Spanish guns on the forts as well as on the fleet were badly served. The firing was extremely wild ; the gunners were too eager to "blaze away," as is shown in the fact that only one of the American ships, the *Baltimore*, was badly damaged, the others not at all. The Americans report no loss of life : the wounds were few and trifling. On the Spanish side, on the other hand, the fleet was completely destroyed ; the number of killed is believed to be at least 400, and the wounded 600. Admiral Dewey's squadron arrived outside Manila Bay late on the night of Saturday, April 30. Ships were despatched to reconnoitre ; but not a Spanish vessel was visible. No outlook was kept. The only consideration, then, for Admiral Dewey was whether he should risk ignoring the submarine mines which ought to have been laid in the Bay. He decided to take the risk. All except the stern lights were extinguished. The vessels proceeded up the south side of the Bay with great caution ; and half a dozen of them had passed the Corregidor fort before they were observed. Searchlights seem to have been unknown on the Spanish forts. The American ships went on their course, and arrived opposite the Cavite forts at daybreak on Sunday morning, May 1. The Manila guns opened fire at five miles' range, but did not hit the enemy's ships. The Americans did not reply at once ; they manœuvred in search of the Spanish war vessels, which were found at last under the wing of the Cavite forts "in battle array," though steam apparently was not up ! At least it was some time before they entered on the fray. The result was as we have stated. It was agreed not to bombard Manila, on condition that its forts remained silent. An American military force is to be sent to Manila as rapidly as possible to enable the Admiral to take possession of the town ; and American journals are now again discussing what they are to do with the Philippines. It is significant that the drift of opinion seems now in favour of retaining the islands to give the States a foothold in the Far East, and, as a corollary, to set to work to create a great fleet, with perhaps a great army to follow. Meanwhile, Europe is looking on with increasing interest. Germany seems rather anxious about the future of the Philippines. France, according to the Madrid correspondent of the *Times*, has her eye on the Balearic Islands, and Russia seems inclined, if occasion offers, to lay hands on Ceuta. Twenty years ago this war between the United States and Spain would not have suggested any change of territory except such as the chances of war might have given to one or other of the belligerents ; now there is scarcely a European Power that is not apparently formulating claims to "compensation," a *fin de siècle* euphemism for diplomatic "theft."

May 10.—A day of rumour rather than of fact. Commodore Dewey has been thanked by Congress for his achievement at Manila ; and a Bill was passed with great promptitude promoting him to the rank of Rear-Admiral. Several of his officers have also been promoted. The Admiral is to receive a sword, and his officers and men medals commemorative of Manila. These are about the only facts there are, except that there has been a renewal of the rioting in Spain. The American expedition against Cuba has been postponed—naturally ; for until Admiral Sampson has returned to Havana, the bombardment is not likely to take place, and it is by no means clear where the Admiral and his ships are. They are said to have been seen somewhere to the north of Cape Haytian on Sunday, while seventeen Spanish vessels are reported as having been seen off Puertorico. There have been many rumours of engagements in the Atlantic, but no confirmation of them. A reconstruction of the Spanish Cabinet seems probable, Senor Sagasta, the Premier, and Senor Moret, the Colonial Minister, being about to retire.

May 11.—The Spanish fleet which sailed some time ago from Cape de Verde has at last been discovered. Not, however, at Puertorico, near which it was said to be on Sunday last, nor anywhere at sea, searching for Admiral Sampson's squadron, but at Cadiz ! It has gone home ; and there is a strong impression that we shall hear very little more of it. It has been attached to the reserve squadron ; but clearly, if the Spanish authorities had believed the ships fit for anything, they would not have brought them to Cadiz, leaving Puertorico open to the American fleet, and the defence of Havana entirely to the troops under General Blanco. This entirely changes the aspect of affairs. Admiral Sampson may run his ships into Puertorico any day. There is practically nothing to stop him. Whether he will then return to Havana is uncertain. If he does, it will not be merely to carry on the somewhat dull work of the blockade ; for it seems to have been finally resolved at Washington that a more formidable expedition than was at first contemplated is to be fitted out as soon as possible for the invasion of Cuba. General Miles has gone to Tampa, presumably to prepare this expedition. Some reports speak of its starting before the week is out, or at least early in next week ; but if it is ready to start in ten days or a fortnight it will do very well. It is believed in America that the army now to be sent will dispose of General Blanco and his force—said to consist of 60,000 regulars and 30,000 volunteers—by the end of June, and thus be ready to escape from the island before the most dangerous hot weather sets in. Of course, the bombardment of Havana will begin as soon as the American expedition has started. It seems probable that Admiral Sampson may return to conduct this bombardment—unless Puertorico proves a harder nut for him to crack than looks likely at present. A further supply of rifles and ammunition is to be despatched to the Cuban insurgents immediately, to be left at various points on the coast of which these insurgents have the command. At Manila the insurgents are said to be beyond the control of Admiral Dewey as well as the Spanish authorities. The population are represented as starving, and the British residents regard their position as critical. The news from Spain itself is gloomy. A Ministerial crisis seems inevitable. There is some grim talk about a dictator, and General Weyler seems qualifying for the post. There has been more rioting at Alicante and other towns, and it is impossible to say what a day may bring forth in this unhappy country.

May 12.—All is in doubt again about that Spanish Cape de Verde fleet. There has been no confirmation of its arrival at Cadiz, and the report is now regarded with suspicion at Washington. Nothing has been heard of Admiral Sampson, who should have arrived at Puertorico yesterday. Were the Spanish ships watching him after all ? The Bill providing for the war expenditure has passed the Spanish Chamber, though its passage was accompanied by a fierce running fire of invective from Republican and Carlist deputies. The Government were sadly riddled. No further serious disturbances are reported from Spain, but the Government is "extending the area subject to martial law." An ominous proceeding. Several smart attempts to land men and arms near Cienfuegos, under cover of the fire of four American ships, were frustated by the Spaniards, and fourteen men were wounded. What the object of these attempts was does not appear. More talk about peace.

The Investors' Review.

The Week's Money Market.

Rates on short loans have fluctuated from day to day, but the tone has generally been harder. The calling in of balances on account of the Chinese Loan payment at once cleared the market of its superabundant supplies of cash, and the rate for day-to-day loans became 3½ to 4 on the Friday preceding that payment. On Saturday, the day of the actual transfer of the £11,088,000, the rate fell off to a wobbly 2½ to 3¼ per cent. in expectation of the speedy release of a portion of the funds handed over to the Japanese Government. When, however, these hopes proved ill-founded, and the Stock Exchange settlement caused a little more activity in the short loan market, the rate for day-to-day money rose to 3 to 4 per cent., which has been the comprehensive quotation for the last four days. Recourse had to be made freely to the Bank of England at times, so that on balance the market increased its indebtedness to that institution by about £3,000,000. The India Council renewed small amounts each day at 3½ per cent. for advances of fourteen to eighteen days.

There has been little change in discount rates during the week. On Saturday, the hopes of an early release of Japanese money caused two and three months' remitted bills to be discounted at about 3⅝ to 3 11/16 per cent., but the news that the Japanese funds will be retained by the Bank of England for a time at once caused a return to the former level of 3 11/16 to 3¾ per cent., at which quotations the market has remained steady. There appears to be a little splitting of hairs as to the definition of the course adopted by the Bank of England in order to retain possession of the unemployed balances of the Japanese Government, but it seems to be certain that some *quid pro quo* for this advantage has been rendered by the Bank. Its policy in holding fast to the money is well advised, and that it should take the step is only another proof that the old "cast-iron" methods are disappearing under the influence of common sense. At the same time, there does not seem to be reason to assume that no money will be released on this account, for the operation in connection with the investment of Japan in £2,000,000 of the Chinese Loan should bring some money out, while the liabilities of the Japanese Government to shipbuilders are also large, and constantly falling due. Then, if gold is taken to Japan, an endeavour will be made to buy it in the open market, which, if successful, must lead to a further setting free of balances in the Bank of England. Meantime the anxieties of the market are aroused as to the effect of the high price of wheat upon the course of bullion movements. So far the American exchange has moved to only a moderate extent, the demand for gold on that account being restricted to the open market, and even so is only of a languid nature. India, however, is stated to be in a position to ship grain freely, and if anything like the million tons of wheat spoken of as probable is sent by it, there is the chance that an enquiry for the metal may arise in that quarter. The Bank of England certainly gained over £1,000,000 in the week from imports of gold, but the great motive for the arrivals from the Continent—payments on account of the German half of the Chinese loan—is now no longer operative, and ordinary conditions have now come into play. A new Russian loan in Berlin, even if it is in part a conversion, will tend to harden the German money market, and thus weaken our power to draw the metal. There is, therefore, no reason for discount rates to weaken at present, although we are approaching the period when the dull summer season usually has a depressing effect upon them.

Less was heard about repayments of loans by lenders in the Stock Exchange this time, and loans for the settlement ruled about 4 to 4¼ per cent., most business, however, being transacted at the lower figure. The Greek loan, or rather the £1,660,000 offered here, did not excite enthusiasm, as the high exchanges ruling caused the French and Russian portions to be cheaper. After allowing for accrued interest, the price of subscription meant par, and at this figure there was sufficient demand on the part of those who always hunger after "gilt edged" securities to cause applications to the amount of £3,036,000. Allotments, therefore, worked out at about 54 per cent. of the amounts asked for.

Most of the gold, yesterday's Bank returns shows, which came in during the week has been retained in stock, and as notes have come back from circulation as usual in the second week of the month, the banking reserve is larger by £1,093,000 than it was a week ago at £23,813,000. But this has not been nearly enough to enable the market to work as usual and find the Chinese loan money at the same time. It has therefore been obliged to borrow £3,007,000 on "other" securities, raising the total of these once more to £35,775,000. All this money, all the addition to the reserves, and £135,000 paid out from the Government balances, have gone to swell the "other" deposits which have risen £4,246,000 to £43,516,000. The strength of this total is illusory, since the balances of the Japanese Government alone represent perhaps ten millions of it, perhaps more, and as these balances are kept out of the market, the prospect before it is one of dependence on the Bank for weeks, perhaps months, to come. The large increase in the "other" deposits has caused the proportion of reserves to liabilities to fall from 44½ per cent. to 43½.

SILVER.

The price of the metal, after an initial drop to 25⅞d. per ounce, has steadily advanced during the week. At the last quite a rush up occurred in the quotation on an urgent order for spot silver from Paris on account of Spain, and the price for immediate delivery is 7/8d. higher at 26⅜d. per ounce. The forward has risen ⅜d. to 26½d. per ounce. It is not clear whether these orders have been completed and sellers, therefore, have been altogether disinclined to press the metal. The Indian exchanges have run up above 1s. 4d., as the business in wheat there is growing more active, and has already caused the Indian money markets to tighten up again. The wheat crop has proved to be very good, and large shipments on this account will, while they last, do more to help the Indian Government towards its ideal of a high exchange than anything that has happened of late. It remains, however, to be seen whether India will prefer to take its differences in silver or gold, in spite of all that Government may do to encourage the latter to go. Under these circumstances, the Council drafts are keenly competed for, and special sales are frequently made.

BANK OF ENGLAND.

Stock Market Notes and Comments.

With the world so full of agitation, wars, hunger, and revolution, it is really wonderful to behold the strength of our markets. We can understand why Home securities should hold up while the agitation which is now spreading over the Continent from Italy and Spain finds as yet no echo here, because our population has not been living for a generation with want as a bosom friend, ground to the dust by excessive taxation, and so exhausted that the slightest extra pressure must drive it to rebel. Wealth has broadened and spread downwards with us, instead of becoming more and more concentrated in few hands as on the Continent, and, to some degree, in the United States. Therefore we are calm; therefore the investing classes can continue to place their accumulations in Home stocks with serenity of mind, and they seek these stocks more and more because of the turmoil beyond our shores. Because they do so the price of our good securities naturally remain high and show elasticity with every dip caused by passing frights.

Abroad, however, the position is very different, and it puzzles the mere onlooker to understand why not only Spanish stock should occasionally show a tendency to recover, and Italian Rente abstain from sinking much, but why even United States railroad stocks should rush away up before the war the Union has entered upon against Spain has been completed to the end of the first act. As regards Continental stocks we cannot but look upon the market for them as most treacherous. They may be kept up in price, or raised in price occasionally, by the struggle between "bull" and "bear," but intrinsically not even French Rentes are worth present figures. The market for all this class of stocks is, therefore, often most difficult to deal in on the Stock Exhange. No man, not the most experienced jobber, can see five minutes ahead. Operators in every part of the civilised world are playing against eaeh other in these securities, to such an extent that the influences affecting the market at any one spot cannot be discovered or traced. A man buys thinking the indications favourable to a rise, and almost before he has entered the bargain selling comes from somewhere and drives the price down. The market is thus at the mercy of a thousand cross currents and side influences, the importance of which no individual can measure.

And of course the very breadth of range, as it were, over which the play extends, may have the effect of sustaining prices for a time, and to a certain extent the credit obtainable in all banking centres can be utilised for the same purpose. So long as the over-burden of profitless securities does not cause a breakdown in credit, markets may simmer and shiver along, devoid of great sensation, but a constant source of perplexity, and now and then of loss. Beyond all these influences, however, there is the dominating one of the insolvency ot Spain and Italy, to say nothing of the, as yet, smothered fermentation in France, Austria, and even Germany. This essential weakness must force prices downwards in the long run and in the main, struggle against the decline as speculators may. And because there is no stability in the financial position, at any rate of any Latin country, we think British investors wise in giving their securities the go by for the present. It is not, in some respects, a good thing for us to be without the possession of large masses of Continental securities at a time like the present, were it for no other reason than that the possession of them would enable us the more easily to draw in whatever amount of gold we required from abroad at any pinch. And the lack of both interest-bearing securities and foreign bills of exchange renders our market, in some respects, extremely weak at the present moment. For all that, and balancing advantages and disadvantages, we are inclined to think that it will be better for the stability of our credit that we should be mostly without this class of investment for a time. Speculators may buy and sell as suits their humour, but the quiet investor should not touch the stocks of any country where revolution may now be raging, or threatening to break out. Scheme and lend as they may, the all-powerful-looking *Haute Banque* cannot always and for ever keep insolvent States from foundering.

United States securities stand in another category. We have always had a weakness for them, in spite of the many disappointments they have given us, and the atrocious frauds that have often been perpetrated upon us by American railroad financiers. Yet it is puzzling to account for the rise in these at present, and we do not believe in its durability. It has not been produced here. Some people may have bought weak bonds during the depression which immediately preceded the outbreak of hostilities with Spain, but the attitude of holders and speculators here has on the whole been hostile, and since prices have risen, we believe selling on this side has decidedly predominated. It is not wonderful that this should be so, for large numbers of people had bought extensively just before the war against Spain began, in the expectation of a great advance, owing to the splendid opportunity shortness of bread in Europe was likely to give American railroads this year. Multitudes, therefore, were caught in the fall, and have been raging ever since. Now that American speculators have lifted prices again, this angered crowd has been flinging its stock away, thereby doing one good thing, at any rate, in fending off to some extent the United States demand for gold. We are not at all sure that they are wrong in taking this course. Indeed, if we were in a similar position we should sell directly we saw our money back, because the rise has come too soon to be enduring. The States have not yet paid for the war, and a large disorganisation in their banking system, as well as in their marketable securities, may occur before the bill is met, even should the war now end because Spain has been eaten to death by its ichneumon ruling classes. Undoubtedly the Union is in a very strong position at present through the splendid prices it is getting for its cereals, and, thanks to this, it may meet its enlarged expenditure much more easily than it could have done one or two years ago. But the railways have "wars" of their own and do their best still to ruin each other for the profit of those in control of them. For all the talk of peace also, we believe the war is going to last long enough and to cost such sums, even if ended soon, as must far more than absorb the advantage given by the poverty of Europe and high prices for wheat. Believing this, we think the time has not yet come to seriously invest in the great bulk of American railroad securities dealt in on this market. Gamble in them if you will and take your chances; but invest in them, no.

Apart from such points as these the markets for the past week present nothing to comment upon. They are all more or less unsatisfactory markets, the best thing about them being the lightness of the speculative account carried on inside the Stock Exchange. So small is this that it is now unprofitable to lend money on stocks in many departments. That is to say, money is dearer from the banker than in the market, and moneylenders inside the Exchange are paying banks 4 per cent. and upwards for money which they are obliged to lend again at 3 per cent. and 3½ per cent. and sometimes less. This smallness of speculation is an excellent thing for the stability of the Exchange, although bad at the moment for the moneylender there, but it is no index whatever to the extent of the speculative account open on the part of the public. How great that is we have no means of gauging, but the smallness of the current speculative business on the Stock Exchange points to a lock up of money on the part of its customers heavy enough to force most of them to abstain from further dabbling. The market is thereby reduced very much to hum-drum investment business, which is not very profitable to the "House," and certainly never picturesque.

We need say nothing further this week about mine shares. They are much where they were, only that the men in control of the South African and Australian markets have been pushing quotations up. How far they will be successful in this we do not know, but in regard to the Australasian section it must not be for-

gotten that the Bottomley puddle has not yet been cleaned up; and in regard to the South African the splendid return of gold for April must not blind people to the fact that the increase is due to the additional stamps at work and not to richer returns from any of the mines. We should be delighted to see a few more both African and Australian mines entering the dividend list, but fear this will have to be waited for just a little longer.

The Week's Stock Markets.

Stock markets were quiet during the closing hours of last week, and the tone was generally dull owing to the usual amount of realisations in view of the settlement which began on Monday. The present week opened with an increase in business, and the opinion gaining ground that the war is likely to end soon caused a decided rise in United States railroad shares, and the tone became firm in all departments. The reported return of the Spanish fleet to Cadiz was also taken as meaning an early cessation of hostilities, and this led to repurchases by "bears," and even to a certain amount of fresh speculative buying.

Consols declined steadily during the earlier part of the week, and other high-class securities were flat, owing to the hardening tendency of the money market, coupled with the rather unsatisfactory feeling produced by Lord Salisbury's recent speech. Then again the issuing of the new Greek loan was thought to be partly responsible for some of the selling, although there was not a great rush for it as far as London was concerned. The firmness of other markets during the last few days, and the slackening of the American inquiry for gold, have, however, imparted a rather firmer appearance to the whole list of gilt-edged securities, the premier stocks of the leading Home railway companies again attracting buyers.

In Home railway stocks all the Great Central Company's issues have been very firm, in view of the opening of part of the London extension in about another two months' time, and for this reason Metropolitan ordinary and new ordinary have both hardened. The coal war is thought to be drawing to a close, although there is not much indication of it yet. Stock was scarce at the settlement, and the light rates brought in buyers, especially for South Eastern deferred, the latter stock being also helped by a good traffic return, whereas the Brighton Company's "take" was a poor one. South Western deferred has met with considerable support, and so has Great Eastern, a good deal of small investment business being reported.

Owing to the absence of reliable information concerning the war, the market in United States railroad shares became inactive and dull, and remained so until the close of last week. The news that eventually arrived from Manila being of such an eminently satisfactory character promptly led to a large accession of buying orders, and home operators were not slow to follow the lead of Wall-street, and a big rise has been established throughout the whole list. Latest rumours to the effect that Spain is only waiting for a favourable opportunity to sue for peace, and that the war will soon be over, and the like, have all been made the most of to raise prices, and the continued advance in the price of wheat has been another "bull" point. Apparently the trouble in the grain trade that was talked of in New York a few days ago was not as serious as was at first assumed. The Wabash Company's officials in an announcement just published state that "all surplus income will, for the present, be used to pay the floating debt rather than interest on the debenture stock." Canadian Pacific shares have been quiet, but leave off rather higher than last week, and Grand Trunk stocks were only moderately active at a slight advance, the traffic returns in each case being fairly satisfactory.

In the Foreign market the principal features may be shortly stated to consist of a big rise in Brazilian bonds, and a moderate recovery in Spanish "Fours," while in the adverse direction there has been a collapse in Italian Rente. The advance in the Brazilian bonds in the first place was only accounted for by a statement which was alleged to have been made by the President-elect, who is now in Paris, while since then rumours have been flying about that the Brazilian Government has come to terms over the sale of the Central Railway. Various causes have led to the rise in Spanish, coming, as it did, in the face of the news of the total destruction of their fleet at Manila, but the principal reason undoubtedly is that the payment of the coupon on July 1 has been arranged for and the amount remitted, while the publication of the balance-sheet of the Bank of Spain led to a decline in the exchange. There is, moreover, a rumour about to the effect that a new ministry is to be formed in Madrid, and this was viewed favourably. Large blocks of Italian Rente have been thrown on the market, and for several days the news relating to the meeting in Milan was of a very unsatisfactory sort, but on Wednesday all offers of stock were promptly taken up by both German and French operators, and the latest quotation is well above the worst. Egyptian loans were favour-

ably affected by Lord Salisbury's remarks, and an advance has taken place in Transvaal 5 per cents., Japanese, French 3½ per cents., and Chinese gold bonds of 1896. Argentine Government and the various Cedula issues show an all-round improvement, the fall in the exchange (owing to the continued rise in the price of wheat and the large exports that are now taking place), together with the success of the new internal loan, all having a good effect. Continuation rates at the settlement were rather higher if anything, with the exception of Spanish bonds, which were carried over at "even" to 2 per cent., against 2 per cent. last time.

Among Foreign railway stocks, Cordoba Central (Central Northern) 4 per cents. gave way, as the traffic return was again very bad, but most of the leading Argentine issues have regained the losses of the earlier part of the week, and Brazilian and Uruguayan emissions are also firmer at the last. Nitrate Railway shares were bought in anticipation of the report, but profit-taking followed its publication. Mexican issues have been entirely neglected.

In the Miscellaneous market, Anglo-American Telegraph stocks, especially the deferred, have been largely bought, and there is an idea that this war is putting a lot of money into the company's coffers, and that it will mean a dividend of 10s. or £1 on the deferred this year. Russian Oil shares have again been waking up, and the price rose sharply when the resolution for splitting the ordinary into £1 shares was passed at the meeting. Great weakness has been the chief characteristic of the market for cycle ventures, and prices have now gone down to quite rubbish level. A further serious shrinkage is noticeable in Dumont Coffee debentures, and several tea companies' shares mark declines. London General Omnibus ordinary has risen 5, but City Offices 3 per cent. debentures have gone back a little after the recent sharp rise. Some inquiry has sprung up for Eastmans and Hammond Meat shares; Millar's Karri ordinary is higher owing to a satisfactory report, and Pillsbury Washburn Mills preference has risen in connection with the "boom" in wheat. Brewery emissions present few features of note; Guinness preference is 7 lower, and the debentures of several of the other leading companies have fallen 1 each. The directors of Wm. Younger are making a new issue of capital, and the preference stock has risen 4, while the demand for the leading American companies' shares still continues.

United States railroad shares closed flat, due to heavy sales on the part of influential houses, and the news that the return of the Spanish fleet to Cadiz has not yet been satisfactorily confirmed, taken in conjunction with the Spanish Premier's fighting speech on Wednesday night, does not quite bear out the idea that an early termination of the war is imminent. Spanish 4 per cents. also leave off dull, but still show a rise of 4 on the week; but apart from this, the Foreign market was well supported by Continental buying orders. Home railway stocks close firm, especially Metropolitan and Great Central issues, the small investment business being more pronounced. Mexican railway issues rose a little quite at the last in sympathy with the improvement in silver, and several other Foreign Railway stocks again advanced. South African mining shares were adversely affected by a forecast of President Kruger's speech.

Mining and Finance Companies.

Rather more activity has been displayed in the South African market, chiefly on Continental support, and the good Rand output, which is again a record one, tended to encourage operators. Chartered shares drooped after the debate in the House of Commons on Friday, but there has been a recovery since, and most of the leading favourites have added a little to their price during the week. All the leading Western Australian companies' shares mark substantial rises. Especially is this the case with Golden Horse Shoe. The account in this section passed off quietly and without trouble, although it was looked forward to with a considerable amount of apprehension. About the only feature the settlement disclosed was the fact that the account open had again been very largely reduced. The "Bottomley" group has not attracted much attention, Market Trusts, after dropping to 2s., having since slightly recovered, as the hearing of the winding-up petition has been put back for a month. Continuation rates were again round about 8 to 10 per cent., with slightly lower terms on some of the higher-priced shares, which appeared to be rather scarce for delivery.

Among copper-producing concerns, Rio Tinto and Cape show a slight advance, and it is now assumed that the Spanish export duty on the metal will be very moderate. Business remains extremely quiet and other miscellaneous shares show little alteration.

TRADE AND PRODUCE.

A week of extraordinary excitement in the wheat market has ended in comparative quiet, with a pause in the wild fluctuation which has characterised Liverpool, New York, and Chicago, and an apparent check to the pretty steady rise which has lately been taking place in the English provincial markets. Not that sellers have yet shown any pressing desire to sell. On the contrary, the inclination is still to hold on, in the hope of even higher prices. But buyers have been very cautious in their operations throughout the week. They have only bought to supply immediate needs, and have never ceased to show a certain amount of confidence that there would, in no long time, be a turn in the flowing tide. It was felt generally, and sometimes expressed even among sellers, that as soon as there were indications that the war was not likely to be unduly prolonged, wheat would begin to go down; not rapidly perhaps, but still go down to a figure considerably beyond what sanguine holders at present think possible. Many English farmers still hope, perhaps believe, that 60s. per quarter will yet be attained. We hardly think so. Although the price in New York once, in a moment of fierce excitement, touched 190 cents per bushel equivalent to 63s. a quarter, 57s. is the extreme price that has been quoted in the English market, and the dealings at that rate were few and exceptional; 54s. and 55s. have frequently been demanded, but these can hardly be regarded as business quotations; 50s. to 51s. is nearer the mark; and there is no present appearance of a likelihood of going beyond that. The return of the Spanish fleet to home waters may be said to be an open confession of weakness, and so appearances seem to indicate a comparatively early conclusion of the war. Speculation seems to have run its course for the present, and cannot easily, unless something new and unexpected turns up, "resurrect" the excitement of the past

ten days. At Mark-lane on Wednesday all was quiet; it was a remarkable contrast to the animation of the previous week. Then the shipments of wheat have considerably increased. "Dornbusch" gives the shipments of bread stuffs to Europe during the week ending May 7 at 1,362,000 quarters, as compared with 1,048,000 quarters in the preceding week, and 983,500 for the week ending April 23. From India, too, the shipments last week amounted to 196,000 quarters, against 79,000 in the previous week, while a year ago we were receiving none at all from India. English farmers, it is believed, hold about 1,300,000 quarters as compared with 2,019,000 last year. There are now on the way to England at least 2,850,000 quarters, while the Continental demand is at least not increasing. According to Dornbusch the "visible supply" on May 1 was 11,800,000 quarters as compared with 12,699,000 quarters last year—a decrease undoubtedly, but not in itself, and without the aid of the war excitement, enough to have run up wheat to the height at which it has been fluttering for some time past. Nobody doubts that there are quite sufficient supplies to carry us over to the new harvest, and of the coming crops we continue to receive the most satisfactory reports. We are inclined to think, therefore, that we have now reached the top price in the wheat boom, and that in a little while prices will begin to settle down to what we may call their natural level.

There has been a fair, though not a very active, business in cotton, and nothing particular has been happening in the markets. The spot market has been quiet. Futures opened on Wednesday a point or so higher, but soon after receded a couple of points, and closed quiet and steady at one and a half to two points net loss. In Manchester things are steady, but the volume of business is not improving; indeed, the manufacturers have had fewer offers with lower prices than at the close of April. The Indian demand is fair, but China buyers are not offering much. On the whole business has a sluggish tendency.

The colonial wool sales are not going off so briskly as the previous series. Better descriptions of merinos and crossbreds are firm, but lower qualities show a decline. Yet a large proportion of the stocks are disposed of and the Continental demand is good. In Huddersfield business last week was more depressed than it has been this year. Scarcely anything is doing with the United States. Business in Leeds is quiet, with little prospect of change.

Copper is still on the down grade; and, in the present condition of the war prospects, it is not likely to improve much. Cash passed on Wednesday at £51 13s., and three months £51 7s. 6d. and 8s. 9d. combined. Settlement price, £51 2s. 6d., as compared with £51 10s. last week. In other metal trades business is well maintained, except perhaps in the Scotch iron warrant market, where, but for the firm tone in the English Midlands, there would probably have been a sensible decline. Shipbuilders continue busy, but new orders are not coming in so freely. Only 12,000 tons of new shipping were placed on the Clyde last month, against 130,000 tons for March. A general improvement reported in pig iron; and in the Glasgow market on Wednesday more business was done than for a long time, the total turnover being fully 60,000 tons. Scotch rose 1½d., Cleveland 3d., and hematite ½d., while copper was reported idle. The demand for hematite pig iron has greatly improved, and business is done at Barrow-in-Furness at fuller prices, ranging from 50s. 6d. to 52s. for parcels of mixed Bessemer numbers, net f. o. b. Shipbuilders and marine engineers there are full of work, and the number of new orders coming in is fairly satisfactory. In Birmingham business is reported as fairly healthy, but the scarcity of pig keeps the prices of wrought iron well up. Home demands are increasing in Wolverhampton, colonial business good, and shipping orders for bars, rods, and hoops satisfactory. Trade in South Shropshire excellent. Sellers decline to make any concession, and buyers are now more inclined to operate.

Coal continues in much the same condition, and there will, of course, be no change until a settlement has been made of the South Wales strike. There is now more likelihood of this than there has been for some time. The men have been holding many meetings, and there seems a growing feeling in favour of accepting Mr. Ritchie's suggestion for a conference. Of course, the President of the Board of Trade can only call it at the request of both parties to the dispute. The proposal is to base the conference on the lines of that at which Lord Rosebery presided and succeeded in settling the last great coal dispute.

The linen trade is reported quietly steady at Barnsley, but in Belfast "slow." There are numerous rumours of financial embarrassments, but nothing definite. No improvement announced in the Dundee linen trade, but considerable activity in jute, the outbreak of the plague in Calcutta having caused a rush to secure jute goods, as it is feared that foreign buyers, refusing to deal with India, might take their supplies from Dundee.

THE PROPERTY MARKET.

The total sales for last week at the Mart contrast somewhat with the similar week of last year, the amounts being £119,107 and £142,874 respectively, or a difference of £23,767. There seems no adequate explanation of this drop in business at this season, except that high-class property has been rather scarce in the market recently. The smaller investments offering during the week, however, sold well. The official monthly summary of sales shows some interesting results. At the Mart the sales for last April were considerably in advance of those of last year, being £475,689, as against £309,909. Private contract sales also come out well as compared with last year, £41,615 to £27,248. But the country and suburban sales were only £297,033 this year, while for April, 1897, they were £407,195. Probably this may be largely accounted for by the somewhat remarkable boom in licensed property last year. It has now become almost a drug in the market. Several good properties were disposed of yesterday week, though the total for the day was little above £35,000. Messrs. Stimson & Son ran up a total of £8,000, their chief dealings being in Bermondsey freeholds. Nos. 51, 61, 104, and 106, Spa-road, producing a gross rental of £162 8s., made £2,250, and Nos. 116 and 132, Jamaica-road, gross rental £97 10s., £1,360. Messrs. C. C. and T. Moore had on hand numerous investments in all parts of London, their aggregate being £7,550. A terrace of thirteen dwelling-houses and two shops, Nos. 234 to 262, even, Rotherhithe New-road, Rotherhithe, leasehold for a term of sixty-two and a half years, at ground-rents amounting to £31, gross annual rental £554 8s., fetched £4,000, and other properties also went well. Messrs. Driver, of Holloway, sold the freehold of No. 61, Albion-road, Stoke Newington, let at £125 yearly, for £2,250; and four leasehold houses, Nos. 2, 10, 12, and 14, Pemberton-terrace, Holloway, term fifty-three years, ground-rent £42, rental £160 per annum, for £1,560. The "Three Pigeons" public-house at Brentford went for £5,000. It is a freehold, with a rental of £100, and was submitted by Messrs. Orgill, Marks, & Orgill. Friday's returns were only £12,500, but they included several excellent freeholds. Riverside house and two acres in Staines realised £2,600. Another freehold in Blackfriars-road, of the annual rental of £120, was disposed of by Messrs. Woods & Snelling for £2,300.

With nothing exceptionally high-class on offer, the total of sales at the Mart on Monday, nevertheless, went up as far as £48,527. Mr. Smallpeice had the highest total; but the most interesting of his lots—the Crown lease of the Lowther Arcade, Strand—was withdrawn at £30,000. The actual bidding went from £15,000 to £24,100. Mr. Smallpeice was more successful with some leasehold properties at Campden Hill, Kensington, which produced a total of £11,200. Freehold properties in Gordon-road, Kilburn, bringing in a rental of £348, were sold by Mr. Percival Hodson for £3,550. The "Gun" Tavern in Church-street, Croydon, freehold, rental £150, was sold by Messrs. Blake & Carpenter, at £4,000. A freehold ground rent £125, in Dryden-road, reversion in ninety-eight years, brought £3,000; and another in Mitcham, Surrey, £31 10s., reversion in two years, went for £7,650. Messrs. Elliot, Son, & Boyton obtained excellent prices for leasehold investments at Norwood, Finsbury Park, &c. The lot at Norwood consisted of houses in Church-road, with eighty and a half years to run, a ground rent of £140, and annual rental of £495, and was disposed of for £6,320.

No fewer than nine of the lots offered at the Mart on Tuesday were left unsold, and this accounts for the smallness of the day's total, £19,055. To this total, Messrs. Debenham, Tewson, & Co. contributed £11,750, the price of a city freehold property, at 37, Wood-street, and 5, Little Love-lane, let at £500 per annum. Two leasehold residences in Lexham-gardens, Kensington, were sold by Messrs. Rogers, Chapman, & Thomas, for £2,050; and a freehold ground rent of £12 per annum on property in Larkhall-rise, Clapham, with reversion in three and three-quarter years, was sold by Messrs. Ventom, Bull, & Cooper for £1,266. Three licensed houses changed hands at the Masons' Hall Tavern on Tuesday, and a fourth, the Greyhound Hotel at Croydon, was withdrawn from competition, the owner intimating his willingness to treat privately. The lease and goodwill of the Lord Raglan, in St. Martin's-le-Grand, City, held for a term of forty-nine years at £375 per annum, sold for £40,000. The lease and goodwill of the White Ferry House in Pimlico, with forty years to run at a rent of £150, offered by Messrs. Schofield, Evans, & Loader, changed hands at £37,310. The Lothian Arms, Lothian-road, Camberwell, was disposed of by Mr. William Rolfe for £3,110.

Wednesday's proceedings at the Mart were rather uninteresting, and the day's total only reached £20,029. Mr. Alfred Richards had the largest account, consisting of a number of gas and water shares. Among these were 500 £10 shares in the Southend Waterworks Company, which fetched from £15 5s. to £17 7s. 6d. each, realising a grand total of £7,957.

Next Week's Meetings.

Monday, May 16.

Compagnie Générale des Asphaltes	Winchester House, 1 p.m.
Millars' Karri & Jarrah Forests ...	Winchester House, noon.

Tuesday, May 17.

Chardwar Teas	128, Leadenhall-street, 3 p.m.
Clement, Gladiator & Humber (France)	Hotel Cecil, 2 p.m.
Lankapara Tea	218, Leadenhall-street, 12.30 p.m.
Metropolitan District	Westminster Palace Hotel, 1 p.m.
New Vancouver Coal & Mining ...	12, Old Jewry-chambers, 3 p.m.
West Middlesex Waterworks ...	19, Marylebone-road, noon.

Wednesday, May 18.

Broxburn Oil	Glasgow, 2 p.m.
Investment Trust Corporation ...	Cannon-street Hotel, 2 p.m.
Lebong Tea	93, Cannon-street, 11.30 a.m.
Santa Rita Nitrate	Winchester House, 2 p.m.
Van Diemen's Land	31, Finsbury Circus, noon.
Vizianagoram Mining	Winchester House, noon
West India and Panama Telegraph	Winchester House, noon.
West London Dairy	6, Spring-street, W., 2.30 p.m.

Thursday, May 19.

Colney Hatch Gas	New Southgate, 4 p.m.
Land and Mortgage of Egypt ...	Cannon-street Hotel, noon.
Singapore Gas	Cannon-street Hotel, 1 p.m.
Surrey Commercial Gas	106, Fenchurch-street, 1 p.m.
Waterford and Central Ireland Railway	Dublin, 2 and 2.30 p.m.

Friday, May 20.

Burgess Hill Waterworks	Burgess Hill, 6.30 p.m.
Hong Kong and China Gas ...	Gresham House, noon
Scottish Australian Investment	Winchester House, noon

Answers to Correspondents.

Questions about public securities, and on all points in company law, as well as on the position of life insurance offices and their promises, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway ?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

MEDICUS.—Many thanks for the pamphlet. There has been a decided rise in the stock since you wrote, and it is now nearly at its full value, as there must be a decrease in the dividend. I think you would be prudent in selling part of your holding at any rate, and so lessen the cost of the balance.

MINING RETURNS.

Messrs. A. Barsdorf & Co. have received a cablegram from the Chamber of Mines of the South African Republic, Johannesburg, stating that the total gold output of all the mines of the Transvaal making returns to the Chamber amounted for April to 353,243 oz., comprising 335,125 oz. for the Witwatersrand district, and 18,118 oz. for the outside districts. The production of the Witwatersrand district was 325,907 oz. in March, 1898, and 235,698 oz. in April, 1897, and of the outside districts 21,736 oz. in March, 1898.

MYALL'S UNITED.—2,100 tons crushed for a yield of 363 oz., tailings assayed 2 dwt. per ton. By cyanide process—1,600 tons of tailings treated, yielding 233 oz.

MENZIES' CRUSOE.—Cyanide process—900 tons tailings ; yield, 534 oz. gold ; value, £1,600.

ZEEHAN-MONTANA.—Have shipped 220 tons of silver lead ore containing about 136 tons 8 cwt. of lead, and 19,580 oz. of silver.

MOUNT ZEEHAN (TASMANIA).—Have shipped 25 tons of silver lead ore, containing about 17¼ tons of lead and 2,075 oz. of silver.

GOLD FIELDS OF MYSORE.—Last month's return :—30 oz. of gold obtained from 660 tons sand, cyanide process ; 192 oz. of gold obtained from amalgamation.

HALL MINES (BRITISH COLUMBIA).—4,734 tons of ore smelted, yielding 218 tons matte, containing approximately 92 tons copper, 71,460 oz. silver, 254 oz. gold.

MYSORE REEFS (KANGUNDY).—April return :—686 tons of ore crushed, yielding 192 oz. of gold.

ST. JOHN DEL REY.—Gold produce month of April, £23,380 ; yield per ton, 0·92 of an ounce troy.

STANHOPE.—Last month's crushing yielded 989 oz.

WAITEKAURI.—During April the mill ran twenty-four days, yielding £4,851 from 1,680 tons.

WEALTH OF NATIONS.—Crushed during April 650 tons, gross yield being 433 oz. of gold.

WORCESTER EXPLORATION AND GOLD.—Last month's crushing yielded 2,961 oz. of gold.

BURMA RUBY.—65,000 loads washed, producing rubies valued at Rs. 77,000.

GLYNN'S LYDENBURG.—From mill : crushed, 1,251 tons ; obtained, 510 oz. of fine gold, equal to 556 oz. standard gold. From cyanide works : treated, 840 tons, yielding 173 oz. of fine gold, equal to 189 oz. standard gold.

HIGHLAND CHIEF.—During the last fortnight crushed 120 tons, yielding 70 oz.

JUBILEE.—Last month's return :—Tons crushed, 5,239 ; ounces obtained, 1,956 ; tailings yielded 624 oz.

MONTANA.—The total output for April was—gold, 2,000 oz. ; and silver, 8,540 oz., obtained from 6,400 tons of ore crushed in the mills and 4,305 tons of tailings from the dams brought under treatment.

OTTO'S KOPJE.—7,031 loads washed during the week ended May 5, 200 carats won, including stones of 12 and 10 carats each.

PIGG'S PEAK.—Crushed, 2,250 tons, for 293 oz. ; cyanide, 2,600 tons, for 389 oz. ; total yield, £2,300.

TRANSVAAL GOLD MINING ESTATES.—From mill—crushed, 9,726 tons ; obtained 3,403 oz. of fine gold, equal to 3,712 oz. standard gold. From outside cyanide works—treated, 2,373 tons, yielding 1,004 oz. of fine gold, equal to 1,095 oz. standard gold.

WAIHI.—For the period ended April 30 the two mills ran twenty-four days, yielding £22,851 from 6,690 tons crushed. In addition £7,100 has been obtained from various crushings at the Victoria Mill before the above period.

WEMMER.—Crushed, 6,863 tons, yielding 4,366 oz. ; cyanide plant, 4,600 tons treated, yielding 932 oz. ; and from concentrates, 150 tons caught, assaying 135 dwt. per ton.

WITWATERSRANDT (KNIGHT'S).—Crushed, 15,280 tons, yielding 4,253 oz. gold ; 8,160 tons cyanide tailings treated, yielding 1,403 oz. gold.

NIGEL.—Last month's return :—1,414 oz. battery ; 1,792 oz. cyanide.

BARRETT.—Gold yield for April, 735 oz

GREAT BOULDER PERSEVERANCE.—Returns from smelting works not yet to hand. Number of tons of ore milled, April—880 tons for 1,944 oz.

HENRY NOURSE.—Crushed 8,655 tons, producing 5,688 oz. : treated 6,450 tons cyanide, producing 3,174 oz.

LANCASTER.—8,941 tons crushed, yielding 2,880 oz. ; 5,685 tons of tailings treated, yielding 1,244 oz.

LISBON-BERLYN.—Ore mined, 2,400 tons ; ore crushed, 2,400 tons ; treated by cyanide, 2,050 tons ; fine gold recovered, 600 oz.

NATAL COLLIERIES AND DURBAN COALING STATION.—Output for March—3,152 tons.

SHEBA GOLD.—6,600 tons of ore, 3,005 oz. ; 3,600 tons of tailings, 949 oz. ; 110 tons of concentrates, 800 oz.

ANGELO.—Tons crushed, 6,836 ; ounces recovered from mill, 3,377 ; tons treated by cyanide, 5,696 ; ounces recovered, 2,595 ; ounces recovered by products, 14 ; ounces recovered by slimes, 134.

BONANZA.—From mill—crushed 5,240 tons, obtained 5,074 oz. of gold ; from cyanide and slimes works—treated 4,944 tons, yielding 3,041 oz. of gold.

BRILLIANT AND ST. GEORGE UNITED.—Last month's crushing :—3,684 oz. of gold from 2,371 tons of quartz.

CROWN DEEP.—Tons crushed, 20,400 ; yield in fine gold from mill, 5,812 oz. ; tons of sands and concentrates treated by cyanide works, 17,240 ; yield in fine gold, 4,134 oz. ; tons of slimes treated, 2,880 ; yield in fine gold, 737 oz.

FRONTINO AND BOLIVIA.—Result for April :—Produce value, £11,140.

GEORGE GOCH AMALGAMATED.—During April 8,353 tons were crushed, yielding 1,642 oz. gold, and 1,095 oz. gold from tailings.

GRAND CENTRAL.—Crushed, 4,900 tons, yielding bullion estimated at $62,200 ; concentrates estimated to realise $22,400.

GREAT BOULDER PROPRIETARY.—Crushing returns for the past fortnight :—Tons of ore crushed, 1,425 ; yield of gold in ounces, 3,157.

NEW COMET.—Tons crushed, 4,990 ; ounces recovered from mill, 1,815 treated by cyanide, 4,126 ; ounces recovered, 1,167 ; ounces recovered by products, 13 ; ounces recovered by slimes, 53.

NEW KLEINFONTEIN.—Tons crushed, 10,080 ; ounces recovered from mill, 3,195 ; tons treated by cyanide, 7,568 ; ounces recovered from cyanide, 1,248.

NEW QUEEN.—Result of crushing for past fortnight :—405 tons, yielding 235 oz gold.

NOURSE DEEP.—Tons crushed, 7,423 ; yield in fine gold from mill, 2,414 oz. ; tons of sands and concentrates treated by cyanide works, 5,723 ; yield in fine gold, 1,556 oz ; total yield in bullion, 4,913 oz , equal to 3,970 oz. fine gold.

ROODEPOORT UNITED MAIN REEF.—Tons crushed, 7,575. Produced 3,151 oz. ; produce from cyanide, 941 oz. ; total, 4,092 oz.

VILLAGE MAIN REEF.—Crushed, 8,480 tons, yielding 5,009 oz. of gold ; cyanide, treated 8,470 tons, producing 3,021 oz. of gold.

THE VAN RYN GOLD MINES ESTATE.—Crushed, 11,347 tons, yielded 3,119 oz. bar gold ; cyanide works, 8,190 tons of tailings treated, yielded 1,254 oz.

BLOCK "B" LANGLAAGTE.—Production for April :—Mill—ore crushed, 10,943 tons of 2,000 lb. ; gold retorted, 2,740 oz. Tailings (cyanide process)—tons treated, 6,750 ; gold recovered, 1,324 oz. Concentrates (cyanide process)—tons treated, 132 ; gold recovered, 370 oz.—total gold recovered, 4,434 oz.

CASSEL COAL.—Output for April, 23,580 tons.

CHIAPAS.—1,600 tons of ore crushed, yielding 62 tons of concentrates. The stamp mill ran twenty-six days, crushing 1,350 tons of tailings, yielding 160 oz. gold.

CLYDESDALE (TRANSVAAL) COLLIERIES.—Clydesdale sales for April amount to 20,250 tons.

CROWN REEF.—Output for April :—Yield in smelted gold from mill, 6,934 oz. ; from cyanide works, 4,270 oz. ; from slimes works, 227 oz.

DE LAMAR.—Return for April :—Beached during the month, 1,831 tons ; bullion produced from cyanide treatment, $16,661 ; surplus from clean up of old mill, $3,000 ; estimated value of ore shipped to smelters, $2,000.

GELDENHUIS MAIN REEF.—909 tons crushed, yielding 200 oz. ; 540 tons treated by cyanide, yielding 129 oz.—total, 329 oz.

GELDENHUIS ESTATE.—Crushed, 16,464 tons : obtained from mill, 6,395 oz. ; from concentrates by cyanide, 933 oz. ; from tailings by cyanide, 2,700 oz. ; from slimes by cyanide, 526 oz.—total, 10,554 oz.

HOPE'S HILL (SOUTHERN CROSS, W.A.).—Crushed, 40 tons for 40 oz.

JUMPERS GOLD.—Results for April :—Crushed, 11,500 tons ; obtained from mill, 3,906 oz. ; from concentrates by cyanide 649 oz. ; from tailings by cyanide, 843 oz.—total, 5,398 oz.

LAKE VIEW CONSOLS.—Clean up for April :—Crushed, 5,670 tons, yielding 5,955 oz. of gold ; tailings assay, 19 dwt. 16 gr. per ton ; cyanide return 3,408 tons of tailings treated, yielded 2,804 oz. 8 dwt. of gold ; tailings (residues) assay, 3 dwt. 23 gr. per ton. Have not cleaned up concentrates and slimes treated during last month. Total return for April (exclusive of concentrates and slimes), 8,759 oz. of gold.

LANGLAAGTE ESTATE.—Mill—ore crushed, 20,668 tons of 2,000 lb ; gold retorted, 7,769 oz. ; tailings, cyanide process—tons treated, 12,150 ; gold recovered, 1,556 oz. ; concentrates, cyanide process—tons treated, 624 ; gold recovered, 1,864 oz.

LANGLAAGTE STAR.—Mill—ore crushed, 4,993 tons of 2,000 lb. ; gold retorted, 2,172 oz. ; tailings, cyanide process—tons treated, 5,280 ; gold recovered, 942 oz.

MEYER AND CHARLTON.—Crushed 9,082 tons, producing 2,682 oz. Extracted rom tailings, 1,254 oz.

NORTH RANDFONTEIN.—Mill—ore crushed, 6,743 tons of 2,000 lb. ; gold retorted, 1,533 oz. ; tailings, cyanide process—tons treated, 3,840 ; gold recovered, 562 oz. ; concentrates—cyanide process—tons treated, 55 ; gold recovered, 130 oz.

NEW GUADALCAZAR QUICKSILVER MINES.—The production of quicksilver for the past month amounts to 7,600 lb.=101¼ flasks.

PAARL CENTRAL.—From Mill—crushed 5,785 tons, yielding 1,119 oz. of gold. From cyanide works—treated 3,625 tons, yielding 940 oz.—total 2,059 oz.

PORGES RANDFONTEIN.—Mill—ore crushed, 7,703 tons of 2,000 lb. ; gold retorted, 2,463 oz. Tailings, cyanide process—tons treated, 5,625 ; gold recovered, 679 oz. Concentrates, cyanide process—tons treated, 111 ; gold recovered, 309 oz.

PRINCESS ESTATE.—Crushed, 6,485 tons ; gold won, 1,914 oz. ; extracted from tailings, 836 oz. ; total, 2,750 oz.

ROBINSON.—Mill—crushed, 14,657 tons of ore, yielded in smelted gold 10,416 oz. From concentrates (by chlorination), 1,160 oz. ; from tailings (cyanide process, 3,373 : from slimes, 1,430 oz. From concentrates bought (by chlorination), 2,914 oz.

ROBINSON RANDFONTEIN.—Mill—ore crushed, 4,531 tons of 2,000 lb. ; gold retorted, 1,982 oz. Tailings (cyanide process)—tons treated, 3,960 ; gold recovered, 604 oz. Concentrates (cyanide process)—tons treated, 110 ; gold recovered, 247 oz.

SIMMER AND JACK.—Crushed, 34,780 tons ; obtained 9,937 oz. of gold from mill, 3,700 oz. of gold from tailings by cyanide, and 714 oz. of gold from slimes ; total, 14,351 oz. of gold during the month of April

TREASURY GOLD MINES.—Output for April, 5,300 tons, yielded 3,649 oz.

UNITED IVY REEF.—Last month's output was 615 oz. ; crushed 1,100 tons.

WEST RAND.—Crushed 3,652 tons, yielded 791 oz. ; cyanide treated, 2,734 tons, yielded 675 oz.

WOLHUTER.—Result of operations for April—Crushed, 12,636 tons ; total ounces produced by mill and cyanide, 6,823.

BARNATO GROUP OF MINES.—New Primrose, 9,653 oz ; Glencairn Main Reef, 6,747 oz. ; Ginsberg, 2,375 oz. ; Rietfontein A, 4,863 oz. ; Roodepoort, 1,138 oz. ; Buffelsdoorn, 2,225 oz. ; New Spes Bona, 1,894 oz. ; Consolidated Main Reef, 2,491 oz. from 6,159 tons battery and 1,186 oz. from 3,456 tons cyanide.

CROWN REEF.—Working results for April—crushed by 120-stamp mill, 15,426 tons. Yield in smelted gold, 6,934 oz. ; from 120-stamp cyanide works, 4,270 oz. ; from slimes works, 227 oz.

DURBAN-ROODEPOORT.—Results for April—quartz milled, 10,160 tons for 3,076 oz. ; tailings treated, 6,640 tons, for 1,152 oz.

FERREIRA.—Results for April—crushed, 10,869 tons ; bar gold extracted, 8,136 oz. ; concentrates caught, 282 tons ; assay value of concentrates, 4 oz. 10 dwt. fine gold per ton, equal to, say, 1,260 oz. ; bullion produced from tailings, 3,006 oz. ; bullion produced from slimes, 1,114 oz.

FRANK SMITH DIAMONDS.—3,650 loads washed, producing 186 carats.

JUMPERS DEEP.—Tons crushed by eighty stamps, 11,187 ; yield in fine gold from mill, 4,075 oz. ; tons of sands and concentrates treated by cyanide works, 8,374 ; yield in fine gold from sands and concentrates, 2,095 oz. ; total yield in bullion 7,313 oz., equal to 6,170 oz.

MAY CONSOLIDATED.—The yield of gold during April was 5,465 oz., from 13,013 tons crushed. Cyanide, 2,666 oz. from 8,760 tons ; total for month, 8,131 oz.

NEW MODDERFONTEIN.—Output for April—7,112 tons yielded 2,928 oz.; cyanide, 912 oz.

ROSE DEEP.—Tons crushed, 15,164; yield in fine gold from mill; 4,666 oz.; tons of sands and concentrates treated by cyanide works, 11,100; yield in fine gold from sands and concentrates, 2,670 oz.; tons of slimes treated, 5,568; yield in fine gold from slimes, 456 oz.; total yield in bullion 10,223 oz., equal to 7 792 oz. fine gold.

YORK.—4,224 tons crushed in April, yielding 877 oz., while 3,510 tons of tailings gave 564 oz., while 3,510 tons of tailings gave 584 oz.—total, 1,461 oz.

ALBION (TRANSVAAL).—Crushed 1,300 tons; yield 372 ozs., 860 tons from stopes; 440 tons from dump.

CHAMP D'OR FRENCH.—Crushed 5,428 tons yielding 2,243 oz. Cyanide, 3,850 tons treated yielding 933 oz. Concentrates 85 ozs.

WINDSOR GOLD MINING COMPANY.—Result for April:—Crushed 3,958 tons, producing 1,224 oz.; obtained by cyanide, 747 oz. Total, 1,971 oz of gold. Profit for month, £3,139.

* From January 1. † From April 1, 1898. ‡ From April 15, 1897. § From October 1, 1897.

It is announced by the General Post Office that private cipher and code telegrams for the Bank of Italy, Rome, will be accepted.

The Ranfurly Mining Company report the discovery of a seam of cannel coal 3 ft. 3 in. thick at Dungannon, County Tyrone. Mr. Munro, the engineer, expresses the opinion that there are many good seams of coal lower down. If true, the discovery will be a very important one, especially for Belfast; but it will be well to wait a little before jumping to conclusions.

At the annual meeting of the proprietors of the Equitable Life Insurance Society it was resolved to present their president, Mr. Richard Twining, with his portrait in oil. It will ultimately take its place in the board-room among portraits of other officials and directors of the society. Mr. Twining is in his ninety-first year, has been on the board for more than a quarter of a century, and his father and grandfather had also been members of the directorate.

NOTICES.

The numbers are announced of thirty-two 4 per cent. consolidated first mortgage debentures amounting to £3,200 of John Bazley White & Brothers, Limited, which have been drawn for payment at 110 per cent. on June 30 next.

Mr. Killingworth Hedges, C.E., has joined the board of the Somzée Greyson Intensified Gaslight Syndicate, Limited.

The offices of the Sheba Gold Mining Company, Limited, have been removed to No. 5, St. Helen's-place, E.C.

Messrs. N. M. Rothschild & Sons announce that a drawing of the Egyptian State Domain mortgage bonds amounting to £206,380 nominal capital will take place this month. The bonds so drawn will cease to bear interest from June 1.

It is announced that the coupons due May 15 on the City of Vancouver (British Columbia) 6 per cent. debentures Nos. 1 to 308 will be paid, on and after the 16th inst., by the Bank of British North America.

Mr. Frank Gardner has been appointed chairman of the British Westralia Syndicate, Limited, in place of the late Mr. Woolf Joel.

Mr. Thomas Morgan Harvey has retired from the firm of Harvey & Greenacre. The business will in future be carried on by the continuing partners under the same style.

The Union Bank of London, Limited, has secured the premises No. 8, High-street, Notting Hill Gate, W., and will open a branch there as soon as the necessary alterations are completed.

The numbers are published of the bonds, amounting to £11,500, of the loan of £347,000 (part of £500,000) of the City of London 3 per cent. bonds (Artisan's Dwelling Act, 1881), which have been drawn to be paid off at par on April 5, 1899.

For the purpose of preparing the dividend payable on the 1st prox., the London and Midland Bank, Limited, notify that the transfer books of the Chesterfield Gas and Water Board 2¾ per cent. loan will be closed from May 26 to June 1, both days inclusive.

The monthly balance-sheet issued by the London and Midland Bank, Limited, shows that on May 4 the current deposit and other accounts were £22,973,768; the cash in hand and at the Bank of England, £2,627,281; money at call and short notice, £2,664,416; investments, £4,513,763; the bills of exchange, £2,860,255; advances on current accounts, loans on security, and other accounts, £12,808,032.

The name of the Law Accident and Contingency Insurance Society has been changed to Law Acciden Insurance Society (Limited).

The numbers are announced of 106 Equipment Trust bonds (1890) of the New York, Pennsylvania, and Ohio Railroad Company which have been drawn for payment at par on June 1.

Mr. Walter F. Mills, of the firm of Newson-Smith, Mills, & Co. has been appointed official liquidator of R. N. Cunningham & Co. (Limited), in the place of the late Mr. H. Newson-Smith.

The Mount Lyell Comstock Company (No Liability) has established a London office and branch register of shareholders at 138, Leadenhall-street, London, E.C., and constituted Messrs. D. J. Mackay and David Tweedie the London board

Applications for £1,660,000, the British portion of the Greek Guaranteed 2½ per cent. loan, were received at the Bank of England on the 10th inst., and amounted to £3,036,500. The allotments were about 54 per cent. of the amounts applied for.

RAILWAY TRAFFIC RETURNS.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, May 7:—Ps. 6,000; increase, Ps. 100. Aggregate from January 1, Ps. 161,550; increase, Ps. 4,580.

Quebec Central Railway.—Receipts for third week of April, $7,036; decrease, $2,328. Aggregate from July 1, $102,791; decrease, $17,226.

Mobile and Birmingham Railroad.—Traffic for third week of April, $5,671; increase, $141. Aggregate from July 1, $303,174; decrease, $2,381.

Algeciras (Gibraltar) Railway.—Traffic for week ended April 30, Ps. 20,450; increase, Ps. 2,590. Aggregate from July 1, Ps. 885,242; increase, Ps. 39,668.

West Flanders Railway.—Gross receipts for week ending May 8, £2,109; decrease, £480. Total from January 1, £42,205; increase, £466.

West of India Portuguese Railway.—Week ending April 16, Rs. 4,574; increase, Rs. 1,159. Aggregate from January 1, Rs. 68,564; increase, Rs. 19,772.

Puerto Cabello and Valencia Railway.—Traffic receipts for week ending March 25, £549; decrease, £124. Aggregate from January 1, £11,211; decrease, £4,722.

Delhi Umballa Kalka Railway.—Receipts for week ended May 7, Rs. 26,200; decrease, Rs. 1,500. Aggregate from January 1, Rs. 6,33,200; increase, Rs. 1,52,700.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending April 9, Rs. 12,831; increase, Rs. 3,708. Aggregate from January 1, Rs. 1,03,173; decrease, Rs. 9,005.

Western of Santa Fe Railways.—Gross receipts for week ending May 7, $31,161; increase, $6,831.

Villa Maria and Rufino Railway.—Traffic for week ending May 7, $413; increase, $172. Aggregate from January 1, $6,472; increase, $1,053.

Southern Mahratta Railway.—Receipts for week ended April 16, Rs. 1,26,023; decrease, Rs. 11,143.

Bengal Central Railway.—Traffic receipts for week ending April 16, Rs. 15,212; decrease, Rs. 158. Aggregate from January 1, Rs. 312,113; increase, Rs. 43,578.

Cleator and Workington.—Gross receipts for the week ending May 7 amounted to £1,017, an increase of £58. Total receipts from January 1, £18,437, a decrease of £646.

Cockermouth and Keswick Railway.—Receipts for the week ending May 7, £896; increase, £69. Aggregate from January 1, £15,018; increase, £1,406.

Peruvian Corporation Railways.—Receipts for month of April, $240,025; decrease, $21,030.

Burma Railways.—Traffic receipts for week ending Aptil 9, Rs. 1,80,322; decrease Rs.1,144. Aggregate from January 1, Rs. 30,74,188; decrease, Rs. 80,682.

Assam Bengal Railway.—Traffic receipts for week ending April 9. Rs. 30,465; increase, Rs. 10,726. Aggregate from January 1, Rs. 36,736; increase, Rs. 62,745.

H.H. The Nizam's Guaranteed State Railways.—Traffic receipts from January 1 to April 16 were Rs. 12,05,561; increase, Rs. 71,306.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S. F. Snk. Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

Working-Capital Column.—In working-capital column, D stands for *debit*.

* Company formed this year. † Interim dividends are given as actual distribution made. ‡ *Total* div. § Crop 1896.

DIVIDENDS ANNOUNCED.

MISCELLANEOUS.

Broken Hill Proprietary Block 10 Company, Limited.—Dividend No 57 of 2s. per share declared due.

New Share Loan Company, Limited.—Interim dividend at the rate of 10 per cent. per annum for the half-year ending 31st inst.

Sweetmeat Automatic Delivery Company, Limited.—Interim dividend for the quarter ended March 31, at the rate of 20 per cent. per annum, the same as for the corresponding period of last year.

Silverton Tramway Company, Melbourne.—2s. per share, payable on June 1.

Grand Hotel, Manchester.—Dividend to be paid on the preference shares to March 31, and an interim dividend at the rate of 8 per cent. per annum upon the ordinary shares for same period.

Ashley Gardens Properties, Limited.—Interim dividend at the rate of 7 per cent. per annum on the ordinary shares for the half-year ended March 31.

Provincial Tramways Company, Limited.—Interim dividend of 2s. 6d. per share on the ordinary shares for the year ended September 30.

Coburg Hotel, Limited.—Further distribution at the rate of 12 per cent. per annum, which, with the interim dividend, will make a total of 10 per cent. for the year.

Provincial Tramways, Limited.—Interim dividend of 2s. 6d. per share on the ordinary shares.

Brunner, Mond & Co.—25 per cent. on the ordinary shares, and 7 per cent. on the preference shares; balance forward of £82,212.

Western and Brazilian Telegraph Company, Limited.—Payment recommended of 6s. 9d. per share, making, with the interim dividend paid in November last, a total distribution of 3¾ per cent. for 1897. This will give 6s. 9d. to the ordinary, 6s. to the preferred ordinary, and 9d. to the deferred ordinary shareholders.

Reuter's Telegram Company.—Dividend of 2½ per cent., making 5 per cent. for the year, placing £5,277 to the reserve fund and carrying forward £411.

Grand Central Mining Company, Limited.—Interim dividend at the rate of 2s. per share, warrants for which will be posted on 28th inst.

Brilliant and St. George United Gold Mining Company, Limited.—1s. per share, payable on 21st inst.

Fraser and Chalmers, Limited.—5 per cent. on the ordinary shares, payable on 24th inst.

Burbank's Birthday Gift Gold Mines, Limited.—Interim dividend of 1s. per share. Warrants will be posted on or after 31st inst.

BREWERIES.

Strettons Derby, Limited.—Usual interim dividend at the rate of 7 per cent. per annum on the ordinary shares.

RAILWAYS.

Southern Brazilian Rio Grande Do Sul Company, Limited.—Dividend, at the rate of 6 per cent. per annum for the second half of 1897; £26,757 carried forward.

Delhi-Umballa-Kalka Company, Limited.—Interim dividend at the rate of 5½ per cent. per annum for the half-year ended December 31 last, as compared with 3½ per cent. per annum for the corresponding period of 1896.

INSURANCE.

Guardian Fire and Life.—5s. 6d. per share, making, with the interim dividend 8 per cent. for the year.

Union Assurance Society.—Directors have resolved to increase the dividend on the shares from 18s. to £1 per share, payable, 10s. half yearly in January and July, first payment to be made on July 11 next.

Marine Insurance.—Dividend of £2 per share in respect for the year 1895 (the same dividend was paid last year), and £25,000 added to the reserve fund, which will then amount to £575,000. Of the accruing dividend, 10s. per share was paid in January last, and the balance will be paid on July 11.

BANK.

Anglo-Egyptian, Limited.—Interim dividend of 4s. per share for the half-year ended February 28, payable on June 1.

A telegram from Brisbane states that "informations have been laid against the late directors and auditors of the Queensland National Bank in consequence of revelations of the Inquiry Commissioners."

The gold exported from New Zealand during April amounted to 15,220 oz., of the value of £56,948, as compared with 18,136 oz., of the value of £71,069, in the corresponding month of last year.

Austria has decided not to order a temporary suspension of the corn duties in consequence of the rise in the price of wheat.

The export of gold from the Cape during the month of April amounted to £1,145,520.

The German trade returns for the first quarter of this year show an increase of £3,396,850 in the exports and £8,444,750 in the imports.

THE

LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,

On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.

The advantages of such Insurance are as follows:—

1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,

In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.

Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

HEAD OFFICE:

The Investors' Review.

The Passing of Mr. Gladstone.

When this aged statesman retired from office in 1894 we published an appreciation of his career to which there is little now to be added. His public life closed then, but none the less will the nation now mourn his departure, ripe in years though he was; and not the United Kingdom alone: all European peoples may well join in our mourning. He has been so long before the world, and has played so many parts in public life, that we of the younger generation who are familiar only with his later career, and with the apparent failure of the Irish policy to which he committed the Liberal Party in 1885, are apt to overlook some of the most striking and picturesque episodes in his life's history. Far has he travelled from that August day in 1841, when he stood before the electors of Newark, to seek re-election on his appointment as Master of the Mint in Sir Robert Peel's administration, and promised protection to the farmers, "adequate protection, through the means of the sliding scale." When Sir Robert Peel, driven by stress of circumstances and allegiance to the will of the people, became a free trader, Mr. Gladstone went with him, and in this aspect of Sir Robert's character he was a Peelite all his life through. Aristocratic in instincts and tastes, no man of his time listened more attentively to the wishes of the democracy, or more earnestly endeavoured to carry out in legislative enactments what he conscientiously believed to be its mandate. In this respect

Mr. Gladstone was always a follower and fanner of public opinion, seldom the creator of that opinion. Masterful he was in many of his attitudes; self-sacrificing, too, on occasion, and, we believe, always thoroughly conscientious. But his great strength lay in interpreting and bringing home to the common understanding, and, in spreading the knowledge of what he believed to be the policy of the hour most popular with the majority of the electorate. He was the servant of the people always, not their master; and as the people is given frequently to change its views, he also in the course of his long life presented many inconsistencies to the cold-blooded spectator of his words and deeds.

But Mr. Gladstone was not really inconsistent with himself, and we do not believe that he ever changed an opinion for any selfish object. No statesman England ever had displayed a greater sacrifice of self than he did when he made the mistake of obeying the mandate, as he took it to be, of the great body of the Irish people in introducing the Home Rule Bill. Events have proved that to have been a mistake, and those of us who ardently supported him then, for the most part have had since to admit that the Home Rule he meant to bestow upon Ireland was a gift for which the Irish people are, perhaps through no fault of their own, still unripe. Whatever his mistakes were, however, Mr. Gladstone was always, and all through his career, on the side of freedom, public liberty, the enlargement of knowledge, and the spread of wealth among the masses. When he grasped the principles of free trade, it was to assimilate them thoroughly, and he never swerved from them throughout his public life. In a like manner, and in spite of inconsistencies such as his strongly expressed sympathy with the Southern Confederacy at the outbreak of the Civil War in the United States, he never forswore his allegiance to the development of liberty in oppressed nationalities. Ten years after he stood before the electors of Newark as a landlord's man, a high Tory and convinced Protectionist, he was writing those letters about the cruelties of the Government of Naples which stirred a spirit that drove King "Bomba" from his throne; and in 1867, when taxed with his sympathy with the American Confederate States, he gave an explanation which shows that, however his instincts might have misled him, at the time he fully believed severance to be the best policy in the interests alike of State and individual freedom. "My sympathies were then," he wrote, "where they had long before been, where they are now—with the whole American people. I probably, like many Europeans, did not understand the nature and working of the American Union. I had imbibed justly, if erroneously, an opinion that twenty or twenty-four millions of the North would be happier and would be stronger (of course assuming that they would hold together) without the South than with it, and also that the negroes would be much nearer to emancipation under a Southern Government than under the old system of the Union, which had not, at that date, 1862, been abandoned, and which always appeared to me to place the whole power of the North at the command of the slave-holding interests of the South. As far as regards the special or separate interests of England in the matter, I, differing from many others, had always contended that it was best for our interest that the Union should be kept entire."

Some will say that this explanation proves the curious tendency of Mr. Gladstone's mind to a certain form of Jesuitical casuistry, and no doubt his mind was fundamentally ecclesiastical in its cast. He would have been a magnificent administrator as a bishop, and all through his career as a popular politician, at the head of a great Party, he never lost his taste for theological discussion any more than his love of Greek literature. He was not a great writer on any of the subjects that he took up, and his excursions into theological controversy will not be the incidents of his life by which he is likely to be most remembered. But he was a great orator, a man with a heart in him that his audience felt the beating of as they listened to the majestic roll of his eloquence and vehement declamation; and he was more than that: he was a great constructive statesman who has indelibly left his mark upon the laws and economic life of the land and the developments of our nineteenth century civilisation. Sadly, therefore, will the nation he loved so well and served so faithfully bid him a last adieu. All the deeper will be the sorrow as we contrast him with the men he has left behind him. He would have been a stranger in his own house had he lived to sit in the Parliament of to-day, a Parliament so degenerate as to have reduced legislation to an evening frivolity and administration to an emulative stampede in riotous waste. Four times was Mr. Gladstone Prime Minister, and he was plain William Ewart and a poor man to the end. It is best so.

It is the fashion with many, while admitting the departed statesman's greatness in a general way, to add, "but his foreign policy was weak." History, we imagine, will not endorse this verdict, which is merely the parrot repetition of a phrase the maledictions of disappointed quarrellers have dinned into our ears. It is not the time now to review the acts and influence of Mr. Gladstone in this sphere of politics, and he never was Foreign Minister. But at two points in his career he surely displayed imperial statesmanship of the noblest order. The Government of which he was the head in 1872 settled the *Alabama* dispute with the United States by arbitration, and in submitting to arbitration successfully resisted the inclusion of the indirect claims somewhat unscrupulously put forward by the Cabinet of General Grant. Surely that was a splendid deed well done in the interests of humanity. Where would the chance of the now fashionably-desired accord with the States have been to-day had Mr. Gladstone and his colleagues then listened to the war party, and, to gratify diseased vanity, put bloodshed between kindred over a question where we were wrong. And when he bowed before the justice of their position and gave back to the Boers of the Transvaal the freedom Sir Theophilus Shepstone and the Government of Cape Colony had filched from them, did he not open a better age for all the whites in South Africa than further attempts at Boer coercion could have done? Where would the talk of a federated South Africa have been but for that display of statesmanlike magnanimity? The answer is best supplied by the words of Lord Randolph Churchill: "The surrender of the Transvaal and the peace concluded by Mr. Gladstone with the victors of Majuba Hill were at the time, and still are, the object of sharp criticism and bitter denunciation from many politicians at home, *quorum pars parva fui*. Better and more precise information, combined with cool reflection, leads me to the conclusion that, had the British Government of that day taken advantage of its strong military position, and annihilated, as it could easily have done,

the Boer forces, it would indeed have regained the Transvaal, but it might have lost Cape Colony."* This is the testimony of a political enemy, and its justness is attested by the peace which has stood the Jameson Raid and many things besides. We might go on, not always in eulogy, not forgetful that good arises out of men's evil, or mistakes, and evil sometimes of their good, even as life wars with death, and death with life, the universe through; but we have said enough for this time. A spirit essentially humane, and courageous in its humanity, has passed from among us for ever. All that is left for us is to mourn from afar, and hush contentions in sympathy for those near and dear to him, who in his loss have seen the light of their lives go out.

The Condition of Italy.

Whether the Marquis di Rudini succeeds in retaining power as the Minister of King Humbert on a policy of military rule or not, does not seem to us to much affect the future of Italy. Revolution has come there, and will stay until it accomplishes its work, repression or no repression. It has been coming for many a long day. Seldom or never have we alluded to Italian financial affairs in the pages of this Review during the past six years, except to point out that all the conditions were making for revolution there. The truth of the matter is that Italian unity was brought about too hastily and too abruptly to weld all the country together as one. From the first the North and South have been jealous of each other, and the North, with its active, industrious population, has despised the South. From the first, clericalism has been as the fly in the ointment, marring all the efforts of the Civil Government to unite the people in allegiance to a superimposed constitutional Government on the British model. And, as Mr. Stillman quite rightly pointed out in last week's *Speaker*, nominal unity was effected without that purification of the system of taxation which alone could have made the central Government seem just to the masses of the people. Throughout Italy privileged classes have all along escaped their fair share of taxation, with the consequence that the steadily augmenting weight of that taxation has fallen with crushing effect upon the backs of the poor. Italy has been filled, almost from the day when it became one State, with cries of hunger and discontent arising from this poverty, and instead of devoting themselves to internal reforms Italian politicians of all shades of opinion, and above all Signor Crispi, spent their energies in trying to make Italy a great military power. In this aspect the new kingdom has all along been like a dwarf trying to keep pace with giants on the march, and now the people have risen in sullen revolt against miseries which have become unendurable. Dear bread was as the touchwood that kindled the fire, but all the materials for a great conflagration have been accumulating this generation back.

What is now really passing within the kingdom we cannot at present know. Telegraphic communication of an independent kind is entirely suppressed, and we are very doubtful if letters telling too much of the truth are allowed to come through the post. We may surmise, however, that displays of military force will be sufficient for the time being, and as long as the troops do not fraternise with the people, to put down open disorder in the cities; but the troops, we feel sure, cannot be counted on to continue this loathsome occupation very long. Already at Naples some soldiers sent to suppress riot fraternised with the rioters, and the same thing is sure to occur in other places, however much the Government may endeavour to distribute the army, so that each division of the troops has to deal with a population to which it is a stranger or antipathetic. But grant that the army is loyal to the House of Savoy and that the Marquis di Rudini, or another, is able to maintain order under martial law, it is none the less beyond the power of all the engines of Government together to force discontented people to work or to pay taxes. The removal of the bread tax itself, which must now be looked upon as permanent—at least, while wheat remains at anything like its present price, no Government in Italy would dare, even behind bayonets, to reimpose the 13s. a quarter duty on imported wheat which was to have been levied again, after a brief interval, from the first of this month. And if taxes fall off, the machinery of Government must come to pieces. The State, in other words, goes towards bankruptcy while maintaining order; and when it is bankrupt the second act of the revolution will come upon the stage. Either the Government, in order to obtain money, will have to force the privileged classes into bearing their full share of the public burdens, or it will have to default on the public obligations of the State; or yet again, it will have to allow the pay of the army on whose loyalty its existence depends from day to day to fall into arrears. Thus the difficulties which any Ministry set up in Italy must be prepared to encounter are only beginning, and the mere reiteration that "all is quiet in Italy," that "perfect order reigns in Milan," that "the disorders" here, there, and everywhere "have been suppressed," means very little. The question is, what can the Government do to so alter the conditions of life for the bulk of the Italian people as to make them contented, and to cease to flee from the country in hundreds of thousands per annum as from a land of pestilence? We are afraid none of the Italian Parliamentary statesmen whose names have been before the public in this generation can be trusted to do much towards solving this question. The position they are in is very similar to that occupied by the last few Ministries of Louis XVI. of France. They may scheme and devise and decree, but the sullen will of the people in the end must prevail. Italy, in short, has entered upon a period of revolution, the ultimate outcome of which no man can foretell. Its end may be the splitting up of the country into hostile republics as of old, or a tyrant may arise to place all the land under his foot. The only thing that appears certain is that the death-knell of the monarchy as now established has begun to ring.

Mr. Chamberlain's Birmingham Speech.

Mr. Secretary Chamberlain must be highly gratified at the success of his address to his supporters in Birmingham last Friday. His words have caused a cackle all over Europe and in the United States which

* "Men, Mines, and Animals in South Africa." p. 23.

exceeds any similar demonstration produced by recent utterances of his chief the Marquis of Salisbury. For a brief moment all men's thoughts were occupied with the attempt to discover what the speaker really intended. They have not benefited much by this exercise, and by the time these words appear most foreign politicians, at least, will probably have given up the attempt. Yet serious consequences might follow such a deliverance. We might even imagine Russian hostility increased by it, for the simple reason that the Czar and his foreign minister may not much relish being compared with the devil. To say that this style of address is not complimentary is little, to call it vulgar is not much, nor is it more adequately described as a "blazing indiscretion"; and yet we may hope that astute Russians understand Mr. Chamberlain and his limitations sufficiently not to be provoked into proceeding right off to the annexation of China. A gentleman who carries his political opinions about with him as a commercial traveller carries samples to suit all customers, eager to meet every requirement chance offers him, is not to be looked upon as a grave and responsible statesman. Sensible people in this country have long ceased to take Mr. Chamberlain that way, and therefore the effect produced by his language in foreign capitals and upon foreign journalists has struck us here as an effect ludicrously out of proportion to the cause. We have been almost as astonished, if not quite so delighted, as he himself doubtless is.

Apparently Mr. Chamberlain's three objects in making this speech—apart from the desire to advertise himself, which is always a dominant consideration with him—were to insult Russia at the same time that he proclaimed the impotence of England as against Russia; to provoke France, so as to render the chances of an agreement with her in the West African dispute, about which not one person in a million in this country knows anything, or cares a brass button, pretty nearly impossible; and to make the most of the fashionable fad of the moment, an "alliance" with the United States. The last of these aims may be praiseworthy enough in itself, but the advocacy of it was so overdone after dinner last Friday, and there are so many reasons why we should have no treaty of alliance with the American Union, that even this part of the speech may do more harm than good. What we require with the United States is friendliness of feeling, accord upon great questions of international policy, and a sympathetic trade rivalry. The last of these objects is yet a long way from attainment, and too great eagerness on our part to solicit a treaty of offensive and defensive alliance with the great Republic might serve to convince its politicians that we sought their support because of our failing strength under our free-trade policy.

Admit, however, that Mr. Chamberlain struck the right note on this point, caught the popular feeling at the flood, as it were, and expressed sentiments which his shrewdness led him to expect immense popular sympathy with, and what shall we say of his hostility towards France? He surely could not imagine that any body of people in this country has the slightest desire that a conflict with France should be provoked over West Africa, or even West Africa and Southern China together. As far as we can judge of the opinion of sensible men in the City of London no imaginable war could at the present time be more unpopular. To be sure the City, like the entire kingdom, is completely ignorant of the nature of the dispute in Africa, and cannot even guess what the French case is, not against us, but against the Royal Niger Company, whose political misdeeds we have fallen heir to at the price of £700,000. But business men do feel that neither in its present trade nor in its potential wealth is the whole of West Africa together worth to us the cost of one month's war with France. And some who know the history of the Royal Niger Company, its high-handed defiance of the Treaty of Berlin in attempting, by its regulations of 1894, to close the navigation of the lower Niger in its own interests, and who remember the hostility which Liverpool has again and again manifested against this company and its questionable mercantile policy, have a shrewd suspicion that the British case may not be so strong as it looks, or as Mr. Chamberlain wishes it to look, and that, therefore, if we quarrel with France over the settlement of boundaries in the Western Soudan, we are recklessly and wilfully doing wrong to injure our nearest neighbour, with whom our commercial interests are very large and becoming more closely interlinked every year. Happily, in our opinion, the danger of war with France is in reality lessened by an outburst like that of the Colonial Secretary. The Marquis of Salisbury is not dead yet, nor driven from his post, and he is a man of peace. Negotiations with France are controlled by him, and with him the ultimate decision rests. Being a man of peace, the probability is that when he has to encounter the strong resentment of the French Government at the attitude of Mr. Chamberlain he will smooth matters down by making greater concessions than, if left to himself, he would either have been asked to do, or have been disposed to accord.

In short, the never-resting conflict waged by the Colonial Secretary against the Prime Minister, a conflict of which the Birmingham speech forms the latest round, may be taken to explain in no small measure the high proficiency which Lord Salisbury has now attained in the art of making "graceful concessions." It is not his desire to embroil the United Kingdom in a great war. He is too able a man not to understand how disastrous such a war would be to our commerce, how deadly its consequences might become to our established institutions. His long experience as a politician has not left him merely a politician; he is capable of measuring some, at least, of the effects which war would produce on our delicate credit system, and could shrewdly guess what the expenditure of £200,000,000 taken out of the capital of the country, all now in active employment, would mean to British industrial supremacy. This being so, there is not much need to be alarmed about this wildly exciting tirade of the Colonial Minister's, even so far as France is concerned. It was not a wise speech, nor the speech of a statesman, and for that very reason, perhaps, the harm it has done will be transitory, or remain only in greater advantages secured by France in the settlement of the reiver's ownership of West Africa.

As to Russia, also, we need not much disturb ourselves. After all, our relations with that great Empire cannot be very much worse than recent events have left them. The traditional policy and suspicion of Russian designs have, under stimulus of recent events, revived to the full in the minds of the people of this country. We may lament this, and do lament it. There may be faults

on both sides to account for the increased enmity, although we think the greater fault lies with Russia, so far at least as recent events in China enable us to distribute blame; but we have to accept the facts, much as the whale might accept the enmity of the buffalo. We do not suppose that the anger excited by Mr. Chamberlain's somewhat coarse attack will cause Russia to move one step faster in her march towards the complete absorption of Northern China; and if it quickens the determination of the Czar to absolutely close Ta-lien-wan to British commerce, that is really not much more than we deserve for treating as a trustworthy statesman an expert and clever-tongued man of affairs.

The Rand Mines, Limited, and its Group.—I.

The full reports of this company and of eight of the dependent companies which it finances and controls have now reached this country. They deserve very careful study at the hands of British speculators in mine shares. In his speech at the Rand Mines meeting Mr. Eckstein, the Chairman, made some comments which, we suppose, were meant as an answer to the criticisms passed by us upon the finance of these companies. His remarks seem to us singularly inadequate. It may, however, be well to quote what he says in order that this inadequacy may be the more easily demonstrated.

I have this week been favoured with a marked copy of the last INVESTORS' REVIEW, a paper in which the deep levels are demolished—entirely to the satisfaction of the writer. I think that the best answer would be to attach this article as an appendix to our report, but it will suffice if I refer to two points which show the extraordinary logic and the amazing ignorance of the writer—exceptional even in a professional critic. Because we have framed conservative estimates, because we have fulfilled our promises—says this sagacious writer—there is something mysteriously wrong: we must be picking the eyes out of our mines. That in No. 1 and No. 2 is equally worth preserving. Because we are "sorting our ore," because we are "working close and clean," and are thus "grading up" our ore by exercising every possible care to exclude waste rock—therefore we are robbing the mine and picking its eyes out. It appears that it is a crime to fulfil your promises, and a deception on your fellows to put up extensive and complicated machinery to enable you to reject worthless rock—you ought to mill it and bring down your yield. We have heard from hundreds of independent observers that nowhere in the world is more information given to shareholders and the public than on these fields, and nowhere in the world are the mines so honestly and conscientiously worked in the interests of shareholders; but you cannot please everybody, gentlemen, and one consoles one's self with the reflection, what must be the moral characteristics of the man who starts out with the freehand assumption that a whole community of people whom he does not know are radically dishonest? No, you cannot please everybody, nor is it necessary that you should try to do so, and there is sometimes a little grim amusement derivable from the position when—as now—some of your critics are indicting you—with abundance of evidence, of course—for making out everything worse than it is, so that you may buy up the whole industry, while others charge you with perpetrating an organised boom by forced returns, so that you may foist your worthless stock on a confiding public. The Rand Mines, Limited, which is responsible for the management of the subsidiaries, is not a jobber but an investor. What we have we hold, what we hold is enough. We shall pursue the even tenor of our way, aiming in our work at that level of profit which we reasonably hope to maintain, giving you the facts as we find them, whether it be in the development of our works or in the conditions for which the Government of this State is responsible.

We have no interest whatever of a personal or pecuniary sort in any of these properties; never had; and never intend to have any. The criticisms we pass, therefore, ought at least to be accepted as entirely unprejudiced from this point of view. Our only desire is to place before British investors considerations deemed by us worthy of their attention, in order that they may have some counterpoise to the steadily laudatory comments which fill the English Press from—we regret we have to say it—the *Economist* downwards. Not so very long ago the *Economist* published a remarkable supplement which we have filed for reference, and in which, amongst other things, the value of Rand Mine shares was appraised at 40. In other respects this old and eminently respectable paper has gone so emphatically over to the side of this particular group of South African mines as to give rise to one or two very silly and unjustifiable rumours, the existence which we lament and merely cite as an example of the mischief which may be done by indiscriminate and indiscreet eulogy of enterprises which at the very best must be regarded as highly speculative. All that seems to have happened to the *Economist* is to have lighted upon a contributor endowed with unbounded and unquestioning faith in the enterprises guided by the wisdom of Messrs. Wernher, Beit, & Co.

Let us, who have no bias of any kind, look at the matter simply as a speculation and see what its chances are, measured by the data made public. Mr. Eckstein, as the above extract shows, implicitly admits the truth of our charge that those of the Rand Mines group of mines already in operation do "pick" their ore. We, therefore, need not further labour that point; it is more profitable to turn to the finances of these companies as disclosed in their reports. We have gone through the whole of them very carefully, and have worked out the net revenue they would have to find in order to pay their debenture interest and 5 per cent. on the present market value of their shares. Were we to include the Rand Mines Company itself, at the price, not of 40, but of 30 for its £1 share, and the further capital of, say, £750,000 still required to bring eight of the companies it is financing into full operation, the net revenue necessary to pay 5 per cent. should be about £1,300,000 per annum. This is a rough and ready estimate, but plainly as unfair as rough, and we have no desire to be unfair. It is unfair, because as we shall demonstrate before we have done, the capital of the Rand Mines is in great measure a replica or concentrated essence of the capitals of all the mines which it foster-fathers and controls. To get at a more correct view of the future it will be best to eliminate the Rand Mines altogether, and deal only with the eight companies whose reports are published along with that of the Rand Mines, Limited. The answer may be given in tabular form thus:—

Name.	Price.	Market value of issued capital.	Amount required to pay 5 per cent. on quoted price.
		£	£
Glen Deep	2½	1,250,000	62,500
Rose Deep	6¼	2,500,000	125,000
Geldenhuis Deep.....	7	2,100,000	105,000
Jumper's Deep	4	1,629,164	81,458
Nourse Deep.....	5	1,874,670	93,733
Crown Deep	11	3,300,000	165,000
Langlaagte Deep.....	2½	1,625,000	81,250
D. Roodpt. Deep	3	873,000	43,050
		£15,151,834	£757,591

Upwards of three-quarters of a million, then, will be required to pay 5 per cent. on the market price of the shares of these eight companies, or rather not quite the market price in all cases, but at prices approximately those current as we write: some shares have been falling lately, and we have therefore "estimated low" like a Chancellor of the Exchequer manœuvring for a big surplus. But two omissions affect the value of this table. One is the debts of these companies and the other is their unissued shares. The interest on the debts, taken at 6 per cent. on the average—the Rand Mines, Limited, charges 7 per cent., and some companies have issued debentures as low as 5½ per cent.—comes to over £126,000 per annum. Add this to the amount required to pay 5 per cent. on the issued shares at given prices, and we get a total of £884,000 as the net income these must produce over and above what is required for depreciation, amortisation of debt, and reduction in the capitalised value of wasting properties in order to give 5 per cent. dividend to holders at prices, let us say, near those of the market. As we have no means of knowing whether the unissued shares possessed by most of the companies will be wanted or not, we, for the present, leave them out of account. Our estimate is therefore quite moderate; and now let us see what chance there is of its realisation.

Some little help in this direction is afforded by the number of stamps which the eight companies will have in operation when in full working order. To some extent we have to estimate this total, because it is very problematical whether all the stamps projected could ever be put into operation. Probably not enough black bondmen can ever be found to pick out the quantities of ore necessary to keep them steadily supplied, and in some cases we fear there is not enough ore to pick. Be this as it may, we give the companies the full benefit of their projected equipment, and find that, were the design in each case carried to completion, 1,040 stamps would be at work. The next question is how many tons of ore will one stamp crush per annum, and here again we cannot get an exact figure. Working up averages, however, and allowing about 330 days to the year—for of course the black slaves work Saturday and Sunday, and the mills are only stopped for cleans up—we think it a liberal estimate to put the crushing capacity per stamp at 1,500 tons per annum. For 1,040 stamps working this full time the output, therefore, would be 1,560,000 tons crushed. This would mean a very much larger output of ore from the mines, because, as not only Mr. Eckstein but various mine managers admit in their reports, the ore has to be carefully "sorted." In the Durban Roodepoort Deep, for example, "fully 30 per cent. of the ore mined will be sorted out as waste," the manager informs us, and in the Crown Deep, which is so far the richest of the mines brought into operation, there is also a considerable percentage of waste which may be expected to continue. To get 1,560,000 tons of payable ore would therefore require the extraction of perhaps quite 2,000,000 tons of rock, and, needless to say, this is a very formidable total.

Having arrived at the crushing capacity of 1,040 stamps working 330 days to the year, the next question is: what profit can reasonably be expected per stamp? and here also we have no very definite data. Two of the companies in this group now crushing, the Geldenhuis Deep and the Crown Deep, give very different results. The Geldenhuis Deep showed a profit last year of 12s. 8·256d. per ton, while that of the Crown Deep amounted to 18s. 11·452d. per ton. On this basis, it seems fair to estimate that, under existing conditions, the average profit will be 15s. per ton, and at 15s. per ton 1,560,000 tons of payable ore crushed will come, in round figures, to a net profit of £1,170,000. This, it will be seen, is more than enough to meet the 5 per cent. we have suggested as the minimum yield on the share capital of these companies at the moderate prices we have fixed. But it is not enough to pay 7 per cent. after deducting interest on borrowed capital as at present and without reckoning the £750,000 odd estimated to be still required to bring these eight companies to full fruition. Surely to say this is to demonstrate that there is no justification whatever for the current, or approximately current, prices of most of these shares, if not all. Five per cent. is not a sufficient return on any mining share. Holders of such ought to receive at least 10 per cent., and in addition, large sums ought to be available for depreciation of machinery and mine claims. Up to the present, as far as we can discover, nothing whatever is allowed for depreciation in the Rand Mines' group of properties, and the longer provision of this kind is delayed the heavier must the amount be ultimately set aside from revenue to write the capital cost down. We have given here only the merest outline of the calculations made by us, because it is not wise to burden readers with details of figures; but upon this basis, is it not reasonable to ask what ground the market has for expecting that higher prices ought to rule for the shares of any one of these companies? Our estimate, it must be remembered, is the best possible at all points, a best probably unattainable for years to come, if ever.

Take the Crown Deep as an example. It is the crack company, as we might call it, of the group, and what does its balance-sheet indicate? An extravagant rate of expenditure, machinery and plant alone standing in the books at £297,000, nothing whatever written off for depreciation, a debt of £110,000 to the Rand Mines, Limited, and a dead weight of £200,000 in fully-paid shares given for the claims. If the other shares of this company had not been sold at such extravagant prices as to give the company £500,000 for nothing it must by now have been absolutely helpless. In his report on this company to the directors, the manager estimates that when the bottom levels are reached the returns of the mine will show a decided improvement, although, for some months to come, he does not anticipate that the present yield of about 10 dwts. will be exceeded. But supposing the yield rises to 15 dwts. per ton on the average, will this company be able to pay dividends justifying the present price of the shares? To pay 5 per cent. on these shares plus interest on borrowed capital would require over £170,000 per annum. The profit of the company for the past year was £67,513. Double this and still there is not enough, quadruple it, and the net revenue is not sufficient to give shareholders at £11 per share 10 per cent. of their money, and to provide a reserve and sinking fund to meet the rapid exhaustion of the ore. We shall have a good deal more to say about these subsidiary companies and about the Rand Mines, Limited, itself in our next issue. Meanwhile, the following table exhibits the holdings of the Rand Mines, Limited, in the eight companies we have been dealing with, together with the total number of shares issued and the number in

the hands of the public. It is, to our mind, a suggestive table which tempted ones would do well to ponder. Amongst other points which to the simple may appear obscure, it explains why the financiers interested in this group of companies are so lavish in expending capital, or market profits, in costly advertisements of the reports and balance-sheets of these companies. These advertisements at least serve the purpose of bribing the Press to hold its tongue. We trust they do not also conduce to making a free market for the shares. When, we may well ask, did ever the Mysore group of mines have to stoop to such tactics? A "free market"! How can that be with a company like Langlaagte Deep, or Jumpers or Glen or Nourse Deeps? Quotations in all such cases must be fictitious. Let readers note and beware.

Name.	Shares Issued.	Held by Rand Mines, Limited.	Held by Public.
Glen Deep	500,000	251,791	248,209
Rose Deep	400,000	143,720	256,280
Geldenhuis Deep	300,000	122,558	177,442
Jumpers Deep	407,391	270,741	136,650
Nourse Deep	374,934	268,382	106,552
Crown Deep	500,000	232,860	267,140
Langlaagte Deep	650,000	628,700	21,300
Durban Roodepoort Deep	291,000	59,000	232,000

Economic and Financial Notes and Correspondence.

Lord Salisbury's Speech and Silence.

How hard driven the Prime Minister is at times by the zeal of his irrepressible and irresponsible colleague in the Colonial Office was curiously illustrated on Tuesday night by his Lordship's speech in reply to Lord Kimberley in the House of Lords. He had to say something about China and our position there, and on the spur of the moment, perhaps, he struck a new reason why we have "leased" Wei-Hai-Wei. Here are his interesting words :—

> Who shall say that China is for ever prostrate, because there are not men to give effect to the enormous material and physical forces she is possessed of? I should say what China wants is courage. One of my defences of the occupation of Wei-Hai-Wei is that it had a tendency to strengthen China against despair, and to give her courage, if the occasion should arise, to stand up against her enemies. The danger of allowing the occupation of Port Arthur to take place without any corresponding movement on our side was that China, or, at all events, large classes of Chinamen, would give themselves up to despair, and believe that the domination of one foreigner was the destiny from which it would be impossible to escape. It was our business to tell them that, so far as we were able to prevent it, that destiny would not overtake them. I do not know that we could have done anything better for restoring their courage, and I am quite certain that there was no more effective method of driving them to despair than by allowing Port Arthur to be occupied by the power that already stands over so enormous a portion of their frontier, and threatens them with so large a conquest.

In its way this is the best thing of Lord Salisbury's we have read for a long time and must possess an exquisite flavour of "drollery" to Englishmen in the East. To give "courage" to the Chinese mandarins; yes, that was it. Not your mere vulgar annexation, with a view to the partition of China, not "going one better" in rivalry with Russia. Nothing of the kind. China may be prostrate, as Mr. Chamberlain said, contrariwise to his chief, but "we mean to encourage her to get on her feet again." Excruciatingly humorous is this conception of our lofty mission of civilisation, and how mad we should all be were it to come true.

But what about France and the hissing, terrible Gorgon of her breeding, threatening us in our perambulations up and down the world and athwart it, looking for something more to appropriate? Ah! Lord Salisbury was not asked about this, and so he, wise man that he is, said never a word. German designs in the East, French intrigues in Southern and Western China, those unknown and apparently unknowable burning questions, pondering over which heats Mr. Chamberlain's brain like new wine, all were passed dumbly by. This also is strangely interesting, and may be taken to prove that Club society is quite right when it declares that the Prime Minister coaches his colleague to say the things he does not care to utter himself. Wise fellows these clubbites are, but we humble folk in the City rather wish at times that the punishment of the "branks" had not been abolished for scolds, and that the duties of ministerial exposition were not so very much distributed up.

The Indian Currency Committee.

Even the business worm will turn, it would seem. Who started the petition which has been influentially signed to present to the Government praying, it to improve the composition of the Indian Currency Committee now sitting, we do not know, but it was a step highly necessary to be taken even if it serves no other purpose than to afford bankers and merchants an opportunity of entering their protest against the manner in which Lord George Hamilton has selected its present members. It is an inexpressible misfortune for India and our interests there that a "fushionless" being of this description should be at the head of the India Office. His Currency Committee is an adequate expression of his own feebleness, as we pointed out at the time it was announced, and of nothing else. There are not more than three men competent for the purpose in view upon it, for we do not consider Sir Henry Fowler in any degree qualified to deal with subtle questions of exchange, and of the relation of a currency to the wants and wealth of a people. And the way Lord George has stuffed upon this committee a majority of incompetent advisers, doctrinaires, and half-pay Indian officials, eager above all things for a high rupee, is nothing short of scandalous. Whether any attention be paid to the petition or not, the Government may rest assured that business men will not forget its conduct in this matter when the next election comes round.

The Late Mr. Ottomar Haupt.

We join sadly with the *Financial Times* in its expressions of regret over the loss of this gentleman, its Paris correspondent and an able and amiable man. When we knew him—many years ago now—in London, he was an argumentative bimetallist, and defended the heresy with all his fervid Teutonic ingenuity. But he was not a mere German Jew word-slave or dialectic windle-straw. He had sense and reasonableness, and so was able to escape from the snares such entangle themselves in, and to become, as the *Financial Times* says, one of the acutest living defenders of the Gold Standard. Indeed, he went too far for us in this direction also, and his criticisms on all things often lacked balance. But he was a most painstaking writer on bullion and exchange, and quite the greatest authority on arbitrage in his day. His book, "Arbitrages et Parités," has passed through many editions, and the last one, issued in 1894, was a large octavo volume of over 900 pages, packed full of most useful information. We shall very much miss his banking and Continental finance letters to the *Financial Times*, and sincerely mourn his loss.

The New Canadian Fast Mail Service.

Last week's *Syren and Shipping* prints "an advance copy" of the prospectus drawn up, setting forth the object and chief features of this project, and giving

some particulars regarding the capital required. It asserts, in doing this, that the prospectus is being circulated for underwriting purposes, and therefore it is really public property. Assuming this to be correct, we find that the entire capital is put at £2,125,000, divided into £700,000 4½ per cent. first mortgage debenture stock, and 140,000 £10 shares, half of which will be called 6 per cent. cumulative preference shares. The odd £25,000 consists of £1 deferred shares thrown to the promoters, and these will take one-third of the remaining profits after 10 per cent. has been paid on the ordinary shares and provision made for a reserve fund, &c. A most fanciful estimate of the profits to be obtained from this new undertaking is embodied in the prospectus, from which it appears that 10 per cent. is certain to be earned on the ordinary shares right off by the help of the Government subsidy of £154,500 to be granted for ten years, and of which Mr. Chamberlain has kindly arranged that we, the taxpayers of this country, should find £51,500.

When this project came up originally we attacked it with severity and described it as a mad project, without the slightest reasonable foundation or hope of profit. We hold that opinion still, although recently we have been mockingly inviting the Canadian Government to hurry up and take its chance while Mr. Dingley was throttling shipping entering United States ports. Mr. Dingley, however, has not been allowed to do this, and such slender chance as his proposed tonnage duty might have given to a scheme of this kind must now be abandoned. There can be no sufficient traffic of a remunerative kind for this line, and it is still only part and parcel of the various enterprises which the Canadian Pacific Railway "ring" have set on foot for the purpose of keeping that undertaking well before the public in an apparently prosperous condition. The Pacific mail service of that company is worked at an enormous loss, and must be so worked because it can never form a large freight-carrying route. If Canada chooses to pay for this kind of luxury, we certainly could have no objection; but as taxpayers here we have the right, and it is our duty, to protest against the appropriation of our hard-earned money to any extent in furtherance of disastrous projects such as this. Not only is there no prospect of paying traffic for such a line—if for no other reason than because nobody who could help it will go to the winter ports of Canada at Halifax and St. John in order to embark for Europe, or in order to proceed from Europe into the interior of the American continent—but the floating palaces to be put on the route under the contract have no freight capacity to speak of and cannot possibly compete with the slow boats which already occupy the field and prove more than adequate for all the traffic available, even with the stimulus such traffic receives through Portland being their winter port. To this place patriotic Imperialists, and what not, have decreed that the fast mail line must not go. It would be a crime in the eyes of Jingoes on both sides of the water to let it go, at least until money begins to be lost.

We have something else to say, however, about this scheme, and that is to ask on what grounds the projectors of it, the High Commissioner of Canada, Lord Strathcona and Mount Royal and his associates, have agreed to pay down a lump sum of £1,980,000 to the contractors, holders of the "concession," Messrs. Petersen, Tate, & Co., of Newcastle-on-Tyne, they undertaking to deliver four ships by a certain date. What guarantee does this comparatively obscure, and, so far as we can learn, not oppressively wealthy, shipping firm give to the company that it can furnish value for the money? Apparently, four steamers are to be put upon the route of 10,000 tons capacity each, and as the *Syren* points out, this is equivalent to paying for these steamers half a million each. Will Lord Strathcona and Mount Royal venture to maintain that the finest boat that could be built, of the capacity and with the appointments stipulated, ought to cost anything like this sum, and if he cannot do that, is he not lending himself to a miserable job, whereby a number of unknown people in Canada calculate upon pocketing a large amount of money in the shape of solid "profit"—the difference between the real and the lump nominal cost of the vessels? What was to hinder this company, if honestly gone about, to raise its capital in a straightforward manner as wanted, and to contract directly with a shipbuilder or shipbuilders, of character and good repute, for the ships it required to be built, at the market price? We should very much like to hear what a first-class shipbuilder thinks of this part of the business, and for the present we shall leave the subject here, trusting that nobody with any regard for his money will be found to underwrite a penny of the capital until points like these, now dark, are made plain. Had the project been good in itself, the way in which this capital is to be raised and paid away ought to have damned it in the eyes of the investing public.

Germany and China.

There have this week been great doings at Peking in which Prince Henry of Prussia played a leading part. If Germany is slow to open the door for us at Kiao Chau, she has been prompt to throw wide the gates of the Summer Palace. As the *Times'* correspondent puts it, the visit of Prince Henry has "broken down the last barrier hedging the Court of Peking." Henceforth the Palace will be more open to western ideas as well as western personages. The Prince's first visit was to the Dowager Empress, who appeared "unpainted and unveiled" behind a table in the "form of an altar." She was gracious and unembarrassed, as became the real ruler of China; but the Emperor, poor man, who only nominally rules, was embarrassed and nervous when his turn came to meet the Prince. His hand trembled; he started when the German escort beat their drums; but he subsequently regained some of his self-possession. The ordeal was not so terrible as it seemed. The blushing Emperor survived it, and returned to the obscurity of his splendid dwelling. When will he next emerge from this obscurity, and who will then be his interlocutor? What will be the ultimate upshot of this unique visit to Chinese Royalty? Will it remain a mere curiosity, or is it to be an epoch-making incident in the history of China? It would be hard to say. The Empress is now to receive the wives of foreign ministers. Perhaps this is as much as can be expected in the meantime. The occupants of the hitherto sacred palace have to learn to walk. It will be some time before they get accustomed to the hurry-scurry of modern advancement.

But China outside the palace has to go forward with more celerity. Western energy has now a firm grip of the country. There will be protests against the rapidity. There will probably be more rioting such as there has been at Sha-Shi and in other parts of the Yangtse Valley. But these cannot be regarded as of serious importance. The collection of the likin by the Customs authorities is not a popular measure, especially with the ruling mandarins, to whom it means a considerable loss in their customary blackmail. They cannot give that up without a growl. But such riot and grumbling cannot stop the advance of commerce. We have just received the first of our Consular reports from Sha-Shi. It is an interesting, even a picturesque document, and informs us that this port on the Yangtse was opened on September 26, 1896. The foreign community consisted at the end of 1897 of seventeen persons, including two Britons. Of the shipping of the port 56·66 per cent. was British, the remaining 43·34 per cent. Chinese. The value of the native and foreign exports for the year was £20,326, and the imports £27,183. These are the real beginnings of western civilisation on the Yangtse. Their development will be rapid. Here, too, is a most significant achievement—the conclusion of arrangements for the construction and working of an important system of railways. The contract has been given,

with the full concurrence of the Chinese Government, to the eminent firm of Messrs. Jardine, Matheson, & Company. The first section, between Shanghai and Nanking, will be begun at once. It is to be 200 miles long; goes through a district of great fertility, as the special correspondent of the *Standard* assures us, and is the first railway in China that has been constructed and worked under British auspices. This is one of the most important steps yet taken in the development of the country. It will be a security for the rapid advancement of trade, in which, however, the shrewd Chinaman will be sure to have his full share.

Mr. George Livesey and the Gas Light and Coke (Chartered) Company.

We have received a letter and some papers from Mr. Livesey which, taken together, prove that we were misled last week in estimating the value of the Gas Light board's retort to his criticism, and believed him on *ex parte* evidence to be guilty of inconsistency. We are sorry that we should have misconstrued his attitude in any degree, because we have sympathy with the object he has in view. There can be no doubt that the Gas Light Company is in an unsatisfactory position, and it would be a pity were its stockholders to be diverted by anything resembling a personal wrangle from giving their attention to effecting reforms in the present methods of business or system of management, a system we have at some point or other called in question for years back. Left where it is, following the policy now adopted, it must go from bad to worse, and stockholders have to face a further reduction in their dividends. The cardinal error from the public's point of view is raising the price of gas; but that error springs from maladministration under which the company's revenue-earning power has been impaired. It would be a great pity if the largest gas manufacturing company in the world were to drift into a condition where drastic measures and the submission to severe losses in capital and income by the stockholders would alone prove adequate to restore it to health. Upon this question of the price of gas it will be interesting to quote the following extract forming the concluding portion of a letter written by Mr. Livesey and published in the *Journal of Gas Lighting* of the 10th inst.:—

> The surest test is the price of gas. The Chartered Company use well over two million tons of coal a year, and water gas in addition, and charge 3s. per 1,000 cubic feet. There is only one concern in the three kingdoms using over 100,000 tons that charges a higher price, viz., Dublin; but theirs is probably the worst district in existence, for they have only about twenty-six customers per mile of main. West Ham comes next with forty-two; while the Chartered Company in 1896 had 140. There is no other large concern charging so much as 3s. I give all those using 20,000 tons and upwards that did so in 1896 (the last return available):—

	Tons.		Price. s. d.
Chartered	(about) 2,140,000	(now)	3 0
Dublin	133,000		3 5
West Ham	86,000		3 0
Tottenham	(about) 40,000		3 0
Hastings	" 40,000		3 0
Preston (18-candle gas)	" 40,000	(about)	3 0
Norwich	31,000	"	3 5
Oxford	29,000		3 0
Cork	28,000		3 6
Bournemouth (Gas and Water)	24,000		3 3
Exeter	23,000		3 0
Eastbourne	22,000		3 0
Swansea	21,000		3 0
Mitcham and Wimbledon	21,000		3 8
Folkestone	20,000		3 0
Richmond	20,000		3 0
Tunbridge Wells	20,000		3 0
Guildford	12,000		3 0
Watford	9,000		3 0
Falmouth	3,400 (less 2½ per cent.)		3 0

> The above are all companies. There are only two corporations using 20,000 tons or more, and none over 44,000, charging more than 3s. per 1,000 cubic feet, excepting one or two in Scotland that supply 22-candle gas and upwards. There are many small undertakings charging less. I give a few examples, omitting all charging exceptionally low prices, and all the large companies, who charge from 2s. 6d. down to about 1s. 8d.:—

	Tons.		Price. s. d.
Brentford	141,000		2 11
Crystal Palace District	103,000		2 7
Brighton	75,000		2 9
Croydon	59,000		2 8
Wandsworth and Putney	49,000		2 4
Rochester	41,000		2 6
Kingston	33,000		2 10
Ipswich	23,000		2 10
Scarborough	22,000		2 9
Maidstone	21,000		2 4
Worcester	20,000		2 7
Isle of Thanet	17,000		2 8
Dover	16,000		2 9

> None in either list, except Preston and Swansea, is near coalfields, and scarcely any of them can get coal so cheap as the Chartered. Brighton has been harder hit by the electric light than the Chartered. In many of these cases the price has been reduced since 1896—Wandsworth, for instance, to 2s. 2d. per 1,000 cubic feet; but I believe there is no case in the United Kingdom of an increase of price since then, except the solitary Chartered, the greatest gas company in the world. Whether or not this justifies my criticism of the management, I leave your readers to judge. The "Reply" has given no answer.

Kruger the Undaunted.

As was natural, on the occasion of his being sworn in as President of the South African Republic for the fourth time Mr. Kruger made an explanation of his future policy and gave a justification of his past. It was a stirring, if somewhat primitive scene, that in the open before the Government House at Pretoria. The houses were decorated, the burghers were armed—perhaps it is their custom—and even the "music that soothes" was not wanting. The members of the Raad were present of course, and so were the public officials. Even the "foreign diplomatic body" graced the scene, and were assured by President Kruger with all the solemnity of a sovereign ruler, that, as it had been in the past, so it would be his desire in the future to remain on friendly terms with all nations. Much of his speech—of which we have as yet only a comparatively brief summary—seems to have been taken up with the grievances of the mining community, who refuse to be comforted by the prospective promises of the President or satisfied with his defence of what he has done in the past. They are rather sulky and sullen, and cannot or will not see that the President has done anything for the mining industry. He is, they say, bringing the country to bankruptcy, and will not listen to their advice as to the way to take to avoid it.

Well, we should not like to pronounce any strong opinion until we have seen the full text of the Presidential address. But certainly it seems that his mining critics are rather too hard upon the President. He was able to show that £200,000 per annum had been taken off the railway charges for the carriage of mining machinery, &c.—a matter of no small moment, one would have thought, to mine-owners. Besides that, there had been reductions in the Customs dues amounting to £750,000 a year, principally affecting the necessaries of life and articles used in mines. There had recently been effected a reduction of ten shillings a case on dynamite, and negotiations were in progress for a further reduction—possibly of five shillings a case. Negotiations had also been entered upon with Portugal as to the supply of labour. These are very substantial concessions, and ought at least to be acknowledged. There was, perhaps, something brusquely naïve in his threat to banks and other institutions which had advanced money to poor people on mortgage, and now threatened to foreclose; but there may be reason for it; and, if he can, as he promises, put a check upon the formation of bogus companies, it is not for miners or any one else connected with the Republic to complain. President Kruger is very conservative—stiffnecked, perhaps, and peradventure rather too prone to boggle about progress and reform; but at least he shows that he is beginning to see the necessity for advancing. He is undaunted by the opposition. The mining interest might make more of the President if they humoured him more. His views as to the promotion of agriculture

should be received with something better than sneers. Boers are poor farmers, but if he can help them by irrigation, is it not worth the trial? Agriculture is the real backbone of the country, and, as President Kruger said recently, "When the gold industry has passed away, agriculture will remain the backbone of the country." Gold mining is vastly important, but in the nature of things it is temporary and passing. It will not establish or support a State. Agriculture, which begets trade and commerce, is essential for that. It is desirable for even mine-owners to reflect that in South Africa we cannot at once eject the Dutch. We must live with them and work with them, and business men should carry themselves accordingly.

The Chignecto Railway.

We have received from Mr. A. D. Provand, M.P., a pamphlet containing the history of this unfortunate enterprise and of his endeavours to bring about some settlement with the Canadian Government. It forms a melancholy story, and we have read it with pained surprise. When the project was originally launched we treated it as a highly speculative one and doubted very much whether it would ever pay. It has never been brought to the proof. Owing to the Baring crisis money difficulties arose, and the company could not raise the funds to finish the railway. After it had spent some £750,000 further work was stopped and the Dominion Government, taking advantage of a penal clause in the contract, repudiated its liability to pay any subsidy, and practically confiscated this money. That is the plain English of the transaction in a few words. At the time this ill-fated project was conceived, the people of Canada were in the hands of one of the most daring and unscrupulous gangs of "boodlers" that ever sat upon and sucked the blood out of any people. Morally, therefore, we are disposed to doubt whether Canada could be held responsible for this transaction, looked at from the people's side; but in honour that young nation is bound to take cognizance of the complaints made by investors here who, in all good faith, found so much money, believing that they had to deal with a Government which would keep its engagements even when to do so involved it in loss. The proper course, we imagine, is for the Dominion Governmeut to agree with the representatives of the railway company, and appoint arbitrators to investigate both sides of the case, and settle the amount of damages to be paid. It would be shameful were the matter to rest where it is.

Long's Hotel Company.

An extraordinary circular has been issued by the directors of this company to their shareholders. One of their number, a Mr. Loibl, has undertaken to buy out the company, paying 45s. in cash for each share. Why this offer is made is explained in paragraph 4 of the circular, which runs: "Mr. Loibl, being the lessor to the company of the hotel premises, would on completion take a complete surrender of the lease, and would then be in a position to make arrangements for dealing with the property in a manner more favourable than any open to the company, which is bound by the terms of the existing lease. Mr. Loibl is thus in a position to offer to the company better terms than could be expected from any other purchaser; he will, however, have to make large financial rearrangements, and undertake onerous and uncertain liabilities, and he has requested the directors to state clearly that in making an offer so favourable to the shareholders he expects to reap some personal profit by his subsequent dealings with the property." There is a charming frankness about the conclusion of this quotation that almost disarms criticism. If Mr. Loibl were a generous outsider there might be nothing to say, but we find that that gentleman figures in the original prospectus as the vendor, as well as the lessor of the hotel. Originally the business was floated as a public company in the end of 1888, with a capital of £65,000 in £5 shares, nearly all of which went as purchase money. In 1893 it was found necessary to write off half the capital, reducing the shares to £2 10s. Now, before ten years are over, we find the vendor anxious, or willing, to buy back his old property for less than half what was paid him at the start. True, the lease is ten years shorter, and the business has not been profitable. Why this generosity, then? We have had some startling examples of this method of financing of late, but, somehow, they do not inspire us with much belief in their philanthropy. Before Mr. Loibl's offer is accepted shareholders should insist on further information. Why, as a director of the company, does not Mr. Loibl devote his energies towards making his prospective profit for the benefit of his shareholders? Why cannot he alter the lease as lessor, if that document stands in the way? Two-thirds of the shareholders have agreed to the scheme, the directors state in their circular. It seems to us that the remaining third should refuse their support unless more sufficient reasons for its acceptance are forthcoming, and should combine to force an investigation.

Balance-Sheet Assets.

How often does a company hug as an asset some worthless item in order that the balance-sheet may look well. Such delusive book-keeping is frequently the secret of apparent big reserves, which lapse into uselessness when put to the test. A strong board of directors, however, ought to have none of this, and ought to write off out of a balance-sheet everything which has been lost or become worthless. A good instance of the manner in which the pruning knife must be used at times is furnished by the London and South African Exploration Company. Going back to the end of 1894, it will be found that in addition to the land and houses representing the investment of the company's capital, it had £91,019 of other assets, including £74,070 of debtors for claim leases from two diamond companies, and for surface rents. This large sum of £74,070 swelled out the balance-sheet beautifully, so that the company claimed a balance in hand of £69,024. Since then the board has had to examine into the position of those assets, as the two diamond companies went irretrievably into liquidation and the arrears of surface rents were not met. By liberal writing down the £74,070 of doubtful assets has shrunk to a mere £5,145, and the total assets outside the property and estates has fallen to £60,169, the chief asset now being £31,760 of investments. In this way a wholesome revision has taken place, and, although at a first glance the company looks poorer, it is probably the richer for the pruning down of the book assets, supposing, of course, that the "investments" are well placed. As to this we have no knowledge.

Dividend Payments on Instalments.

Time after time we have pointed out the dangerous manner in which profits can be manipulated under this principle. The report of the Brampton Brewery Company affords still another instance of the deceptive character of the results attained under this system. The company was issued last June, and, of course, some time elapsed before the various denominations of capital were fully paid. The report, however, shows that the profits were taken for the whole twelve months ended March 31 last, and interest was, of course, paid to the vendors for the interregnum, but that did not amount to the difference between the dividend and interest charges actually paid on the company's received capital and the amount the fully-paid capital would have required. By dint of paying the interest charges and a dividend of 8 per cent. to the shares merely upon the amount paid upon them, and a lump sum of £4,661 to the vendors for interest on the purchase money, only £14,773 was absorbed, whereas if the full interest, charges, and dividend for the year had been met, the sum required would have been £17,900. The company certainly did not distribute the difference, putting as it did £2,000 to reserve, and

writing £1,117 off preliminary expenses, so no complaint can be made on this head. Still, to the ordinary man the tale went forth that the company, after paying 8 per cent. on the ordinary shares, was able to set aside these sums, whereas, in reality, if it had paid the dividend and interest charges for the whole year, there would only have been a small balance left.

The South Wales Strike.

It is nearing its end. The colliers have consented at last to give their representatives who may meet the employers the plenary powers these have all along insisted upon. There is, then, a probability of an early meeting of a conference on the lines suggested by the President of the Board of Trade. It would seem also probable that the miners have suffered sufficiently to induce them to be more reasonable in regard to the terms of settlement. The loss they have by their obstinate shortsightedness inflicted upon the community is practically incalculable; but some slight indication of its possible extent may be gathered from the loss of traffic suffered by the three Welsh railways chiefly affected by the dispute. During the last nineteen weeks the receipts of the Taff Vale Railway have been £51,291 less than in the corresponding period of last year. During eighteen weeks the Barry line similarly lost £24,429; and the Rhymney, in nineteen weeks, £9,713. The total decrease is £85,438. The Great Western Railway, which has important mineral branches in South Wales, has also lost about £12,000; and the stocks of each of these lines have gone down a point or two in quotations as compared with last year. But of course this is a "mere fleabite" as contrasted with the loss in wages, the loss to the employers, and the dislocation in business, not only in South Wales, but throughout the country. The worst of it is that this strangely irrational quarrel seems almost to destroy the hope of better things in the future. It was the stupidest and least responsible section of the Welsh colliers that voted this strike in opposition to the advice of the men's most prudent leaders. Fortunately this sort of reckless unintelligent irresponsibility has resulted this time in disastrous failure. It may possibly serve as a lesson. We sincerely hope so, but repeated failures of a similar kind, though not on so gigantic a scale, have gone far to convince us that your "striking" workman is not always, not even generally, the kind of being who can be taught by experience.

"Financial Agents!"

No one will be disposed to quarrel with the sentences pronounced by the Recorder of London on Messrs. Marcus Leon and Blumenthal of eight and six years' penal servitude respectively. The practice followed by these gentlemen was to introduce to each other impecunious persons, and induce them to draw and accept bills, which they subsequently presented to bankers to be discounted as genuine trade bills. They carried on their "business" under the name of Blumenthal & Company and received sums ranging from £25 to £1,000 as commission for these introductions from both drawers and acceptors. After they had managed to discount these bills, and had deducted their commission, the proceeds were equally divided between the drawers and acceptors. When the bill matured the parties went bankrupt, to the no small loss of the unfortunate discounter. The swindles had been carried on since 1886, and no less than £2,000,000 worth of bills had been thus put in circulation. Their operations were brought to light in the bankruptcy proceedings of one Burckhart, who, when in very low water financially, was attracted by the firm's advertisement. The magnitude of the operations and the ease with which they were carried on for nearly twelve years are certainly extraordinary, and it is to be hoped that the exemplary sentences now imposed will have their effect in intimidating rogues who may contemplate similar operations.

Brewery Issues.

We are not surprised that some of the holders of preference shares in the Camden Brewery Company objected to the authorisation to raise £200,000 further in loans or debentures. By incurring such indebtedness, which will certainly be done, the debenture capital of the company will be raised to £350,000, and the share capital will still stand at £270,000, of which only £120,000 is in ordinary shares. The £150,000 of preference capital, therefore, has to stand all risks of the new acquisitions proving unprofitable, while if they bring increased profits the poor preference shareholder will obtain no benefit. The new debenture capital will probably cause an increase of £8,000 per annum in the fixed charges, and, with the prices of public houses at their present level, it is quite conceivable that some of the purchases may prove bad bargains. This £8,000 in interest will, however, have to be paid, and in that case the margin in front of the preference interest might be seriously encroached upon.

The Workmen's Compensation Act.

This measure comes into force on July 1 next; and to all appearance it will have an effect upon trade and prices which probably nobody contemplated when the Act was under discussion in Parliament. The insurance companies have been carefully considering the matter, and have arranged a table of rates which are about eight to ten times higher than Mr. Chamberlain and his friends estimated when the Bill was before the House of Commons. The Colonial Secretary has been surprised and even shocked at the presumption of the insurance companies in going so far beyond his calculations; and he has been scolding them in good set terms for what he considers their "ridiculous" conduct in this respect. But we presume the companies will prefer the opinion of their actuaries to that of Mr. Chamberlain, and will continue to be guided by it accordingly. If experience should prove that the rates now adopted are too high, competition may be trusted to bring them down to a more natural level. But so serious a view do the companies take of the character of the risks under the Compensation Act, that they have resolved to deal with them as with fire risks, and to distribute the liability among various companies. Mr. Chamberlain's floutings have fallen on stony ground.

But manufacturers and others would seem to have also come to the conclusion that the insurance companies are seeking too much; and trades are already banding themselves together for the formation of mutual insurance associations. The experiment is not without risk, but with careful, prudent management there is no reason why such associations should not succeed. The railway companies seem to be making no special preparation for their protection under the Act: they are to meet this compensation in the same way as they meet the compensation to passengers in case of accidents. But coalowners are to combine for so much of the cost as it may not be convenient to throw upon the consumer. Engineers, shipbuilders, shipowners, are all contemplating mutual combination, and it is not impossible that the Shipbuilders' and Engineers' Federation will form the nucleus for these trades. These mutual insurance associations seem likely to have another and somewhat far-reaching influence. The combination thus assured among employers will no doubt, in time, be utilised in the settlement of trade and industrial questions. Trade-unionism may or may not be "played out," but it will certainly have now to meet and cope with more and better organisation among the employers than they have ever yet encountered. That is one of the probable effects of the Workmen's Compensation Act which was not contemplated even by its framers. Another effect will apparently have to be faced. The Sheffield coalowners are already asking enhanced rates on renewal of contracts to cover the cost of possible loss under the Compensation Act. Scotch coalowners are said to contemplate similar action, so

that no small part of the cost to employers may yet fall on the patient backs of the consumers, including the artisans themselves.

A Year of American Trade.

1897 has been rather a remarkable year in the history of American trade. It opened under somewhat depressing circumstances. The depression of several years seemed continuing, as it had been intensified by the uneasiness and uncertainty connected with the Presidential election. Hopes of improvement were considerable, however, but the signs were slow in coming. We have before us the consular reports for New York, Baltimore, and Chicago; and they all have the same story to tell. The year was well advanced before the hoped-for improvement made its appearance. It was heralded by the great European demand for grain, and the consequent rise in price in America. Indeed, but for this improvement in wheat prices and exports, our Baltimore consul believes that 1897 would have shown a repetition of the stagnation in trade which had characterised the three previous years. Wheat was one of the largest crops that had ever been raised, the return showing over 530,000,000 bushels, an increase of more than 100,000,000 bushels as compared with that of the previous year. The high price obtained for wheat enabled the Western farmers to pay off mortgages, and left them a larger margin for general expenditure, and so set agoing that advance in trade which distinguished the year 1897, and which would have undoubtedly been continued in 1898 but for the check given to it by the outbreak of the war.

According to our New York consul the total value of the exports was the largest on record. In Baltimore there had been a heavy increase in the exports of provisions, lard, and illuminating oil, and an augmentation in copper and tobacco, which, with the enormous export of grain, made 1897 the greatest year for exports in the existence of Baltimore. It was a notable feature of the year, too, that the first shipment of steel rails from the United States to India then took place. They were sent to Calcutta, and were succeeded by another shipment to South Africa; and it would seem that American steel rails are finding their way into several markets where before England had the command. It is also worthy of note that British manufacturers appear to be holding their own in the United States, "except as regards hosiery, linens, and laces." British hosiery has almost disappeared from the American market, having been supplanted by the German article. What may have been the reason for this is not apparent, but it would seem that no effort whatever had been made to regain the trade. Saxon linens are also making inroads on the English trade in that article; and a hint is thrown out that, if English manufacturers were to bring themselves more closely in touch with American wholesale houses, and ascertain the wants of the market, they might probably check the downward tendency, which has not yet advanced very far. In shipping, British vessels seem to keep an easy lead. Of 874 foreign trade vessels entered at the port of Baltimore in 1897, 696 were British. Some time ago, just before the war broke out, Glasgow was somewhat perturbed by the arrival of a cargo of pig iron from America, which was sold at about 10s. a ton below what it could be obtained for in England. It would appear that a continuance of such exports may be expected when the war allows of the resumption of commerce under normal conditions; for the production of pig iron in the United States in 1897 was the largest ever recorded in any previous year. In this, as in many other ways, the loss to America by this war with Spain will be very great.

Critical Index to New Investments.

SOUTHAMPTON CORPORATION.

Capital and Counties Bank offers for tender at a minimum of 101 per cent. an issue of £120,000 2¾ per cent. stock. Interest is due January and July, and the stock can be redeemed at par in July, 1915. The money is wanted chiefly for street improvements, sewerage and drainage works, and a new infectious diseases hospital. Population of Southampton is 100,000; rateable value £422,359; and the capital value of the entire undertakings and properties of the Corporation is put at £1,001,982, the existing debt being £518,322. In July, 1895, £100,120 of similar stock was placed at 102½ per cent. and in December, 1896, £100,000 of stock was sold at an average of £101 1s. 6d., or only 1s. 6d. over the minimum. Good as the security is, the present seems hardly the time to offer it, and in spite of a full half year's interest being payable next July, we rather doubt the reception it will receive.

KENSINGTON PALACE MANSIONS, LIMITED.

With a share capital of only £50,000 held by the vendor, an issue is made of £63,000 in 4½ per cent. first mortgage debenture stock at par. It is redeemable at par December, 1975, by sinking fund policies in the Alliance and Sun Companies, the lease expiring in the following March. Property, which is situated in Kensington Gore, is valued at £110,000. The stock appears to be a fair second-rate venture for those who do not mind having no share capital to lean against.

THE BRITANNIA WORKS COMPANY (1898), LIMITED.

This is a reorganisation of the Britannia Works Company, Limited, manufacturers of the well-known Ilford dry plates, films, and photographic papers. Originally established in 1880, the business was carried on as a private concern until December, 1891, when it was converted into a private limited liability company. The capital is £380,000 in 190,000 ordinary and 190,000 6 per cent. cumulative preference shares, of which the vendor takes 60,000 shares of each class and also £260,000 in cash. The company has been very prosperous in the past, the profits for 1894 being £47,994; for 1895, £43,746; for 1896, £46,939; and for 1897, £47,362. We see no reason given why the vendor is selling nor any valuation of the assets. Perhaps, therefore, it would be well to wait awhile and see the first report before investing much in the shares.

COAST DEVELOPMENT COMPANY, LIMITED.

If there be wisdom in the multitude of counsellors this company ought to do well, for it has ten directors residing at different places between Twickenham and Dumbarton. The object is to acquire various undertakings, comprising the Clacton-on-Sea and General Land, Building, and Investment Company, Limited, Belle Steamers, Limited, Clacton-on-Sea Pier Company, Limited, Clacton-on-Sea Hall and Library Company, Limited, and the recently formed Walton-on-the-Naze Pier and Hotel Company, Limited. Share capital is £500,000 in 40,000 5 per cent. cumulative preference and 60,000 ordinary shares of £5 each, of which 9,968 preference and 8,458 ordinary, with an issue of £100,000 4 per cent. first mortgage irredeemable debenture stock are offered at par. The assets acquired from the old companies are stated at £346,717, but some of the things taken over seem very expensive. The Clacton and Walton-on-the-Naze piers stand for £52,112 and five passenger steamers at £124,750, or an average of £24,950 each, and if the remaining assets are valued on this basis we should say the sale will be a very good thing for the old companies. Profits for past three years are certified at £12,575, £15,292, and £17,843, giving an average of £15,237. This refers to the first four companies, and depreciation and interest on capital has yet to be deducted, so that the margin for the ordinary shares on this basis would not be large. The consideration given for the assets is £294,000, viz.: 10,032 preference, and 21,542 ordinary shares, and £136,130 to discharge the liabilities of the old companies. The amalgamated venture offers, we think, small attraction to the prudent investor.

COSTA RICA COFFEE ESTATES, LIMITED.

Of the share capital of £50,000 in £10 shares, one-half is offered for subscription. Company buys a partially developed coffee estate in Costa Rica called "La Canada," comprising an area of about 809 acres, but only sixty acres are in bearing. Purchase price is £14,500 in cash, and £9,500 in shares. Costa Rica coffee may be very fine stuff, but this is not the time to take shares in a coffee company.

HARVEY'S YOKER DISTILLERY, LIMITED.

This will not do under any circumstances. Company is formed to buy a distillery at Yoker, near Glasgow, said to have been successfully carried on for about 150 years. We feel ashamed to admit we never heard of it. Share capital, £90,000 in £1 shares, 50,000 being 5½ per cent. cumulative preference, and the rest ordinary.

The preference are offered with an issue of £40,000 4 per cent. debentures at par. Purchase price is £98,000, including £58,000 in cash, although the distillery is valued at only £46,777. The profit statement is certainly extraordinary. Without deduction for interest on capital, partners' salaries, income tax, depreciation on building and machinery, or for wear and tear on casks, they were for 1894, £3,053; for 1895, £2,812; for 1896, £9,792; and for 1897, £8,271. These profits include a yearly estimated appreciation on the stock of whisky held, and the large increase in profits for the past two years is due to sales of whisky in stock, upon which basis the company is to be floated. The thing is really too funny.

KENT COAST MINERAL WATER COMPANY, LIMITED.

Capital £15,000 in 4½ per cent. debentures, £20,000 in 6 per cent. preference, and £40,000 in ordinary shares, the greater part of which is now offered at par. Six firms in the east of Kent are to be amalgamated, and their net profits, which are given separately for three years, show an average per annum of £4,642. We never thought much of these ginger-pop amalgamations, and the fact that the vendor takes £44,000 in cash out of the £50,000 of purchase money shows that he likewise does not think much of them.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

The Equitable Life Assurance Society.—The annual reports of this society, of which the 136th is now before us, are monotonously good. In 1897 312 new policies were issued insuring £284,809 and yielding £17,723 in new premiums, including £6,702 single premiums. Also fourteen annuities amounting to £907 were granted for £9,559. Claims on 100 policies took £239,965, of which sum £132,450 represented the amount contracted for in the policies and £107,515 bonus additions thereto. But for bonuses aggregating £13,570 surrendered previously, or applied in reduction of premiums, the second of these totals would have been £121,084. In one case the sum assured and bonuses declared together exceeded the original amount assured more than four times over. On forty-nine policies surrendered the surrender values amounted to 83·5 per cent. of the premiums paid. Expenses of management were under 7·3 per cent. of the premium income and less than 4 per cent. of the total income. At the end of the year the accumulated funds amounted to £4,402,281, an increase of £80,748 on the previous year's total. This money is invested in the best stocks and securities, all, with a small exception, within the United Kingdom. It is announced that the Earl of Denbigh has been appointed a director in place of the late Major-General Sim.

London and South African Exploration Company.—This company has a pretty steady revenue from its lands, but of late years it has been writing off various worthless assets, and so the balance forward diminishes. Thus the sum of £58,785 was brought in, but only £30,603 was carried forward, the reduction being chiefly due to the writing off of £16,438 owing by the Gordon Diamond Company as a bad debt. It should not be passed unnoted that the revenue did not prove sufficient to meet expenses and pay the dividends of the year, which latter amounted to £80,000. With a revenue of £88,078, working expenses came to £19,821, and so the balance had to be reduced by about £11,600 in order that the dividend might be paid. The profits of the company are good, but we should imagine the board would do wisely to return to the dividends of 12s. per share in place of the 16s. per share now distributed each year. Ever since the higher rate has been paid the cash balance of the company has been running off, and, as against £70,887 at the end of 1895, it is now only £30,603.

Reuter's Telegram Company.—Perhaps owing to political disturbances, this company appears to have done well during 1897, and after working charges had been met, the net profit is £10,687. This permits of a dividend of 5 per cent., the placing of £5,278 to reserve, and the carrying forward of £411. The reserve will then amount to £26,000, but is practically absorbed by the capital expenditure of £27,145 upon establishing an advertisement branch. We should doubt very much whether this branch was a success, and so the reserve should not be treated as a very tangible asset. The balance-sheet in other respects is not particularly strong, so that further additions to reserve ought to be made before the dividend is increased.

Arizona Copper Company.—Burdened with a malodorous past, this company appears to have at last issued safely from the slough, and accordingly its board, which has never failed to take the market view of the position, is apparently going to "run the show for all it is worth." Of the £100,000 of terminable debentures, £37,080 have been redeemed out of profits, a further sum of £47,020 falls due at Whit Sunday, 1899, and the balance of £15,900 can be arranged to be redeemed at that date. From that date, therefore, it is proposed to reconstruct the concern. First, the other debenture issues will be taken in hand, and the "A" 6½ per cent. debenture stock, amounting to £134,908, and the "B" 7 per cent. debenture stock, amounting to £181,239, will be converted into a new 5 per cent. debenture stock. The "A" debenture stock is redeemable at a bonus of 10 per cent., so that the amount of new debenture stock will be just about £330,000. The saving in interest will be, at the start, about £5,000, but 25 per cent. of the net profits are to be used in redemption, so that the initial annual charge of £16,500 for interest ought to diminish. The "A" preference shares of £40,000 will be left untouched to receive 6 per cent. interest, but the few deferred shares out will be merged into the preferred issue, thus constituting a total of £640,000, which will be equally divided into preferred and ordinary stock, the former being entitled to a cumulative 7 per cent. dividend, and the latter taking surplus profits. As the profits for the year ended September 30 amounted to £129,000, it is argued that if this rate be maintained all the charges might be met and £59,626 left for dividend on the new deferred stock, less any sum devoted for improvements and extensions. The scheme seems fair to all concerned, but shareholders should not build too much on profits being maintained at the rate mentioned. The development of new copper mines goes on apace, and the present high quotation of the metal may not last. Still once Whit Sunday, 1899, is passed, and this scheme is agreed to, the fixed charges ought to be so reduced that dividends upon both the preferred and deferred stocks may be reasonably expected.

Brampton Brewery Company.—This new company earned last year a gross profit of £21,967, and after paying interest on purchase money and on debenture stock the net balance was £11,631. This allowed of the payment of preference interest, a dividend of 8 per cent. on the ordinary shares, the carrying of £2,000 to reserve, the writing off of £1,117, or the whole of the preliminary expenses, and the carrying forward of £473. The dividend and interest upon the various denominations of capital were only paid for the period during which the instalments had been paid up, while the whole profits of the year were taken, the vendors receiving interest for the time during which full payment had not been made to them. The result was a saving of £3,100 to the company, which is precisely the amount set aside to reserve and the wiping out of the preliminary expenses. Dividends on the ordinary shares are not allowed to rise above 8 per cent. until the reserve amounts to £20,000, but we have yet to see whether any substantial surplus above the amount so required will be earned. A little lower dividend than 8 per cent. would please us better.

Malay Peninsula Coffee Company.—A bad record is shown by this new company for its first year of working. The crop was short, prices were low, and the cost of picking and curing the berry was unusually heavy. The result was that there was a loss on working of £1,975, and as £1,450 had been paid away in an interim dividend on the preference shares, the company has to start on its career with a balance to the bad of £3,403. It is stated that less than half the cultivated area is in full bearing, but this implies a heavy cost for upkeep, and as the balance-sheet showed that the company owed more than it possessed in liquid assets the outlook is not encouraging. Everything appears to have banded against this poor company, but we wonder whether its conception was altogether healthy.

W. N. White & Company, Limited.—This small concern had a gross profit last year of £13,829, and after payment of administrative charges a sum of £8,370 was left as net profit. One-tenth of this amount is put to reserve, the preference interest of 6 per cent. is paid, and a dividend of 10 per cent. is declared upon the ordinary shares. The chief asset to all appearances is "goodwill," and there does not seem to be any strong desire to accumulate funds in order to reduce the £60,000 at which the "Purchase of the Business, &c." stands.

Rohilkund and Kumaon Railway Company.—The company last half-year benefited to a moderate extent by the Frontier War. This caused an increase of Rs. 9,747 in the coaching traffic; which more than covered the diminution of Rs. 4,517 in the goods traffic, chiefly from grain. The net receipts came to £5,630, as against £4,652 in 1896, a great part of the improvement being due to the higher exchange. A dividend of £2 11s. 9d. per cent. is proposed for the half-year, making £5 3s. 6d. for the year, which is the same rate as for the three previous years. The sum of £900 is transferred to the reserve, which will then stand at £8,000. The Secretary of State for India received £270 as his half of surplus profits after 5 per cent. had been paid upon the capital, but in future years the Government will only take the half of surplus profits after the stock has received 6 per cent.

American and General Mortgage and Investment Corporation.—The revenue of this corporation tends to improve, but it is insufficient to meet the preference interest. That, however, is not so serious a matter as it looks, for there is only £28,718 of deferred capital against £265,000 of preferred shares and debenture and loan debt. For last year the revenue was £11,710, and after administrative charges were met the net balance of £9,272 was arrived at. Of this £1,500 was set aside to meet realised losses, and £500 to write down preliminary expenses; then 3 per cent. in interest was paid upon the 5 per cent. preference shares, leaving £302 to be added to the carry forward, which will be £500. The interest upon the preferred shares is cumulative, and the arrears will now amount to 9 per cent. The real estate business of the company, which is its weakest side, shows some improvement, the loans on mortgage having been reduced £5,740, and the real estate held by £4,771. This has enabled the company to put £6,000 more into investments, which of late have yielded better than land mortgages. Some £4,133 of the real estate is also under contract for sale, so that that item will drop below £40,000. But we fear the best of the lands and mortgages are being redeemed, and to deal with the residuum will be troublesome.

The shifting of investments appears to have been done with judgment, and they now consist of a much better collection than some time ago. The company has, however, £18,166 of losses realised upon investments to wipe out before its balance-sheet can be considered at all satisfactory. The present dividend ought not to be increased until this item and the £1,000 of preliminary expenses are wiped out, for the real estate is sure to bring more losses later on.

Balaghat Gold Mining Company.—So far as revenue is concerned, the results of this company last year were most disappointing. Only £752 in gold was obtained, and £2,064 from water rents, so that with a small sum from transfer fees, the total revenue was £2,946 against £10,232 of expenditure, making a loss on working of £7,285. Depreciation of plant, machinery, &c., required £3,584, so that the debit balance for the year is £10,870. In the time, however, a good deal of exploration work has been done, and a valuable ore body is claimed to have been found at the 700-feet level south at Tennant's shaft. Powerful pumps have also been put to work at Haine's shaft which had previously been under water up to the 410-feet level, and the water had been lowered at the time of the issue of the report to the 670-feet level. The pumping of the shaft dry to the 800-feet level is not expected to take long, and the board is hopeful that the remaining resources of the company will last until the mill is in a position to make returns. Of this we should be rather dubious unless creditors prove patient, as the balance-sheet at December 31 last only showed free assets of about £1,500.

The British Tea Table Company.—This company makes up its accounts to March 31 last, and the profit shown is £20,408. All this, however, does not come to the shareholders, because the company did not enter into possession until July 1 last, and had to pay certain moneys over to the vendors. So £14,621 was all that the directors had to distribute. They have paid the preference dividend, and declared a dividend of 1s. 3d. per share on the ordinary shares, which they say is equivalent to about 10 per cent. per annum on the amounts for the time being paid thereon. A balance of £1,509 is left to carry forward. Goodwill stands in the balance-sheet at £130,411, and we should not like to trust the company with much of our money until this has been materially written down.

The report of the Castner-Kellner Alkali Company, Limited, for the period ended March 31 last states that the profit was £9,161 on the working of the first installation of 1,000 horse-power. It is expected that the full output of 4,000 horse-power will be ready within the present year. To meet the final costs of the substantial works being erected an issue of £80,000 5 per cent. first mortgage debenture stock, part of an issue of £100,000 repayable in three years. A sum of £8,677 is carried forward as net profit, and it is hoped that six months hence the profit will be enough to warrant an interim dividend at the rate of 8 per cent. Current expenses look very moderate.

J. W. Benson, Limited.—For the year ended March 31 last the net profit was £50,139, including the dividend of £9,066 from the shares of Hunt & Reskell, Limited, held by the company. Of the total, £7,040 has been carried to general reserve as representing profit earned previous to the incorporation of the company. After meeting prior charges, paying 10 per cent. on the ordinary shares, and adding £4,959 to the general reserve, a balance of £8,820 is left to carry forward. This seems good on a company capitalised at £750,000, but why is the amount devoted to depreciation not stated?

New Explosives Company, Limited.—Net profit for 1897 was £2,601, which, added to £3,593 brought forward, gives £6,194 for appropriation, and the directors pay a 2½ per cent. dividend out of it, leaving £3,944 to go to the new year. Extensive new works are to be ready this month. Delay has been caused by a strike and the engineers' lock out. All the £24,000 of debentures have been "practically" taken up, but the new works will cost about £32,500 when finished. The balance-sheet and profit and loss accounts are full and clear.

Montevideo Gas Company.—Again this company has had a bad year. The reduction in the price of gas made in 1896 led to considerable loss in revenue, which was accentuated by the political unrest in the city. During the whole of 1897 commercial enterprise was checked by politics, and not until the present provisional Government took office in February this year was there any sign of commercial revival. Revenue was, therefore, about £12,000 less than two years ago, and although working expenses were reduced, the net profit of £18,034 was nearly £10,000 below that of 1895. As a consequence, the sum of £7,136 had to be withdrawn from the contingency fund in order to maintain the dividend at 5 per cent., and, of course, the balance forward of £4,456 also disappeared. The contingency fund, however, will then stand at £18,137, and the insurance fund at £12,500. The reserve, too, will be £64,540, after £9,460 has been deducted for the redemption of debentures. The latter policy is a good one, as they bear interest at 5 per cent., and the company is rich in surplus assets.

Trust and Loan Company of Canada.—This high-class company earned in the half-year ended March 31 a net revenue of £10,988, which allowed of a dividend at the usual rate of 6 per cent. per annum, the addition of £619 to reserve, and the addition of a like sum to the balance forward, which amounts to £10,390. The reserve fund, however, had to bear £4,217 for loss on securities realised in Canada and £2,593 for depreciation of investments held in England, but it benefited to the extent of £3,670 from interest and £619 from revenue, so that the net decrease was only £3,629. The company has been steadily meeting moderate losses on realisation of securities in Canada, and although its loans and debentures outstanding have diminished by about £32,000 in the past two years, its net revenue has been maintained. The foreclosure account rises, but it is proportionately small to the live mortgages, and overdue interest is much less.

Jhanzie Tea Association.—Owing to climatic influences the outturn of tea last year was only 825,091 lb., or 202,909 lb. less than the estimate, and 142,816 lb. below the output of the previous year. A fractional higher price, however, was obtained, the average being 10·50d. per lb., as against 10·33d. per lb. in 1896; but the result was that the sales came to £5,334 less, and owing to the higher exchange, which cost the company £1,216, the working expenses were £354 more. Accordingly, the net profits were only £3,933, as against £9,521 in 1896. Such a reduction, we should fancy, was unprecedented in the history of the company, and the board met the emergency by withdrawing £2,000 from reserve, and reducing the dividend from 10 to 8 per cent. That they could then pay such a good rate is proof of the sterling solidity of the concern, for the reserve will then stand at £15,800. At the same time, it was prudent to reduce the dividend, as there is no certainty that the current year will see anything like 10 per cent. earned.

River Plate Gas Company.—A newly amalgamated concern, it has started with a good year. Gross profits came to £80,662, and after including £30,907 as a balance left over after the settlement of the accounts of the old companies, there was a total of £111,259. The sum of £12,301 was absorbed by debenture interest, £6,751 by administrative salaries, and £4,000 placed as a reserve against bad and doubtful debts. Out of the balance of £87,679, the directors declared dividends equal to 6 per cent. for the year, carried £20,000 to reserve, and wrote off £5,288, the whole of the preliminary expenses, which left £10,966 to be carried forward. It ought to be clearly understood that this was not done wholly out of one year's profits, for the £30,907 brought in from 1896 just accounts for the allocation to reserve and the big carry forward. At the same time bad debts ought not to require—at least we hope not—so much in future years, debenture interest should be less by one-third, and of course preliminary expenses will not recur. There is, however, an unsatisfactory item in the balance-sheet of £27,339 for "discount on issue of debenture stock and premium on redemption" which ought to be written off out of profits. At present the reserve and carry forward may be said to be invested in this intangible fashion, and not until this item disappears can those accumulations be said to be set free for a useful purpose.

Wenholt Estates Company of Australia.—Not a happy record belongs to this company, for in its history of ten years the ordinary shareholders have only received three dividends and they were small. Whatever may have happened in the past the board now seems to be endeavouring to improve the financial position of the concern. Last year was not a favourable year for the Australian pastoral industry, yet after paying £10,000 in debenture interest the company showed a profit, including £5,112 brought forward, of £21,730. Of this £10,973 was used to write off the balance of permanent improvements, £6,500 was absorbed in paying the interest on the preference capital, and £4,256 was left to be carried forward. By this arrangement, the whole of the £54,316 spent in past years as permanent improvements upon the stations and stock is written off, and these will stand in the books at the original value of £500,000. There is a reserve fund of £10,565, but this is practically ear-marked to purchase a new property. The effects of the drought are seen in the diminished number of stock upon the property, but we should imagine that this company has not suffered so severely as others in this respect. If the expected improvement comes this year, a dividend upon the £200,000 of ordinary capital may be in sight, but it would be wise to add to reserves at the same time, and not use these reserves wholly in the business. The experience of the Scottish Australian Investment ought to be a warning on this head, for its £200,000 of reserve is very little assistance in the period of adversity.

Castle Mail Packets Company.—Considering that there was some falling off in the trade with South Africa during the past year for reasons well-known, the figures of the balance sheet are satisfactory. Practically all the assets have been written up; the fleet, including payments on account of new steamers, standing at £1,352,479, compared with £1,154,786 a year ago. Property has been raised from £84,868 to £93,014; cash at bankers from £47,443 to £57,338, and investments from £36,501 to £51,000, the total assets standing at £1,763,334, or £232,000 more than in 1896. On the other side, £150,000 of temporary advances have been replaced by £330,000 3½ per cent. debenture stock, which is borrowing cheap enough for such a company, the insurance fund has been raised from £249,390 to £323,476, and the reserve from £125,000 to £135,000. The credit balance is then £27,433 compared with £26,120 a year ago, from which a dividend of 12s. per share is to be paid, making 20s. for the year, as in 1896. Two new large vessels of between 9,000 and 10,000 tons register are being built by the Fairfield Company to pay for which the company will need more money. Opportunity is, therefore, to be taken to rearrange the capital by which the basis will be improved upon which to raise the new capital. In the first place, the balance of £6 will be called upon the 36,000 ordinary shares, less £2 to be credited from the insurance fund, so that the net amount produced will be £144,000. It is also proposed to issue 12,000 preference shares to bring in £240,000. The directors further want powers to issue the balance of the share capital of 22,000 shares, which would make up the entire authorised capital of £1,400,000. We do not think that the present earnings by any means warrant this large increase in the paid-up capital, but in view of growing competition the directors doubtless wish to be in a strong position, no matter how the dividend may be affected.

THE OTAGO AND SOUTHLAND INVESTMENT COMPANY, LIMITED.—Last year the board of this company reduced its liability on debentures by a net sum of £47,960. This has not been done without loss through realisations of securities in New Zealand, but even so it is well done, as the company carries securities representing £165,014 on which it is receiving no interest. Owing to £5,204 lost and to the smallness of the revenue, the debit balance now amounts to £23,869, £14,335 of it accruing last year. Charges have been reduced by £600. The prospect is not over cheerful.

JOHN BAZLEY WHITE & BROTHERS, LIMITED, Cement Manufacturers.—Last year's profits amounted to £89,057, an increase of over £30,000. During the year two additional cement works have been acquired, adding about £35,000 to capital account. On the other side of the balance sheet, freehold and leasehold properties have risen £54,000. Reserve fund is increased by £10,000. Apparently this fund is invested outside the business, but this point is not very clear in the accounts. Goodwill, trade marks, &c., stand as before. £3,410 has been used to redeem debentures. The directors state a fair amount has been written off for depreciation and loss caused by floods. A dividend of 4 per cent. is to be paid on the ordinary shares. Certainly there is an improvement, but with the large capital sunk in the business we should like to see efforts made to reduce the goodwill asset.

MILLARS' KARRI AND JARRAH FORESTS, LIMITED.—The result of the first year's working is quite up to the promise of the prospectus, the profits from trading amounting to £70,121, of which £11,974 is appropriated to property reserve account, and £10,000 to depreciation suspense account, although it is claimed that the works have been maintained in the highest state of efficiency. The ordinary shareholders get a dividend of 3s. per share for the year, or 15 per cent., and £11,930 is carried forward. Reference is made to the large increase in the output of timber, and to cope with the expanding business another 50,000 ordinary shares are to be issued at £1 premium *pro rata* to existing ordinary shares, which will give them a nice little bonus. The number of these wood concerns have increased considerably of late, and we should think there is a good prospect of lively competition in the future.

Diary of the War.

May 13.—Meagre fare in war news. The Spanish Cape Verde squadron is again missing. It has not been at Cadiz; such is the latest assurance. Where is it? Nobody knows, or at least, nobody will tell. It cannot apparently have gone near Porto Rico; for reports are received of Admiral Sampson's bombardment of San Juan, and of the surrender of that port. Two American gunboats and a torpedo-boat, the *Winslow*, having looked into the harbour of Cardenas to ascertain the exact position of the shore batteries, and to attack, if opportunity offered, some Spanish gunboats, had such a hot reception from the forts that they retired. The *Winslow* was badly hit through her boiler, and it was with difficulty that she was towed beyond the range of the Spanish fire. The Americans evidently cannot do what they like on the Cuban coast. The Spaniards there, at least, keep a fairly good look out.

May 14.—Another turn of the kaleidoscope, and a new arrangement of war prospects, necessitating a prompt change of tactics on the part of the Americans. The Cape Verde Spanish fleet is not only not at Cadiz, but has never attempted to go there. It is now discovered that a couple of days ago—Thursday, the 12th—this fleet, moving so noiselessly and escaping observation so cleverly, arrived at Fort de France, Martinique, one of the Lesser Antilles, that it coaled there, or a few miles off at sea, and sailed away again, no man, except the Admiral in command, knows whither. Admiral Sampson, on the same morning, very early, had arrived at Puertorico, and at daybreak bombarded the forts on San Juan. He destroyed them, say some accounts, but his own despatch does not claim so much. It is clear, however, that he inflicted severe damage upon them, receiving comparatively little in return; but he nevertheless withdrew his fleet, and the Spanish report asserts that one of his ships had to be towed away. Previous to bearing down upon Puertorico, Admiral Sampson and fleet had been scouring the seas in search of the Spanish squadron; but the seas he scoured were two or three hundred miles to the north of where the Spaniards had been steaming; and so of course they never met. The question now is, whither has the Spanish fleet sailed? It may have gone towards Puertorico, a not improbable assumption; or it may have sought to intercept the returning American warship *Oregon*, a notso probable assumption for a squadron consisting of at least four large fighting ships and three torpedo boats; or it may have gone by a circuitous route to the south of Jamaica, holding for Havana by the southern and western coast of Cuba. This is the assumption on which the American naval authorities have acted, for they immediately ordered the despatch of the flying squadron under Commodore Schley from Hampton Roads for Havana, to strengthen the somewhat weakened blockading fleet there. It would seem also that the fact of the discovery of the whereabouts of the Cape Verde fleet had been communicated to Admiral Sampson, who immediately sailed from San Juan with the whole or chief part of his fleet, also in the direction of Cuba. If he took all his ships with him, his progress must have been slow, as he had two monitors, and the speed of one of these at least does not exceed twelve knots an hour. Supposing the Spanish fleet is heading for Havana, it is calculated that it might reach that destination by Sunday night. But it is believed that Commodore Schley, with the flying squadron, might reach Havana to-night. If so, he would be in time to meet the Spanish fleet to-morrow (Sunday) night or Monday, and a big naval fight would result. But there is yet another contingency. Admiral Cervera with his Spanish ships may sail for neither of the points indicated, but out into the "ewigkeit" where he has during the last fortnight so adroitly escaped observation. The "moral effect" of such a movement would be great. It would postpone indefinitely the American military expedition to Cuba, for it cannot sail as long as there is a possibility of this erratic Spanish fleet coming down upon it at any moment and from any quarter.

May 15.—Situation much the same as yesterday. The Spanish fleet still invisible. No word from Admiral Sampson. Commodore Schley, it is now said, cannot reach Havana before to-morrow, so that, if Admiral Cervera should get there, say, to-night, he might raise the blockade and get under the shelter of the Havana forts. This might strengthen the defence of Cuba, but it would leave the Americans in command of the sea, and would settle the fate of Puertorico. American papers treat with humorous grimness the suggestion by Mr. Chamberlain of an alliance with the United States. They have no objections to friendly relations, but they refuse to be involved in England's European quarrels.

May 16.—Admiral Cervera's fleet has again upset American calculations. It appeared off Curaçao, one of the Dutch West India Islands, about forty miles north of Venezuela, on Saturday morning. The Spanish Admiral seems to be in no hurry to take refuge anywhere—either Havana or Puertorico, or other port. The American Admiralty seem to think he now aims at Cienfuegos; but that appears doubtful. Of course he might go there or he might proceed round Cuba to Havana. But if he goes to either Cienfuegos, or Havana, or Puertorico, he virtually shuts himself up; and the Americans can concentrate their fleets for his destruction. The tactical success of their Admiral has elated the Spaniards and all suggestion of peace is lost in the cry for a continuation of the war. It is a poor peg on which to hang such a policy, but Spanish depression had become so profound that a small hint of success might easily bring elation. Mr. Chamberlain's speech has made a great sensation on the Continent. It is interpreted as an appeal, *ad misericordiam*, for an alliance with the United States if possible, but, failing that, with any Continental State. None of his critics, however, allow the possibility of alliance. Comment on the speech in American journals is not very profuse, but the suggested Anglo-Saxon alliance is not altogether scouted. France repudiates the notion that anything in the present condition of the West African negotiations justifies the suggestion that there is any danger to peace there.

May 17.—Still searching for the Spanish fleet, which has nowhere been seen since it left Curaçao on Sunday evening, the 11th. Admiral Sampson is watching for it in the Windward Passage. Commodore Schley's position is not quite clear, but he has not gone to Havana. The Spanish Ministry has resigned, and Senor Sagasta is engaged in the reconstruction of the Cabinet; it will continue Liberal, as a Conservative Ministry could not have been formed without a majority in the Chamber, and to risk a general election just now in search of a majority is too dangerous a proceeding to be thought of. The reconstruction of the Ministry means, it seems, "a vigorous prosecution of the war," though how Senor Sagasta is to set about it is not quite clear. The war may be prolonged as long as Admiral Cervera keeps afloat and avoids a battle, but the Home Government cannot afford much assistance to him. The only thing they can do is to send out the reserve fleet at Cadiz to try and find him and render assistance; and as the Admiral in command there has been summoned to Madrid, possibly this step may be in contemplation.

May 18.—Americans still in search of the Spanish fleet, which has called nowhere since its brief rest at Curaçao.

May 19.—Senor Sagasta has succeeded in forming a new ministry, but the Spanish fleet has not been seen again. No news of it whatever.

THE PROPERTY MARKET.

It almost seems as if the supply of property at Tokenhouse-yard were falling below the demand. The quantity disposed of last week brought in a total of £181,356, or £64,220 lower than the total for the corresponding week of 1897. But buyers seem still plentiful, competition keen, and prices are improving. Land, especially for building, is in increasing demand. Fifteen acres in Church End, Finchley, sold last week at £500 per acre; another lot, in smaller parcels, at Barnes, brought over £1,500 per acre; while a farm of about thirty-two acres near Brentwood, in Essex, went for the modest sum of £9 an acre. A freehold estate at Streatham of fifty acres, with seven residences, offered yesterday week by Messrs. Farebrother, Ellis, & Co., did not, however, command the reserve price put upon it, £150,000, or £3,000 an acre, and so was withdrawn. The firm mentioned on the same day sold the freehold of 11, New Burlington-street, Bond-street, for £15,700, and the leasehold professional residence, 34, Bruton-street, for £4,500. Messrs. White & Sons, of Dorking, acting with Messrs. Hampton & Sons, disposed of a freehold residential property known as "Bokefield," at Westcott, Surrey, with ten and a half acres, for £7,600. The remaining supply consisted mostly of bricks and mortar. Messrs. Newbon, Edwards, & Shepherd sold a leasehold residence at Finsbury Park, sixty-nine years unexpired term, at £1,210. A Guardian life policy for £3,800 and profits, life aged 57, was disposed of by Messrs. Vernon & Son for £1,650. Messrs. Stimson & Son got £1,500 for the freehold house, 285, Camberwell-road, and £750 for two freeholds, 212 and 214, St. George's-road, Peckham. Total of the day's sales, £50,255.

Friday was what may be called a good day at the Mart. Several large properties were disposed of at good prices. Messrs. Protheroe

& Morris sold two freehold blocks of building land in Long-lane, Finchley, at £4,210; other two freehold blocks in Squire's-lane, Finchley, at £1,170; and the Ballards'-lane Nursery, area 1a. 1r. 5p., freehold, rent £154 at £2,500. Mr. W. A. Blackmore realised £2,700 on a number of leasehold houses in Percy-road and Thomas-road, Hackney; and Mr. L. Farmer disposed of Brondesbury House, Willesden, and about three acres, unexpired term sixty-one and a half years, at £2,350. A freehold property at Crouch Hill, rent £120, with four plots of land, was sold by Mr. Smallpeice for £4,100; as well as freehold ground rents of £35, reversion in seventy-seven years, at £1,295.

Out of nineteen lots offered at the Mart on Monday six were bought in, and the total of the day's sales only reached £11,900. Messrs. Beale & Capps succeeded in disposing of some leasehold property in Clarendon-gardens, with fifty years to run, ground rent of £28, and rent of £295, at £2,375; other leaseholds in Paddington and Notting Hill at a total of £3,575. The only other important lot was that offered by Messrs. Holcombe, Betts, and West, a freehold residence, with two and a half acres, at Northwood, Middlesex, which brought £2,250.

The excellent business of Tuesday almost made up for the inactivity of Monday. The total sales amounted to £65,415, and some very fine properties were disposed of. Messrs. Farebrother, Ellis, & Company negociated the sale of the late Lady Watkin's riverside residence, "Mount Felix," at Walton-on-Thames, which, with over fifty acres of land, brought £23,500. Messrs. Debenham, Tewson, & Company obtained £12,000 for the freehold of Nos. 362 to 375, Old-street, St. Luke's, covering an area of 8,100 feet, and £6,700 for a freehold building estate of nine acres at Ealing—a very fair figure. Messrs. Walton & Lee disposed of two lots of freehold building land at Surbiton for £3,550. The Leaming House Estate, containing seventy-two and a half acres, at Ullswater, Cumberland, in the Lake District, was placed by Messrs. Bean, Burnett, & Eldridge for £7,600. Messrs. E. and H. Lumley disposed of Great Cliff End Farm at Pegwell Bay, Kent, containing 111½ acres, freehold, at £4,200. This was sold on the system of deferred payment recently introduced by Messrs. Lumley. These are some of the most notable transactions of an active day at the Mart. Two licensed houses were sold at Masons' Hall Tavern on Tuesday—one, the "Cauliflower," a well-known public at Ilford, with stabling and garden, freehold, which Messrs. Orgill, Marks, & Orgill negotiated for £50,000. It is stated that the house has been in the possession of one family for 200 years. The other house was the "Tulip Tree" at Richmond, situated opposite the athletic grounds in the Old Deer Park. For the twenty-seven and a half years' lease, at £60 rent, with goodwill, Messrs. Fleuret, Sons, & Adams obtained £2,640. Mr. Alfred Richards announces a sale of leasehold residences in Islington at the Mart next Monday, and on Tuesday of eleven long leasehold houses, two freehold villas, and a plot of freehold building land in Tottenham.

At the Mart on Wednesday Messrs. Edwin Fox & Bousfield sold portions of an adventurer's share in the New River Company at the rate of over £129,000 per share, and 50 new ordinary shares in the Grand Junction Waterworks Company at prices ranging from £95 to £103 per share. The day's sale at Tokenhouse-yard amounted to £15,810, but the details were of minor interest. Messrs. Douglas Young & Co. were the chief operators, all except one of their lots being sold at an aggregate of £6,305.

TRADE AND PRODUCE.

The tone of the English wheat markets has been very easy during the week, with a decidedly downward tendency. In one or two instances business could only be done at a reduction of 2s. to 3s. a quarter; but as a rule the attitude of buyers and sellers alike has been one of expectancy—the former pretty confident of a decrease in price, and the latter hoping for a yet further increase. These were the views animating Mark-lane until Wednesday last, when the general impression seemed to be that the wheat "boom" must be regarded as at an end, and that the question must now be how far the decrease in price would go. Not far for some time, probably. Indeed, Chicago and New York seem not altogether to have given up hope of a resumption of the upward tendency; but the speculative efforts to produce a rally in prices have been weak and ineffectual. Liverpool responded languidly, and the market fluctuated in a heedless sort of way; but there was no quotable change in values. Yet the demand for the Continent continues. France seems still to take as much as she can get, and many shipments for English ports have again been reconsigned for French ports. Italy also is taking a great deal, and so is Spain. But the supplies keep well up. *Dun's Review* tells us that Western receipts at New York, after averaging less than 2,500,000 bushels per week for four months, a fortnight ago suddenly rose to 3,500,000 bushels. Exports for the same week amounted to 2,094,389 bushels, flour included, against 1,498,167 bushels from Atlantic ports last year, and 559,348 against 99,508 from Pacific ports. This does not look like any shrinkage in supplies from that quarter. Supplies from Russia are also considerable; and from India the reports are that the chief difficulty is to get ships to carry the stocks of wheat and cotton coming in for shipment. The latest English quotations show a decline of 1s. to 3s., but business is far from active. Sellers are not pressing; and it is probable that for some little time yet the current quotations will be fairly well maintained. If the Chicago and New York speculators find, as they seem to be doing at present, that prices cannot be further forced, we may look, in the course of the week, for a gradual reduction, though not a very considerable one. The latest American as well as English market reports indicate growing weakness in the sellers. Wheat is manifestly on the downward grade. The war scare is losing its influence.

Though the shipments of cotton to this country have been well kept up, there is little change in the Liverpool market. The continent, however, being already tolerably well supplied, has lately been taking rather less than the average. As to the new crop, Messrs. Neill Bros. say the reports are, on the whole, favourable. The weather has been rather too dry for some time, but otherwise the conditions are satisfactory.

So far as the wool auctions are concerned, there has been great firmness of tone if no particular rise in price. The main demand, however, would seem to be for the Continent, with some considerable transactions on Russian and even American account. But for the home market the demand has not been so great. Reports from Leicester are inclined to be rather desponding. There is less actual depression than formerly, but the recovery is slow: there is great want of confidence, and the turnover is restricted to the supply of actual needs at very low prices. Spinners, as a rule, have ample supplies on hand. Leeds is more hopeful, the outlook having become brighter than it was some weeks ago. In Huddersfield, though comparatively little has been doing on the spot, travellers' orders are above the average, and repeat orders are so numerous as to have put some strain on the merchants' stocks. On the whole, there seems a more hopeful prospect, but no very strong confidence in the future.

Copper is in a peculiar position. Statistically it stands well. During the past fortnight a reduction of 1,362 tons has taken place in the visible supplies, while stocks show a reduction of 1,762 tons. Still, during this period the price of G. M. B.'s has declined from £52 2s. 6d. to £51 13s. 9d. per ton, a total reduction of 8s. 9d. During this week the market has been flat, with a weak and undecided tone throughout, resulting in a further fall on Wednesday to £51 7s. 9d. for cash, while the best price obtainable for June 10 and other dates nearer the end of the month were £51 8s. 9d. In the afternoon session £51 10s. was paid for two months, but three months, which earlier in the day were dealt in at £51 12s. 6d., receded later to £51 11s. 3d. Settlement price was £51 7s. 6d. The curiosities in the copper position are attributable, first, to an increase of the American output, and to the uncertainty of the war and political situation. The market is pretty certain to fluctuate not a little for some time, but in itself the trade is in a perfectly healthy condition.

The upward movement in pig-iron has been checked by speculation, and on Wednesday there was a sudden drop, Scotch lost 7d., Cleveland 4½d., and hematite 5d. The reports from the iron manufacturing districts show great activity, however. The Glasgow producers of iron and steel have announced a general advance in prices; in Sheffield prices have gone up all round about 2s. per ton. South Shropshire maintains a firm tone; and from Barrow-on-Furness we learn that more activity has been shown, though makers are not booking to a large extent. Still there is a decidedly firm tone, and quotations have advanced, mixed Bessemer numbers being now quoted at 52s. to 53s. 6d. per ton f. o. b. Warrant iron in active demand and holders are very firm. Stocks represent 172,000 tons, and forty-seven furnaces are in blast, as compared with thirty-seven in the corresponding week of last year. More still would be lighted if the supply of native ore were better. Birmingham prices are not considered so satisfactory, though there, too, the tendency is upwards. The great bulk of the Admiralty orders for electro-plate, representing £4,000 to £5,000 value, have been placed in Birmingham. The gunmakers are greatly irritated at the stoppage of the Persian Gulf trade. It represents to them a loss of 25,000 to 30,000 guns per annum; and as neither the German nor Belgian makers suffer by the prohibition put upon English makers, the Birmingham trade will fall into German and Belgian hands. This does seem rather rough upon Birmingham. Glasgow reports activity in all departments. Locomotive engineers are in treaty for some Indian work, and Australia is buying tubes more freely. Offers of American steel plates at moderate rates have been somewhat disconcerting to home producers, who are thus brought face to face with an article, for which they charge about £6 a ton, offered at about £4 12s. Such an outlook is not quite pleasant.

As to coal the fancy prices caused by the strike have begun to fall a little. As the strike itself may probably soon be ended, the downward tendency is likely to continue.

Messrs. Gow, Wilson, & Stanton, in their circular of the 18th, give some figures which they say might at first sight appear to indicate a check in the consumption of British-grown tea in North America, but they do not warrant such a supposition. The increase in the first quarter of 1897 was due to the fear of an alteration in the tea duty. There was a very heavy increase in the Indian tea taken in the first quarter of 1897, nearly the whole being lost during the remaining three quarters, the total quantity for the year being 5,663,244 lb. against 2,587,273 in 1896; the quantity of Ceylon tea was 5,698,596 lb. in 1897, and in 1896 4,354,510 lb., the main portion of the year's increase being contributed in the first quarter. The quantities of Indian tea brought forward at recent auctions show a considerable reduction. The tone continues steady. Buying has been fairly general in Ceylon tea, and the late improvement in price is fully maintained.

Over half a million francs in securities and gold has been stolen from one of the vans of the Paris-Lyon-Méditerranée Company. The driver of the van knew of nothing wrong until, going from the railway station, he had reached the Place de la Bastille, when passers-by drew his attention to the fact that the door at the back of the vehicle was open. He then discovered that two packages had disappeared—one containing securities valued at 480,000 francs and 12,000 francs in gold. The thieves escaped with their booty. Later accounts say that the real value of the securities stolen is about £30,000.

Notes on Books.

Dictionnaire du Commerce, de l'Industrie, et de la Banque. Publié sous la direction de MM. Yves Guyot et A. Raffalovich. Paris: Guillaumin et Cie., Editeurs. Première Livraison, price three francs; to be completed in two vols., price fifty francs.

We have received the first number of this publication, and give it a cordial welcome. The book is wanted, and its appearance is opportune. The editing of it could not have been in more competent hands than those of MM. Yves Guyot and Arthur Raffalovich, the one of whom is an able economist and an ardent free trader, and the other a financier of wide experience and eminent talent. This first number carries us down to *Allemagne*, the article on which runs on to the next number. It contains also articles on *Abonnement*, by M. Salefranque; *Accidents du Travail*, by M. Maurice Bellom; *Action, Actionnaire*, by MM. L. Guérin et Léantéy; *Admission à la Cote*, by M. Emmanuel Vidal; *Agent de Change, Agiotage*, by M. E. Vidal; *Agriculture*, by M. Louis Passy; *Alaska* and *Alexandrie* (d'Egypte) by M. Ravier; and *Alimentation*, by M. le Dr. Laumonier. It is a very arduous undertaking, and we trust the welcome it will receive from the business public will amply reward those who have had the courage and energy to undertake it.

Fenn on the Funds: Being a Handbook of Pubic Debts, &c. Edited by S. F. Van Oss, with the assistance of H. H. Bassett. London: Effingham Wilson.

Our old familiar friend appears in a new dress, and on the whole we think an improved one. Although now elbowed aside by many newer text-books "Fenn on the Funds" still has a place, or ought to have a place, on the reference book-shelf of every banker's and financier's library. It specialises one form of financial knowledge—that relating to the debts of all nations—and in this edition the information about these has been supplemented by a great many facts relating to the revenue and expenditure and trade of many of the countries dealt with. As far as we have been able to estimate by a brief examination the work has been ploddingly well and, on the whole, accurately revised. We are not sure that the publisher was wise in omitting the Bank Act, or, at any rate, the rules of the London Stock Exchange. These latter are very inaccessible to the general public, and "Fenn on the Funds" could always hitherto be relied upon to give a reprint of them up to date. Mr. Van Oss has written an introduction to the book which, though not new, is worth reading and suggestive. In it will be found a summary of all the burdens the civilised and semi-civilised peoples of the world have now to carry in the shape of public debts. They aggregate to the inconceivable total of £6,121,000,000. This mountain, we take it, represents only the interest-bearing debt of the various States dealt with and takes no account of the enormous obligations in the shape of paper money which oppress countries like Spain and Brazil, or which go to form a material part of the national obligations of many other countries, such as France and the United States.

Pelican House, E.C. By G. B. West, Author of *Half Hours with the Millionaires.* London: T. Fisher Unwin.

A cleverly written but rather peculiar sort of book. What the author's aim may have been in writing it we know not. It is not apparent. There is no plot, no real story. At the outset we thought it must be intended as a scathing exposure of some scheme of financial rascality. There have been some such schemes. It could certainly do no harm if they were exposed so thoroughly that there could be no hope of resuscitating them, or anything like them. But there is no such exposure of financial villany here. If anything it is a fairly-painted picture of financial imbecility. The particular syndicate whose history is here recorded was the conception of several gentlemen more or less silly, who ought in reason to have come to grief, and very nearly did so, but whom luck befriended, and in the end they retire with flying colours and modestly well-filled purses. The syndicate announced itself ready to combine philanthropy and usurious interest; they advanced sums to impecunious cranks and faddists at 5 per cent. per week interest. What is more remarkable still is that the loans were all repaid, interest as well as principal. Some of the sketches or caricatures, for there is something of both in "Pelican House, E.C.," are cleverly done, but the book is not enthralling. Nay, it is sometimes hard and rather dry reading, and when you come to the end, you can hardly say that you have gained anything, not even amusement, at least in a large way.

Davis's Bulawayo Directory and Handbook to Matabeleland. With Map and Township Plan.

We should hardly have thought that Bulawayo yet required a directory; but this is, it seems, the second issue. The first appeared in March, 1896, just as the Matabele rising was coming to a head, so rapidly does civilisation in these days tread on the heels of disappearing barbarism. There is a good deal of readable matter about "Lobengula and his times," about the "Occupation of Mashonaland," and the Matabele War. A very good map accompanies the book, as well as a ground plan of Bulawayo. The trade directory of Bulawayo is more extensive than might have been thought at first. It has six accountants and auditors, four aerated water manufacturers, five mining agents, nine architects, thirteen attorneys, notaries, and conveyancers—lawyers are always to the front—eleven auctioneers, nine bakers and confectioners, three banks, four drinking bars, four blacksmiths and farriers, only one boarding-house, but twenty-one brokers. There are twenty-eight builders and contractors, but if Bulawayo progresses there should be work for them all. Nine butchers will probably prove enough for the present population, though eleven carpenters does not seem an extravagant supply. There should be work for the half-dozen clothiers and outfitters, whose names are given; and there may be work for the twenty-seven civil and mining engineers. It is to be hoped for the comfort of the population that the two dentists named will be sufficient. We cannot afford space or time to go through the list; but we may further note that there are eight hairdressers, twelve hotels, only two laundries, six insurance offices, twenty-seven merchants and importers, one pawnbroker, one photographer, one high school, one music teacher, and four newspapers.

THE RUMOURED JAPANESE LOAN.

The rumour as to the flotation of a Japanese loan in Europe has been revived, and this time the only thing the authorities can say about it is that the report is premature. We may assume from this that, whether the amount be £15,000,000, or whether it be a smaller sum designed for the relief of "approved public undertakings," Japan is on the point of appealing to the moneylenders. There is no good reason why it should not obtain the accommodation it desires provided it cares to offer a fair price; for the credit of the country is good, and it is progressing, if only slowly, in material wealth. The only fear is that its attempts to force the rate of advance may land it in difficulties. It is satisfactory, however, to note that this year the Government is curbing its desire to be extravagant, and has abandoned some of the more pettifogging of the devices which it initiated last year for the purpose of increasing the revenue. It has not gone in for any radical reform—the commitments which it has made in furtherance of the national ambition to become a great power in the Far East would be quite sufficient to prevent that, even if the cabinet were to show a leaning (which it has not done) in that direction. But at least the Budget for 1898-9 provides for less expenditure than that of 1897-8, and this indicates a recognition by the Ministry of Finance of the fact that the country is not yet equal to the pace proposed in the first flush of success after the war.

What Japan wants just now is some means of remedying the financial stringency that has clogged its footsteps for more than eighteen months past. All the indemnity money has been allocated, and a good deal more in addition. The good effect of the influx has been nullified by the speculative mania, higher taxes, increased wages, and the drain of hard cash caused by over-indulgence in European luxuries of one sort and another; imports are going up at an alarming rate, while exports are now actually on the decline, and the country is at this moment left with about as much money and bullion as it possessed a quarter of a century ago, when the foreign trade was not one-tenth of what it is now. The money at present in London cannot be applied to the relief of this unpleasant situation, for the bulk of it is wanted for the discharge of the country's obligations in Europe, and the balance will be needed to ease the drain occasioned by the alarmingly large exports of gold, which amounted to close upon 5,000,000 yen for February alone. The note issue stands at 350,000,000 yen, and the people are beginning to realise that it is rather too large and that notes are not exactly the same thing to them as gold. Prices have reached an absurdly high level, and enterprise all round is languishing. A loan of £15,000,000 would go a long way in improving matters, provided the money were judiciously handled, and not flung away by the Government in the purchase of more expensive gewgaws for fighting purposes, on which Japan has already spent much more than it can afford. A very sensible way of helping the commercial ventures which are hanging fire for want of capital would be to encourage the investment of European money in them, but until the operation of the new treaties in October next foreigners can have no voice in any Japanese undertaking, and the Japanese themselves have not shown the commercial ability and honesty essential to confidence, while the need of help is very urgent.

To Correspondents.

The Editor cannot undertake to return rejected communications.

Letters from correspondents must, in every case, be authenticated by the name and address of the writer.

Telegraphic Address: "Unveiling, London."

*** Owing to pressure on our space, we are compelled again to leave over our table of prices quoted on the leading provincial exchanges.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the Investors' Review, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

Central Pacific Railroad.

Shareholders' Protection Committee.

The Right Honourable Sir William Marriott (Chairman).
Aubrey Stanhope, Esq.
M. J. Horgan, Esq., Cork. *F. J. Longton, Esq., Liverpool.
T. Stewart-Jones, Esq., London. *W. Morshead, Esq., London (Deputy-Chairman).
Edward Fox White, Esq., London.

*Committee who protested in March, 1894, against the continuing stoppage by Mr. Huntington of the reduced 2 per cent. dividends.

A meeting of shareholders, favourable to reorganization without assessment, on the basis of the plan which had the approval of Mr. Fairchild, Mr. Bayard, Lord Monkswell, and Sir John Lubbock, as opposed to the Banbury proposals, will be held at Winchester House, Old Broad Street, London, E.C., on Tuesday, the 7th day of June, 1898, at 2.30 p.m.

1. In opposition to the policy and proceedings of (a) Mr. C. P. Huntington, (b) the present Board, and (c) the Banbury Committee.
2. To consider the situation and the measures in progress for the protection of the stockholders.

Meanwhile particulars, with prints of recent correspondence between the Protection Committee and (1) Mr. C. P. Huntington, (2) Mr. Banbury, M.P., and (3) others, may be obtained by shareholders on application to

W. C. Gunner, Secretary.

124, Chancery Lane—Room No. 12.
19th May, 1898.

The Right Hon. Lord Monkswell has kindly consented to act as Trustee for the stockholders if desired.

SUN LIFE

The Investors' Review.

The Week's Money Market.

Considerable balances were released during the week, and so the short loan market has been comparatively flush of cash. Not only did a portion of the Japanese money come out, but the large inflow of gold increased credits, and the influence in this latter case often came earlier that the actual arrival of the metal, owing to the Bank's system of allowing advances free of interest on shipments. The rate for day to day loans, which a week ago stood at 3 to 4 per cent., has accordingly dropped to 2½ to 3 per cent., and threatens to become weaker if conditions do not change.

Discount rates under these circumstances, had to give way to a moderate extent. Indeed, they would have been very weak if it were not for the political uncertainties of the time. The coin and bullion now totals £36,100,000, which is more than the amount held before the American drain commenced, and is about the same total as was held a year ago when the discount rate stood at 1 per cent. The market, however, has no control over the percentage represented by the amount owned by the Japanese Government; but if it is true that that Government is selling exchange freely against its Bank of England balances, such operations, combined with payments to creditors, must lead to the transfer of a considerable part of the Japanese funds to the market. The American exchange, contrary to general expectation, has risen sharply, and so there

is absolutely no demand for gold in the open market, save occasional small orders on account of India. The Bank of England has, therefore, reduced its buying price of bars to the normal figure of 77s. 9d. per ounce, and receives all arrivals of bars. It, however, raised its purchasing price of American eagles to 76s. 5d., and by so doing actually obtained a small parcel on Wednesday. No one, however, attempts to forecast the future by beating down discount rates, and the decline to 3½ to 3 9/16 per cent. for three months' remitted bills is more the result of the deadweight of these favourable influences than of any disposition to bid freely. The Spanish-American dispute, however, may yet have surprises for the market, and no one is prepared to say that we have seen the end of the gold shipment to America. Whilst the market is still so heavily indebted to the Bank it cannot take too decided an initiative, and if political matters improve, there appears to be the prospect of some large financial schemes being promoted which will draw money out of us. The characteristic of our financial business of late years has been its insularity, but if any proportion of the schemes to develope China and Egypt are put into force, money must leave the country for those purposes. It would therefore be unwise to look for too rapid a decline in discounts, although further weakness is probable.

The issue of £500,000 London County six months' bills was well received, applications to the extent of £2,684,000 being submitted. Tenders at £98 5s. 8½d. received 11 per cent., and the average discount rate for the whole was £3 6s. 9d. per cent. It compared with £1 2s. per cent. for an issue of £600,000 a year ago.

The figures of the Bank return show that the inflow of gold from abroad, and also some returns of gold from circulation, is gradually delivering the market from the grasp of the Bank itself. Altogether £1,521,000 was added to the stock of coin and bullion within the week, £1,384,000 coming from abroad. A few notes also came back to roost, and the reserve of the banking department has consequently been increased by £1,629,000 to £25,441,000. Of this money, £1,465,000 has been utilised to reduce the indebtedness of the market to the Bank, and the "other" deposits are therefore now down to £34,310,000, still a highly respectable total. No advantage has accrued to the "other" deposits which are, indeed, smaller by £380,000 at £43,136,000, because the balances of the Government classed as "public" deposits have risen by £529,000 to £11,933,000, a total even now well above the average at this date. At present, then, the market is not directly enriched by the gold; it is only relieved of strain. A good many more millions' worth of the metal will have to arrive before "cheap money" could again visit us to stay. The poverty of the market is greater than it looks, because the Japanese Government balances, it must never be forgotten, help most materially to swell the total under "other" deposits.

SILVER.

The cessation of Spanish buying caused the price of bars for immediate delivery to drop back last Saturday to 26¼d. per ounce. Even at this figure there was no ordinary demand for the East, but the feeling was strong that more Spanish orders would follow, and so no further decline was permitted. This view will probably prove to be correct, and buying, said to be in preparation for another order, has forced the price up again to 26 5/8d. per ounce. Whilst these orders are about, the market is bound to be unsettled, as being usually of a pressing nature the price paid is a good one, and floating supplies of the metal tend to be absorbed. The Eastern demand, however, is very poor, or else there would have been a much stronger advance. The "forward" quotation, therefore, is no better than 26 5/8d. per ounce. Indian exchanges have risen to 1s. 4 1/16d., the banks of Bombay recording a sharp drop in its cash balances as a result of the activity in the grain business. So the Council sells its drafts freely, and since the commencement of April has disposed of nearly £4,000,000. Of course, this is the busy season, but if the wheat business proves to be as large as is hoped, the demand must continue good for some time to come.

Stock Market Notes and Comments.

There is really nothing new to be said about the stock markets this week; they would have been as calm as a mill pond on a summer's day but for the sensation caused by Mr. Chamberlain's speech. That did not disturb us much here on Saturday, but it caused a first-class sensation on the Continental bourses, and induced speculators, in Paris more particularly, to sell with great persistence. The "funk" spread to London, and all this week we have been in a state of grumbling disgust. Business has been made difficult, and prices have kept displaying a tendency to fall which effectively prevents serious people from coming near the market. Now the Stock Exchange never likes to be left to itself. It must have a large public playing upon it, and busy buying and selling, and failing this it falls out of heart and into a mood to accept almost anything with ill-humour. Rumours of the most silly description pass across markets, we may say every hour of the day, and a punter may here and there profit by a momentary rise or fall in some price or other caused by some of these rumours. Generally speaking, however, they have no effect of any kind; people have got too *blasé* to care for the sensational stories they are continually treated to, and in their cynical moments numbers will be heard to declare that even this Spanish-American war is little better than a long-drawn-out farce. How exhausted minds have become through a surfeit of sensations could be measured by the slender results produced on Monday when the tale was put about that Mr. Chamberlain had "resigned." To be sure, nobody in the least imagined him capable of such a step, and in its present mood the market would be much more disposed to believe that he had procured the resignation of Lord Salisbury, so unpopular is his Lordship with the scatter-brained lot we mostly have to do with. Anyway, the story was laughed at and prices lay still. Yet we believe it is a fact that the right hon. gentleman did tender his resignation—to cow his colleagues, of course, and bring Lord Salisbury back to a due state of meekness.

Under such a condition it is useless to pretend to give definite advice of any kind, except to reiterate our well-worn one, "keep away from markets." Nothing is to be gained just now by buying anything, and much may be lost. For the time being, and for various reasons we need not now specify, the money market looks easier, and were circumstances otherwise happy cheaper money would as usual cause prices to advance. But when we see gold pouring into the bank and Consols often falling in price we may be quite sure that markets are not favourable to investors. There is an undercurrent of uneasiness which bars the way to a steady upward movement, and until it has died down or disappeared the prudent will buy sparingly, if at all. Why, even the great Sir Thomas Lipton, it seems, is not able just yet to invest his money. He was paid up this week by the company to which he has transferred his business, and must have the best part of £2,000,000 lying idle at his bankers'. Popular estimate computes him to be worth considerably over £3,000,000 altogether, and he must be a poor, unhappy man with so much money that he does not know what to do with. To let it lie at his bankers always would never do, and yet he does not feel able to invest it on the Stock Exchange; not yet, at any rate. He had better go round the country and pick up a few derelict landed estates and improve them. They will be worth having some day when the young men who are coming on have been taught by bitter experience that it is better to cultivate the soil of their native land than to buy "Chartereds" and play pitch and toss with things like Northern "Terrors," while cursing the Russians and inviting the French to come on.

American geniuses of this sort appear to be still happy in pushing up the prices of their own securities, and we rejoice. It not only allows us to sell, but reduces the danger of heavy demands from New York upon our stock of gold. But really, we see no sense in this action. The war with Spain does not appear to have com-

menced yet. It almost looks just now as if when it does start Rear-Admiral Dewey might have ground for thinking that he would have done more wisely to have looked in at Manila on his way out to his China station after helping to conquer Cuba than to get trapped their on his way home for the fray. Really, though, there is no knowing but what the Wall-street speculators have got a tip that the whole thing is a joke or mystification intended to cover a "transaction" wherein dollars will go to Spain in exchange for Cuba. In that case—ah! the wind is still in the East and our gift of prophecy is frozen up.

The Week's Stock Markets.

An almost total absence of business has been the general report from markets throughout the week. The uneasiness caused by the aspect of foreign affairs was increased by Mr. Chamberlain's speech at Birmingham on Friday lasf, and although there was not much selling at any one time, there was, on the other hand, no inclination on the part of operators to increase their commitments during the present unsettled state of things. As there was no support forthcoming from the outside public, prices are lower in all departments, although the slightly steadier tendency on the Continental bourses on Wednesday helped to strengthen markets here which were inclined to harden under the influence of the Premier's speech in the House of Lords on Tuesday night. Consols have come down steadily, and Indian Government stock close flat. Home corporation issues, after being weak, finally show a recovery in several instances, and Colonial Government descriptions also rallied from the lowest points of the week, but Indian railway shares have been depressed and close at the worst.

In the Home railway market, the principal transactions have been in the stocks of the passenger lines, and the fluctuations in the deferred stocks of the Brighton and South Eastern Companies have been considerable. The former company's traffic return was again disappointing, the poor showing being doubtless due to the unsettled weather. Metropolitan ordinary has reacted after last week's sharp rise, and Great Central issues have fallen in sympathy. Great Western gave way,

although the traffic return was no worse than it has been at any time during the dead-lock in the Welsh coal district, which still seems to be a long way from being settled. Taff Vale is also lower for the same reason, and the Midland return was a poor one; otherwise the traffics were good. In the present condition of affairs, a very little selling caused a considerable decline, and the closing quotations, although rather above the worst, yet still show a serious depreciation. A certain amount of "pawned" stock has come on the market during the last few days, and helped to still further depress prices; but towards the close a few investment purchases came to hand, and imparted a rather steadier tone.

United States railroad shares were also adversely affected by Mr. Chamberlain's speech, taken in conjunction with the fact that the long-looked-for and decisive action between the American and Spanish fleets is still delayed. A little Continental and local buying steadied the market here for a time, but prices are all lower than a week ago, in common with the decline in other departments. In Wall-street business has been on a small scale, and the little buying that has taken place was of the purely professional type, while the reaction in the price of wheat did not tend to improve matters.

Canadian Pacific and Grand Trunk issues, after a period of dulness, picked up a little, and when both the companies published good returns there was a smart rally to nearly last week's level. Nothing whatever has yet transpired as to any settlement of the rate war question having been arrived at.

Foreign Government stocks have followed the downward trend of prices reported from all the Continental bourses, which were seriously alarmed by Lord Salisbury's unreported speech, followed as it was immediately after by Mr. Chamberlain's very much reported one. The Paris Bourse especially got into a very nervous state, business consisting chiefly of realisations made in consequence of these disquieting utterances. Spanish 4 per cents. again mark a moderate decline, although once towards the close of last week a little French support was forthcoming, a few "bear" operators closing their accounts. The Madrid exchange shows a further improvement, but any advantage that might have been taken of this fact was more than offset by the news of another Cabinet crisis and a disagreement among the ministers, coupled with rumours of fresh disturbances in Madrid. Italian Rente has attracted much less attention this week than last, and purchases on behalf of the Italian Government, and the report that tranquility is now completely restored in Milan and the other affected districts, has kept the price tolerably steady. Heavy sales of Turkish groups on a very narrow market caused a sharp fall, part of which has since been made up. Chinese loans drooped owing to Mr. Chamberlain's remarks about the state of affairs in the Far East, and Transvaal 5 per cents. fell a little after President Kruger's speech was received here. Apart from Spanish bonds,

which show no recovery from the worst point of the week, there is a slightly firmer tone apparent in all inter-Bourse securities at the last, due to repurchases by "bear" operators, who were anxious to close their accounts prior to the holiday yesterday (Ascension Day). In the South American section, Argentine issues all gave way on the news of the increase in the export duty on wheat. Brazilian bonds have hardly moved, the Rio exchange remaining stationary, while the proposal to pay the interest half in gold and half in scrip has met with approval. Among the less prominent securities there has been a fall of 5 in Salvador 6 per cents.

Argentine railway stocks have also been adversely affected by the proposed increase in the export duty on wheat, and although the traffic returns again show substantial gains, there is a considerable shrinkage in prices, especially in Buenos Ayres Great Southern ordinary. On the other hand, rumours of a settlement with the Government caused an inquiry for the Cordoba Central Company's stocks. Nitrate Railway shares have quietly slipped back again to their old level, and the Mexican Company's emissions were sold after the meeting on Friday last.

The Miscellaneous market has been a dull and uninteresting one, and in the majority of cases the changes have been in the downward direction. Among brewery stocks Guinness ordinary fell 10 and Allsopp preferred ordinary 3, but Guinness's preference and Younger preference are both 2 higher. Telegraph companies' issues are lower, as it is feared that some more cable cutting will yet be heard of, but there has been a steady rise amounting to about 15 in Commercial Cable. Gas Light "A" is firmer on the passing of the company's Bill for splitting the stock, but holders of electric lighting companies' shares have taken fright at the possibility of the threatened competition from the local vestries. Among the very few changes in the upward direction a slight improvement in Howell and James is noticeable on the satisfactory meeting. Pillsbury-Washburn Mills ordinary and preference show a further advance, and P. and O. deferred is 2 higher. On the other hand, Holborn and Frascati debenture has fallen 4, and La Guaira Harbour debenture 5½. Bryant and May shares gave way owing to the Government inquiry as to the death of several of the company's employés, and British Tea Table ordinary was pressed for sale on the appearance of a discouraging report. Welsbach ordinary is 4 lower.

Almost the only feature during the closing hours of the week was a sudden rise in Consols, a few purchases for cash, and a little "bear" closing being quite sufficient to raise the price fully ½ per cent., as the market appears to be very bare of stock. The Indian Government sterling loan, and one or two of the leading Home corporation stocks also shared in the upward movement. All the Continental bourses being closed to-day (Thursday), business was almost at a standstill, but the tone was fairly steady in the foreign market, Argentine Government and railway bonds being inquired for. United States railroad shares gave way a little more, notably Denver preferred, Louisville and Southern preferred, and Canadian issues were weaker in sympathy. Apart from a further heavy fall in Mount Lyell shares, the mining market was quiet and featureless.

Mining and Finance Companies.

The South African market was not taken with President Kruger's speech, and the Paris Bourse being in such a depressed state, and doing little except send selling orders, jobbers naturally rather hesitated about making prices. On Tuesday, for the first time for nearly a week, there was a little recovery on "bear" closing, but it did not amount to much. Western Australian ventures have been more erratic in their movements, but the net result is to leave prices rather the worse, although the fall rarely amounts to more than about ⅜. "Market Trusts" at one time touched 2s. and then moved up a little. Copper shares all fell sharply, in spite of the large reduction noticeable in the visible supply of the metal. Rio Tinto was particularly weak owing to reported disturbances at the mines, while the fall in Mount Lyell was due to the arrival of a cabled extract of the report. Indian shares are generally a little weaker.

Next Week's Meetings.

Monday, May 23.

Arnold Perrot & Co....	1, East India-avenue, 3 p.m.
Kimberley Diamond Mining ...	Winchester House, 3.30 p.m.
London and South African Exploration	Winchester House, 3 p.m.
London Bank of Australia	Winchester House, 12.30 p.m.
Malay Peninsula Coffee	138, Leadenhall-street, 1 p.m.
River Plate Gas	Winchester House, 12.30 p.m.

Tuesday, May 24.

Brazilian Street Railway	Gresham House, 2.30 p.m.
Castle Mail Packets Company ...	Cannon-street Hotel, noon.
Lambeth Waterworks	Brixton Hill, noon.
London Corn Exchange (Special) ...	Mark-lane, noon.
Mason & Barry	87, Cannon-street, noon.
Nitrate Railways	Winchester House, noon.
Rohilkund & Kumaon Railway ...	Gresham House, noon.
W. N. White & Co.	Cannon-street Hotel, 12.30 p.m.

Wednesday, May 25.

American and General Investment	Winchester House, 3 p.m.
General Life Assurance	103, Cannon-street, 1 p.m.
North Brancepeth Coal	Darlington, noon.
Otago and Southland Investment ...	5, Adam's-court, 11.30 a.m.
Reuter's Telegram Agency	Old Jewry, noon.
Santa Anna Gold Mining	Winchester House, 2 p.m.
Southern Brazilian Rio Grande do Sul	Winchester House, noon.
Weinhold Estate of Australia ...	52, Lombard-street, noon.

Thursday, May 26

Army and Navy Auxiliary Supply ...	Westminster Town Hall, 2.30 p.m.
Eugene Rimmel	5, Chancery-lane, 4 p.m.
First Scottish American Trust ...	Dundee, noon.
Nobel Dynamite Trust	Winchester House, 1 p.m.
Rock Life	15, New Bridge-street, noon.
San Donato Nitrate	Liverpool, 11 a.m.
Trust and Loan Company of Canada	7, Great Winchester-street, 2 p.m.

Friday, May 27.

Ballaghat Valley	Cannon-street Hotel, noon.
astner Kellner Alkali Company ...	Cannon-street Hotel, noon.
Freshwater Yarmouth and Newport Railway	9, Clements-lane, 2 p.m.
Jhanzie Tea Association	14, St. Mary Axe, 2.30 p.m.
King's Norton Metal Company ...	16, Gt. George-street, S.W., noon.
Union Assurance	81, Cornhill, noon.

Answers to Correspondents.

Questions about public securities, and on all points in company law, as well as on the position of life insurance offices and their promises, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway ?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

J. F. S.—It is not possible to say yet how the company is doing, but it does not appear to be very strong financially. Purchase price was heavy and the issue was not fully subscribed; the underwriters had to take a big percentage. There is very little market, but you may be able to sell your stock. If you can, you should do so even at a discount.

NJOX.—1. Quite good. 2. Such issues must be publicly made. 3. They are only advantageous as temporary investments. 4. They are not very marketable and, as a rule, I think you will find the borrower only has right to give the "cancelling notice." 5. Yes, if you are satisfied with the return. Mortgages on even high-class properties usually yield a little more.

A. J.—1 and 2. Financially, position is moderate, the business, however, appears to be growing. See no reason for selling at present. 3. I have no particulars of this concern. If you will send me copy of report I will look into it. 4. I did not like the prospectus of this concern, but have not seen the first report. An interim dividend was paid in September, which proves nothing. If you can get out reasonably I think you can find something safer. 5. None of the companies controlled by founders of this concern are investments in the proper sense of the word. Your company makes its money to a large extent by market manipulations, which lately have been seldom possible or profitable. I cannot say whether it is right to sell now or not, as it is quite likely efforts will be made to improve this market generally, which will probably be successful, unless politics put a stop to such tactics. 6. Are not worth selling at present prices. Those managing it and others in this group are, I believe, honest, though sanguine. 7. Have you ever noticed the price of the debentures of this company ? The shares are mere gambling counters and, intrinsically, have little value ; but here, again, market operations may be successful. Arrangements are being made to try and put a better face on its prospects, and such is the belief in its future that I should not be surprised to see a rise, but I should not care to guarantee it. Kindly read instructions at the head of this column and note same for your future guidance.

A formidable coal trust is the latest development of the spirit of American monopoly manufacture. We are told that negotiations are now pending in Boston, United States, which, if completed in conformity with the hopes of the negotiators, will result in the discontinuance of some of the largest coal firms doing business in Boston. The scheme is to organise a company which will take over the business of these firms, which handle annually about 1,000,000 tons. This is not quite half the amount of the United States present annual export ; but if the suggested scheme is successful, it may but form the nucleus of more gigantic schemes, which, in course of time, may embrace a large part of the coal output of the States.

The India Council is renewing £2,500,000 of its sterling bills falling due on the 3rd proximo, and tenders for these will be received this day week at the chief cashier's office, Bank of England.

Prices of Mine and Mining Finance Companies' Shares.

Shares £1 each except where otherwise stated.

A REASON FOR THE PROTECTION OF SMALL BIRDS.

Mr. Consul Hearn, reporting on the state of trade and agriculture in Bordeaux, puts forth a very strong argument in favour of the protection of small birds on the ground that they are the great destroyers of insects among the vines. Last year the vintage was a particularly bad one, partly owing to "atmospheric disturbances," but greatly also to the hordes of cochylis which attacked and ruined the blossoms and fruit, causing a loss in certain important vineyards of some hundreds of casks. Mr. Hearn argues that "the appearance of cochylis is contemporary with the destruction of small birds in the vineyards," and though as against this he has been told that there never were many birds among the vines even before *la chasse* was free to all, there were then no insects, and therefore no *raison d'être* for the birds. "Now the vines are infested with insect life, and if the birds were only allowed they would go to the vines in search of grub, cochylis or other kinds, and obtain for the proprietor a result which no amount of money can accomplish." Many women and children were employed last year to search for and destroy the eggs and larvæ of insects, whereas their natural destroyers, thrushes and starlings, who could have done the work much more effectually, were offered for sale by thousands in the streets of Bordeaux.

RAILWAY TRAFFIC RETURNS.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, May 14 :—Ps. 7,800 ; the same as last year. Aggregate from January 1, Ps. 169,350 ; increase, Ps. 4,580.

Quebec Central Railway.—Receipts for fourth week of April, $14,267 ; increase, $695. Aggregate from July 1, $117,058 ; decrease, $16,530.

Mobile and Birmingham Railroad.—Traffic for fourth week of April, $9,573 ; increase, $,2,832. Aggregate from July 1, $312,747 ; increase, $450.

Algeciras (Gibraltar) Railway.—Traffic for week ended May 7, Ps. 23,720 ; increase, Ps. 2,880. Aggregate from July 1, Ps. 908,962 ; increase, Ps. 42,458.

West Flanders Railway.—Gross receipts for week ending May 15, £2,643 ; increase, £656. Total from January 1, £45,633 ; increase, £1,725.

West of India Portuguese Railway.—Week ending April 23, Rs. 4,717 ; increase, Rs. 1,291. Aggregate from January 1, Rs. 73,281 ; increase, Rs. 21,063.

Puerto Cabello and Valencia Railway.—Traffic receipts for week ending April 8, £964 ; decrease, £679. Aggregate from January 1, £12,368 ; decrease, £5,683.

Delhi Umballa Kalka Railway.—Receipts for week ended May 14, Rs. 30,400 ; decrease, Rs. 4,900. Aggregate from January 1, Rs. 6,63,600 ; increase, Rs. 1,58,600.

Manila Railway.—Receipts for week ending May 7, $18,000 ; increase, $3,262. Aggregate from January 1, $348,961 ; increase, $81,403.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending April 16, Rs. 9,770 ; increase, Rs. 506. Aggregate from January 1, Rs. 1,13,539 ; decrease, Rs. 7,903.

Western of Santa Fe Railways.—Gross receipts for week ending May 14, $45,000 ; increase, $21,370.

Villa Maria and Rufino Railway.—Traffic for week ending May 14, $272 ; increase, $58. Aggregate from January 1, $5,744 ; increase, $1,111.

Southern Mahratta Railway.—Receipts for week ended April 23, Rs. 1,14,969 ; decrease, Rs. 21,320.

Bengal Central Railway.—Traffic receipts for week ending April 23, Rs. 17,012 ; decrease, Rs. 1,126. Aggregate from January 1, Rs. 330,548 ; increase, Rs. 43,875.

Burma Railways.—Traffic receipts for week ending April 16, Rs. 1,46,788 ; increase Rs. 3,316. Aggregate from January 1, Rs. 32,38,143 ; decrease, Rs. 60,199.

Assam Bengal Railway.—Traffic receipts for week ending April 16. Rs. 24,628 ; increase, Rs. 6,941. Aggregate from January 1, Rs. 3,92,894 ; increase, Rs. 70,216.

H.H. The Nizam's Guaranteed State Railways.—Traffic receipts from January 1 to April 23 were Rs. 13,05,753 ; increase, Rs. 102,374.

Great Western of Brazil.—Traffics receipts for the week ending April 9, $14,651 ; decrease, $4,007. Aggregate from January 1, $532,652 ; increase, $69,560.

Cleator and Workington.—Gross receipts for the week ending May 14 amounted to £1,141, an increase of £8. Total receipts from January 1, £19,578, a decrease of £638.

Cockermouth and Keswick Railway.—Receipts for the week ending May 14, £868 ; increase, £95. Aggregate from January 1, £15,887 ; increase, £1,501.

MINING RETURNS.

Balmoral Main Reef.—April return :—2,045 oz.

City and Suburban.—Last month's crushings yielded 11,496 oz.

New Rietfontein.—April return :—3,277 oz.

Weld Hercules.—Crushed 295 tons, produced 286 oz. gold. Tailings 6 dwt. per ton.

Transvaal Coal.—April :—Output, 20,500 tons ; profit £1,800.

Victoria (Charters Towers).—265 tons, crushed yielded 367 oz. gold.

Consolidated of Western Australia.—From Yellow Aster Mine a crushing of 30 tons, realising 59 oz. 6 dwt. of smelted gold.

Hannan's Brownhill.—450 tons of sands, 565 tons of slimes treated, 2,300 oz. of gold recovered.

Mikado (Lake of the Woods District), Ontario.—During the twenty-four days ended April 30 the mill crushed 750 tons, yielding 444 oz. of gold.

New Heriot Gold.—Last month's crushing yielded 5,806 oz.

Ottos Kopje Diamond.—4,924 loads washed during the week ended May 12, 143 carats won.

New Zealand Crown.—Tons crushed, 1,667 ; value of bullion, £3,681.

Mount Lyell.—From April 7 to May 4, inclusive, a total quantity of 11,176 tons of ore has been treated, 9,508 tons from open cuts, assaying before treatment—copper, 2·54 per cent. ; silver, 2·57 oz. per ton ; gold, 0·159 oz. per ton. 1,668 tons from No. 4 Tunnel, assaying before treatment—copper, 8·31 per cent. ; silver, 8·99 oz. per ton ; gold, ·077 oz. per ton. The converters have produced during the same period 348 tons of blister copper, containing—copper, 344 tons ; silver, 36,375 oz. ; gold, 1,843 oz.

Anglo-Mexican.—Output for April :—Crushed, 1,671 tons ; $28,363 (U.S. gold) ; 27 days' run. Cyanide plant—tons treated, 620 ; $4,050 (U. S. gold).

Eaglehawk Consolidated.—The yield from last month's working is 189 oz. ; tailings assays average 143 dwt. per ton.

Hyderabad (Deccan). Output of coal from the Singareni Collieries for the four weeks ended April 23, 32,069 tons.

Moodie's.—Tons crushed, 1,000 ; ounces obtained, 570.

Pahang Corporation.—April returns :—Jeram Lumpang Mill—1,420 tons of stone crushed, producing 82 tons of black tin. Jeram Batang Mill—810 tons of stone crushed, producing 12 tons (or 17 tons 17 cwt.) of black tin. *Code word mutilated.

Premier Tati Monarch Reef.—Returns for April :—1,450 tons crushed, including 105 tons surface ore, low grade ; yield of retorted gold, 421 oz.

Wentworth Proprietary.—Five weeks' return :—920 tons of ore crushed, yielding 847 oz., and 2 tons rich crude ore shipped, containing 233 oz.

Cavlloma Silver.—April production :—12,500 oz. fine silver in export ores, and 12,250 oz. fine silver in bullion.

Day Dawn Block.—Result of crushing for fortnight ended May 14 :—Tons crushed, 1,520 ; yield of gold, 2,034 oz., including tailings.

Day Dawn P.C.—Crushing for two weeks ended May 14 :—No. 1 shaft, 290 tons, 328 oz. ; No. 3 shaft, 120 tons, 190 oz.

New Australian Broken Hill Consols.—Fortnight's output :—1 ton 14 cwt., containing 3,600 oz. of silver.

Ouro Preto.—6,080 tons of ore, produced 1,741 oz. of gold.

St. John Del Rey.—Gold produce May 1 to May 11, £7,458 ; yield per ton, ·77 of an ounce troy.

Labuan and Borneo.—Output, first quality, 700 tons ; second quality, 50 tons.

Frank Smith Diamond.—4,100 loads washed, producing 197 carats.

Highland Chief.—Crushed 155 tons for a yield of 57 oz. gold.

North Boulder.—363 oz. of gold from 343 tons crushed.

Associated Gold of Western Australia.—Ore crushed, 1,700 tons, yielding 1,325 oz. of gold.

The sugar-cane crops in the Cairns district of Queensland are reported to be in good condition. On some farms a yield of fifty tons per acre is expected.

Here is a pretty story of the value of properties held in mortgage by the Argentine National Mortgage Bank. The directors have just had a valuation made of the properties mortgaged to it before the crisis, the owners of which are not paying either interest or amortisation. The result shows that one borrower obtained $250,000 on a property valued officially at $536,000, but of which the actual value is only $1,800.

a Loss. *b* Exclusive of yield from Concentrates bought—1,320 oz. in February, 2,913 oz. in March, and 2,914 oz. in April.

SOUTH AFRICAN MINE CRUSHINGS.

The April output is again a record one, the total for the Witwatersand district being 335,125 oz., or 9,218 oz. more than the March total. The outside districts seem a poor lot, yielding only 18,118 oz. last month, compared with 21,736 oz. for March and 23,263 oz. for February. The Rand total for April is just 100,000 oz. more than in the same month last year; but, of course, there are more mines working, and a good many more stamps. Amongst individual crushings last month, the Simmer & Jack Company had an increase of nearly 3,000 oz. compared with March, and the Angelo, Feireira, Nigel, and Langlaagte Estate Companies all did very well. The second crushing of the Jumpers Deep was 2,300 oz. better than the first, and the return of the Village Main Reef Company was more than 2,000 oz. up, but the Crown Reef shows a considerable reduction, and the York return has been continually growing smaller since crushing began. The return of the Transvaal Estates Company moves up and down as usual, the April output showing a decrease, compared with March, of 2,574 oz., because the returns from the Central cyanide works were not included.

The Rand output for the current month promises to be less satisfactory, as several of the mines are hampered by shortness of water, and the May Consolidated, which had been doing extremely well, both as regards yield and profits, has unfortunately been already obliged to shut down its mill for want of water.

The evacuation of Thessaly has begun, and the payment of the first instalment of the indemnity will be made to Turkey forthwith.

Mr. Edward Dobson, of Bradford, has been elected President of the Auctioneers' Institute for the ensuing year, while Mr. Allen Drew, the popular member of the firm of Messrs. Debenham, Tewson, & Company, has been elected a member of the Council.

Twenty-seven thousand tons of coal were shipped in April from Newcastle, N.S.W., to San Francisco, and arrangements have now been made for the shipment of 150,000 tons in May. What about the neutrality proclamation?

The first hundred miles of the Uganda Railway have been opened for traffic. The returns have not yet been issued, but a time and fare book has been published. You may travel the whole length of the line for Rs.38 first class, Rs.19 second class, and Rs.3 3a. third class.

DIVIDENDS ANNOUNCED.

MISCELLANEOUS.

Pavilion Theatre, Limited (Mile End).—Interim dividend on the ordinary shares at the rate of 10 per cent. per annum for the half-year ended April 30.

Union Steamship Company of New Zealand, Limited.—An interim dividend at the rate of 5s. per share, and a bonus from insurance fund of 1s. per share for the six months ended March 31, are payable to British shareholders at the company's offices in London on the 25th inst.

Liebig's Extract of Meat Company, Limited.—Final dividend for 1897 of 15 per cent., making, with the interim, 20 per cent. for the year, being the same dividend as paid last year.

D. Jones, Dickinson, & Company.—Interim dividend for the six months ended April 2, at the rate of 7 per cent. per annum on the ordinary shares, and 6 per cent. per annum on the preference shares.

Royal Oak of Hauraki, Limited.—Dividend of 3d. per share is payable on the 25th inst.

Wemmer Gold Mining Company, Limited.—75 per cent. has been declared.

Birmingham Mint.—Dividend of 10 per cent. recommended and a bonus of 2s. 6d. per share for the year ended March 31.

Assam Company.—Final dividend of 12½ per cent., making, with the interim dividend, a total of 17½ per cent. for the year.

Fuller's Earth Union, Limited.—3 per cent. for the year ended March 31, carrying forward £1,606, as against 2 per cent. and a balance of £1,307 forward.

W. A. Lloyd's Cycle Fittings, Limited.—Interim dividends at the rate of 5 per cent. per annum on the ordinary shares, and at the rate of 7 per cent. per annum on the preference shares for the half-year ended March 31.

Bransom, Kent, & Company, Limited.—Interim dividend at the rate of 10 per cent. per annum, as previously, for the half-year ended March 31.

Humber & Company, Limited.—Usual interim dividend on the ordinary shares at the rate of 5 per cent. per annum, to be paid on June 1 next, together with the dividend on the preference shares.

British Tea Table Company, Limited.—10 per cent. on the ordinary shares has been declared.

International Trustee, Assets, and Debenture Corporation.—Interim dividend at the rate of 7 per annum on the ordinary shares for half-year to April 30.

City of London Real Property.—Dividend of 8 per cent. for the year, including interim dividend of 3 per cent., on the original shares, leaving £5,769 to be carried forward, and 9 per cent., including interim dividend of 3 per cent., upon the new shares, leaving £9,540 to be carried forward.

West London Dairy Company, Limited.—6 per cent. for the year ended March 26.

Peak Hill Goldfield, Limited.—Further interim dividend of 1s. per share.

Vizianagaram Mining Company, Limited.—Final dividend for 1897 declared of 2s. per share, making, with the interim of 1s. per share paid in August last, 15 per cent. for the year.

BANKS.

Yokohama Specie.—A dividend at the rate of 15 per cent. is proposed, with 274,689 yen carried forward.

The Bank of New South Wales announces a dividend at the rate of 9 per cent. per annum for the half-year ended March 31. A balance of £16,942 was carried forward.

Anglo-Argentine, Limited.—Interim dividend at the rate of 4 per cent. per annum for the half-year ended March 31, payable June 8.

BREWERIES.

Beeston Company, Limited.—Interim dividend on the preference shares at the rate of 5¼ per cent. per annum, and on the ordinary shares at the rate of 6 per cent. per annum.

Cornbrook Company, Limited.—Interim dividend of 4s. per share on the ordinary shares for the half-year ended March 31.

RAILWAYS.

Bengal & North-Western, Limited.—The accounts for the half-year ended December 31 have been received from India, and subject to audit he net revenue admits of the payment of a dividend of £2 per cent.

Bombay, Baroda, and Central Indian.—Dividend proposed on the consolidated stock at the rate of 7s. 6d. per cent., in addition to the guaranteed interest, making in all a distribution of £2 17s. 6d. per cent. for the half-year, against £2 16s. for the corresponding period of last year.

East Indian.—Directors recommend dividend of £1 4s. 6d. per cent. on the deferred annuity capital and deferred annuity capital class D, in addition to the guaranteed interest for the half-year; making a return guaranteed interest and dividend for 1897 of £6 8s.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount s given with the name so that investors may know the liability upon them.

Working-Capital Column.—In working-capital column, D stands for *debit*.

* Company formed this year. † Interim dividends are given as actual distribution made. ‡ *Total* div. § Crop 1896.

NOTICES.

Baring Brothers & Co., Limited, have received a remittance of £6,968 15s. 4d., in bills on London at ninety days sight, on account of the service of the City of Buenos Ayres 4½ per cent. loan of 1888.

Messrs. Matheson & Co. are prepared to pay, on and after June 1, the prior lien bonds of the Mexican National Railroad Company drawn for payment on that date, at the rate of 4s. 1½d. per dollar, or £206 5s. per bond, provided the bonds shall have been previously left three clear days for verification.

Mr. Arthur Edward Buckler and Mr. Alfred Coote Norman, who since the death of the late Mr. F. L. Gower have been the sole representatives of the firm of Buckler, Norman, & Gower, have taken into partnership Mr. Charles Birch Crisp, and the style of the new firm will be Buckler, Norman, & Crisp.

The coupons due June 1, 1898, of the New York, Pennsylvania, and Ohio Railroad Company issue of £250,000 equipment trust bonds (1890) of £100 each will be paid, on and after June 1, at the offices of the trust. Coupons will be received between the hours of eleven and two (Saturdays excepted), and must be left three clear days for verification.

The half-yearly interest, due June 1, 1898, on the East Argentine Railway Company's £350,000 6 per cent. debentures will be paid on and after that date (less income tax), at the company's bankers, Messrs. Glyn, Mills, Currie, & Co. The transfer books will be closed from the 21st inst. to June 1, both days inclusive, for the preparation of the warrants.

Messrs. Smith, Payne, & Smiths announce that in order to prepare the dividend due July 1 on the Lincoln Corporation stock and the dividend due July 5 on the Ilkeston Corporation stock, the balances will be struck on the night of Wednesday, June 1, and that on and after Thursday, June 2, the stocks will be transferable ex dividend.

Mr. Arthur Goddard, chartered accountant, of St. George's House, Eastcheap, E.C., the liquidator of the Tigerfontein Gold Mines, Limited (in liquidation), notifies that a dividend of five shares in the Rooderand Gold Mining Company, Limited, for every six held in the Tigerfontein Company, is now deliverable at his office, any day except Saturday, between the hours of eleven and one.

The Capital and Counties Bank, Limited, has established a branch at Dover under the management of Mr. H. S. Cundell.

The coupons of the Imperial Japanese Government 5 per cent bonds, due June 1 next, will be paid by the Yokohama Specie Bank, Limited, 120, Bishopsgate-street Within, E.C.

The Rio Tinto Company notify that at the fifth half-yearly drawing of their 4 per cent. bonds, 1895, to be held on the 1st prox., bonds amounting to £28,920 will be drawn, to be paid off at par on July 1.

Messrs. N. M. Rothschild & Sons announce that the dividends due June 1 on the Brazilian 4½ per cent. loan of 1883 and the Egyptian State Domain mortgage bonds will be paid by them on and after that date (Saturdays excepted).

Messrs. Glyn, Mills, Currie, & Co. notify that they are prepared to pay, on and after June 1 next, the coupons of the Mexican external 6 per cent. loan, 1893, due on that date.

It is notified that all creditors in the matter of the Nava Gold Mines Syndicate, Limited (Paris), are to send in their claims by July 4 next to Mr. Julius H. Byrne, of Gracechurch-street, E.C., the liquidator.

The Union Bank of Australia, Limited, notifies that it is prepared to pay, on and after 1st proximo, the half-year's interest due at that date on the Palmerston North (New Zealand) 5 per cent. loan, £50,000.

It is announced that the "Société de Régie des Monopoles de Grèce" will for the future be known as the "Société de Régie des Revenus Affectés au Service de la Dette Publique Hellénique," and that the old shares will shortly be exchangeable for new, and that 12,000 additional shares will be issued.

The Baltimore and Ohio Railroad Company being still in default on the payment of the coupon due March 1 last, Baring Brothers & Co., Limited, are prepared to receive on deposit bonds of the 6 per cent. sterling loan of 1872, in order that steps may be taken for the protection of the bondholders' interests, and to issue negotiable certificates for the bonds so deposited. A copy of the agreement, together with the requisite lists to be filled up on deposit, can be obtained on application at their office.

Messrs. Glyn, Mills, Currie, & Co. have received advice by cable from the London and River Plate Bank at Montevideo announcing the despatch by mail of a remittance amounting to £5,800 for the service of the Uruguay 5 per cent. loan of 1896.

Egyptian State Domain mortgage bonds to the amount of £206,380 nominal capital have been drawn for payment at par on June 1. The drawing consists of all bonds (not previously cancelled by the operation of the sinking fund) comprised in the series of numbers advertised.

The annual general meeting of Holland & Company, Limited, was held on Wednesday, at the Deptford Distillery, S.E., under the presidency of Mr. Cyril Wanklin. The chairman: Profits for the past year, including the amount brought forward, and deducting interest paid on the debentures (£3,625) were £7,107. Of this, it was proposed to place £7,000 to the credit of the debtors' suspense account, reducing it to £5,293. A total of £31,590 had been thus placed since 1895, and the directors hoped that they might be in a position at the end of the current financial year to recommend the payment of a dividend on some portion of the company's share capital. The report and accounts were unanimously adopted. Mr. Wanklin, he retiring director, was re-elected. Subsequently certain special resolutions for deducing the capital of the company by £48,850, and for altering the relations between the preferred and ordinary shares, by converting them into stock were unanimously passed.

In the Dominion House of Commons on Tuesday, Sir Wilfrid Laurier denied the report that Government intended reviving the bonus of the Chignecto Marine Railway. The Government had been asked for compensation as an alternative to the revival of the subsidy, and they had that matter under consideration.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 21. New Series. FRIDAY, MAY 27, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

The Investors' Review.

A Falling Money Market.

Within little more than a week the price of loanable capital in the discount market has subsided fully 1 per cent. Before another week passes it may have gone down considerably further, encouraged by the reduction of the Bank rate to 3½ per cent. How has this remarkable change been brought about? By a very simple cause, a cause which illustrates the remarkable influence which operations of credit pure and simple have over the changes of all money markets and of ours in particular. The subscription of the Chinese loan, half in Germany, half here, has brought some £11,000,000 of credit and cash into the London market, most of which might have remained either abroad or unavailable at home for use in the short loan market of the City. The collection of this money caused scarcity of credit during April, and when it was paid into the Bank of England a report was circulated on such good authority that we credited it, that the Bank meant to allow commission or interest upon the money in order to prevent it from getting back into the market. The Bank has done nothing of the kind, and therefore the Japanese Government has been free to lend its large balances wherever it could place them. This has been done so freely that scarcity has given way to plethora, and discount rates had slipped back almost to 2½ per cent. before the Bank put its rate down yesterday. Along with the release of these large balances we have had gold flowing steadily into the country, until within the last

six weeks the stock at the Bank of England has been increased by about £7,500,000. No doubt a considerable portion of this gold represents the German half of the Chinese loan, which had nearly all to be sent here in order to be paid over at the Bank of England to Japan, but our Bank rate of 4 per cent., and a market rate for a time pretty near that figure, have also been masterful agents to draw in stray amounts of gold from all parts of Europe and from South America, and the over-trading of Japan has brought large sums in gold from the Far East. At the same time the United States demand, which was feared some time ago, has completely died away and gives no indication of revival. Thus the market is being flooded with money in a manner we could scarcely have foreseen some months ago, and is relieved at the same time from fear of export demands to an extent equally impossible to foretell. It only remains haunted by one dread, and that arises from the project of the Indian Government to borrow £20,000,000 in gold for the purpose of establishing a gold standard in India. We fancy this danger also is not immediate, although it is by no means wholly averted.

How comes it that the apparently uncomfortable indebtedness of our trade position at the present time should be completely buried, as it were, beneath indications of wealth, and the unlimited command of capital, such as the recent influx of credit and gold implies? The explanation is to a large extent in the statement already made. By the Chinese loan we have obtained command of quite £5,000,000 of foreign capital, and much of that capital may remain here to be gradually disbursed by Japan in payment of war materials and ships under construction and manufacture in this country, we thus getting an accession of floating wealth which may remain with us. Such products of credit operations serve to off-set any temporary increase in our indebtedness upon the mere balance against us in our current foreign trade. Is all danger, then, of dearer money in the autumn now swept away, and can we look forward to a time of cheap money such as prevailed with very little interruption for five years till last September? We think not, for several reasons. First of all, other credit operations must come into play which will tend to withdraw money from us in the later months of the year. None of the United States or Spanish bills of costs for the war have yet been met. When they do come forward for payment, the United States at least, is certain to require bullion from Europe to a much larger extent than has yet been exhibited. Assume that this bullion is not drawn from us, or that its amount does not exceed the steady imports of the metal from the mines, and there still remains the bread bill of Europe to be paid. Should wheat continue at or near its present price this bill next autumn and winter will be far more difficult to meet than the one for the present harvest year has proved to be, and as not only we ourselves, but France, Italy, Spain, Belgium, and perhaps to some extent Austria, will have to buy wheat abroad, prudence dictates that we should look for adverse exchanges and heavy exports of gold towards the end of the year. Add to this the danger which exists for us at home from the large number of over-capitalised industrial undertakings whose weak position must soon begin to show itself, and without going further we can at once recognise the advisability of not reckoning upon a prolonged time of low rates for money in the future. It will be much more sensible to treat the present ease as to some extent an accidental thing, due to causes of temporary force, and to recognise that the permanent influences of war and dearer food and inflated credit operations on our own and other markets are working for a higher price for loanable capital at no distant date. It may be all very well to enjoy low rates for money while we have them, but it is not advisable to enter into great operations, whether on the Stock Exchange or in commerce, in the belief that credit will remain easy for many weeks in succession.

Perhaps it is just because they see such probabilities ahead that the directors of the Bank only lowered their rate yesterday by ½ per cent. from 4 per cent. to 3½. Had they had no cause to hesitate they would have done better to lower the rate at once to 3 per cent., since the ½ per cent. step leaves the Bank about as far above the open market as it was before. Accepting this as the reason for the hesitation of the Bank Court, there is no fault to be found. Should foreign exchange betray no tendency to go seriously against us during the next few weeks the rate can be further lowered without disturbing the market in any way.

Farewell Words on Mr. Gladstone.

It was inevitable, we suppose, that his body should be buried in State. Unquestionably there has been more genuine feeling behind the demand of the nation that the great statesman's remains should be thus laid to rest in mother earth than is usually found in such cases. Mr. Gladstone's death has touched most hearts, not only at home but in every civilised country, with a sense of personal loss, in its way unexampled. No more eloquent testimony could be given, not, perhaps, to the estimation in which his political career is held, but to the fascination and binding force of his lofty character and pure, simple life. The country was right to claim to do him honour in his death, and yet we have to confess to a feeling that we should have liked best to have thought of his body as resting at Hawarden among his own people, before whom he went out and in, the quiet, unassuming citizen and friend, a perfect gentleman of the olden time; and there is an unconscious lack of consideration for his own family and friends, and above all for his widow, in the delays and parade incident to a great State function, no matter how shorn of its splendour. When all is over, and the ultimate bourne attained, the cry of the bereaved is ever that of the Patriarch Abraham —"Let me bury my dead out of my sight"— and to keep the living and the dead together longer than can be helped is to inflict the most painful strain on those who mourn the most. Well may her children be anxious for their mother in the days that must intervene—much as the ceremony has been hastened —ere Mrs. Gladstone can look her last on the clay of the warrior now at rest whose life she has shared, whose wounds she has dressed and healed nigh these sixty years.

Last week we said a few words about Mr. Gladstone's influence in foreign politics, and now pause only to ask, could any possible testimony to his success in the highest field of such politics be greater than that afforded by the manner in which other nations join

with us in tributes to his memory—in mourning his departure. If it be a nobler deed to unite nations in friendship than to part them in jealousy and strife, then are Mr. Gladstone's achievements to be ranked among the greatest of this or any age. To no small extent, perhaps, his personal character accounts for the accord of nations now in speaking well of his memory, but we cannot help thinking also that the long series of brilliant financial reforms, which, begun by Sir Robert Peel, were carried so far to completion by Mr. Gladstone that the path of every Chancellor of the Exchequer who followed him has been defined beforehand, give the true explanation of his power for good—his influence in promoting peace abroad in past years.

There can be no question that the liberation of our trade, a liberation effected chiefly by Mr. Gladstone's measures, opened the way for that increasing intercourse between ourselves and other nations which, leading as it does to a closer interlinking of interests, causes enmity and prejudices to disappear and friendship to take their place. Thanks to the Budgets of 1853, and 1861, '62, and '63, more than to any performances of diplomacy proper, the day approaches, we may hope, when a war between us and any civilised people will be impossible—a crime too fratricidal and ruinous to be committed on any pretext. We say this and hope this, all the fashion of the hour for playing at war and costly provisions for strife notwithstanding. They are but the fevered protests of a dying barbarity.

As M. Yves Guyot finely says in his thoughtful essay on the deceased statesman published in the *Siècle* of the 20th inst.: "Without doubt the Jingoes have reproached him, as they did Cobden and Bright, with not conducting a foreign policy of bombast. He looked a very timid and small personage when, in 1850, in answer to the clanging discourse of Palmerston, in which the famous formula of old Rome had been recalled, *Civis romanus sum*, in justification of his high-handed interference in Eastern and other foreign affairs, Mr. Gladstone pointed out that the civilisation of England was quite another thing to that of Rome. The grandeur of Rome rested on the exploitation of the conquered peoples by their conquerors; war was its only trade, whereas the glory of the Liberals of England in the present century, the immense service which they have rendered to their country and to humanity, has been to demonstrate that civilisation is the product of industrial effort, that the true expansion of a people was that of its productions, of its language, and its ideas, and not that brought about by its soldiers and generals. The policy of Gladstone," he adds, "has been a policy of affranchisement." This is true, and a grander epitaph no man need desire. We have wandered far in recent years from the aged statesman's ideals of international fellowship, but the eclipse is but transitory, and when the nation is again in its right mind they will reassert their sway.

M. Guyot's concluding paragraphs must be given entire :—

"Gladstone has been one of the grand agents of liberty under all its forms, affranchisement of peoples, freedom for the individual. He has delivered his compatriots from numerous imposts, and from more than a hundred millions of debt. He provoked the recognition of ignored rights. This is the true liberal policy. He will remain a great figure, and merit the homage of posterity, because he brought into the world a little more justice than he found there at the threshold of his career.

"Through a depraved worship of force there are men who represent Bismarck as the great statesman of the second half of the nineteenth century. Is it because he incarnates the policy of treachery, brutality, and rapine? He has organised a powerful Germany, apt at destruction, but he has likewise made a retrograde Europe, a Europe crushed beneath the weight of its armaments, shut up in gigantesque barracks, and 'corporalised' in intellect.

"If progress be in direct ratio to the power of man over things, and in inverse ratio to the coercive power of man over man, then Gladstone, from the point of view of politics, has been its grandest auxiliary. While Bismarck will be ranged among the malefactors of humanity, Gladstone will be classed among its benefactors. This is why, in spite of the faults which he has committed, he is the type of statesman whom we ought to take for our ideal."

Hooley Finance.

In the end of last week eulogies appeared in many papers of an invention for jointing tubes of all descriptions by hydraulic pressure. Duly following these puffs, a prospectus was advertised on Monday of the British Hydraulic Jointing Company, Limited. This stated that a company had been formed with a share capital of £1,200,000 in £1 shares, £800,000 of which were to be issued forthwith. Of this £800,000, only £100,000 was set aside for working capital, the balance going in payment of promoter's profits, and for the patents and provisional or other protection taken out in the United Kingdom, France, and Belgium. There are five directors of this company, all men of some position, and, we should judge, men of honour. The Earl of Crawford, who acts as chairman, is undoubtedly a man of some scientific attainments, and, as far as we have ever heard, perfectly incapable of lending himself to any transaction by which the public would run the risk of losing money. Nevertheless, in our opinion, the public will lose money if it subscribes for these shares. We have studied the prospectus carefully and cannot find in it any substantial ground for a belief that the profits from royalties upon and sales of the hydraulic machines can ever be such as to justify such a monstrous capital. From this aspect, indeed, the company is only another of Mr. E. T. Hooley's extraordinary freaks in capital inflation.

At two points we can put the statement in the prospectus to the test of fact. It is stated that the principle can be applied to anything tubular, and after mentioning a number of kinds of tubes, it goes on to mention in particular that the process is applicable to the jointing of aluminium, "which is difficult, if not impossible, to solder or braze." This statement, according to our information, is directly contrary to fact. One eminent firm engaged in the manufacture of aluminium utensils has succeeded in perfecting a solder which holds, and is so strong that, as those who know the metal can suppose, it is easier to break the thing soldered anywhere else than at the joint. Again, further down the prospectus we are told that the process permits of the easy construction of a cycle frame made of thin tubes of aluminium, as no solder or brazing is required, and

this will allow of a combination of great strength with extreme lightness. Here also is a statement which we do not consider in accordance with fact. Aluminium by itself is much too soft a metal, and too deficient in toughness, to be suitable for the thin tubes of a cycle frame. Unless strengthened by some alloy, such tubes would collapse with very slight weight or concussion. Now, if such statements as these are unjustifiable in light of actual experience and facts, may we not fairly conclude that many of the others are exaggerated, and that the extraordinary saving of labour claimed for the new invention exists mainly in the imagination of the sanguine promoters. Grant that it does all that it claims for aluminium, is it not already superseded as an invention of utility in relation thereto by the "weldless" frame? All that has appeared about this invention has, we think, come under our eye, and we have never been able to discover in any statement a convincing proof of the extreme utility of the new process. Welding by pressure is not a new thing by any means. Admit, however, that it is all that is claimed for it, and is it possible to imagine such an invention to be worth £800,000? Indeed, Mr. Hooley seems to buy the patents for that sum and sells them for £1,025,000. It is a monstrous price, totally unjustified by anything put forward in favour of the process, and we should imagine sensible people will keep their money in their pockets.

Mr. Hooley has never been a favourite with the investing public in London. He is looked upon in the City as a phenomenon, not as a man of practical sense and business; and his methods of floating companies have never commended themselves to the minds of prudent people. Not so long ago he introduced with the usual flourish of puffery—including, by the way, an article in the *Illustrated London News*, which was printed as an editorial that we were beguiled into reading with a puzzled mind until the key to it was revealed to us at the close—a wonderful improvement on the Jacquard loom. This was such a complete failure that we believe the money subscribed had to be refunded. Recently in Dublin and in London two trials have taken place which should throw a good deal of light on the harum-scarum, slap-bang, bounce-the-market system of finance, so-called, pursued by this enterprising citizen of Nottingham. The trial in Dublin was that of an action brought by the Components Tube Company, Limited, against a shareholder to recover unpaid calls. The verdict was for the defendant, but we believe a new trial has been applied for, and therefore it is not competent for us here to say whether this verdict was just or not. It is, however, permissible to allude to the evidence given. This went to show that the entire promotion of this company was merely a share-rigging affair, and there was a mysterious deposit of £10,000 which was difficult to trace. Whether it was paid or not even the judge, after the trial had ended, did not seem to be sure, and he lamented in his summing up the absence of Mr. Hooley as a witness. "Several points in doubt," said Mr. Justice Gibson, "in the case would have been made clear if Mr. Hooley's evidence could have made it clear by his contradiction. Unfortunately, however, we are afraid, whether from press of business or otherwise, in a case which affected his commercial honour and standing he did not come into the witness box." It would seem that Mr. Hooley is not popular in Dublin, for in his evidence at the still more recent trial held in London, he roundly stated, in answer to Sir Edward Clarke, that he did not care to go to Ireland. "Why," asked Sir Edward, "did you abandon your action against the Grappler Company and pay costs?" "First," answered Mr. Hooley, "because I knew that the company was in such a position that I could not get anything, and, secondly, because I was advised by many people that it would not be wise for me to go to Dublin, and I never shall go unless they fetch me." We quite believe in Mr. Hooley's reluctance to go to Ireland: the Irish have an awkward way of expressing their feelings. In 1896 the humble editor of this Review was told that it might not be safe for him to appear in that capacity on the Dublin Stock Exchange. This was only a joke, of course, but if he might judge by the hot letters he then received denouncing him for warning the public to have nothing to do with the Dunlop Tyre Company, and other cycle company promotions, the unmeasured wrath which must have accumulated now against Mr. Hooley in the Emerald Isle is too formidable to be encountered by an Englishman possessed of respect for his own skin. It would have been better, by the way, if the Irishmen had listened to us instead of Mr. Hooley and his Press in 1896. Thousands of people who are to-day ruined might have been in comfortable circumstances had they taken our disinterested counsel. This, however, is by the way.

Let us look for a moment at the other action just alluded to, which ended abortively last Thursday week in a disagreement of the jury. This was an action brought by a Belfast merchant, named Reid, against Mr. Ernest Terah Hooley and Mr. Martin D. Rucker, charging them with fraud in connection with the Grappler Pneumatic Tyre Company. It seems that this company had originally a small capital of £75,000, upon which no dividend was ever paid. It was an unsuccessful company, in short, and on April 9, 1896, its shares were quoted between 1s. 9d. and 4s. So helpless was it that its end could not, in ordinary course, have been far off at that date, if left to its own devices. Just then, Mr. Hooley and Mr. Rucker appeared on the scene, and, helped by a Mr. Bulger, a Dublin stockbroker—who has resigned his position as deputy chairman of the Dublin Stock Exchange in consequence of the Dublin trial held early in the present month—they entered into negotiations for the purchase of the Grappler Company, offering £4 per share for shares of which it is admitted that the would-be purchasers had picked up large numbers on the market at 2s. each. Before the negotiations came to this point rumour was busy through the Press, and the price of the shares began to creep up. Then the offer in due course became public and the shares flew up. People from all quarters rushed in to buy, feeling sure that they had a good thing, and that they would at least get back £4 per share, according to the offer of the two eminent English provincial financiers. The bargain was never completed. Messrs. Hooley and Rucker preferred to sacrifice a deposit of £25,000 rather than complete it, and Mr. Reid boldly asserts that there was never any intention of completing it, that the whole thing was a mere trick in order to enable the smart Englishmen to unload at fancy prices thousands of shares which they had picked up for next to nothing. As the jury could not agree, we may take it that Mr. Reid did not prove his case. The

very fact, however, that opinion was so divided amongst the jurymen as to prevent their agreement should be accepted as a warning by prudent people to give all Hooley promotions a wide berth. Every one of them has been vitiated by the mistake of excessive capitalisation. It has never appeared to us that Mr. Hooley paid the slightest attention to the intrinsic value of any business or patent, or amalgamation of businesses and patents, he undertook to vend. No pretence has ever been made by him of doing this. His one object has been to put as high a capital value upon the thing he wished to sell as he conceived it possible by all manner of blandishments to get the public to subscribe. This may be "smartness" above board, but none the less is it smartness of a very unprofitable description, and the latest instance before us, in this Hydraulic Company's prospectus, of Mr. Hooley's ambitious versatility does nothing whatever to inspire us with deeper confidence in his judgment than we had before.

The Rand Mines, Limited, and its Group.—II.

An error was made in the table at the end of the article on this subject in last week's number: we gave the "shares issued" of eight Rand Mines' creations, and the number of them held by the parent; the balance of them we treated as held "by the public." This is a misleading phrase and unpardonable on our part, seeing that on February 18 we published a table which demonstrated that "the public" had mighty little to do with some at least of these companies. For example, Glen Deep shares are nearly all held by the Rand Mines, Limited, the Goldfields Deep, Limited, and the Consolidated Goldfields of South Africa, Limited. At least they were so held till quite recently, and the Rand Mines, Limited, has increased its holding during the past year. It follows that the market quotation for Glen Deep shares must be purely fictitious. This is also the case with Rose Deep and with Jumpers Deep, although not quite to the same extent, and it is on the whole gratifying to find that the promoter companies seem to have made little progress in unloading their shares on the public last year. At least, we infer this to be the case from the fact that in several instances the Rand Mines, Limited, has had to buy in shares in order to sustain the market price.

Before proceeding to complete what we have to say about the Rand Mines Company itself, let us complete the observations begun last week relative to the extravagant expenditure of its children. We do not merely mean extravagance in advertising, but at all points. What, may we ask, has been done to prevent waste and to check the prices paid for the appliances necessary and for the equipment of the mines? Mr. Eckstein claimed that the management had been thrifty. Has it? We should like to have independent testimony on this point. Last week we noticed in passing a very heavy sum charged against machinery in the case of the Geldenhuis Deep, and the same characteristic is observable throughout the whole of the accounts presented. Thus machinery and plant in the Glen Deep have cost already £55,000, although not even sixty stamps as a beginning have yet been erected. In the Rose Deep, which is at work with 100 stamps, the cost of machinery and plant has been £209,600. In the Jumpers Deep, which was not then working, there are apparently 100 stamps laid down then of 200 projected and for which we have given the company credit in our estimates. Here the machinery and plant have cost £142,000. The 100 stamps of the Nourse Deep are not yet all erected, although the machinery is on the ground, and the same item in this company's accounts stands at over £116,000. In the Crown Deep, whose full equipment was also to be 200 stamps—and all of this has been apparently erected, although all of it cannot be worked—machinery and plant figure for £296,976. The same item in the Langlaagte Deep, whose reports do not indicate that any stamps are yet erected, stands at £59,692, although the general manager in this instance states that it has been deemed advisable to enter into negotiations for the lease of a neighbouring mill with a view to commencing crushing operations at an early date. And in the Durban Roodepoort Deep, where all the 100 stamps are certainly not erected—it being stated that on commencing operations it may be found that it will be impossible to successfully run more than forty stamps during the first few months owing to the difficulties of obtaining a proper supply of natives—the machinery and plant stand at £126,336. These various amounts tot up to a total of £934,797, and we should like to know not only who controls this expenditure, but why the amount of it varies so much in different concerns for apparently the same article. Is the whole of this machinery provided by Messrs. Wernher, Beit, & Co., acting as agents for the companies in the same way as North & Jewell acted for the North group of nitrate companies? Do they pocket handsome commissions upon the orders? If not, how is the business managed? Shareholders in this country assuredly have not the shade of a shadow of real control over any one of these properties, in the shape of directorate, management, expenditure, or anything else.

Mr. Eckstein boasted at the meeting that an immense amount of information was given about South African mines, more than about any other similar undertakings in the world, and, in some respects, his boast was justified. Still, there is a great deal of information which ought to be useful for shareholders to know that is never even hinted at, and we class all the facts about the management of the mines in this category. Essentially, in everything that relates to the business of sinking shafts, putting up machinery, buying stores, selling products, regulating native labour, and so on, these mines are all as much private property as if no single share had ever been sold to the public. It may be all right, of course, and the management may be thrifty and careful, but it may just as well be the reverse, and we think shareholders here, if they are seriously bent upon making incomes out of their investments, ought to do something towards obtaining information upon this most essential side of their business. They will be active in forming committees when too late. Why cannot they act now? Perhaps because for some of these properties, as we have just demonstrated, there are almost no independent shareholders.

A word finally in regard to the accounts of the Rand Mines, Limited, itself. They show a profit last year of £351,364, making the total profits earned to date

£1,694,737. The whole of these profits have, quite rightly, gone into the business as we may say, the money being used to develop the subsidiary companies, and it has nearly all been profit made on transactions in shares. Out of the last year's income, only £55,443 came from dividends earned; the rest was profit on shares sold, the company having parted with some 70,000 shares in five of its companies during the year, replacing them by additional shares in the Glen Deep, Rose Deep, and Geldenhuis Deep. It both bought and sold in the shares of these two latter companies, so that the profit in their case came from stockjobbing pure and simple, not from mere "investment" as Mr. Eckstein would have us believe. The controllers, no doubt, sold when the shares were high, and bought back when they were low. Needless to say, profit of this description is extremely precarious, and cannot be trusted to continue. Meantime the British public may just as well note that the Rand Mines, Limited, owns nearly 2,500,000 shares in twelve different companies, the whole of which it will doubtless be one of these days quite pleased to put on the market at a handsome profit, notwithstanding the assurances so often given that it is an investment and not a speculative company. A sensible man will not be ready to give it the opportunity to sell. Suppose, though, that the whole of these shares could ultimately be realised at £10 each: that would give Rand Mines shareholders back £25,000,000, and at 30 the market capitalisation of the issued shares is under £10,000,000. Is there not great scope here, then, for an increase in the price of these shares? Possibly, but meantime most of the shares held by the company are unsaleable in quantity on the market at any price.

And there is another way of looking at the subject. Accept as true the declaration that the Rand Mines is an investment company, and how much revenue will it require in the shape of dividends on its present holdings to give 5 per cent. to its own shareholders on the capital now issued at £30 per £1 share? Just about £550,000, including the interest on its 5 per cent. debentures, and without making any allowance whatever for depreciation. Now, we proved last week that it will take over three-quarters of a million to provide 5 per cent. on the quoted price of the shares of the eight companies whose reports are appended to those of the Rand Mines, Limited. But this parent holds over 58 per cent. of the entire issued capital of these companies, and cannot hope—as we made clear to all who care to look at facts without prejudice—to draw in anything like £550,000, still less £650,000, which it would require to be in a strong position. Its possible revenue from these companies cannot be expected, within the next five years, if ever, to reach £350,000 per annum. What else, then, has the company to fall back upon? Well, it holds 9,771 £1 shares in the Simmer & Jack West property, 40,330 £4 shares in the Wolhuter Gold Mines, 215,500 £1 shares in the South Rand Company, and 199,763 £1 shares in the Paarl Central Company. Will these give it a quarter of a million a year in revenue as an "investment" company? We doubt it exceedingly, but have not the data by us to form a judgment upon. We do, however, know that there is no market for any of these shares, except the Wolhuter. The Paarl Central Company has never yet done any good, and its shares now stand at a discount of 50 per cent. Simmer and Jack West shares are not in the "active list" at all, nor yet South Rand shares. We can find no quotation for them. In these circumstances, it will be prudent not to count much on revenue from such quarters, and if this source is left out of account what justification do plain facts give to the current quotation for Rand Mines shares? To our thinking, absolutely none. It would not surprise us at all were the company soon to be in want of more money, for nearly a million is, by its own board's estimate, still required to bring its properties into productive condition, including the Rand Exploration Syndicate's wants—a concern whose capital has not yet been issued. Perhaps "reserve shares" will provide this money. If not, the Rand Mines, Limited, must find it, and how is it to do that if the market will not let it unload some of its present holdings? Its one chance of escape seems to be in a "bear" account, and we trust no one will be so mad after reading what we have said as to sell a "bear" of shares in any of these companies. That would be to commit financial suicide. Leave the Rand Mines, Limited, alone for the present with its investments.

Electric Light Companies and Local Authorities.

Slowly has come to the front a very awkward dispute between local authorities and electric lighting corporations. For a number of years, indeed until the last three, the operation of supplying electric energy was considered a highly speculative undertaking, and although a number of companies were formed between 1887 and 1892, only one local body in London—the St. Pancras Vestry—was bold enough to start supplying the energy prior to 1895. In fact, the local authorities of London, although the Electric Lighting Acts gave them full powers in the matter, shrank from the task, and in the absence of action on their part a number of companies were formed to supply energy in the most promising districts of the Metropolis. Before these companies obtained power to operate, their applications had to go before Parliamentary Committees at which the local bodies interested were represented by counsel, who on behalf of their clients caused to be inserted in the orders regulating the working of the companies many onerous conditions, with the view that if a local authority should wish to buy the undertaking at the end of the forty-two years' lease, it might be able to get it cheap and in full working order. They also obtained full protection for the public in regard to the price to be charged for energy and against the danger of a company growing into a monopoly. In this respect they were doing their duty, and although their action in forcing the companies to make heavy provisions for depreciation led to several of them going without dividends for some years, the policy thus pursued has in the end made the electric lighting companies of London much more solid concerns than joint stock undertakings of recent growth usually are. At the same time it should be admitted that the local authorities and the community at large have benefited by the prosperity of the electric lighting companies, inasmuch as the price of energy in every case, save that of the City of London Company, has been reduced materially below the statutory prices allowed to be

charged by the companies, although these cannot generally be said to have yet obtained a fair return on the money invested. Taking the leading London companies we find that the average dividend upon their shares since their date of formation has been as follows :—

	First Capital Issue.	Average Dividend over Period. Per Cent.	Last Dividend. Per Cent.
Charing Cross and Strand	1892	5·33	7
Chelsea	1888	2·85	6
City of London	1891	3·64	10
House to House	1888	·40	4
London Electric Supply	1887	nil	nil
Kensington and Knightsbridge	1888	3·80	10
Metropolitan	1887	2·14	6
Notting Hill	1890	1·62	6
St. James's and Pall Mall	1888	6·40*	14½
Westminster	1889	5·22*	12

* In addition dividends paid to founders.

That the new business was not unattended by risk is evident from the poor results obtained by the London Electric Supply, the House to House, and the Notting Hill Companies ; and although the St. James's and Pall Mall and Westminster may be cited as instances of prosperity, it ought to be remembered that they have built up their business in face of competition, and that their charges are much below the statutory limits. The local authorities, by assenting to the granting of powers to the various companies, must be considered to have tacitly agreed to the supply of energy being placed in these companies' hands, and in view of the fact that they did not dare to take the responsibility of carrying out the work themselves, they ought to give those who did dare a fair chance. They are not doing so.

Since the electric lighting companies have proved to possess a prosperous industry, that is, within the last two or three years, there has grown up a strong movement amongst the London vestries to take up the work of electric lighting on their own account. They see St. Pancras gaining fair profits from the business, and even some of the other vestries which started later in the day making some profit on it ; and accordingly they apparently do not see why they should not plunge in and secure some of the pickings. In this respect they are particularly favoured by having full liberty of action, for the first clause of the Electric Lighting Act of 1888, which amended the first Act of 1882, runs as follows :—

> Notwithstanding anything in the Electric Lighting Act, 1882, no provisional order authorising the supply of electricity by any undertakers within the district of any local authority shall be granted by the Board of Trade, except with the consent of such local authority, unless the Board of Trade in any case in which the consent of such local authority is refused are of opinion that, having regard to all the circumstances of the case, such consent ought to be dispensed with, and in such case they shall make a special report, stating the grounds upon which they have dispensed with such consent. The grant of authority to any undertakers to supply electricity within any area, whether granted by licence or by means of a provisional order, shall not in any way hinder or restrict the granting of a licence or provisional order to the local authority, or to any other company or person within the same area.

Fortified behind this clause the vestries of London have stirred in the matter, and after gaining several advantages in minor districts, notably in Newington, the gauntlet has been thrown down to all the electric lighting companies by the Marylebone Vestry applying for powers to set up an electric lighting station in its own parish. For years this parish has been supplied by the Metropolitan Electric Lighting Company, and although that company has not reduced its charge for energy so quickly as others, it is charging well below the statutory price, and its dividends have throughout been moderate.

Now that it has been satisfactorily proved that the supply of electric energy is a paying business, it stands to reason that the local authority can afford to produce the light at a cheaper rate than a company. In the first place it can borrow money under 3 per cent., and then it has no shareholders for whom to earn profits. Standing charges, such as offices, supervision, collection of accounts, &c., are, in a great measure, provided by the existing staff of the vestry, and should adversity fall upon the undertaking there is always the rates to fall back upon. Against these advantages the only off-set is the proviso that capital must be repaid; but we believe this clause has been utilised by vestries in order to reduce depreciation charges, so that it is not really a drawback. Whatever the intention of the framers of the 1888 Act of Parliament might be, to foster competition in such an unfair manner as is now proposed against the pioneers of the industry, looks inequitable at least. In fact, the Board of Trade in a letter dated May 18, 1889, written by Mr. Calcraft to Lord Rosebery, as Chairman of the London County Council—a letter which laid down the principle of granting orders—put great stress on the fact that permission for one company to enter into another's district was only granted upon special conditions, such as a difference in the form of current supplied or the necessity of obtaining access beyond. This policy, however, appears to have now been abandoned, and the Board of Trade has recently granted powers in cases that virtually admit the principle of free competition at all points.

The electric lighting companies are preparing to oppose the application of the Marylebone Vestry when the matter is brought before Parliament, but unfortunately there is an awkward lack of agreement amongst themselves. First of all, we have one company—the County of London and Brush—acting the part of bold buccaneer, and endeavouring to edge its way into every district in which it can obtain a foothold. Then, to make matters worse, we have a group of gentlemen connected with some of the older electric lighting companies —the Westminster and St. James's and Pall Mall—asking Parliament to consent to a scheme for a Central London Supply Company, with a huge station outside London to bring up current at a very high tension, to supply distributing companies or vestries. Such an undertaking would allow a vestry to light its district without the initial expense of building a station. All that would be needed would be to lay mains and arrange for a supply of energy from the Central Electric Supply Company.

In this chaotic condition, which threatens competition all round, there is danger that the capital invested by the pioneers in this great industry will be imperilled, and we think every one who is at all interested in a fair recognition of enterprise and successful organisation ought to support a movement for the settlement of the respective rights upon a satisfactory basis. Parliament ought to appoint a Joint Committee to consider the whole conditions which have arisen since 1888, the date of the last Act, and take such steps as will give investors some certainty as to what they have to expect in subscribing money towards electric lighting enterprises. By preventing the companies

from obtaining a freehold right Parliament certainly acted for the public benefit, but if private capital is now to be wasted by the oppressive action of local bodies, the mainspring of enterprise will be taken away, to the great injury of future progress. For the local authority is usually great at garnering the fruits of other men's labours, but it is particularly weak in initiative. On the other hand, to permit free and open competition in such a matter is an impossibility, as the inconvenience to the public is too great. This was found to be the case in regard to gas years ago, and although the districting of London that took place in regard to those companies cannot be considered to have been wisely conducted, it is upon some such principle that Parliament should act in regard to electric lighting. The local authority ought to be put into its proper place as residuary legatee in every case where private enterprise has first supplied the district with energy, whilst competition betwixt company and company ought to be considered sufficient for the interests of the public. Besides, should there be any oppressive action on the part of the electric lighting companies, the local authority has power to appeal to the Board of Trade and enforce a reduction in the price of energy. In regard to this matter the intention of the Board of Trade was to eventually bring in a sliding scale upon the same principle as in use for gas companies, and Mr. Calcraft, in his letter to Lord Rosebery, stated that considering "the electric companies only have a certain tenure of forty-two years, the Board of Trade are of opinion that a price arranged on the basis of a 10 per cent. dividend would not be unreasonable." But how in the world will it be possible for the companies to earn a 10 per cent. dividend, if the local authority, with all its powers of cheapening cost, is to be allowed to enter into competition against them?

West Australian Market Trust Conjurors.

We have never beheld the burlesque of serious finance carried to such an extreme height as it is in this instance. The success with which Mr. Bottomley and his friends continue the play is, perhaps, due to the small amount of interest the public has in the various "companies" paraded before them; but even so one wonders sometimes when the curtain is to ring down on the final scene. In a general way, people know that this Market Trust arose in some mysterious fashion out of the Joint Stock Institute, and that it engaged recently in the strenuous occupation of keeping up the price of the shares of the Northern Territories Gold Mining Company, Limited, at and above £4. When the artificial market in these shares collapsed the Trust immediately found itself very hard up indeed, for after all one cannot keep even burlesque finance a-whirligigging on nothing. For a short space of time things looked very black, but the Bottomley group was equal to the occasion, and "reconstruction" of the Trust was resolved upon at an enthusiastic meeting of Bottomley's henchmen. Unless our memory is at fault, the understanding was, as expressed at that meeting, to liquidate the old Trust, and form a new one, the new one to possess the same amount of nominal capital as the old, but with 15s. or 16s. only paid per £1 share. A committee, therefore, was appointed to report on the condition of the Trust before finally carrying out this arrangement, and the combined effort of this wonderful body is before us.

Usually, when a company gets into difficulties and requires its affairs to be looked into, shareholders are treated to some details about the possessions of the embarrassed concern, and almost invariably have a balance-sheet put before them showing more or less the assets and liabilities to be dealt with. But our "Trust" committee does not condescend to this kind of thing at all. It takes the high-handed way and delivers judgment like a Delphic oracle. It seems there are "assets and liabilities," but the shareholders are told nothing about them, except that Mr. Wreford and his staff "certified" to their existence. What the assets are, how the losses which have brought down the Trust have arisen, what will be done with the money to be called up on the new shares—all these things are wrapped in their original mystery, and the committee merely condescends to state that it has arrived at the conclusion that the present position has been brought about by "causes of an exceptional character," and then proceeds to laud the zeal and wonderful abilities of the chairman, Mr. Horatio Bottomley, who valiantly "supported" the market until the Trust went down beneath his feet. Furthermore, the committee proceeds to say that it has been agreeably surprised at the present position of the company's assets, and signifies its emphatic opinion that the holding of the Trust in Northern Territories' shares is a most important possession. By "personal inquiry and independent expert advice" it comes to the conclusion that the properties owned by this Northern Territories Company, "judged by results already obtained and present developments," are of great value. You ask for facts in support of this: there are none forthcoming. How many stamps are at work, how many men digging out the ore, what money has been spent on developments, what returns has come from gold won? All these things are in the same original darkness shrouding everything about this amazing group of companies.

There is a practical aim, however, behind all this nice language, and that is not only to put the Trust in the position to command 5s. per share in new capital, or say £125,000, but also to put a new creation of preference shares, not, we believe, mentioned previous to the issue of this report, in front of the assessed ordinary shares, to their damnification. What is to be done with the money obtained from these preference shares? There is no information. How many preference shares are to be issued? The report does not say. Will Mr. Bottomley, or his nominees, or the Trust's preferential creditors, if any, receive these shares? Ask the man in the moon—he may know. Is Mr. Bottomley really going to take ordinary shares for the £150,000 stated to have been advanced by him to help the Trust "through the Joint Stock Institute," which we never knew before to be so rich? Perhaps, but we can only guess: there is no definite information. We are merely informed, with an admirable gravity, that he has agreed to accept repayment of this sum entirely in "fully-paid ordinary shares of the new company, taking them at their full face value." But how could some part of the ordinary shares be issued with liability and some not? Will they be ordinary shares with a preferential right to certain dividends, or what? Still we cannot say. It is all as creepy as Mr. Maskelyne's cabinet of

mystery. Assuming the public to be uninterested, this is really one of the most comic exhibitions of how to play the great financier with wind instruments we have seen for many a day. Indeed, the only serious thing about it, to our minds, is the fact that two members of the Stock Exchange have signed the report. They surely can hardly expect that the public is going to come in and find the money to pay their losses on data such as we have indicated. If they do, poor fellows, they deserve our most sincere commiseration, and we hereby tender it to them. As for the others, oh, but they are a merry band of most excellent players!

Economic and Financial Notes and Correspondence.

The Wisdom of Lord Windsor.

This nobleman has very original geographical ideas, but they are highly suitable for the policy of Mr. Rhodes. At a luncheon held in Westminster Palace on Tuesday last his Lordship held forth thus :—

As to the proposed extension of the great railway from Bulawayo to Lake Tanganyika, he reminded them that Mr. Rhodes had made an application, not for an advance of public money from England, but only for a guarantee. Mr. Rhodes had suggested that the railway should be made in sections, and only the part that was constructed should be guaranteed by the English Government. Whether Mr. Rhodes was correct or not in his figures was a matter with which they had no concern ; they had only to think of the advantages that were to be gained by the price that was to be paid by England for giving this guarantee. The price surely was a great railway through the backbone of Africa, and ultimately and inevitably to reach Khartoum and the Nile Valley (cheers). This important railway, with all its advantages, was comparable only to the position which Russia now held in Siberia and in Northern Asia in consequence of the great trunk railway which they had created from China to Port Arthur (cheers). This was surely a policy the value of which the English Government must recognise. He felt confident that the scheme would have the countenance and support which it deserved from her Majesty's Government ; and they looked with the utmost interest to the decisions which would be come to by them.

There was much more of the same sort with which we need not trouble the reader. According to this sample, we can only suppose that Lord Windsor imagines Africa to be bounded on the one side by a frozen ocean, and to be occupied on the other by a number of great States hostile to the domination of Great Britain. This is highly interesting, and accounts for the zeal shown by the privileged classes in supporting Mr. Rhodes's sublimely ridiculous project for a railway along the mid-rib or backbone of the African continent. And really the reasons set forth in support of the first little bit of guarantee asked for this railway are in admirable keeping with the whole spirit of those who are seeking to load us taxpayers with the cost of the project. These guarantees, indeed, open an endless vista of similar demands on our purses in the not distant future. In the last report of the Chartered Company, figures were given to prove how exceedingly profitable the already existing bit of this railway had proved to be in the few months of its existence, but the directors forgot to state that this profit arose from exceptional traffic which had been long accumulating, and a very different story will doubtless be told after a year or two, unless successive doses of fresh capital can be secured to keep the trains running.

And the Possible Developments Thereof.

We can imagine something of this sort coming before us, and being advocated in Parliament and on the platform by the ever-zealous Secretary of State for the Colonies, whose son is deputy chairman of the Bank of Africa, and therefore interested in the development of one at least of our amazing empires there : guarantees, for a loan to import elephants so as to obtain ivory, to be exported on the mid-rib African railway, the native supply being exhausted ; for a loan to enable chiefs and kings of black tribes, scattered throughout the territory served by this railway, to pay their fares to visit each other in order to swear blood-brotherhood in the interests of peace ; for a loan to provide capital to "natives" so that they may buy clothes, in furtherance of decency after the English model, which clothes would be imported from Cape Town or Port Elizabeth by this railway ; for a "temporary advance" to pay for poles and fresh wiring for Mr. Rhodes's "Cape Town to Cairo" telegraph, the old poles having been eaten by the white ants and the wire stolen for ornaments by the unlettered savages ; for a loan to provide funds to enable congratulatory messages at so much per word to be sent between Cape Town and Cairo, and for other purposes, in order to enable the telegraph company to show a "net" revenue ; for a loan to pay for imported black labour from the Sandwich Islands or other places where such can be found, the native supply having "given out" through exhaustion or emigration into the territories in Africa occupied by Germany, Portugal, France, or Belgium ; for a loan to enable settlers to buy new cattle—which would be, like the new blacks, imported at profitable rates over the railway—to replace their old stock, all eaten up or worked out ; for a loan to subsidise a company to be formed to exploit the glaciers of Ruenzori and Mount Kenya, in order that the ice might be sent by the railway to Cape Town for export to England, so that we might always have plenty of pure ice for our "Schweppes" ; for money to be expended on "barrages," so that all rivers, especially those in the Nile watershed, might be dammed up at convenient places to establish a storage of water, rendered necessary by the depletion of the aforesaid glaciers ; for a loan to enable banks to pay dividends on their capital, all locked up in unrealisable securities, such as advances to mines without ore, to farmers without crops, to graziers minus cattle ; and, finally, for a loan to provide the means whereby mine companies might buy ore abroad to be brought over the railway, and crushed at mills unable to obtain any ore on the spot worth crushing. These are but a few of the demands we may expect to see sprung upon us as time goes on, in consequence of the zeal Rhodesians exhibit in the development of their African dominion, present and prospective, with money drawn from our pockets.

As Seen Without Lord Windsor's Glasses.

The *St. James's Gazette* said the other day that the Bechuanaland Railway guarantee had been arranged. This may be premature news, but we have no doubt it is news which will come true. Were it of any use, we might ask Parliament and Ministers to pause before committing the country to such an unwarranted obligation, at least until the utility of the Uganda Railway now building, and which will cost us probably quite £5,000,000, has been proved by experience. It is of no use. If you speak to a Member of Parliament on the subject, and he is frank, he will tell you "We cannot help ourselves : the whole thing is pushed on by the Prince of Wales, and we have got to vote the money." This answer has been given to us, and whether it embodies a slander against the heir to the throne or not, it carries sufficient weight with Members of Parliament to silence them. "They have not the manhood"—to use the phrase of Mr. Gladstone's quoted by Lord Rosebery in his beautiful speech in the House of Lords last Friday—to stand up in their place and say : "This thing is wrong, and must not be." Many fear loss of Court favours—titles, dinner invitations, presentations to Royalty, and so on. Others merely shirk their duty from moral cowardice, and, between them all, this vote will go through, helping to keep a gigantic imposture on its legs a little longer for the fuller rifling of the simple investor's pockets. Of such stuff are your chosen-by-ballot law-makers made, good electors. The day was when Englishmen had souls they called their own—backbone,

and moral courage. Has that day gone for ever? Is the company-promoting share-trafficker henceforth to be our lord and master, making even kings and princes bow to his commands?

The French Elections.

It does not seem to us that the new Chamber of Deputies in France just completed by the second ballots of last Sunday promises well for the stability of M. Méline's ministry. Taking the official enumeration, there are only 254 Republican deputies in a Chamber of 581. Adding the Rallied members, who have forsaken their old allegiance to other parties, to the deputies officially classed Republican proper, the majority for the Government in the Chamber is only two. It therefore follows that in order to retain power M. Méline must lean on one or other of the groups with whom the balance of power rests. Should he lean to the Radicals and follow their programme, then he might command 358 votes out of the total 581. A smaller majority would be given to him by the Radical Socialists, and if he inclined to the Socialists pure and simple he might still maintain his place. Should he decide either to do this or to go over to the Reactionaries, it is probable that a large number of his nominal Republican supporters would forsake him. Whatever side he leans towards, power can only be retained by him on a compromise which will make one or other of the smaller factions in the Chamber master of the situation. His position is in most respects similar to that of the Conservative Party with us, only that he has a greater choice of allies than its leaders have, seeing that there are no less than seven groups, or sects, of politicians in the new Chamber, including ten anti-Semites. The Radicals proper have lost twenty-four of their number in the fight, but still form a party of 104; the Reactionaries have also lost, and are now forty-four against fifty-three, but the Radical Socialists, Socialists, and "Rallied" have all increased their voting power, and are reinforced by ten nondescripts classed as Nationalists or anti-Semites. Enumeration of this kind leads us to fear that the new Chamber will be more of a bear garden than the last one, and we fear the Republican Party, ill-assorted at best, will have the greatest difficulty to maintain its position at the head of the government of the country. To some extent it deserves its fate and to be harassed by its factional enemies, for it has displayed a lack of principle and of moral courage quite lamentable to behold. We are sorry, however, for France, which appears to have stormy times ahead, and assuredly cannot count on a season of calm and enlightened progress.

Immigration of Aliens.

Although Lord Hardwicke's Bill for regulating the immigration of aliens was carried on second reading in the House of Lords by a majority of sixty-two, it is not likely that the measure will figure among the Bills passed into law this session. Of course, it is highly desirable to prevent foreign idiots, as well as foreign paupers, from settling down in our midst; but we doubt if this could be accomplished merely by the appointment of a number of Board of Trade inspectors for the detection of insanity or extreme poverty among foreign visitors arriving on our shores. It would involve a considerable immediate expense and a constant future outlay. We doubt if the results would be commensurate with the cost. Alien immigration is not all bad. We do not know that the proportion of idiots or lunatics among them is large. Lord Hardwicke did not attempt to enlighteen us upon the question. But it was shown during the debate in the Lords that the aliens who have fallen to London's share in this immigration have practically set up a new British industry which is worth several millions a year. This is the trade in ready-made clothing, which is largely exported to the United States, among other countries, and the export of which gives employment to an appreciable proportion of British shipping. We do not know that there is any serious outcry against these aliens among our native working population. This is a form of protection that they do not seem to desire.

Yet we are glad to observe the anxiety shown by Lord Salisbury on behalf of the English ratepayer, whose helplessness in protecting himself from heavy fiscal burdens is quite as conspicuous and pathetic as his Lordship described it. But we could have wished that Lord Salisbury's anxiety had been awakened earlier, and to more practical purpose. Had he, for example, reminded Mr. Chaplin of the pathetic figure of the English ratepayer, when that right hon. gentleman was dragooning the House of Commons into conferring an endowment of about two millions a year on English landlords, the Premier would have been conferring a signal service on the pathetically helpless ratepayer who now excites his compassion. And he might still do an equally great service to the Irish ratepayer, who is asked to buy a no doubt excellent measure of local self-government at a capital outlay of £10,000,000, or a yearly cost of £400,000. If Lord Salisbury would but induce his friends the Irish landlords to forego this nice little bit of blackmail, the pathetically helpless Irish ratepayer would no doubt bless him for a great financial relief. A British Prime Minister has endless ways of assisting the pathetically helpless ratepayer. Suppose he were to try to save this "pathetic figure" from one heavy portion of his burden by reducing our naval expenditure by a paltry million or two per annum, or by insisting on making the army really efficient by strong administrative reforms in place of piling up million upon million of extra expenditure without consideration of the wasteful extravagance of thoughtless, if not incompetent officials? These are only a few of the ways in which an anxious Premier might assist the pathetically helpless English ratepayer, any one of which would be infinitely more helpful to him than this shrimp of an Aliens Bill which he has not asked for, and that may probably add to his fiscal burdens rather than reduce them.

A Lesson from the Tirah Campaign.

Last week's *India* contains a striking article of Colonel H. B. Hanna's, formerly of the Punjab Frontier Force, and late commanding at Delhi, on this subject. Colonel Hanna is well known as a strenuous opponent of the present Northern Frontier policy of the military party now dominant in India, not only on strategic, but on economic grounds; and in this article he proves to demonstration that there is no danger whatever of an invasion of India by Russia from that quarter of Asia under modern conditions. Assuming that the Russians intend to employ their Transcaspian railway for the purpose of conveying troops and supplies to the frontier of India, so as to invade our dominion there, he points out that the task would really be beyond the capacity of the railway, and of any conceivable railway service Russia could provide. He takes the experience of the Tirah campaign in proof, and his deductions from the incidents of this compaign are so striking that we take the liberty of quoting them pretty well in full, and beg intelligent citizens at home, who have the interests of the Empire seriously at heart, to ponder his words.

> Sir William Lockhart's 25,000 men never got further than fifty miles from their rail-head; yet, though they marched in lightest order, and were not encumbered with heavy cannon and pontoons, 75,000 mules and ponies were not too many for their needs in an eight weeks' campaign. Now, Kabul is 170 miles from the Indian frontier, Kandahar 400 from the Indus; so that, if the Russians elect to invade India by the former city, and we assume them to number 150,000 and to take two months to get through the Khyber, they will require 450,000, or, if they prefer to tempt fate by the Bolan, 900,000 mules to bring them within sight of their objective; and however great may be the difference between these numbers and those that would have been needed by the invaders had they begun their march at the Caspian—from the point of view of the safety of India, I think I am entitled to claim that it need not be taken into account.
>
> But, apart from its incapacity to carry the transport of a large army, or to exercise any appreciable influence on its amount, the Transcaspian railway can never materially affect the problem of the defence of India; for when, at enormous expense, it has been

extended to Cabul, it will be but single-lined; liable, at many points, to be buried under sand-drifts or snow, and at many others to be swept away by floods; everywhere exposed to attack from Persia and the tribes, requiring, therefore, to be guarded from end to end—a task which, in time of war, would absorb the services of many thousand troops; a railway which must bring not only much of its water but all its fuel from the Caspian; on which it would be impossible to run a dozen trains in each direction per diem; to which if an army once entrusted its fortunes, there could be no alternative means of advance, and along whose entire course destruction must be the fate of forces depending on it for progress, reinforcement, and supply when the inevitable breakdown occurred—inevitable, because no railway, let alone one worked under such an accumulation of adverse circumstances, could bear the strain to which this line would be subjected when the great host which is to wrest India from the British crown is, at last, set in motion.

It may be said that Russia, who has taken 200 years to get half way to India, may be trusted not to endanger her ultimate success by premature action; and that, continuing her slow forward movement, she will so consolidate her power at every stage of her journey, and so multiply her bases of supply, that at the end she will find herself with a large force ready to her hand, and will have nothing to do but to step across the frontier, defeat the Anglo-Indian army, and enter into the enjoyment of all its resources—railways, arsenals, food magazines, &c.—and so escape the transport difficulty altogether. No doubt, if she indulges in the dream of adding India to her empire, these must be her plans; but unless she can convert Transcaspia and Afghanistan into fruitful lands, and—what would be almost as great a miracle—so win the attachment of their peoples as to be able to dispense with troops on her long line of communications (Skobeleff reckoned them at 90,000)—she will find it more difficult and costly to move large forces gradually up to the confines of India than to hold the intermediate territory with the smallest garrison compatible with its own safety, and to do the whole work of marching or railing a big army from the Caspian to the Indus in one, or, at most, two seasons. Geographically, the Indian Government is in a far better position than Russia for extending its authority to Afghanistan; yet it has twice made the attempt and twice relinquished it; not because it could not march its troops to Kandahar and Kabul, but because it could not support them in those cities when it got them there; and though a completed Caspian railway would make it easier for Russia to convey stores of all kinds into Afghanistan, these, so far as they consisted of food and forage, would be consumed by the large garrison she would be compelled to maintain in that country almost as fast as they arrived. And if it would be difficult to accumulate beforehand in Afghanistan any large quantities of grain and bhoosa, and to keep them in good condition for an indefinite number of years, it would be quite impossible to do this, and at the same time to feed, in addition to its garrison, a second and much larger force whilst waiting for a favourable opportunity of attacking India; so that, railway or no railway, the invaders, the invaders' transport, and a large proportion of the invaders' stores, would always have to be drawn at the last possible moment from beyond the Caspian.

But if these things are as I say—and I defy any man to show how they could be different—the conditions of the defence of India have not changed since the days of Lord Lawrence; and there never was, and never can be, any excuse for reversing that statesman's wise, humane, and economical policy.

President Kruger and his German Friends.

Another plain hint seems to have been given to President Kruger that Germany has changed her mind in regard to the Transvaal. The *Journal des Debats* a few days ago published an article rather sharply criticising the President's conduct in regard to reform. The object seemed to be to warn French financiers against listening to the overtures of the Transvaal Plenipotentiary Extraordinary, Dr. Leyds, should he, on his approaching visit to Europe, try to negotiate a new loan. The significant thing, however, is that this article has been reproduced in the semi-official *Norddeutsche Zeitung*. It is significant because the semi-official journal would not have published the article in question had it not received permission from the "powers that be," and these powers would not have accorded their permission had they not practically accepted the views enunciated in the article. This is one of the conveniences of semi-official journalism. It is the straw which shows how the wind blows. The *Kölnische Zeitung* indicated some months ago that the official weathercock had turned towards the north-east; this new publication indicates that the wind is settled in that somewhat nipping direction. It will be well perhaps for Mr. Kruger to seriously ponder the matter. If, as he said at the swearing-in ceremony, his Government is at peace with all nations, it might be well for him to rest content with that happy state of affairs, and not to risk rebuffs by straining the goodwill of his German friends. Domestic matters are more important to him just now than foreign relations. He has, as we have pointed out, made very substantial concessions to the mining industry; perhaps he may yet see his way to make more. But it is possible Dr. Leyds might be found more useful at home than abroad. Economy of administration may be made to serve the purpose of a foreign loan. If "German allies" are cooling, it may be judicious to cultivate the peaceful graces among the neighbours at home. As to the question of suzerainty, which bulks so largely in President Kruger's last despatch to Mr. Chamberlain, it is rather an airy question at best. If he strictly adheres to the Convention, it is rather a straining of words to boggle about suzerainty. Lord Derby never expressed a very clear notion as to its practical application.

City of London Real Property.

This peculiarly constituted affair did remarkably well last year, and, as our company reports show, both the original and new undertakings increased their dividends by 1 per cent. to the highest figures known in their history. Furthermore, both made substantial additions to their reserves out of revenue, with the consequence that the original undertaking shows a reserve of £105,893 and a sinking fund of £30,531, and the new undertaking a reserve of £113,093 and a sinking fund of £22,305. Now the whole of these accumulations are invested in the business, for after the dividends are paid, little more than a working balance in cash is left on the asset side besides the buildings that constitute the *corpus* of the undertakings. Would it not, however, be a wise policy to invest a portion of the reserves (the sinking funds might well be employed in acquiring fresh properties) in securities outside house property? The companies have done very well, and no doubt they earn a better return upon the reserve by using it in the business; but its character as a reserve is somewhat impaired by this policy. A reserve is assumed to be a fund upon which directors can draw should any unforeseen contingency arise. By using it in the business the risks that apply to that business are attached to the reserve, and thus an event that might lead to a diminution in revenue might also impair the value of the reserve. There is a striking instance of this in the case of the Scottish Australian Investment Company, which a few years back claimed a reserve of £185,000. This, however, was wholly in the business, and so, when revenue fell off owing to the drought in Australia, the board found its reserve also impaired, with the result that dividends have had to be reduced more seriously than would probably have been the case if the reserve had been invested in securities.

Will there be Mediation?

The special correspondent of the *Daily News* at Madrid, who speaks with confidence as one who has some authority for his statement, assures us that there is a "possibility of peace at no distant date." The responsible statesmen of Spain, he adds, are prepared to seize the first opportunity for ending the war, provided it be done on terms honourable to Spain. What the conditions of peace should be it is not for the Spanish Government to say yet; but apparently we may infer that Spanish statesmen have considered possible conditions, and will be prepared to disclose them when negotiations are opened. The thing is to procure a mediator. Would any of the European Powers undertake the responsibility? If there be a Power ready to take up the arduous task, if America agrees and Spain is really willing, then there is no reason why the effort should not be made. But we doubt the possibility of success, at least at present. Responsible Spanish statesmen are probably not only willing but anxious for peace, and they would have avoided war altogether if they could. But the question is not so much with Spanish statesmen as with the Spanish crowd. Are they ready or willing for the acceptance of mediation? We very much doubt it. The results of the war, so far, have been too indecisive; and with the Spanish populace ready to make a hero of Admiral Cervera because

of his cleverness in dodging the American fleets, they are not likely to be satisfied with a peace which leaves them with a feeling of defeat, yet not complete enough to crush them. The Spanish statesman who at present proposed peace negotiations would, we fear, have but a short lease of power. He would lay himself open to the attacks alike of Republicans and Carlists. General Weyler, also, might probably, in his own interests, stir up the discontent that is but partially hidden just now in Spain. A proposition of peace would probably only prove the immediate forerunner of revolution. Nor is it at all certain that the United States would welcome a proposal for mediation by a neutral Power. Their fighting forces are being daily strengthened, and it would require very favourable conditions indeed to induce them to sheath the sword, which they may feel to have been only half drawn.

Jamaica's Outlook Not so Bad.

The retiring Governor of Jamaica's report on the island comes as something like a revelation after all the lugubrious representations we have had as to its rapid descent on the road to ruin—unless helped by State doles. Sir Henry A. Blake takes a general survey of Jamaica since he went there, nine years ago; and the general conclusion he draws is that though capitalists may have suffered, the people as a whole are better off than they were. Even the sugar industry he does not consider to have suffered so much as might have been expected. The quantity exported has diminished, but the hardship is not so much in this decrease as in the fall of price. From an average of 12s. to 13s. per cwt. the rate fell gradually to 9s. 3d. per cwt. in 1895. Rum has also declined, but then the colony is not now so dependent on sugar and rum as it used to be, the percentage of these exports to the total trade having declined during the last three years, while that of fruit and other products has materially increased. The loss to capitalists, to which Governor Blake refers, has probably fallen upon those sugar growers who had not the forethought or energy to face the altered circumstances of the sugar markets. In Dominica, another of our West Indian possessions, the planters were more prompt and resourceful; sugar growing has there been gradually supplanted by the cultivation of limes and cocoa. A good deal of attention is now being given also to coffee-planting, and it seems not improbable that tea-growing will likewise be introduced. Thus, while Dominica suffered little from the sugar failure, and has been going forward in a fairly prosperous condition, Jamaica, or rather the sugar-growers there, deficient in initiative and ingenuity, have been losing because they went on in the old groove, and idly cried to the Imperial Government to make good the losses mainly caused by their own want of foresight. There has undoubtedly been a state of depression, to some extent attributable to the terrible drought of about a year ago; but there are many signs of a revival, which might perhaps have been hastened by a little more mental alertness and vigour on the part of the losing capitalists. Jamaica is evidently not so bad as it has been described, and if it will but follow the example of Dominica and others of its neighbours, it may enjoy substantial prosperity.

Mines as Investments.

The subjoined letter is to the point and true, but written somewhat under a mistake so far as we are concerned. We do not seek to demonstrate the value of Rand shares as investments, but to try to find out what they would be worth to the buyer who really regards them as such :—

To the Editor.

Sir,—With all deference to your authority as a reviewer of investment securities, I venture to think your article on the investment value of shares in the Rand Mines, Limited, labours a point which, in spite of anything the chairman says or may hereafter say, does not really exist. No investor could be satisfied with a problematical £1 a share dividend on a share standing at about £30, as foreshadowed by the chairman of the Rand Mines. In an experience of investments extending over the past twenty-five years, I can safely say the prominent mining shares which may be fairly classed as investment securities may be counted on one's fingers. The Mount Morgan mine, the Mysore, Coromandel, Durban-Roodepoort, Waihi, and a few others are bought and sold on their intrinsic merits, but nearly all the other mines currently quoted, including sound properties like Rio Tinto, Mount Lyell, Lake View Consols, Great Boulders, and the best class of South African mines, are chiefly held as speculative investments to be sold again at a profit. Under these circumstances, any calculation as to their investment value, pure and simple, conveys little or nothing to the speculative buyer of shares who is merely interested by market conditions. Intelligent reasoning is neither required nor looked for. Most people infinitely prefer to buy their own experience, and a very costly process they almost invariably find it.—Yours, &c., Broker.

Unfortunate Austria.

Is Austria breaking up? The question may seem premature; but undoubtedly events are tending in that direction, and must have serious consequences unless some check is given to the extravagant hatred and miserable fanaticism of the warring races whose sectional differences make union impossible. Nothing is capable of binding them. The influence of the Emperor seems waning; at least he finds it impossible now to smooth over difficulties as he once could. The warring sectaries will listen to no one. They are as venomous and narrow as the fanatical Dervishes of the Soudan. They would rather break up the Empire than look at a compromise on the language question. And the mischief they are doing is not confined to internal broils. It would seem as if Germany were beginning to take sides with the Germans in Austria. At any rate, the relations of the monarchy with Germany, though not perhaps yet to be described as strained, are giving rise to considerable anxiety. We can hardly believe that they will reach the breaking point; but all this internal haggling and quarrelling must ultimately have the effect of greatly weakening Austria's position, perhaps of shaking the basis of the Triple Alliance, already greatly crippled by the weakness and instability of Italy.

But the Triple Alliance is, at present, a minor consideration with Austria. Her danger is in herself: she is bleeding from internal injuries. The language difficulty made the discussion of the Hungarian *Ausgleich* impossible, and the postponement of this discussion seems to have developed a certain dangerous antagonism between the two halves of the monarchy. The estrangement is daily increasing. Hungary dislikes the proposed increase of the navy, she is suspicious of Austria's suggested changes in the direction of a Customs' frontier, and some of her most notable statesmen have been hinting that the unsettled relations between Austria and Hungary might oblige the latter to exercise her constitutional right of regulating her Customs and commercial affairs independently. Only on Tuesday last Baron Banffy, the Hungarian Premier, announced in the Reichstag that it would be impossible, in the present state of affairs in Austria, to discuss the treaty with Hungary before September. This delay bodes no good for either half of the monarchy. Hungary seems drifting apart. The Austrian Reichsrath, which reassembles in a few days, if it devotes itself, as is fully expected, to wrangling over the rival claims of the German and Czech languages to official superiority, is not likely to do anything to stop the widening breach between Austria and Hungary. Yet, of course, the end of such a process can only be the break up of the Empire.

Even prominent commercial men seem to be losing faith in the permanence of the common Customs system of the two countries, while admitting that the severance of existing commercial relations would have the most serious consequences for both. The Austrian commercial outlook is not more hopeful than the political. Count Goluchowsky, the Minister of Foreign Affairs, recently spoke handsomely of the necessity of encouraging the trade and commerce of Austria; but what has he done to enforce his words? Practically nothing, except to insist on the increase of the Austrian navy, which can hardly be regarded as a relief for commerce. It rather

adds to existing burdens. The proposed modifications of the Customs union with Hungary could do little for commerce, though much in estranging the two countries. Austrian exports are steadily declining. If Government wish to encourage trade, they had better save the proposed outlay on the navy, and apply the money to the construction of canals say, while devoting their legislative energies to relieving commerce of the antediluvian obstacles which a crusty, rusty bureaucratism delights in keeping in its path. We cannot, however, hope for much unless Austrian merchants and traders take the matter into their own hands, and act with vigour. Evidently, they need expect little from Government or legislature.

Two Lockett-Harvey Companies.

As could only be expected, the Primitiva and San Donato Companies had a miserable showing for last year —both companies confessing to an actual loss on working, so that no dividend was possible. It is amazing, however, to find that with such a state of affairs the directors neglect to inform shareholders of any of the details of working. The profit and loss account of the Primitiva Company, for instance, is as follows :

	£ s. d.		£ s. d.
To Interest	36 19 2	By Transfer Fees	5 10 0
To Loss for twelve months ending December 31 ...	8,182 17 6	By net loss for the twelve months ending December 31.....	8,214 6 8
	£8,219 16 8		£8,219 16 8

This tells the suffering shareholder a great deal about how his money has been lost, does it not? Did the directors take their fees? Were those "agency" expenses as large as usual? Questions of this kind at once spring to the mind when the result is set forth, but the report is as silent as the Sphinx on all things. So we think the more.

The War and Trade in America.

Thus far the war has certainly not been ruinous to trade in America. It has been increasing, not diminishing. There was hesitation for a time, some check on industry through dubiety as to what might or might not happen, and a slight feeling of something like panic from fear as to the possibilities of risk from the plunge into the unknown depths of war. But doubt and dread have vanished, and trade goes on increasing steadily. Actual business through clearing houses for the month of April is 26·3 per cent. above last year. Railway earnings for April have been 15·9 per cent. higher than during the same period last year. Some cotton mills have been closed, but that is more owing to over-production than lack of demand. The wool sales have been much below those of last year at the same time, but prices are more firm, and the demand is increasing. The output of pig iron shows no great change; but there is a confident expectation of expansion in business. Prices are firm. Of course Government orders are heavy, but it is not these that keep the industrial situation healthy and vigorous. High prices for wheat have greatly increased the demand for agricultural implements, as well as for locomotives and cars; and many other demands contribute to the general expansion of trade. It would be a mistake, however, to deduce from this that war, under modern conditions, will, on the average, interfere but little with trade and industry. The present war has so far been exceptional. Spain has not been able to maintain even a strong defensive attitude. She has been incapable of making an attack on American ports or American shipping. She may yet be able to do some damage in these directions; but until she does American trade will flourish. It would probably have been very different had a stronger and richer Power been pitted against the United States. Then the dismal prophecies which the course of present events have thus far falsified would probably have been verified, and adventurous speculators might have profited largely, where now they lose heavily, to the advantage of trade and industry.

Germany's Naval Requirements.

One sort of expenditure leads to another. Germany has finally arranged for the indefinite expansion of her fleet. Now she insists on acquiring coaling stations. Prince Henry's voyage to China has shown how thoroughly dependent she is on foreign coaling stations. The semi-official *Post* tells us that the acquisition of Kiao-Chau was a step which will soon have to be followed by other measures for procuring supplies of coal for the German Navy and for the mercantile marine. When coaling stations are discovered and secured then they must be fortified, and there must be a sufficient naval force to protect them. A pretty and far-reaching vista of constantly increasing expenditure is here suggested! But where are the coaling stations to be got, and how are they to be secured? By war? It will not be always possible to lease them as Kiao-Chau has been leased from China. So the cost will go on indefinitely increasing. If Germany insists upon having coaling stations of her "very own," there is, of course, nothing more to be said. She will go on picking them up as she can get them. But if she is not bent on exclusive possession of such stations, why may she not remain content with the coaling stations possessed by Great Britain? Prince Henry was none the worse of obtaining his fuel at English stations. Suppose, then, that an understanding was arrived at with England on the subject? It would be useful for Germany; it would do no harm to England; and it might strengthen the chances of future peace.

The Lungla Tea Company.

We wonder what shareholders of the old Lungla and Shumshernugger Companies now think of the monstrosity that swallowed up those modest little concerns. In the July 1895 number of this Review we protested against the formation of the company upon the lines then proposed, and since then we have strongly condemned the financial policy of the board. By a "juggle" unworthy of the merest trickster a dividend of 10 per cent. was declared in the first report; this was followed by 6 per cent. in the second, and only 3 per cent. in the third, the one just issued. Meantime the worst principles of finance are being followed by the board. Not only are the whole of the extensions being carried out upon borrowed money, and so placed to capital, but the very cost of maintaining those extensions is also put to capital. Consequently, the company owed last December in loans and advances from agents, &c., no less than £60,000, against about £11,000 of liquid assets. No wonder the board proposes to increase the company's borrowing powers, and we should imagine that its present policy must lead to these being added to until the ordinary shareholders no longer possess a substantial interest in the concern. It is a shocking case of mismanagement, and the sooner the shareholders get rid of the present board the better it will be for their chance of saving some shred of their property. Even preliminary expenses still appear in the balance-sheet for £5,166, while the cash in hand was only £199.

Critical Index to New Investments.

City of Cape Town Loan.

Standard Bank of South Africa receives tenders on May 31, the minimum being 99 per cent., for an issue of £100,000 3½ per cent. debentures. Interest March and September; principal repayable at par March 31, 1948. Borrowing powers upon security of city rates amount to £1,177,604, of which £688,950 has already been issued, and the present is a portion of unissued balance. Money is being used in completion of works, including drainage and sewerage works, water storage, &c. Population of city 64,000, and of suburbs 51,000; property liable to rates £5,690,280; assets of city £1,325,388; no other liabilities beyond loans already stated. Revenue for 1897 was £146,580, expenditure £141,307. Full half-year's interest payable September 30. The security is excellent, and the loan will be well competed for, though the return is less than has hitherto been obtainable on the issues of the city.

CHANCE & HUNT, LIMITED.

This company is formed to acquire the businesses of the Oldbury Alkali Company, Limited, and of Messrs. W. Hunt & Sons, chemical manufacturers. Both concerns have been in existence over fifty years. Share capital is £280,000, in £10 shares, in equal moities of ordinary and 5 per cent. cumulative preference, all of which are held by vendors. Lloyds Bank invites subscriptions for £120,000 4 per cent. first debentures at 102 per cent. They are redeemable after 1918 at 102, or before then at 105 on six months' notice. The purchase price of the businesses is £420,000, while the plant and machinery are valued at only £314,753. The debentures appear a fairly good investment, though we should have thought more of the company if a few figures had been published about past profits.

KALANTAROFF (BAKU) OIL COMPANY, LIMITED.

Capital £50,000 in £1 shares, of which 30,000 are allotted to vendor, 15,000 offered for subscription at par, and balance held in reserve. Property has an area of about four acres, lies in centre of a famous oil-field, and the first productive oil strata is expected to be reached in three months' time. Even if it is, only three-fourths of the output will belong to the company, as the remaining fourth has to be paid to the lessor as a royalty. Lease is for twelve years from June, 1897. How is it that English capital is being constantly sought to develop Russian oil-fields? There must surely be something against them which does not come to light.

BRITISH DYEWOOD AND CHEMICAL COMPANY, LIMITED.

Four old-established firms carrying on business, chiefly in Glasgow, as importers of dyewood and tanning materials and general drysalters are to be amalgamated. They are described as the leading firms in the trade, and their amalgamation is expected to reduce competition and allow of economies being effected. Capital £570,000 in £10 shares, 22,000 being ordinary and 35,000 5 per cent. cumulative preference. Purchase price £570,000, including all the ordinary shares and £350,000 in cash. It therefore comes down to the fact that the company wants to borrow £350,000 at 5 per cent. This would require £17,500 a year for interest, and although no detailed statement of profits is given, the accountants certify that for nearly six years past they averaged £45,182, and the lowest year exceeded £34,000, so that the preference shares should prove a fair investment.

NEWFOUNDLAND IRON ORE COMPANY, LIMITED.

The company is formed to acquire from H. Spencer & Co., Limited, Workington, an under-lease for ninety-nine years of fourteen claims situate in Conception Bay, Newfoundland. The vendor company asks the modest price of £20,000, including £8,000 in cash, for the under-lease, and there is a royalty to be paid of 8d. per ton. A favourable report from an engineer is supplied, and Mr. Joseph Ellis and Mr. J. S. Randles, who visited Newfoundland last year, are thoroughly satisfied with the genuineness of the reports of the wealth of iron ore in the district. These two gentlemen, however, are directors of the vendor company, and it seems strange, if the property is so rich, that the vendor company should not wish to retain the profits. The capital, too, looks ponderous, £150,000 in £1 shares, of which 75,000 shares are now issued.

H. WILLIAMSON, LIMITED.

The business is that of watch and clock manufacturers, jewellers, &c., carried on at Farringdon-road, London, and at Holyhead-road, Coventry. It was established thirty years ago, and in 1892 was converted into a private limited liability company. Profits for past three years are certified at £17,685, £22,442, and £25,242, but the prospectus says the system of making loans to customers has proved very remunerative, and has secured a large increase in the returns. Assets are valued at £280,000, but this includes book debts, £61,890; loans to customers, £38,733; and goodwill, machinery, plant, patent rights, and trade marks, £110,025. The vendors ask £280,000 for the business, of which they will take £180,000 in cash. Capital, £400,000 in £5 shares, half ordinary, and half 5 per cent. cumulative preference. 15,000 shares of each class offered for subscription. Profits show a good margin after paying preference dividend, but the "loans to customers" business seems to involve some risk, and the book debts are heavy, being £15,000 more than the stock-in-trade. The absence of a separate statement as to how much is allowed for goodwill, rights, and marks, suggests the idea that investors are paying a high price for them. No need to hurry to invest here, we imagine.

J. TYLOR & SONS, LIMITED.

Out of la share capital of £200,000, in £10 shares, equally divided into ordinary and 5 per cent. cumulative preference, 6,700 of the latter are offered for subscription. Company is formed to buy the business of T. Tylor & Sons, Limited, established over a century, and carried on at Newgate-street, King's Cross, and Sydney, New South Wales, as hydraulic and sanitary engineers, and brass and iron founders. Profits for last seven years averaged £12,771, and for last year were £13,830. Debentures are being paid off by the old company, and as interest on present issue of preference shares will need only £5,000 there should be a margin large enough to constitute these shares a good investment.

ANGLO-NORWEGIAN KIESELGUHR COMPANY, LIMITED.

Here is an opportunity to take an interest in something quite out of the ordinary, the object of the company being to buy 100 lakes and waterfalls in South Norway which are known to contain deposits of infusorial earth, otherwise known as kieselguhr, or fossil meal, which when dry forms a powder used in the manufacture of nitro-glycerine explosives and in many other ways The company will also have transferred to it the benefit of options to buy 250 more lakes. The capital is £100,000 in £1 shares, 70,000 being now issued, of which 25,000 are taken by the vendor with £10,000 in cash. We should hardly think this enterprise will appeal to the ordinary investor; it had better be left to those who know something about the powder, which is apparently not at all a new thing, as it is believed to have been used by the Greeks and Romans. We are not impressed.

BRITISH ALUMINIUM COMPANY, LIMITED.

The share capital, all issued, is £300,000, and the directors now offer an issue of £100,000 5 per cent. debentures at par. They are repayable at par January 1, 1900, or can be redeemed on one month's notice at 105, interest being due May and November. Assets of the company are valued at £625,752, but as the debentures are only a floating charge on them, subject to certain mortgages on the freehold portion of the property amounting to £37,400, and to two series of debentures amounting to £100,000, they are far from first-class. Is it not the case that this company is under bond to buy 2,000 tons of aluminium every year from its American competitors to keep them out of our market; and if so, how can it possess a monopoly of the British supply through its patents? We should like to hear what the trade says on this point, and what is thought of the company's own make of aluminium.

AUSTRALIAN HARDWOODS (JARRAH), LIMITED.

This is another Western Australian wood company, the capital of which is put at the substantial figure of £250,000 in £1 shares, three-fifths being 6 per cent. cumulative preference, and the balance ordinary shares. Present issue is 100,000 preference shares. Company acquires Government licences to fell and remove timber over 47,680 acres of the Jarrah forest on the Darling Range in the Murray district, at a rent of £1,505 per annum. An annual net profit of £30,000 is spoken of, and the marketable timber on the estate is valued at £2,200,000, the rising crop of young trees not being taken into consideration. Yet the vendors are content to accept £150,000 for the licences. In comparing this with existing Jarrah companies, it must be borne in mind that this is only leasehold property.

SEPTIMUS PARSONAGE & COMPANY, LIMITED.

The directors offer 31,436 preference shares of £1 each, entitled to a 6 per cent. cumulative dividend, at 1s. per share premium, and 34,297 ordinary shares of £1 each at 2s. 6d. premium, being the balance of the share capital held in reserve. This is an amalgamation of various businesses which took place in 1896, the trade being wholesale wine and spirit merchants. Profits for 1894 were £11,199; for 1895, £12,501; for 1896, £13,964; and for 1897, £14,840. In spite of this, we have not a favourable opinion of the concern.

[GIBBS, MEW, & COMPANY, LIMITED.

Company takes over the Anchor Brewery with another brewery business close by conducted under the style of Herbert Mew & Co. Share capital £50,000; 4½ per cent. debenture stock; £50,000 of the latter. £30,000 is offered at par. Assets valued at £57,000; no statement of profits. Stock offers no attraction to investors.

NATIONAL RELIANCE INSURANCE COMPANY, LIMITED.

This is described as a new independent fire office and the capital is £500,000 in £5 shares, of which 500 are to be issued to the founder, James Hewitt, an insurance broker. The other 99,500 shares, on which it is not anticipated more than £1 per share will be called up, are offered for subscription at 5s. premium. The board is but middling, and we regret to say that we do not think there is any opening at present for a new fire office.

BRITISH HYDRAULIC JOINTING COMPANY, LIMITED.

The company is formed to buy from the Hydraulic Joint Syndicate an invention and patent rights relating to improvements in tubular joints and frame joints, the jointing of tubular frames, and of wheel hubs granted to the inventor, Charles Thomas Crowden, of Beeston, Notts., and other subsidiary patents subsequently acquired by the syndicate. By the invention, it is claimed that articles of tubular construction which have to be made in large quantities can be jointed without screwing, soldering, brazing, or heating. The directors do not form what we should by any means call a business board, and no detailed forecast of profits is ventured upon. The capital is put at the substantial figure of £1,200,000 in £1 shares, of which 800,000 are issued. Contracts show that as far back as April, 1897, there was one made between the syndicate and Johnson & Phillips, engineers, of Charlton, Kent, whereby the latter were entitled to an exclusive license to manufacture machinery under the process; then there was one in February, and another in May, 1898, between Johnson & Phillips and E. T. Hooley, whereby the license was bought by E. T. Hooley for £75,000; another, dated May 16, 1898, between the Hydraulic Joint Syndicate and E. T. Hooley, for the sale of the patents for £800,000 in cash and shares, and another on the following day between Hooley and the present company for re-sale of the patents for £1,025,000 in cash and shares. We are not told that of the capital of £400,000 of the syndicate £10 was all that was paid up, or what Hooley made by selling the syndicate shares at a premium during the closing months of last year and in the early part of this year. Neither do we see what Hooley paid for the patent rights—was it £20,000? Assuming that the patents are perfect, we certainly do not see how shareholders are going to get back their money.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

City of London Real Property Company.—This dual concern fared better than ever last year. The original properties earned a revenue of £51,754, and after interest on debt, administrative charges, £3,194 for sinking fund, and £2,730 for interest on reserve had been met, the balance was £24,862, to which £5,597 brought forward had to be added. A total dividend of 8 per cent. for the year was declared, or 1 per cent. higher than that for 1896, £5,070 was further added to reserve, and £5,769 was left to be carried forward. The reserve fund will then amouut to £105,893, the sinking fund to £30,531, and the fire insurance fund to £1,066, or about 13½ per ceut. of the capital employed. The new properties showed a total revenue of £64,173, and after deduction of interest on debt, administrative charges, £2,775 for sinking, and £2,790 for interest on reserve fund, the net balance is £38,000, to which £8,749 brought forward has to be added. A total dividend of 9 per cent. is declared, or 1 per cent. more than last year, £10,210 is further added to reserve, and £9,540 is left to be carried forward. The reserve will then stand at £113,093, the sinking fund at £22,305, and fire insurance reserve at £1,343, or in all about 13½ per cent. of the capital employed.

Primitiva Nitrate Company.—This unhappy concern was rather more unhappy last year than usual. The oficina was worked during nine months, but owing to the extremely low prices that ruled for nitrate the loss on working amounted to £8,214. No items of the working expenses are given in the profit and loss account, and we certainly think a clear statement in regard to this matter ought to be issued. Shareholders ought to be in a position to know how their money has been spent, and these "North" companies have not been well managed in the past. As a credit balance of £3,540 was brought in, the year closed with a loss since the reconstruction of the company of £4,674. Unless an improvement sets in the company may easily see further difficulties, as it owes £27,253 on bills payable and to sundry creditors. We know, on the other hand, it has stocks of nitrate and iodine, and consignments of nitrate, but these have not always proved the tower of strength that nitrate companies would have us believe.

San Donato Nitrate Company.—This Lockett-Harvey company did badly last year, the loss on working being £2,960, after allowing £1,798 for depreciation. The oficina did not operate during the year, having completed its quota under the combination in 1896, and could not therefore resume work until April, 1897, at which time prices had declined so much that it was decided to wait for an improvement before restarting work. On the break up of the combination in October prices still further declined, and the works have consequently remained closed. A balance of £10,120 was brought in, so that after deduction of the loss of £2,960, there is a balance of £7,160 to carry forward. This, however, is almost entirely locked up in the stocks of nitrate and iodine, which, we believe, do not improve by keeping, and are valued at cost. To restart, therefore, we are afraid will be a matter of difficulty.

Warner Estate, Limited.—The process of acquiring further properties, and increasing the scope of this company renders impossible any adequate idea of its revenue-bearing capacity. During the past year 207 more houses were purchased, and a considerable amount in preference shares was issued, so that neither the full revenue nor the full interest charges are shown in the present report. As it is, the gross rental was £27,026, and after deduction of charges the net balance was £12,417, to which £741 was added by the amount brought in. Of the total, £5,027 was required for preference interest, £2,245 was put to reserve, and the remainder permitted of dividends amounting to 6 per cent. upon the ordinary shares. The reserve also benefited by £9,255 in premiums received upon the preference shares, and its total now amounts to £21,000. There is only £10,400 of mortgage and loans, so that the preference shares are well secured.

King's Norton Metal Company.—An excellent showing is made for the year ended March 31. The profit in that time came to £30,468, as against £22,577 in the preceding year, and of the total £5,000 is set aside to form a dividend equalisation reserve and £9,906 to the general reserve. The balance permits of a dividend of 10 per cent. per annum and a bonus of 5 per cent, or 15 per cent. in all, upon the ordinary shares, and the carrying forward of £1,603. The two reserve funds will then amount to £21,000, or quite 11 per cent. of the capital employed. Premiums amounting to £9,000 received from an issue of preference shares, together with £2,463 for depreciation, have been written off capital expenditure, so that although a large sum had been spent on this account in the year, the item stands lower than it did a year ago. The new money from the preference shares has enabled the £19,000 of debenture debt to be extinguished. Trading balances, as may be imagined, are much in favour of the company, being about £32,000 to its advantage after the dividend is paid. It would be a wise step, while prosperity is thus with it, for the board to invest a fair proportion of the reserve outside the business.

West African Telegraph Company.—This company is slipping into a rather dangerous position. It claims a subsidy of £12,000 per annum from the French Government, in addition to other subsidies, and this French subsidy has not been paid for two years and a half. Yet the board goes on treating it as received, with the result that it has credited revenue in that time with £32,415 never received. This year it has recognised the danger of this policy by writing the amount off reserve, and setting down the amount owing by the French Government as a separate item. The investments of the reserve have not been touched by the operation, the money paid away as surplus revenue being drawn from the trading balances, which instead of being favourable to the company, as in previous years, are now distinctly adverse. Some statement as to the reality or otherwise of the asset of £32,415 ought to be made at the meeting. Meantime, after including the visionary £12,000, the revenue account of the company is poor indeed, being £64,722 for the year, of which £41,077 was swallowed up by working expenses. Out of the net balance of £23,644, which compares with £31,425 for the year 1896; no less than £10,098 is absorbed by interest on debentures, and the sinking fund required £13,633, so that the balance forward had to be reduced by £87 to the meagre sum of £372 in order to make ends meet. By dint of the sinking fund, the debenture issue has been reduced from £304,000 to £200,000, but if no satisfactory arrangement is made with the French Government, or if the revenue does not improve very much, there must come a breakdown in the company's finances.

Dooars Tea Company.—Good fortune has attended this concern, and its crop of 3,526,473 lb. was 501,007 lb. more than in 1896, the yield per acre being higher. The market price of the tea was lower, but not heavily so, being 7·75d. per lb., as against 8·26d. per lb. in 1896, and this, combined with the heavy cost of working entailed by a higher exchange, caused the profit of £24,486 to be about £5,500 less than in the preceding year. It proved however, sufficient for the directors to maintain their dividend at 12½ per cent.. and carry about the same amount forward. Last year, however, the sum of £5,000 was carried to reserve, and the wisdom of this step is seen in the present result. The reserve amounts to £45,000, but the company is poorly financed, and has actually had to borrow £35,100 from the Agra Bank upon a loan against security.

British Indian Tea Company.—The outturn of this company last year was 811,446 lb., or 63,265 lb. below that of the preceding year. The average price of 7·11d. per lb. was slightly lower, while, of course, the higher exchange prevented expenses falling much, so that the profit of £2,685 was just about half that of 1896. The substantial sum of £2,098 was brought forward, and after inclusion of sundry receipts and deduction of income tax, preference interest, and premium on debenture stock, the balance of £3,942 was left, out of which the directors declared a dividend of 5 per cent. This is the same as last year, but the balance forward is only £76, as against £2,098 a year ago. The balances of the company, however, are in a good condition.

Yokohama Specie Bank, Limited.—In the half-year ended December 31 last this native Japanese bank made a gross profit of 4,747,515 yen, including 251,303 yen brought forward. Of this, 3,440,747 yen went in working expenses, interest on deposits, &c., leaving 1,306,767 yen as net gain. The directors pay out of this a dividend at the rate of 15 per cent. per annum on both the old and new shares, add 200,000 yen to the reserve fund, raising it to 5,964,000 yen, 100,000 yen to the reserve for equalisation of dividends, bringing it to 696,000 yen, set aside 50,000 yen for the contemplated new building, and give 63,328 yen to increase the remuneration of the staff. All this done, 274,870 yen is left to carry to the new half-year. The aggregate of the balance-sheet is 98,548,720 yen, a most respectable total, and the money is fully employed in the bank's current business.

The Lancashire Insurance Company.—In 1897 the life business

of this company yielded £7,836 in new premiums on life policies, and £2,391 was received as capital in payment for annuities sold. The total income of the life branch was £135,370, including £36,414 from interest and dividends. Claims absorbed £68,932, and cash bonuses amounting to £11,913 were paid to policy holders. After deducting £15,384 for commission and expenses, an amount representing about 15½ per cent. of the premium income, and other payments, £35,671 was left to be added to the life fund, raising it to £1,045,646. In the fire department the premium income was £700,832, and claims came to £419,833. Commissions and expenses took £235,723, or nearly 33·7 per cent. of the premium income. The profit after meeting all outgoings was £33,427. Two dividends have been paid, an interim at the rate of 5 per cent., and a final at the rate of 7½ per cent., making 6¼ per cent. for the year 1897. These absorbed £17,062, but the total balance at the credit of profit and loss is £50,895, including the fire department proportion of interest and dividends, and a balance of £3,434 brought forward. Therefore, after payment of the dividends £33,231 is left over, out of which £30,000 is added to the fire reserve, and a balance of £3,231 remains to be carried forward. Life and fire funds together show an increase of £65,468 on the year, and their total, including the shareholders' capital of £273,000, is £1,639,863. The company's funds appear to be well invested, chiefly at home.

Liebig's Extract of Meat Company, Limited.—This company's accounts are made up to September 30 in South America and to March 31 in London. Last year was a prosperous one and shows a steadily augmenting business in Liebig's extract of beef, notwithstanding increasing competition. The profits for the year amount to £122,376, out of which 20 per cent., or £4 per share, is distributed on the ordinary capital, £1 having been paid in February last as interim dividend. £5,000 is carried to reserve, £2,000 to the employés' provident fund, and £8,248 goes to the directors as their 10 per cent. on the profits. This leaves £7,128 to be carried forward. The stock held at Fray Bentos and in Europe seems to be very high indeed, aggregating, inclusive of packing material, £381,628, and the reserve fund of £145,000 is invested only to the extent of £68,000; but the company is unquestionably rich and prosperous, and its sales of produce of all kinds amounted to £306,243 last year.

J. Lyons & Company, Limited.—In their fourth year, ended March 31 last, the directors of this company were able to make a gross profit of £158,586, which compares with £112,333 in the previous year, and shows remarkable progress. The net profit is £44,323, and, adding the amount brought forward, there is £46,548 available for distribution, out of which, after setting aside £9,830 for depreciation and meeting debenture interest, dividends aggregating 15 per cent. have been declared on the ordinary capital. The reserve is increased by £5,000, and after writing off a portion of the outlay for sundry installation expenses at Trocadero, a balance of £1,316 is carried to the new year. All this is very good, but there are one or two items in the balance-sheet we should like to see modified. The £5,000 carried to reserve, for instance, is good in its way, but it is very little against a goodwill item of £39,189, and we are not sure that the £3,630 devoted to depreciation on leasehold premises, whose total cost is £147,555, is sufficient, but there is nothing in the balance-sheet to indicate weakness, except that we think the company owes too much and would do better to reduce its liabilities on loans and its trade debts. These, with the 4½ per cent. first mortgage debenture stock, aggregate £196,590, and are quite £30,000 larger than the paid-up capital. They are very little set off by stock-in-trade and debts due to the company. A large increase in the business is expected from the new shop, of which the company has secured an eighty years' lease from the Drapers' Company in Throgmorton-street.

The Mint, Birmingham.—In their ninth annual report the directors of this company announce a net profit of £29,893 for the year ended March 31 last, after writing off £1,600 for depreciation. Adding £2,132 brought forward, the available profit is £32,025, and a dividend of 10 per cent is to be paid, together with a bonus of 2s. 6d. per share for the year, making 12½ per cent. in all. Further, £2,000 is written off goodwill, reducing it to £15,000, and £18,000 is added to reserve, raising it to £36,000. A balance of £2,358 will then be left to carry forward. Trade has been satisfactory, the board says, and the company seems well managed; its reserve, of course, will become more real when goodwill disappears. An extraordinary general meeting is called after the ordinary one on June 3 to sanction extensive changes in the articles of association. Dividend payable June 4.

London and San Francisco Bank.—Some recovery of lost ground has taken place, the net profits for the year ending March 31 last amounting to £17,912 or £1,439 more than in the previous year, and as a larger balance was brought in, the amount available is £21,755, being £3,212 more than in 1897. The dividend then was 3 per cent. and it is now raised to 3½ per cent., and the increased balance of £4,605 is carried forward. According to the balance-sheet deposits and bills payable have risen from £690,000 to £900,000, and bills discounted and advances have increased from £1,050,000 to £1,284,000. A year ago it will be remembered the whole of the reserve fund of £50,000 was transferred to doubtful debts' reserve account, which was thus raised to £72,658. This amount has now been reduced to £62,819, which shows that some of the doubtful securities have been realised.

Quebec Central Railway Company.—The working for the past year shows a little improvement compared with 1896, but this is not saying much. Gross earnings came to $457,643 against $397,106, and the working expenses to $309,555 against $268,794, the net revenue in sterling being £30,979 compared with £26,614. More than half the revenue is absorbed by the prior lien bond interest and from the remainder 1½ per cent. is to be paid on the income bonds. The history of this affair is a melancholy record. In 1881 £556,000 of 5 per cent. first mortgage bonds were issued over here, interest being regularly paid by the government of the province until July, 1886, but the following year default took place, and the company was reconstructed, further capital being raised to finish a branch. The old first mortgage bonds, with some others, were changed for income bonds, and £200,000 5 per cent. prior lien bonds were issued, the total of which has been since increased to £350,000. The interest paid on the income bonds for 1889 was 1½ per cent., but until this year only 1 or 1¼ per cent. has been forthcoming, so that the company may be said to be now doing better. According to the balance sheet the reserve contingent fund remains at $60,463, while on the other side there is a trustee account (in suspense) standing for $74,295.

Ruston, Proctor, & Company, Limited.—This company did better in the year ended March 31, and the profit, including £2,024 brought forward, was £32,297. Depreciation was allowed at the rate of 4 per cent. upon plant and machinery, and the amount required was £2,653. Directors' remuneration took £1,000, debenture interest £10,625, and depreciation of furniture £171, leaving £17,847. Out of this a dividend of 5 per cent. was declared, or 1 per cent. better than last year, and £5,347 carried forward. The profits, however, have not returned to the level prior to 1896-7, when 8 per cent. dividends were comfortably declared, fair sums being written off each year from goodwill. This latter item only stands at £9,000, as against an original total of £82,692, and the money thus accumulated has gone to the benefit of the trading balances which are much in favour of the company.

Lungla (Sylhet) Tea Company.—The outturn last year was 1,710,984 lbs., or 154,868 lbs. less than in 1896, but the average price of the crop was rather better at 7·71d. per lb. as against 7·59d. per lb. a year ago. The higher exchange caused working expenses to increase, and charges were higher in other respects, so that the gross profit was £7,608, as against £13,217 a year ago. Including £1,498 brought forward, the available balance was £9,107, and as the preference interest required £6,000, the directors found that the interim dividend of 3 per cent. absorbed the balance except £107, and so no further distribution was possible. The board is going on with extensions under that insensate plan of borrowing from the agents, and having already exhausted the borrowing powers of £50,000, it proposes to increase them to £100,000. Clearly, this is the way to ruin, and the sooner the shareholders stop the directors on their course the better.

Delaware and Hudson Canal Company.—This is a company with a bit of canal ownership and a good deal of railroad control and colliery business in its constitution. Its canal mileage is 108, whilst its controlled railroads have a mileage of 685. The business centres in the anthracite coal traffic, and out of an output of such coal in the States last year of 41,637,863 tons, the Delaware and Hudson Canal produced 3,965,638 tons and transported 1,681,213 tons for other miners, so that it handled in one way or another about 13 per cent. of the anthracite production. The report of the company, however, does not tell one much about how its finances are worked. It certainly contains a table showing the anthracite production of the United States back to 1820, but the most careful study of the report will fail to tell an outsider what rate of dividend is paid upon the stock. The gross receipts of the company were $18,360,051, working expenses came to $13,085,661, and taxes, interest, and rentals absorbed $3,132,968, leaving $2,141,420 as net revenue. The leased lines of the company brought in a profit of 109,506. The managers charged off as depreciation upon canal, boats, and equipment $1,052,875, and for a number of small items $211,814, or a total of $1,264,689. By reference we find the dividend was 5 per cent., which represents $1,750,000, and so we presume the deductions for depreciation and so forth led to a reduction in the surplus, which now stands at $5,128,344. From 1889 to 1896, the company paid 7 per cent. regularly, but for the last two years only 5 per cent. was distributed.

Diary of the War.

May 21.—At last the Spanish fleet has been located. It arrived at Santiago de Cuba, situated in the south-east of the Island of Cuba, late on Sunday night, the 19th. The latest cruise of the fleet was "without incident," and its safe arrival at Santiago de Cuba is hailed as a "victory" at Madrid. A doubtful one. Admiral Cervera has shown himself clever—in avoiding the American fleet; but now that he has shut himself up in Santiago de Cuba it would seem that he must have reached the end of his tether. The harbour at Santiago de Cuba is a powerful defensive position; but, unless the Americans are culpably remiss in their attentions, the Spanish Admiral cannot bring his ships out again except to destruction. In Santiago he can be of no use to Havana. No doubt it will be some little time before the American fleets can concentrate at Santiago de Cuba; but when they do, Admiral Cervera will be imprisoned there—his only consolation being that he has drawn off the bulk of the enemy's ships from Havana. That of course is something. It ensures further delay in the invasion of Cuba. Indeed there is now talk of postponing this invasion until the autumn. This is inevitable; and there seems nothing before the American fleets but the blockade of Havana and watching Admiral Cervera's fleet. In any case there is not much promise of activity in the near future. American Jingoes are very impatient. They imagined beforehand that the war with Spain would be a "walk over" that would not last a

month. Now that they see they were both foolish and mistaken in their prophecies, they blame the Government for dilatoriness instead of confessing their own foolishness. The Spanish Ministry has been reconstructed and introduced to the Chamber, all except the new Foreign Minister, Senor Leon y Castillo, who, as ambassador to France, is engaged in negotiations with the French Government which cannot at present be interrupted. They are, Senor Sagasta informed the Cortes, likely to have important consequences which may be made manifest in the near future—perhaps in a few days even. The Spaniards have had many "surprises" of this sort, but none of them has yet come off. But this one may. We shall see.

May 22.—Is Admiral Cervera at Santiago de Cuba? Doubts are now hinted; some American critics see in it a "Spanish ruse," the object of which is by no means clear. There is nothing for it but wait. American naval authorities are much more reticent than they were. There was to be a "great naval battle" yesterday or to day; accounts of it have not yet arrived.

May 23.—There was a report that the "great naval battle" had been fought, but it was untrue. There is now almost as much uncertainty about Admiral Cervera and his squadron as there was before they were supposed to be "bottled up" in Santiago de Cuba. It is not believed that the Admiral will accept battle on the high seas if he can possibly avoid it. But there is a suspicion that he may seek to escape northwards, and perhaps in time be able to attack some of the American Atlantic ports. Admiral Camara is returning immediately to Cadiz to resume command of the Spanish reserve squadron. It is expected to sail soon with "sealed orders."

May 24.—More mystery. American naval authorities *may* know about the positions of the fleets of Admiral Sampson and Commodore Schley, but if so, they do not tell. Nothing, moreover, is known of Admiral Cervera—whether he has left Santiago de Cuba or whether he ever really entered that port being alike uncertain. It would seem, however, that the United States armed cruiser *Oregon* is now safe. It is expected daily at Key West, and will ultimately join Admiral Sampson's squadron. The American War Board are puzzled at Admiral Cervera permitting the *Oregon* to escape. But, though Admiral Cervera is at present a free lance, it may not be at all times expedient for him to go where he would like to be. Serious complaint was made in the Spanish Cortes that American ships were being sailed close to Spanish ports under the Spanish flag. It was resolved to direct the attention of the European Powers to this conduct; and a hint was thrown out that Spain might retaliate by the employment of privateers to prey upon American shipping. A British steamer, *Ardanmhor*, was seized by mistake in the Straits of Florida. It was released at once on arrival at Key West.

May 25.—Plenty of rumours, but no facts. It is said that the American naval authorities now "believe" that Admiral Cervera is in Santiago de Cuba with his squadron, but they do not know; nobody knows. There is said to have been trouble at Manila between Admiral Dewey and the German consul, who threatened to force his way into the town with provisions for the Spaniards. Senor Leon y Castillo has returned to Paris to continue his "negotiations," which are now said to be of a financial rather than a political character. Admiral Montojo will, it is said, be tried by court-martial on charges of cowardice, with being unready for the fight at Manila, and with not making full use of his opportunities. The *Daily News* special correspondent at Madrid asserts that Spain is anxious for peace. It is not, he says, for the Spanish Government to make proposals; but peace, he thinks, need not be delayed much longer if some disinterested Power were to take the matter up. That is rather a sanguine view of the situation.

May 26.—No confirmation yet of the "bottling up" of Admiral Cervera at Santiago de Cuba, though confident rumours circulate to the effect that he is "cornered" there with Admiral Sampson and Commodore Schley watching him. President McKinley has called for 75,000 more volunteers, clear evidence that the authorities are taking a more serious view of the war. It is now declared that Senor Leon y Castillo is conducting no special negotiations with the French Government. At first they were said to be of such a character as to lead to important international results. Then they were said to be of a purely financial character. Now we are told that there have been no negotiations at all. Admiral Camara has left Madrid for Cadiz with the inevitable "sealed orders."

TRADE AND PRODUCE.

Wheat has been very quiet during the week, with a general reduction in price of from 1s. to 2s. per quarter. Not much business has been doing, however, sellers holding out against any further reduction, and buyers rather keeping aloof, in expectation of a further turn in their favour. Attempts at a rally in price were made in New York early in the week; but they had only a momentary success; and since then the tone of the market has been quiet, not to say dull, with a tendency downward. American supplies continue large, and the quantities coming from India are increasing. Stocks in this country keep well up to the average level; but France is still buying largely. Last week she took 192,000 quarters against only 38,000 in the previous week. Imports of Russian have certainly not been large, and the supplies from that quarter seem likely to diminish rather than increase. On the whole it seems probable that the reduction in rates will not go much further, if any. There have been instances of white wheat changing hands as high as 55s.; and in several districts business was done at 51s. to 53s.; but probably 50s. to 51s. is nearer the average, though in some districts the quotations were 48s. to 50s.

There is no change to report in cotton. The spot market is dull, and futures are receding. The visible supply at the beginning of the week was 3,795,000 bales against 3,347,000 bales last year. No increase in business is reported in Manchester, and, owing to the inadequacy of prices offered, only a moderate turnover has been possible. The condition of the trade has been adversely affected by the absence of buying for Calcutta, though for other Indian centres a moderate business has been doing. Very little speculative buying. Spinners are not securing many new contracts. Demand for yarns small, and prices have a downward tendency. The linen trade in Belfast is reported a shade better, with a sensible improvement in orders from the States. Barnsley, however, reports the demand sluggish in every direction, while recent failures have caused some depression in Dundee, and traders are exercising more caution, though the excitement about the Calcutta plague has abated.

At the third series of colonial wool sales, which closed on the 19th inst., competition, Messrs. Jacomb, Son, & Co. inform us, has not been so even and regular as might have been expected, and there have been occasional nightly fluctuations and irregularities observable. Of the quantity catalogued, 10,700 bales were bought in, while 76,000 bales were taken for export. Importers of some 28,000 bales have not met the market at all. As compared with last auctions there was a decline of from 5 to 7½ per cent. in most sorts; indeed, in all except superior Australasian merino wools in the grease which showed an advance of 5 per cent., and superior fine greasy cross-bred wools, which also advanced 5 per cent. Reports from the manufacturing districts are not particularly bright. The demand in Huddersfield has been almost entirely for home consumption, and that not exceptionally active, though prices have remained firm. Serge and worsted coatings, fine vicunas, and fancy worsted trouserings have been in good demand. Tweeds of the soft Saxony make have also received a good deal of attention. Leeds manufacturers are hopeful of the near future; but recent weather has rather interfered with business, and owing to changeableness in the price of colonial wool, buyers and sellers have alike been cautious. There is a strong hope of considerably increased business with Canada. Already numerous orders have been received, conditional, however, on their execution not before the preferential tariff comes into operation in July next. Leicester is still depressed. Prices are irregular, and the few transactions are at quotations lower than at any time for over fifty years. There is no improvement in the yarn market, and new orders are difficult to procure at prices considered profitable.

Copper continues unsettled, fluctuating greatly from day to day. The war, and the probability that it may be more prolonged than was expected, gives scope to speculators, of which they seem to take full advantage. The tax the Spanish Government proposes to place as a war contribution on copper ore—said to be 2 per cent. *ad valorem*—cannot greatly disturb the market; but then, if the war goes on, the duty is almost sure to be increased, and may indeed begin at even a higher figure than that mentioned. There is no doubt that Spain will extract as much as she can in the present emergency from her extensive mineral resources. We may, therefore, look to continued fluctuations in the copper market. On Monday 500 tons were sold on the London Exchange at £51 7s. 6d., 6s. 8d. and 5s. cash, and £51 8s. 9d. and 7s. 6d. three months. The cash price was maintained on Wednesday, but the rates for three months went down 2s. 6d. to £51 5s. and 6s. 3d. for various dates in August, £51 5s. and 7s. 6d. three months. The market closed quiet. Settlement price, £51 5s., the same as on Monday.

Pig iron has this week taken a downward turn. The market has been inactive and featureless, and a drop is recorded in Scotch of 2½d., Cleveland 2d., and hematite 1d. The reverse can only be temporary, for the reports from the manufacturing districts are generally very satisfactory, and the other day a Scotch firm held out for an advance of 7s. 6d. to 10s. a ton on hematite. He did not get it, however, for hematite makers say that the cost of production has increased so much that profits are not so large as they were five months ago, when hematite was 3s. to 4s. per ton cheaper. When dear coal is added to dear ore, they cut in severely upon profits. Scotch pig iron is now down 1s. 2½d. below the top price paid last week.

There is a pretty confident expectation of an early termination of the Welsh coal strike. The colliers have at last reluctantly agreed to confer plenary powers on their delegates, and the conference with the employers seems now certain to meet on an early day. There is a consequent slackening of prices in Newcastle and other coal centres, which have been so greatly benefited by the strike. Shipowners, however, are looking forward to greatly increased business; for as soon as the Welsh collieries resume work, there must be a considerable addition to the export trade. The forward chartering shows that the owners do not believe in low rates before the late autumn at any rate.

The sugar market is still very firm, with every indication of a continuance. The leading feature of the week has been, according to Mr. Czarnikow, another advance of about 2½d., on near deliveries of beet, caused mainly by a demand for America. August, again, is only 1½d. dearer, and new crop only fractionally harder. Granulated sugar has also participated in the improvement, though as yet only to a small extent. The general position is undoubtedly sound, and seems likely to become stronger month by month.

About 43,000 packages of Indian and Ceylon tea were offered in public auction this week. Messrs. Gow, Wilson, & Stanton state that the average price of Indian tea sold on garden account during the past season was 8.67d., against 9d. during the season ended May 31, 1897, and 8¾d. during the season ending May 31, 1896. The total estimated crop of Indian tea for 1898-9 is given as 158,750,000 lbs., and of this amount 140,500,000 lbs., it is calculated, will be available for the United Kingdom. Lower grades of whole leaf Ceylon tea have been specially in demand, the general tone continuing firm, with a slightly hardening tendency. The average price is 7.73d., against 7½d. in the corresponding week of 1897.

CLEMENT WILSON,

NORFOLK HOUSE,

NORFOLK STREET, STRAND, W.C.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the Investors' Review, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investors' Review.

The Week's Money Market.

Bank Rate 3½ per Cent.

The money market has weakened with a vengeance in the past seven days. Not only has the Bank of England failed to make arrangements to control the Japanese funds, but a large proportion of these funds have been lent directly to the market, and this fact, coupled with the continued influx of gold, has quite conquered the unwillingness of brokers and bankers to reduce rates. Each day has seen greater competition to find employment for funds in the market, and this ease, capped by the reduction in the Bank rate to 3½ per cent., has sent the quotation for day to day loans down to 2 per cent., as against 2½ to 3 per cent. a week ago. Loans for a week are now quoted at 2¼ per cent., and the India Council lends with difficulty, until June 3, at 2½ per cent. Upon the reduction in the official minimum, the discount houses brought down their allowance for deposits by ½ per cent. to 2 per cent. for "call," and 2¼ for "notice" money. The joint stock banks, of course, will now allow 2 per cent. on deposits.

Discount quotations have naturally fallen more severely than rates for short loans, as they had been relatively so much higher. Political misgivings were felt to have been overdone, especially in the shape of Mr. Chamberlain's speech, and when it was found that the American exchange rose rather than fell back, the market had perforce to pay attention to the heavy addition to its resources represented by the inflow of gold. In the past seven weeks quite 7½ millions of the metal have come in, which more than obliterates the effect of the recent shipments to New York. The action of the Bank of England in reducing its rate yesterday from 4 to 3½ per cent. was long forestalled by the market, which bid actively for bills throughout the week. Under this influence, the discount rate for three months' remitted paper, which a week ago was 3½ per cent. fell rapidly to 2½ and then to 2⅜ per cent. at which point it is not particularly firm. Foreign exchanges have necessarily moved against this country as a result of this decline, but the fall in their case has not been rapid, and so far there is no sign of the renewal of a gold demand for the Continent. The only quarter for which gold is wanted is India, and, as usual, this want is so moderate that it can hardly be said to be felt. The Bank of England has therefore reduced its buying price of Japanese yen to 76s. 4½d., but, so far, has made no further change in its price for other foreign coins.

The Stock Exchange settlement found plenty of money on offer, and the banks, after starting their rate for loans at 3½ per cent., had to reduce their terms to 3 per cent. Even then lending brokers paid off considerable sums as a consequence of the contraction of the supply of floating stock in the market.

Another increase of £1,103,582 in the banking reserve, bringing its total up to £26,545,000, made a reduction in the bank rate inevitable. The total stock of coin and bullion is now £37,192,000, and there seems to be no present danger that it will be drawn upon for export. The directors of the Bank, therefore, did well to begin to reduce their rate towards the level of the market. In other respects the Bank return for the past week shows very few changes of any moment. The largest is a decrease of £698,000 in the "other" securities which are

still, however, £33,612,000. Thanks to the influx of new money, this decrease, representing the balance of the loans due at the Bank and now repaid, has been effected without further drawing upon the "other" deposits. On the contrary, they are now at £43,452,000, £316,000 larger than they were a week ago.

SILVER.

The price of the metal has fluctuated within narrow limits during the past seven days. Starting at 26 7/16d. per ounce, the price of bars for immediate delivery rose to 26 9/16d. per ounce on Monday, owing to purchases variously ascribed to "bear" closing and preparation for another Spanish order. Since then it declined, and, with little doing, the quotation dropped back to 26½d. per ounce, and then strengthened to 26⅝d. per ounce. America does not seem inclined to offer freely, and of course the East is still out of the market. Indian exchanges dropped back in the week to 1s. 3 1/16d. but at the reduced rates the India Council made a fair allotment, and with the announcement that only 50 lacs will be offered next Wednesday, rates have moved up to 1s. 3 3/16d. Chinese rates remain very dead, but Singapore is maintained at a quotation well above the usual parity with Hong Kong.

Stock Market Notes and Comments.

Cheaper money is already beginning to have its effect upon the price of securities. Political apprehensions still keep Consols down in spite of Government purchases, but should our West African dispute with France be arranged, as reported, the price of this security also will begin to look up. As yet, however, the buying has been what is called professional, and the investing public still keeps away from the markets. It may rush in now that the Bank rate is down, and buy at considerably higher figures than now prevail, because a reduced bank rate means reduced interest on deposits. Investors will let money lie with their bankers when they receive 2½ per cent. upon it, but when the interest falls to 1½ per cent. they seek to place it in permanent securities. It looks, therefore, as if wisdom dictated speedy purchases, and yet we are not disposed to give this advice, because it seems to us the lower rates for money cannot last for any length of time, and even if they do last, there are so many disturbing influences in active operation that we cannot count upon stable markets for three days running. Within our own sphere we may have many alarms during the present summer, and there is always hanging over us the financial difficulties of the Indian Government. The daily or weekly excitements the public mind has been subjected to since this year began have recently turned away people's thoughts from India, a thing never difficult to do, because we do not at the best of times give India much attention. The difficulties of our Government there, however, are none the less real because we ignore them, and every day that passes brings a crisis in Indian finance nearer. In a very short time only the most heroic remedies will avert this crisis, and among these remedies it is very probable that large exports of gold to India will take a prominent place.

Then we have always to bear in mind the effects of dearer grain upon our resources. These likewise have been obscured recently; it is difficult to say how. Contrary to expectation the United States has ceased to draw gold from Europe, either because their expenditure upon war materials in Europe has assumed extraordinary proportions or because Europe's indebtedness is held in suspense. Perhaps also American speculators have been buying their own securities extensively on our markets, and thereby for the time being reducing the power of their country to draw upon Europe's stock of gold. All these causes may be in operation, but it remains true that we cannot pay 40 per cent. to 50 per cent. more for our wheat without feeling the effects of the increased indebtedness thus created upon our money market. What we should expect, therefore, is that mitigating influences such as those mentioned in connection with the American Union may last for the next two or three months, and then that adverse tendencies should reassert themselves with added force. Certainly the longer the present war between the United States and Spain drags on the more liable are we to credit disturbances from some quarter or other. The Spanish Minister of Finance, we notice, is boasting that his country has plenty of resources with which to carry on the fight, and in his position he is doubtless bound to put a bold face on affairs, but unattached observers know better, and are better able to measure the consequences of large increases in the note circulation of the Bank of Spain and in the internal interest-bearing debt. Spain is near collapse already in consequence of this war, and will be quite without resources should it continue another three months. The condition of Italy has also to be borne in mind, not only in regard to our commercial relations with that country, but in view of the consequences which a collapse in its finances would be certain to produce, both in Paris and Berlin. It is impossible to believe that Italy las now situated can continue to meet her debt obigations in full, and almost equally impossible to expect that the Paris Bourse can stand up under successive blows such as have been, or, will be, administered to it by Portugal, Spain, and Italy taken together.

We need not go further afield in discussing the influences from abroad which affect our market, and there is not much new to be said about domestic ones. Speculation is not very active; that is, its manifestations at the best are only sporadic. We have been taking some part in the gamble in American railways, probably as "bears" to our loss, and there is quite a rush of business in Grand Trunk stocks, but of general speculation there is hardly a trace to be found. Each Stock Exchange settlement discloses a smaller demand for money than the last, and in some of the securities which have suffered most, such as Spanish 4 per cents., we have comparatively little interest. It cannot even be said that the British public has done much to raise the price of Argentine Government securities, although it undoubtedly has bought heavily in Argentine railway stocks. The Government debts, therefore, both of Argentina and Brazil, are handled from above, by the financiers who have to find means to sustain the credit of these countries and prevent their falling into difficulties of an irremediable kind. Generally, in the long run, these financiers succeed in their object, and, given cheap money, they are sure to do so now, but up to the present the public, as far as we can learn, is not deeply involved.

Equally dead is speculation in the mining markets. Either the public holds shares at higher prices which it is waiting to see again in order to sell, or shares are possessed in bales by the trusts and finance companies interested. In either case there is no room for fresh play. Prices have been moved up recently by the action of the financiers, but the public has not responded, at least as far as we can discover. We must, however, admit that our acquaintance is not extensive among the class of brokers who cultivate this kind of business. A

better test, therefore, than their experience is found in that of the jobbers, who have had for a long time past very little to do either in the "Kaffir Circus" or the Western Australian market. Had there been general speculation going on in these they would have been busy and making money. They are not busy, and on the whole have probably been losing money. We may, consequently, take it as true that speculation is at a very low ebb in these departments, and we hope it will continue so in spite of the lamentations of the dealers. Almost equally stagnant is the business of the miscellaneous market. There is nothing to "go for" in it, as the phrase is. Almost every share dealt in is at a price which repels instead of attracting the man who is careful of his money, and in many instances quotations are entirely artificial, the product of manœuvres on the part of groups or individuals who have inconvenient quantities of shares to dispose of. We hope such will be obliged to keep these shares until the test of time has been applied to the quality of the companies by which they have been created.

The Week's Stock Markets.

Stock markets have been quiet, but firm on the whole. The decline in discount rates, and the closing of accounts by "bears" prior to the settlement which began on Tuesday, were the chief reasons for the moderate rise which has taken place, but as the Stock Exchange will be closed on Saturday next as well as Monday, and the attractions of Epsom have kept many members away this week, business has naturally been on a very small scale.

Consols rose at one time to 111⅜, owing to cheaper money, but the price has slipped back a little since. Most of the leading Colonial Government inscribed stocks have been marked higher in anticipation of an early reduction in the Bank rate, but Home Corporation issues have not participated in the rise, and a fall of 5 in Manchester 4 per cents. is noticeable.

A feature in the Home railway market was the unexpected announcement made by the directors of the Great Western Company of an issue of nearly 2½ millions of new stock. This new capital is wanted for lines in Somersetshire, and a shortening of the route to South Wales is also to be effected. Great Western ordinary promptly fell about 4, but part of this has since been made up, despite the publication of a very bad traffic return due to the continuance of the deadlock in the Welsh coal trade. Apart from a decline in the stocks of several of the mineral lines serving the same district, there is a general advance in the rest of the list, the most prominent rises being in Midland deferred, South-Eastern deferred, and the "underground" stocks. As regards the latter companies the rise was supposed to be due to some fresh electric traction developments, but in addition the District was helped by another good traffic return, coupled with a scarcity of stock for delivery. Considering the bad weather of last week, the traffic returns were fairly good, although the passenger lines suffered somewhat, but the prospects of a fine Whitsuntide has since led to some inquiry. Continuation rates were light, and about the same as last time, with the exception of Metropolitan, on which the contango rose to ¾ per cent., while the account again disclosed a great scarcity of stock generally.

Among United States railroad shares the principal activity has been in Milwaukee, the price going up with a run, and the smallness of the floating stock, of which mention has been made of late, was clearly demonstrated at the settlement by the "back" of ⅛ per cent. which was at one time charged. There has been a scarcity of war rumours, or definite news of any kind, and Wall-street operators have done little, and business continues restricted on this side, the firmer tendency being due more than anything else to the publication of good reports as to the condition of the crops, and the traffic returns again present an excellent showing.

About the only information relating to the rate war that has appeared this week is that the committee hopes soon to arrive at a settlement, yet upon the top of this very vague report there has been a large business at rapidly advancing prices, especially in Grand Trunk stocks, but the traffic return caused a partial relapse, although it was a very good one. Canadian Pacific shares followed the upward move, and purchases by Berlin operators also helped to harden the market. The last price, however, is not quite the best of the week.

The foremost place in the Foreign market has been occupied this week by the Brazilian bonds, which have been forced up rapidly. Various rumours have appeared day by day to account for the steady advance; the negotiations between the Government and the house of Rothschild for the sale of the Central Railway were nearly completed, said one report; and then an arrangement for funding for three years the interest on the National Debt in new 5 per cents., to be secured on the Customs revenue, was talked of, but has not been confirmed. The Rio exchange is considerably higher at

6¼d., but this has not prevented some profit taking, and the last prices are well below the best. Argentine issues owe their rise to the remarks made by Dr. Pellegrini at the beginning of the week, and other South American descriptions are firmer in sympathy. Turning to inter-Bourse securities, there has been only a small business, and the ups and downs day by day have finally resulted in slight gains on balance in Spanish and Italian. A rumour was current on Monday that the dispute between England and France in West Africa was nearly settled, but the improvement which followed this report was afterwards lost, an uneasy feeling being produced on the Paris Bourse by the result of the French elections. Then the speeches in the Spanish Cortes, recommending the payment of the coupon in silver, had a depressing effect on Spanish fours for a time. The strength of Italian Rente was due to purchases by an Italian banking syndicate, and the existence of a "bear" account was disclosed at the settlement, judging from the fact that the stock was carried over "even," contrasted with a contango of 3 per cent. last time; but rates were all lower on this occasion.

Argentine and other South American railway stocks have been quite active, and a moderate advance has to be reported, the traffic returns again coming well up to expectations. The Mexican companies' issues show an improvement as well, also due to a good traffic, the increase amounting to over $10,000.

Among Miscellaneous stocks changes are few and unimportant. Guinness ordinary is 10 higher, and Allsopp preferred has risen a point or two; otherwise, there has been little or nothing doing in brewery securities. A further slight shrinkage is noticeable in the leading electric lighting companies' shares, and among water stocks Chelsea preference has fallen 6½. G. H. Hammond shares and the income stock have risen rather sharply, the demand being due to a statement that this company is doing well, large orders having been received for canned meat in connection with the Spanish-American war. Lyons' shares rose on the publication of the report, but Maison Virot ordinary and preference have fallen steadily. Vickers and Maxim attracted buyers, presumably on the report of some sort of a working agreement with a leading American firm, but this tale has since been contradicted.

Markets, on the whole, closed firm, the reduction in the Bank rate not having been quite discounted, and professional buying caused an advance in most of the leading Home railway stocks. Consols also advanced sharply, the rise being assisted by the firmness of the Continental bourses, but the most prominent feature was a big rise in Grand Trunk stocks on influential buying from Montreal helped by provincial orders. United States railroad shares were rather dull at the finish, with one or two exceptions, such as Wabash, Central Pacific, and New York Central bonds, which all closed very firm on Amsterdam buying. The call for more volunteers in America was not liked, as it was thought to mean a prolonged struggle with Spain. Among mining ventures, Mount Lyell closed weak, but other copper-producing companies were firmer.

Mining and Finance Companies.

The South African market has been a comparatively firm one for the greater part of the week, chiefly on Continental support, and the settlement disclosing a scarcity of stock, prices were inclined to go ahead. Paris then became a seller, and in the absence of support here there was a set-back, although the latest quotations still show a moderate gain on balance. Rand Mines were carried over "even" at the last, and continuation rates were generally easier, but, as compared with a fortnight ago, there is an all-round shrinkage apparent in the list of prices. A few of the higher-class West Australian shares have been inquired for, on Adelaide account it is said, and where there is a change in price it is generally in favour of holders; but business has simply dwindled away in this department to nearly the vanishing point. Rates of continuation of "Westralians" were in some instances, such as Associated, a little lighter, the account being an extremely small one. Among copper shares Mount Lyell fell away still further, and the price touched 9⅞ when the cable giving the reason for the lower percentage of copper in the ore recently treated was published. It was also rumoured that the heavy sales of these shares was not unconnected with the late Mr. Crotty's holding, at any rate the selling orders came principally from Melbourne. When they ceased the price rallied a little, and then again weakened. Rio Tintos were pressed for sale on Paris account on the news that the Spanish Government will put an export duty on copper of 1½ or 2 per cent., but repurchases have since caused a recovery to quite last week's level.

The United Matabele Claims Development Company, Limited.—Very little information is contained in the report of this company for the year to October 31 last, and not much was to be expected, seeing that it has not got to work yet. The directors, however, do inform us that when certain works are completed, about 10,000 tons of ore will be in sight, and that they have obtained the funds for this development on favourable terms. They also proclaim that the assays have been very favourable, there being 250 tons of ore at grass, which give an average assay value of 2 oz. 4 dwt. 8 gr. to the ton. When they have a quarter of a million tons of this ore laid open we shall begin to have hope. In the meantime, expenses seem to be kept down fairly well, and the balance-sheet offers nothing to comment upon.

May Consolidated Gold Mining Company, Limited.—In the year 1897 this company does not seem to have made very much by its operations. Its gross receipts from gold won were £209,480, and £185,791 of this went in expenses, leaving only £23,688 as net profit, but this was really not available as profit, because £20,047 had to be written off for depreciation. A balance of £4,047 was brought in, and after taking credit for sundry small receipts the sum left to carry forward is £8,483; not a large amount on a gross overturn of about £210,000; but then the net return per ton milled was only 3s. 7·023d. Unless the ore gets richer, or expenses are reduced, the future prospects of the company are anything but brilliant, and £179,201 stands in its books as the dead weight of the capital cost of the claims worked. The company seems to owe £32,545 to the National Bank of the South African Republic, and has, of course, no reserves of any sort.

Answers to Correspondents.

Questions about public securities, and on all points in company law, as well as on the position of life insurance offices and their promises, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway ?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

SCOTUS.—The institution is sound, and the form of policy a reasonable one. Its only drawback is the difficulty of realising if you should require the money. Before accepting you should inquire into the "surrender value."

TONK.—It is not possible to answer your query this week ; will send you a letter in the course of a few days.

RAWLEY.—1. So far as it is possible to judge from published reports, the management is fairly good, and prospects are said to be encouraging. The shares stand now at a fair price ; if you are in lower down it would be prudent, I think, to sell, at any rate, part of your holding. I doubt if there will be much activity in this market for some time. 2. My opinion of this concern has been very openly stated in the columns of this paper. The value behind these shares is almost, if not quite, nil, there may, however, be a rally engineered shortly ; if so, sell, and have done with it. In any case, don't wait very long. 3. This is in much the same position as 2. Companies with reserves "invested" in shares of speculative undertakings cannot be considered sound. They will prove mere bubbles in the long run. Sell these also on a rise. Efforts will be made to put a better appearance on the position shortly, I expect ; if these prove futile, cut your loss.

NEXT WEEK'S MEETINGS.

TUESDAY, MAY 31.

British Indian Tea ... ... 14, St. Mary Axe, 3 p.m.
Dooars Tea ... ... Winchester House, 2 p.m.

WEDNESDAY, JUNE 1.

Coburg Hotel ... ... Coburg Hotel, 12.30 p.m.

THURSDAY, JUNE 2.

Bally Paper Mills ... ... 28, Fenchurch-street, 2.30 p.m.
Brownlee & Co. ... ... Glasgow, noon.

FRIDAY, JUNE 3.

Lipton, Limited ... ... Cannon-street Hotel, noon.
Mexican National Railway ... ... Winchester House, 2 p.m.

A conference is shortly to be convened, a preliminary to the conclusion of a convention for clearing up all pending controversies between the United States, Canada, and Great Britain. The negotiations are to include the protection of fish on the great lakes and on the North Atlantic fisheries, the alien labour laws and the question of border immigration, mining regulations at Klondike and elsewhere, the seal question, and the subject of reciprocity. A large order, but no doubt seems to exist as to the possibility of executing it.

Prices of Mine and Mining Finance Companies' Shares.

Shares £1 each, except where otherwise stated.

President McKinley, we are told, is taking great personal interest in pending legislation for the representation of America at the Paris Exhibition of 1900. It may be good for the commerce of the United States, but his more immediate object is to counteract the efforts being made by the French Press to induce the Government to interest itself on behalf of Spain. It is a sagacious move on the President's part—a move that makes for peace.

THE PROPERTY MARKET.

Last week's results at the Tokenhouse Yard Mart were uncommonly good—the total realised having been £238,160, as compared with £135,420 for the corresponding week last year. The leading lots we have already indicated, and need only now refer to some items of interest in the later days of the week. A farm at Hambledon, Bucks, realised about £17 per acre; but some building land in the same locality commanded as high a figure as £150 per acre. Yesterday week Messrs. Stimson & Sons and C. C. & T. Moore had important sales of ground rents and properties, the respective totals of which were £23,565 and £28,325. One freehold ground rent disposed of by the former firm was in Euston-road—£30, with reversion in four and a half years—and fetched £5,525. Another freehold ground rent of £129, offered by the same firm, with reversion twenty-nine and three-quarter years, brought £3,180. A freehold ground rent of £180 at St. John's Hill, reversion in ninety-six years, was sold by Messrs. Moore at £5,030. Messrs. H. E. Foster & Cranfield sold some valuable reversionary interests and policies well, bringing in a total of over £17,000. A reversion to a trust fund of about £13,218, comprising freehold property and Government stocks, life aged sixty-one, brought £6,350. Another reversion to a sum of £30,000 charged upon freehold property at Carlton, in Notts, lives aged sixty-two and fifty-seven, brought £8,000. Three endowment policies in the Scottish Provident for £1,000, and a policy for £200 with profits, life aged fifty-two, sold for £450. Good business was also done at the Mart on Friday. Messrs. G. A. Wilkinson & Son had a long list of improved ground rents at Brixton, and all were sold at high figures. Messrs. Gouldsmith, Son, & Co. sold, amongst other lots, the leasehold premises Nos. 13, 14, and 15, Sloane-street, and 17, 19, and 21, Pavilion-road, Chelsea, for £8,975. Messrs. F. J. Bisley & Sons got good prices for leasehold properties at Bermondsey, Rotherhithe, and Camberwell.

Several rather important sales are announced for the near future at the Mart. There is, for instance, Weir House, on the Middlesex bank of the Thames, at Teddington, which will be offered by Messrs. St. Quinton & Sons on June 6. Cottismore, a freehold residence, with very pleasant grounds, is to be offered during June by Messrs. Debenham, Tewson, & Co.; and Mr. Newman, of Hillingdon, Middlesex, will offer at Shepperton an adjacent building estate, freehold, including the farm known as the Clock House at Hulliford, near the railway station, and within a few minutes' walk of the river. Messrs. Edwin Fox & Bousfield have in hand for offer at the Mart on June 22 two residential properties on the banks of the Thames: Oldfield Cottage, near Maidenhead, and the property known as Hill Lands, built on the hill top overlooking Wargrave-on-Thames. Both seem likely to attract keen bidders. A City building lease, to be offered by Messrs. Baker & Sons on June 17 by order of the Bridgehouse Estate Committee, must also attract some attention. The lease is for thirty years, comprises about 15,600 feet, with a frontage of 197 feet to Finsbury-pavement and a return frontage of 79 feet to West-street. A freehold property in Clerkenwell-road, a building of five floors, containing a floor and area space of 16,437 feet, is to be offered at the Mart on June 28, by Messrs. Bean, Burnett, and Eldridge. On the same day the same firm, in conjunction with Messrs. Jones, Lang, & Co., will offer the building at 10, Wood-street, held on a long ground lease direct from the Corporation of London. Among other notable properties soon to be offered are a valuable mansion at Brighton; Barnside Moor, near Sheffield, well stocked with grouse; the Bonningtons, a freehold residential estate in the parish of Hunsdon, within three miles of Roydon; two freehold estates in the parish of Melksham, known as the Melksham Forest Farm, and the Little Snarlton Farm; an important building estate known as "The Elms and Wellfield Estate," on the top of Muswell Hill, to be offered by Messrs. Edwin Fox & Bousfield on June 15; and the pretty marine residence on the shores of Cardigan Bay, known as Hafod-y-Bryn, now in possession of Mr. Pope, Q.C. Hean Castle, near Tenby, is also to be offered at the Mart on June 28.

Little was doing at the Mart on Monday and Tuesday, the total for the former being £7,490 and for the latter £18,464. On Monday, Messrs. E. Belfield & Co. offered the Mitcham Brewery and thirteen licensed houses for sale, but they were withdrawn, £49,000 being the highest bid. Some improved ground rents at Marylebone, Hyde Park, and Paddington were successfully disposed of by Messrs. Elliott, Son, & Boyton; but this firm failed to obtain a satisfactory price for the Crown lease of Hanover Lodge, Regent's Park, with five acres of ground, which was consequently withdrawn. There was rather more activity on Tuesday, but not much. Messrs. Debenham, Tewson, & Co. disposed of the corner shop and premises, No. 8, Baker-street, Marylebone, for £2,310, a satisfactory figure; while a freehold building estate of fifteen acres at Higham Hill, Walthamstow, was sold by Mr. W. Houghton for £3,000. Messrs. Fuller, Horsey, Sons, and Cassell disposed of the assets, goodwill, and British and foreign letters patent of the Automatic Castor and Wheel Company for £3,000. The remaining properties offered were of minor importance.

Wednesday was Derby Day even at the Mart, and the properties offered were few and unimportant, the total sales for the day only amounting to £4,782. Messrs. Pearce & Son were the only auctioneers present, and disposed of all their lots at fair prices.

The French and Russian portions of the first instalments of the Greek war indemnity were not paid until the 21st inst. The Porte had sent a remonstrance on the subject on the 20th, and was probably beginning to doubt whether the evacuation of Thessaly had not begun too soon.

NOTICES.

Mr. William Abbott Turnbull and Mr. William McFarlane have been elected directors of the Thames and Mersey Marine Insurance Company, Limited, with seats at the London board.

Lloyds Bank, Limited, will open a branch on Monday next at 35, Cambridge-street, W., under the management of Mr. W. L. Harris.

The Great Northern Railway of America has removed its London office to 21, Cockspur-street, Pall Mall, S.W.

Mr. Nathaniel Spens has joined the board of the Transvaal Mortgage Loan and Finance Company, Limited.

The registered office of Waldon's Find Gold Mines, Limited, is now at 9-10, Fenchurch-street.

Baring Brothers & Company, Limited, have received cable advice from the Banco Comercial, Montevideo, stating that the bank has received from the municipality the sum of $76,000 gold, on account of the service of the City of Montevideo sterling loan of 1888.

The Imperial Ottoman Bank has decided to call in and cancel its certificates of 100 shares, and to replace them by others of twenty-five shares each. Holders are requested, therefore, to deposit their 100-share certificates at once, either in London, Paris, or Constantinople. Dividends will only be paid on coupons of the new certificates.

Manley Hopkins, Son, & Cookes have removed from 32, Cornhill, E.C., to 91, Gracechurch-street.

With reference to the Guatemala External Debt the Council of Foreign Bondholders has received advices from the Banco de Guatemala, dated the 30 ult., enclosing copy of a protest entered by the bank on behalf of the bondholders against the proposed reduction of the export duty on coffee. The protest had been read in the Assembly, and referred to the Finance Committee for consideration.

The Commissioners of Inland Revenue have entered into an agreement with the Corporation of Dover for the composition of the stamp duties payable on transfers of £93,000 Dover Corporation 3 per cent. stock. Transfers executed on or after March 19, 1898, will be exempt.

The agreement for giving effect to the proposed arrangement between the Central Argentine and the Buenos Ayres Northern Railway Companies having now been concluded, subject to the approval of the shareholders of the Central Argentine Company, and to the passing of the Bill now before Parliament, an extraordinary general meeting of the Central Argentine Company has been convened for June 2, to consider resolutions approving the Bill and the agreement, and authorising the creation and issue of 4 per cent. debenture stock for the carrying out of the arrangement and for other purposes.

The Standard Bank of South Africa has opened a branch at St. John's River, Cape Colony.

The Hon. H. C. Gibbs has retired from the board of the Exploration Company, Limited.

The New Zealand Loan and Mercantile Agency Company, Limited, announce that, in order to facilitate the issue of the new certificates under the scheme of readjustment, the transfer registers of the "A" and "B" debenture stocks will be closed from May 31 to June 28, both inclusive.

The numbers are published of 117 debentures of £100 each of the Blake and Knowles Steam Pump Works, Limited, which have been drawn for repayment at 110 on July 1.

We are informed that the Hon. G. A. Burns, of Messrs. G. & J. Burns, shipowners, Glasgow, has joined the board of directors of the Cunard Steamship Company, Limited.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

Working-Capital Column.—In working-capital column, D stands for *debit*.

* Company formed this year. † Interim dividends are given as actual distribution made. ‡ *Total* div. § Crop 1896.

DIVIDENDS ANNOUNCED.

MISCELLANEOUS.

International Trustee, Assets, and Debenture Corporation, Limited.—Interim dividend for the six months to April 30 at the rate of 7 per cent. per annum on the ordinary shares.

Lockhart's, Limited.—Final dividend on the ordinary shares at the rate of 11 per cent. per annum, making a total distribution of 8 per cent. for the year, and leaving £1,045 to be carried forward.

Cape Town and District Gas Light and Coke Company, Limited.—Dividend at the rate of 6 per cent. per annum on the ordinary shares for the half-year ended December 31, making 7 per cent. for the year.

Albion Hotel, Manchester, Limited.—An interim dividend has been paid on the 5 per cent. cumulative preference shares for the half-year ended March 31.

Slaters, Limited.—Interim dividend on the ordinary shares at the rate of 8 per cent. per annum, payable May 28.

Kaffirs Consolidated Investment and Land Company, Limited.—3d. per share for the month of May.

Brilliant Gold Mining Company, Limited.—6d. per share declared, payable on the 7th prox.

Sharrer's Zambesi Traffic Company, Limited.—Interim dividend at the rate of 8 per cent. per annum for the nine months ended March 31.

Detroit Telephone Company.—Quarterly dividend of 2 per cent., being at the rate of 8 per cent. per annum.

Hannan Land Company, Limited (Palace Hotel), Kalgoorlie.—Dividend at the rate of 5 per cent. for the first quarter of 1898 on the paid-up capital of the company.

P. and O. Steam Navigation Company.—At the half-yearly meeting, to be held on June 14, the directors will recommend a dividend at the rate of 5 per cent. per annum on the preferred stock, and an interim dividend at the rate of 7 per cent. per annum on the deferred stock of the company.

Broken Hill Proprietary Block 10 Company, Limited.—Warrants for dividend No. 57 of 2s. per share have been posted.

Brazilian Submarine Telegraph Company, Limited.—Interim dividend of 3s. per share for the quarter ended March 31, payable on June 24.

Oxford Music Hall, Limited.—Dividend at the rate of 12 per cent. per annum for the half-year ended April 30, and a bonus of 2s. per share.

Kynoch, Limited.—Dividend at the rate of 10 per cent. per annum on the ordinary shares to be recommended.

Cape Copper Company, Limited.—Interim dividend of 3s. per share on the cumulative preference and ordinary shares, payable July 1.

Foster & Bird, Limited, King's Lynn.—Dividend at the rate of 4 per cent. per annum for the past six months.

Cape Copper.—Interim dividend of 3s. per share.

BANKS.

London and River Plate, Limited.—Interim dividend of 7 per cent. for the half-year ended March 31.

BREWERIES.

Wolverhampton and Dudley.—Interim dividend on the ordinary shares for the half-year ended March 31 at the rate of 8 per cent. per annum.

Newcastle Breweries.—An interim dividend at the rate of 8 per annum on the ordinary shares for half-year euded April 30.

Leeds and Wakefield Brewery.—Directors declared an interim dividend of 7 per cent. per annum on the ordinary shares for the half-year ending March 31.

INSURANCE.

Norwich and London Accident Association.—Interim dividend of 5s. per share, being at the rate of 10 per cent. per annum.

Referring to the concession of 250,000 acres in British New Guinea to the Somers Vine-Lowles syndicate, it is understood that the Queensland Government will ask Mr. Chamberlain to advise the Queen to withold her assent until the Australian colonies are able to express their views.

The wheat export season in Karachi promises to be the heaviest on record. The produce already bought for shipment will, it is said, require twenty-two trains daily until the end of August.

A Mr. McLaughlin, a Chicago dealer, is said to have successfully established a "corner" in oats throughout British Columbia. Dealers expect to have to pay 50 cents.

It has been stated in the House of Commons, by Mr. Curzon, that the conference on the Sugar Bounties is expected to meet on June 7. We shall know soon who the British delegates are to be.

It is reported from Pretoria that negotiations are proceeding between the Transvaal Government and a Continental financial group for a State loan of £6,000,000 to be issued at 98 at 4 per cent.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 22. New Series. FRIDAY, JUNE 3, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation"—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

CLEMENT WILSON,
NORFOLK HOUSE NORFOLK STREET, LONDON, W.C.

THE

LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	**£1,000,000**
do. Paid-up	**£100,000**
do. Uncalled	**£900,000**
Reserve Fund	**£70,000**

FIDELITY GUARANTEES,
On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.
The advantages of such Insurance are as follows:—
1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of Interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,
In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.
Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

The Investors' Review.

War and American Securities.

At last we have some definite news regarding the war between the United States and Spain. It seems to be established that the Spanish fleet has taken refuge in the difficult-of-access port of Santiago de Cuba. This is the end of the "brilliant strategy" of the Spanish Admiral, about which we have seen so many discussions and laudations during the last fortnight. He has displayed the strategy of the fox, and has taken to earth, as we may say, without daring to face the enemy at any point. In all probability Commodore Schley is right in his prediction that the Spanish ships will never get out again, for the entrance of Santiago seems to be so narrow that ships can only get out and in in single file, and clearly any attempt on the part of Admiral Cervera to pass out again could be frustrated by a very small number of vessels keeping guard over the exit from the harbour. And it is possible that the knowledge of the American Admiral that the harbour of Santiago was, in this way, a trap enabled the Spanish fleet to get into it unobserved. It would never have entered into the mind of a fighter that an enemy, who also meant to fight, would hide himself in such a dangerous position. We may assume, then, that there is extremely little probability of a great naval battle now. The Spanish fleet is bottled up, or the greater part of it, and may be either captured or destroyed by a combined land and sea attack. It will

not be conquered and sunk in the open ocean, nor will it now have the least chance to conquer there or anywhere else. This is a pitiful end to so much Spanish bravado, but we fear it is the only end now to be looked for. A repulse of the first United States attack can only defer, it cannot avert, the doom.

So the question now comes to be, is the war likely to end sooner in consequence of this? At the first sight the appropriate answer seems to be yes. When, however, we consider the task which is before the United States and the season of the year at which it is to be undertaken, as well as the extreme unpreparedness of her raw levies for active operations in the field, we are inclined to lean to the opinion that the Spanish tactics may prolong the struggle. Had Admiral Sampson been fortunate enough to encounter the Spanish fleet at sea and thrash it well before it took refuge in port, we might have seen Spain reduced at once to the necessity of negotiating for peace. Her Government has no resources out of which to equip a fresh fleet, and could not possibly hope to hold out in Cuba without the assistance such a fleet alone might give. All the world would have cried out against Spanish cruelty had Marshal Blanco obstinately persisted in maintaining a defiant attitude in Havana after such a catastrophe. Now, however, the mere possibility that Admiral Cervera might get out again, and the fact that his fleet has not yet been destroyed, encourages the authorities both in Cuba and in Madrid to go on making a show of war, in the hope that something may turn up to let them off with "honour." A piteous wail goes round the Courts of Europe about once a week, and is heard in the newspapers in the shape of rumours that this, that, and the other "Power" or combination of Powers is going to intervene on behalf of Spain. One is almost ashamed to think how much these exhibitions show that Spain has sunk into real cowardliness while still indulging in the braggart language her politicians and military men treated us to. There is, we are almost persuaded, no genuine intention to fight so far as Spain is concerned, and if there be any fight, whether around Santiago or Havana, it will be because the Spaniards there have no choice but to defend themselves. In the meantime, what is called "war" will drag on, and the United States will have to incur an enormous expenditure of men and money in occupying the island. We really see no other alternative. It is exaggeration, of course, to say that the American Government has already spent over £60,000,000 on this conflict to be, but before her Government has driven out the Spaniards, the expenditure may well attain a total much exceeding that sum. Decidedly it would have been cheaper in the long run for the United States to have bought the island, and it certainly would have been far more profitable for Spain and her creditors. Spanish pride, however, would not allow her to accept a sum by which Spain would have been magnificently put in funds and able to pay her debts. It is better, from the point of view of the old "Castilian honour," to go bankrupt and defraud the humble creditor than to sacrifice the chance to dream of the age when Spain was great.

Coming to what is, from our point of view, the practical question, how does this prospect affect American securities? Not very favourably, in our opinion; at least not in the near future. By and bye, when the war is over, and the Spaniard cleared out of the West Indies, as he is bound to be, there might come a great trade revival in the American Union which would lift numbers of her railroad securities, of her municipal and land company bonds, even of her brewery companies' shares, into a much more satisfactory position than they now hold. There is "a long row to hoe" before that time arrives, in our opinion, and, thinking this, we hardly deem it prudent to buy any of these classes of securities just now in the hope of immediate profit. Peace seems to have been, in market phrase, already "discounted" on the Stock Exchange, so that its actual attainment might very well be followed by a collapse in markets. For the United States will be in some ways an entirely different country at the end of this war to what it was before the war began. It will be a country with international responsibilities. In one sense, it always has had these responsibilities, but the habit of its political thought was to pass them by and ignore them. No interference with the affairs of distant nations was countenanced by any party in the body politic. Now this will all be changed—must be changed. The United States will have to keep the Philippines when they have conquered them, as they will, as well as Cuba and Porto Rico; and in holding Cuba they become one of the Great Powers with whom the destinies of the world's future rests. This will necessitate the creation of at least a large navy, in order that the great Republic may be able to speak with authority when international questions in which it is interested come up for settlement; and the creation and maintenance of a great navy must involve many changes in taxation, as well as some difference in the habits and conditions of life for the American people. Once embarked upon a large naval expenditure there is no knowing where the Union may travel to. Public burdens will be increased, and the development of the country perhaps be in some directions arrested. Even if not, and we hope not, it will be just as well for us as mere investors to wait for a time to see what is likely to ensue from the present endeavour of the Union to put an end to a state of affairs in Cuba which has been more or less a nuisance to it ever since the Declaration of Independence. The States had to undertake this job, and we believe good will come to them for having undertaken it, but the good may neither be an overflowing treasury nor an immediate expansion in commercial prosperity.

The Development of China.

It seems to us that the most important lesson to be learned from Mr. Consul Bourne's valuable report on the trade of Central and Southern China has been somewhat overlooked. It would be advisable for those who are contemplating the investment of money in the syndicates and companies which are being organised to "open up" China to read this report with great care. We have seen lately statements put in circulation that most valuable concessions—the building of railways, working of mines, &c. — have been obtained by English capitalists, or English and Italian combined, and the quotations for the "first crop" shares of some of these embryo companies are already extremely high. We earnestly hope that these preliminary flourishes do not signify a thoughtless speculation on the part of the public, in which they could only lose the whole or the greater part of their

money. That China is in some respects a great country, with an immense, very poor and hard-working population, is true, but it is a country whose development cannot be forced. The largest province which Mr. Bourne visited, that of Su-chuan, has a population, according to some reckoners, of 70,000,000, and it may in reality amount to 50,000,000, or half the entire probable population of the African continent. Into this province British goods at present find their way with difficulty by the Yang-tse river. All over China our productions might find a greater market than they do now, were the facilities of transport greater and the taxation more honestly, moderately, and intelligently applied, but what a deal these desiderata imply.

Yet there is one great distinction between the position of China in relation to trade and that of Africa. While the African for the most part requires no clothes by reason of the climate, all over China cotton clothing is worn by the people, in greater or less quantities according to the season of the year. At present in provinces like Su-chuan and others of Central and Southern China much of the cloth worn is of native manufacture, and of late years a great increase has taken place in the export of coarser Indian yarn to be woven up into cotton clothes by the native hand-loom weavers, whose wages, Mr. Bourne calculates, come to about 1s. 6d. a week in our money. Also in some parts of China native capitalists have endeavoured to establish cotton mills, and it is probable that in the near future mills under European management, and supplied with the modern appliances of machinery by European capital, will spring up in various parts of the Yang-tse Valley more particularly, and supply a large part of the native demand for the coarser kinds of goods. We in this country can only hope to continue to supply the well-to-do few in China with the finer kinds of cloths that the East, whether Chinese or Indian, is in no position at present to supply. Some day, perhaps, our most formidable competitors for this trade may be the Japanese. At present their competition is not sensibly felt, but there is a certain amount of rivalry between our manufacturers and those of the United States, and in course of time we may have to fight hard not merely to extend our trade, but to retain what we already possess.

Remarks like these, however, deal only with the more superficial aspects of the great question now forced upon us by the changed conditions appertaining to our relations with the great, but perhaps moribund, Chinese Empire. Capitalists here dream of spreading a network of railways over the great territory of that Empire, of digging out its minerals, of which there are plenty all over the more upland portions of the country it would seem ; and it is probable that we shall be invited to subscribe the capital for this and the other enterprises, destined to bring large returns, we shall be told, to the men bold enough to be first in the field. We are unable to see the grounds for this sanguine view of these developments, either in the present condition of China, or in the possibilities of the near future. A country where the cost of labour is so low that swarms of heavy-laden porters are able to make a beast's living by carrying goods over difficult mountain passes in order to escape payment of a local tax, which may not in the worst case amount to 5 per cent. on the value of the goods, does not seem to be a country ripe for railway development. Transport unquestionably requires to be improved, but we think the efforts at improvement should be directed in the first instance to the waterways. There is the Yang-tse River itself, for example, which is navigable for 1,000 miles from the sea up to Hankow by ocean-going steamers, but a little beyond that becomes a rapid stream, sometimes flowing with great swiftness, in a narrow channel between gorges for a distance of 100 miles. All goods have to be hauled through these rapids by gangs of men, sometimes as many as 300 being attached to one boat. The labour is prodigious and cruel—"no slaves ever did such work"—and yet so extremely poor is the bulk of the population of China that there seems to be no difficulty whatever in obtaining any number of men to carry on this traffic.

It seems to us that if this stretch of rapids on the great river could be made navigable by steam vessels, either by clearing the channel at various points, or by aiding these steamers with tow ropes and chains at difficult rapids, a stimulus of great value would at once be given to the trade of Western China. Beyond Kuei-Chou the river opens out again, except at one or two points ; and it or its feeders are navigable to boats for many hundreds of miles all over the province of Su-chuan, and down, one may say, into the province of Yun-nan, at present supplied with European goods, English and other, through the French territory of Tong-king.

Were our capitalists to devote their attention to enterprises of this kind, and obtained the permission of the Pekin Government to put steamers on all the navigable waterways of the Yang-tse basin, as well as on the Yang-tse itself as far as it is opened to navigation, greater help would be given to the development of trade with the interior of China than anything we can for many a long day hope for from the construction of railways anywhere in the Empire. Probably tramway lines and light railways might be useful at various points to bring goods to the nearest port, but we doubt if even these should be at once undertaken until some other means of existence is found, such as work in mills, foundries, and mines, for the swarms of labourers who may be thrown out of work by such a revolution. Mr. Bourne suggests one way by which a great deal of good might be done, not only to our own trade, but to the industries of China themselves. In dealing with that great province, Su-chuan, he points out that it is unable to import goods sufficient in value to balance the value of its exports, and that consequently exchange with the coast is always in its favour. This leads him to infer that if British merchants would train assistants and representatives in the Chinese language and in knowledge of business, and send these up to the interior to, as it were, tap the splendid resources of the Great Red Basin of Su-chuan that province might become in a position to export enormous quantities of its products for which there is now no outlet. What it chiefly sends now is opium, but the inhabitants who cultivate, as so many of the Chinese do, their land like a garden, would be able to supply much larger quantities of silk, of insect wax, of wool, bristles, hides, fur, feathers, and probably many other articles, now either exported in small quantities or not at all. As this export trade developed so would the import.

What is wanted there and elsewhere is guidance, and the stimulus of minds more enlightened, less conservative, and better educated in the world's wants than the

highest classes of the natives. After a time, when the trade in the products of the soil in this and other parts of the interior had been developed, it might be well to lay hold of the mineral wealth to be found there, and as the necessity arose for coal and iron more particularly, railways might be constructed which would enable the products of the mines to be utilised more economically than is possible now. For a time, however, the great waterways of China must remain the principal channels of communication between the interior of the country and the coast. Goods will pass up and down not only the Yang-tse River but the West and South Rivers and the Hoang-Ho, which are either navigable for great distances or can be made navigable. At present, as we have said, the principal part of European trade with the south of China, that at any rate with Yun-nan, goes through Tong-king *viâ* the Red River, or through Hong-Kong *viâ* the West River, and it is probable that if the French adopted a liberal policy towards this transit trade they could control almost the whole of it in the south-west of China, to the exclusion not only of Hong-Kong but of the Burma route, over which we talk of throwing a railway connecting Yun-nan with Eastern Burma. At present, however, the French, who have been very energetic in compelling the Chinese to abandon their local squeezes and allow goods to go through under transit pass to their destination, have almost counterbalanced the advantage thus obtained by the heavy taxation they themselves levy on all goods other than their own passing through their territory into China. As long as this obstructive policy is adhered to the opportunity is given to us to develop our business with that part of the Empire either from Burma or through Canton and Hong-Kong, or by the Yang-tse River, made navigable up to Sui-Fu for steamboats.

But before anything can be done there will be a great deal of friction to be overcome in dealing with the arbitrary local taxation everywhere hampering trade throughout China. We have not space here, nor is it necessary, to go into the details of "likin" dues, of "Fu-shui" and "Kuan-shui," and the various forms of taxation applied, in various degrees of arbitrariness, to traffic from beyond sea passing into the country, but we may mention one example that Mr. Bourne gives. "There are," he says, "twelve likin barriers between Chinkiang and Huai-an Kuan on the Grand Canal, a distance of about 130 miles, and there are thirty-six customs and likin barriers on the Grand Canal between Chinkiang and Chi-ning Chow. Goods pay likin at every other barrier unless under transit pass. The rate for a piece of grey shirtings, according to the printed likin tariff, is about 4·2d. a piece at every other barrier, equivalent to 33 per cent. *ad valorem*, for a distance of 130 miles." This may be an extreme instance, but it serves to illustrate the gigantic task which is before the Imperial maritime customs service in straightening out this tangle of impositions, for many of them are nothing less. We shall not be in the least surprised to find that riots, and even more serious disturbances, may occur within the next few months, or years, in various parts of China as a result of the efforts of European administrators to bring order out of chaos and enforce free transit of goods throughout the country on one payment of a fixed duty covering all these petty local exactions. Such a reform means money taken out of the official pockets.

There is a great deal more of interest in this instructive and valuable report, but we have gone as far with it now as we have space for and must leave it with this recommendation: before putting much money in any Chinese enterprise, however tempting, investors in this country should carefully weigh the information publications like this give them. They cannot master that information without coming to the conclusion that the development of China must be a slow and laborious undertaking, subject to many disappointments and many set-backs. A new relationship is coming into force there between European countries and the Chinese, and it is not going to be established in a day or in many years. But it is worth establishing, and if we are alive to our mercantile interests, active and energetic, we might even at this late day be able to find compensation for the decadence of India in the development of China. Anyway, this is a better piece of work to try to do than any offered by "Empire expanding" among naked savages in tropical climates, into which we have been drawn by the blandishments of the dishonest company promoter.

The Confiscation Bill of the Council of Foreign Bondholders.

So the House of Commons Committee has found the preamble of this Bill proved. We are sorry for this, because it means that the Bill will go through unless vigorously blocked and opposed in the House, as private bills seldom are. It is a Bill for the confiscation of property and for the erection of a co-optative "Council" into an irresponsible oligarchy empowered to negotiate debt compositions with foreign States. In its old form, and thanks to its defective constitution, the Council did incalculable mischief to the creditors of defaulting foreign States. In its new it can hardly help being completely pernicious, the mere tool of the loan monger and "market scooper"—of the men and firms that trade upon national insolvencies and make fortunes out of defaults and compositions.

We have read the proceedings of the Committee on the Bill promoted by Sir John Lubbock, and find the common opinion expressed by the witnesses is that a reconstruction is necessary; but the evidence presents some striking features of disagreement. To the extent of our knowledge points should have been made which were in some cases passed over by both parties. One, relating to the original subscriptions, was referred to by one witness under some disadvantage. He was not free to open an argument. As the founders of the Corporation were to receive services free, but were to profit by the fees paid by those (not members of the Corporation) to whom services were rendered, the subject is important to original subscribers. Let us, therefore, retell the story in a few words.

The subscriptions of founders were received upon that basis; but when a Royal Charter was found by the "promoters" to be unobtainable the funds provided were disposed of in a way that deprived the founders of the advantages promised in the shape of profits to themselves. No consent was asked for, and the information that this had been done was only given after registration under limited liability (without the word limited) had been effected. The founders were (according to the reports of the Council meetings

in 1873 and 1874) urged to give up the idea of profits, because the Council would act "gratuitously." Later on, the Council ceased to act "gratuitously."

It appears that the founders of the Corporation, when the one part of the agreement upon which they had subscribed (the return of £100 from moneys earned by means of the capital sum they had provided) had been fulfilled, were so doubtful of the further value in their certificates of permanent membership, that some certificates were sold as all but valueless—two to clerks of the Corporation at the prices of £1 and £3 each. It was stated before the Committee that these transactions caused anxiety. The witness who offered this evidence said he feared that certificates might be bought up by a clique and the purposes of the foundation of the association defeated; and he proposed to refer to the newspapers in support of his view, but that was objected to.

We have taken some care to look up the newspaper reports of the Corporation meetings as well as the reports of the Council. It is evident to any intelligent reader of those documents that the idea of a division of profits was merely a suggestion made with the object of giving them value. They were to become a desirable property in the hands of holders of foreign bonds, who were to be moved (by that or some other means) to influence and act upon the members of the Council in what concerned foreign bonds. The newspaper criticisms to which Sir John Lubbock so emphatically objects, will, if perused, show that the Council has not acted upon the lines laid down at the public meetings held in 1868 and 1869. It was and is objected that holders of foreign bonds are not adequately represented upon the Council, and that the Council has become an agency for the exoneration of defaulting foreign States from their liabilities. The co-optive system has been attacked at successive meetings of the Corporation, because the Council has practically aided defaulting Governments to impose their own terms upon their creditors. Does Sir John Lubbock propose to remedy this cardinal failure? It was not even mentioned before the Committee. Will he go on as before? Having introduced new men without any provision that they hold foreign bonds, or represent holders of such, will he renew under the provisions of his Bill that condition of things which the public Press and the Stock Exchange alike deprecate? To this question the evidence laid before the Committee affords no answer.

The next subject is that relating to the great number of transfers of certificates of permanent membership referred to in No. 53 of the Investors' Review, September, 1897, and No. 6 (new series) February 11, 1898. It is well known that many members of the Stock Exchange have unsuccessfully sought to acquire certificates by means of applications at the Council House. The Council have failed, although the subject has been discussed at public meetings of the Corporation, to offer facilities to purchasers of certificates offered for sale by keeping a list accessible to inquirers. Has Mr. Cooper, the secretary of the Council, been employed by the direction or at the request of Sir John Lubbock or others, members of the Council, in procuring certificates during 1895, 1896, and 1897 for friends or acquaintances for voting purposes at the meeting called to approve the Bill in November, 1897; and, of the purchasers enrolled as members during those three years, how many did, consequently, vote for the Bill? We cannot say, but we do know that some certificates were sold on the Stock Exchange, and we take it that their purchasers did not vote with the Council. Our inquiry, however, relates more particularly to the action of the secretary, and is whether he acted for or by the instructions of members of the Council. If he did, we leave it to any of our readers to say whether votes acquired by his action were rightly and honourably made use of. This matter ought to have been brought before the Committee, and ought now to be inquired into as it has not yet been examined. Was there no means of compelling Mr. Cooper to give evidence, even though he was not called by the counsel for the Bill? No evidence was offered showing how the Council had taken upon itself to act directly in opposition to the interests of bondholders, and in opposition to the principles set out *ab origine* to be adhered to.

Sir John Lubbock was allowed to refer to the "votes of thanks" the Council had received from foreign bondholders. Should he not have been questioned whether the resolutions for those votes had or had not been prepared by the secretary of the Council, and whether the bondholders had or had not been asked to bring them forward? Whether they were or were not spontaneous votes? We are inclined to ask, further, whether the farce that the division of profits is the one object of dissentients was not too elaborately played? The certificate holders found the money to enable the Council to enter upon the protection of holders of foreign bonds, reserving certain advantages to themselves. The Council undertook to act and would only consent to act "gratuitously." The "promoters" did not, according to the evidence of a very positive character, call their co-founders together to ask their consent to registration under limited liability, doing away with the advantages they had reserved to themselves. The promoters acted first and urged afterwards, that as the Council would only act on the "gratuitous" principle, so the subscribers of funds must be content to receive £100 back, with 5 per cent. interest, whenever the money might come in wherewith to pay. Money did not come in at first, and shares, or bonds, whichever or however called, were sold at prices much below £100. Peru, a very much mismanaged business, was the cause of this. But the Council got tired of the gratuitous principle. One of its members declared afterwards that a quorum could not be easily got together when no fees were allowed to the Council. The Council, however, resisted any departure from the gratuitous principle on the part of the general body of members, who were told of the services of the eminent men placed at their disposal for the paltry sum of £100 a year each.

The Council next took opportunity—or its apologists did—to represent those who stated that, having subscribed funds to establish business, they wished to profit by the advantages they had stipulated for as "covetous," or asking what they had no right to. This question of right to assets has been discussed, according to the reports of the Corporation, and the suspension of a solution agreed to as being at that time premature. We ask, for we do not suppose that Sir John Lubbock was consulted concerning the earlier proceedings by which the advantages to subscribers were thrown over without their consent, whether Sir John Lubbock or the Council can honestly say or feel that they are doing justice in using the influence of their position and their names in

forcing the general body of proprietors to a decision by a vote of Parliament, when they have taken those proprietors by surprise in the preparation—it may almost be said secretly—of a Bill which no one of them could study, digest, and act against, if so minded, in the five days during which action was possible? The evidence shows the great disadvantages under which the Bill was opposed. The learned counsel opposed to the Bill made a strong case; but the system, foresight, and preparation of the case for the Bill, with the admission of its opponents that a reconstruction is necessary, led—it seems to us naturally—to the decision come to that the preamble has been proved. Given that Sir John Lubbock held the purse-strings, that he had taken every care to exclude those opposed to the Bill from any material means save those derived from the introduction of their hands to their breeches' pockets, and it is no wonder that he succeeds so far. The public spirit of the opponents to the Bill is to be praised. The individual interest of each individual proprietor being so small, it is wonderful that any could be brought together to bear an expense out of all proportion to that interest. The public Press, the Stock Exchange, and individual bondholders have repeatedly expressed their disapprobation of the way in which English holders of foreign bonds have been guided by the Council into disastrous compromises, but all this was left out of sight.

We ask whether the Council do not place an excessive number of their own members upon bondholders' committees, and whether they, the Council, or their secretary, do not negotiate in place of the bondholders' committee itself? Whether the choice of agents is, or is not, made with adequate prevision? Whether the Council, in fact, does not predominate in all arrangements of the kind? The general idea is that committees are powerless, and the Bill will place them absolutely in the power of the Council.

Because this is so, we have no hesitation in the expression of a sincere hope that the Bill, in its present form, will not pass. It would violate principle in deciding as to the property rights of the subscribers without evidence. It would perpetuate a system which has proved injurious to the interests of the holders of foreign bonds. It would create the evil, long ago foreseen—an institution where, if the funds could not be divided, they could be applied in pensions, fees, and salaries to functionaries, who would do no good, but infinite harm, should they continue to relieve, on easy terms, foreign defaulting States from their liabilities.

To sum up, the course followed has been to divert subscribers' money so that they get neither profits nor other advantages. Having bagged the profits, the next step the Council took was to devote them to the payment of salaries or fees to its own members. And now as a final wind up it is proposed by this Bill that the accumulated unspent profits of the business shall be declared not to belong to those who self-denyingly subscribed funds to establish the Corporation, but to the small body which alone has hitherto gained by its existence. Parliament is called upon to summarily violate the rights of property, and the process of trying the case and sifting claims in the Law Courts is carefully avoided. Why, by the way, was the Committee left in ignorance of the remarkable case relating to fees brought against Sir John Lubbock and his friends on the Council and settled by them on the threshold of the Court rather than face the ordeal of a trial? The whole story has an evil odour, but it is quite in keeping with the system whereby the Council has been made a close borough, a clique of commission earners, from which representative holders of foreign bonds are carefully excluded. Will Parliament now elevate this body, whose conduct in the past has brought loss on tens of thousands of innocent people, into the position of a sort of offshoot of the Foreign Office, and endow it with a quasi-statutory authority to negotiate and meddle in the affairs of people deprived of all control over it, and who would doubtless do much better if left to their own initiative? We can hardly believe it possible, and yet adroitness and choice of opportunities can do so much, and Members of Parliament are so indifferent and ignorant that, if vigorous opposition is not organised, with a little smiling and dining the mischief may be done. What, we wonder, has Lord Salisbury to say to the invasion of his functions by this proposed new body, to be started on its career with money not its own?

The Drought in Australia and Australian Finance.

An interesting article in the *Australasian Insurance and Banking Record* for April last informs us that the long drought in the Australian colonies has had a disastrous effect on their stock of sheep. The writer estimates that in 1897 alone New South Wales lost nearer 8,000,000 sheep than 6,500,000 to 7,000,000, and this loss fell at the end of a period of three years during each of which immense numbers of sheep perished of hunger and thirst. The other colonies suffered in the same way, so that enormous although their whole stock is now, it is less than it was four years ago. In 1891 the total stock of sheep in the colonies of Australia and New Zealand was 124,500,000, and in 1893 120,000,000. It is now estimated at 104,000,000. We must not stop to dwell on the morality of the shepherding which brings this condition of affairs about, nor on the cruelty displayed in the overstocking of sheep runs to so reckless an extent that a year or two of drought, such as must always be reckoned upon in Australia, causes the wretched animals to die by millions. Habit has made the Australian mind callous to this kind of suffering, and the death of a few millions of sheep by the most painful of all scourges, hunger and thirst, causes no more emotion than the destruction of so many flies by the first frost in autumn.

The economic side of the matter, however, touches everybody, both in the colonies and here, most nearly, and it is a very interesting subject to dwell upon. Unfortunately, the writer of the article gives us comparatively little data to go upon in estimating the probable effects of the prolonged droughts upon the finances of the colonial Governments, and, still more, upon the solvability of the land companies and agency companies in whose hands almost the whole business now is. But a table is supplied exhibiting the value of the Australian wool clip from 1880-81 down to the current year. From this we gather that since 1890 there has been almost no progress made in the output of Australian wool, so far as values go. In 1892-3 and 1895-6 the total values reached

£23,504,000 and £23,175,000 respectively, but in all the other years since 1889 the value of the crop, measured by selling prices in London, has fluctuated between £22,100,000 and £22,846,000, the lowest total being that estimated for the current year, 1897-8. In quantities also the progress has been remarkably small compared with that of the first half of the period under review, and it has declined every year since 1894-5. This is a most serious matter, and must bear severely upon the power of some, at least, of these settlements to maintain their position as solvent-looking communities. Were it not for the gold, which has been found in considerable quantities in most of these colonies, we fear it would have been impossible for them to stand up under the disasters which one after another have fallen upon them. Even this gold, however, will not always sustain the people in their endeavour to pay the interest they owe to creditors here, both on their public debts and on their private obligations to finance and land companies; and at any rate the struggle required to meet these obligations, public and private, must be increasingly severe as time goes on, gold or no gold. The population is expanding very slowly, immigration having all but ceased. The great mass of the people is falling into increasing poverty rather than rising in the scale of comfort; work is scarce in many parts of Australia, scantily peopled though the settlements all are, and not even the rigorous, and some think imprudent, economy practised in Victoria enables the community there to recover from the deadly blow administered to it by the financial crisis of 1893.

Most of these settlements continue, if their statistics are to be relied on, to import more than they export. This means that they continue to contract new debts, because, to be in a sound position, they ought to export much more than they import, in order to have the means wherewith to pay their debt interest in London. Their wool and gold, cheese and butter, timber and coal, horses and cattle, dead meat and hides, are about the only things they have with which to pay their debts; and if they do not export some fifteen or sixteen million pounds' worth more of these products per annum than the entire value of their imports they must somewhere and somehow be again running deeper into debt. The question is where and how? Debts, involving fresh burdens upon these settlements, must be accumulating, although they are not coming here to any great extent for loans, West Australia alone displaying dangerous activity in this direction. Where, then, are they getting the money? Are they depleting their banking balances? Are they sinking deeper into debt to the finance companies and banks? Is, in short, a new crisis in preparation for these colonies through their still improvident expenditure?

We have not the data before us with which to answer these questions, and probably no data will be forthcoming until another crisis does come; but we must never forget that a very substantial reserve fund was in a manner created for the people in most of these colonies by the methods taken to deal with the banks which stopped payment in 1893. The deposits then annexed and turned into shares, in spite of the amounts absolutely lost before the date of their appropriation, must have materially assisted the people in sustaining through the intervening years the struggle to appear solvent. And if the insolvencies of 1893 and earlier or later have from this point of view assisted in this direction, so also has every fresh supply of capital obtained here, no matter on what pretence. Pastoral properties turned into limited companies whose shares and debentures have been sold in London; mining companies created here and floated with large capitals, some portion of which is paid over to the Australian prospectors and promoters; mercantile businesses turned into limited liability companies in order to enable them to find money to pay off loans to banks and for other reasons. All these have contributed towards the "emergency fund," as we may call it, out of which the settlements sustain themselves and still continue to appear solvent to the eyes of the world.

But beyond all this there must be some hidden source out of which the severe losses of the past few years have been temporarily made good. It was not in the power of these colonies, not even of New South Wales, strong by comparison to the others as it is, to encounter the frightful havoc produced by the drought of the past three years without betraying great weakness and instability in credit institutions, unless the banks and finance companies and land companies had found means to make advances to enable the people to tide over the bad time. In themselves the colonists did not possess the resources for doing this, could not have done so, since the drought came upon them soon after the banking crisis had swept the means of so many of them altogether away. Nor were they aided by better prices for their products or by new channels of trade. Unless, therefore, a time of great prosperity should forthwith arise for all these colonies—larger crops of wool and better prices, outlets in the East and in Europe for their agriculture and dairy produce, large supplies of bullion from their mines, and so on—we must in all prudence look for a renewal of the same class of credit breakdowns which devastated them all in 1893. They cannot go on bearing the load they do, meeting the competition they have to encounter in the sale of their productions and enduring the loss produced by dry seasons without once again showing that they have overburdened themselves in the time of their exuberant youth to an extent which has left them without resources or without adequate recuperative power in times of difficulty. The unfortunate thing about all these colonies is that they have such a dead weight of debt to carry that even good years do not allow them to raise their heads out of the slough into which they have cast themselves. The best their people can do in such years is to wipe out a little of the losses accumulated during the bad years. They cannot soar above their burdens and become free of debt, either as individuals or States.

Economic and Financial Notes and Correspondence.

The Financial Troubles of Spain.

It did not require any gift of prophecy to foretell that Spain would not long have entered upon a state of war before she became bankrupt, and already her practical bankruptcy is beginning to show its fruits. The paper money of the Bank of Spain has sunk so far in value that it has become a paying speculation to pass in these notes to the Bank to be exchanged into silver, in order that the silver might be sent out of the country and sold for its bullion price. So severe already has been the depletion of the Bank's small stock

of silver on this account that between May 8 and 21 more than £1,250,000 of the metal had been withdrawn from the Bank, and the latest return showed a stock of only £4,330,000. The note circulation, taken at the conventional exchange, amounts to about £52,500,000 ; the Finance Minister, Senor Puigcerver, was therefore a very reckless man when he declared that the Bank had silver enough to exchange for all notes presented. It would not have that even if it bought silver, and coined it to the extent of the entire stock of gold still in its possession. It has been buying silver with somebody's gold in London, and the London bullion dealers have treated Spain precisely like a bankrupt. If the gold was at hand to pay for the silver bought, the silver was sold ; not otherwise.

In order to stop the drain of silver created in the way described, a law has been passed by the Cortes prohibiting its export altogether as a criminal offence. As Senor Calzado declared, this law is absolutely futile, but it has been passed to try to "quiet the public mind," and thus indirectly stop the drain of silver. It will not stop that drain—nothing can stop it in the present position of the paper money, which is at a discount fully greater than that of silver coins compared with the market price of the bullion. Years ago Spain lost all her gold money in circulation, and was only able to maintain a small gold reserve in the Bank by continually forcing out more and more notes. Now it is to lose apparently both that gold and what remains of its silver. When the whole of this bullion is gone what will be its position? What guarantee can it offer to any creditor? What security for a loan? Will the French bankers, desperate as their position must be in relation to Spain's debts, really have the courage to make an advance of £10,000,000, or any amount, however small, on any security that Spain can now offer? Do not these questions serve to indicate how perfectly hollow the pretences of solvency put forward by the present Government of this unhappy country have been for the last ten years at least? Spain is bankrupt, hopelessly bankrupt, and her bankruptcy is about to be made patent to the whole world. Happily for us, we have not believed in her solvency in this country for many a long day. The last default and rearrangement of her debt whereby the public creditor was cheated out of something like half his capital, an arrangement made and carried through by the Council of Foreign Bondholders in 1882, sufficed to cure the British investor of any disposition to again intrust his money to Spanish keeping.

In these circumstances it will be interesting to see how the Spanish Government fares in its attempt to contract a new loan of one thousand million pesetas in 4 per cent. bonds. This is nominally forty millions sterling, and the Bank of Spain is going to be entrusted with the sale of the bonds, utilising "its clients and correspondents at home and abroad to place the new issue." On what grounds can it expect to accomplish this gigantic feat? The existing market value of the sterling foreign debt of Spain stands around 33 per cent. of the nominal value, but the Spanish Government cannot expect to obtain the current market price for a new issue of the proposed dimensions—cannot hope to receive even 30 per cent. The loan, therefore, if sold, would not bring in more than fifteen millions at most, and how long will fifteen millions last at the present rate of Spain's war expenditure? We should judge not longer than eight or nine weeks. In other words, the situation is just about as hopeless as it well could be, and the longer it continues the more striking will be the folly of the Queen Regent's Government in continuing a conflict which it has not strength to sustain. But then it dare not yet make peace.

The Debt of Brazil.

It has been announced that an arrangement has been satisfactorily concluded for funding interest on the debt of the Republic of Brazil during the next three years. Instead of receiving cash for the interest due on this debt the creditors will get 5 per cent. funding bonds after the Argentine manner, and these bonds alone will receive interest in cash, secured upon the customs of Rio de Janeiro in the first instance, and on the customs of other ports should that be necessary. Doubtless this arrangement was the only alternative to complete default upon the foreign debt of Brazil. We cannot, however, say that we relish the plan very much. It gives a temporary breathing time, and prevents that discredit which an open suspension of payment would bring about ; therefore it also enables the loan mongers who conduct the finances of this Republic to manœuvre and struggle so as to bring about an appearance of solvency, such as will enable them once more to sell Brazilian loans to the investing classes of Europe. We may take this, indeed, to be the primary object. Such an arrangement as this is not undertaken for philanthropy or in the interests of the people of Brazil, but merely for the sake of the finance houses, whose occupation would be gone, and whose loss might be severe, did the States they nurse and choke the life out of with debt absolutely default. As to permanent benefit to Brazil from this arrangement we confess we can see none. At the end of the three years the debt will be increased by six or seven million pounds nominal, and Brazil will not be one single milreis better for this extra burden. Her enormous paper money circulation will not have been reduced, nor yet her heavy internal debt, and the more remote consequence of all this appears to us to be a break up of the loose-jointed Republic into fragments, and possibly the annexation of parts of it by foreign Powers such as Germany. Meantime, the market price of Brazilian bonds can perhaps be sustained on the bourses, and that, at any rate, may keep European financiers from despairing about recovering their losses out of investors' pockets.

The Affairs of the Central Pacific Railroad Company.

Mr. Morshead's committee—the Shareholders' Protection Committee—has sent us copies of a correspondence which it has had, or rather tried to have, with the Californian railroad "Boss" Huntington, and with Mr. F. C. Banbury, M.P. Neither of these men have answered the letters of Mr. Morshead. They probably thought it not worth their while. Nevertheless, in our opinion, if Central Pacific shareholders here, who have been robbed and defrauded in a manner so cold-hearted and shameless by the group of scamps who devised and built the Southern Pacific line at their expense, would only heartily stand together and support Mr. Morshead's committee, they probably have now a better chance of obtaining some of their money back than at any previous time since it was misappropriated in millions. They cannot themselves compel the thieves to make restitution, but the United States Government can, and its disposition is now so friendly to England and Englishmen as to make it advisable for those who have grievances against American citizens to strike the iron while hot. We published the Californian official presentment of the Central Pacific frauds in the Investors' Review for June and July of last year. Those who care to look that up and refresh their memories with it will find it curious and suggestive. The scandal it recites the history of is such as no Government could face, were the moral responsibility for permitting such iniquities to be committed once brought home to it. It is a specious theory that the big thieves ought to be let off, and only the small ones punished, and it has been a disastrous one many a time for the British investor.

Indian Currency.

The subjoined note, extracted from the financial columns of the *Indian Daily News*, shows what the business community in India thinks about the proposals of the Simla Government for giving an artificial standard of value to the silver rupee. It is a view in full accord with that of business men in this country,

but for that very reason, perhaps, the officials despise it. It is their misfortune rather than their crime to have been so mis-educated as to be quite incapable of taking a practical, common-sense view of business affairs.

Let no one be deluded as to the ultimate result of the new currency policy. Ten crores of rupees are to be taken from the currency reserve, to be melted up, and to be sold in India as bullion. It is expected that the ten crores will realise six crores, which are to be taken from the pockets of the people and locked up in the currency reserve treasuries. The difference of four crores is to be made up by £2,700,000 (the equivalent at 1s. 4d.) in gold, to be borrowed in London and placed also in the reserve treasuries. This will constitute one year's operations. Then the next year, or if in the meantime gold has not rushed into the country, the policy will be repeated, and a further six crores of rupees will be withdrawn from circulation, and so on. Now let there be no mistake as to the effect of this upon the money market. Already for the past two years we have experienced the devastating effects of a contracted currency, but these, serious although they have been, will be as nothing compared to the intense stringency which the new policy will produce. It must not be forgotten that it is not the Government's intention to provide sovereigns to fill the void caused in circulating medium; this is to be left for the public to do. That some gold might be forced out to India under the scheme we admit, but it would only be sent in cases of dire necessity. How could the investing public at home be expected to invest in industries in India when these industries are being strangled through the contraction of the currency, now to be greatly accelerated, and absolutely ruinous rates of interest which the accelerated contraction would produce.

American and Canadian Harmonies.

There was reason for the congratulations offered by the Opposition in the Dominion House of Commons on Wednesday to the Laurier Ministry for the success which had attended their negotiations for the appointment of an International Commission for the settlement of all pending differences between the United States and Canada. There was perhaps some reason also for the complaint of the Leader of the Opposition that the public men of the United States have scarcely understood the Canadians or sympathised with them as they might have done. But there was a great deal more reason for Sir Wilfred Laurier's suggestion that whatever the relations of the two States might have been in the past, it would be as well, at present, not to inquire too curiously who had been in the wrong and who in the right. The past may be forgotten. The new agreement will be of great advantage to Canada; it is a significant and gratifying indication of the cordial relations now existing between the United States and Great Britain, and probably Sir Wilfred is right in anticipating that the influence of these improved relations will extend "wherever there are nations which acknowledge the sovereignty of England." At any rate, there is ample ground for the general satisfaction expressed at the conclusion of this important agreement and at the evidence it affords of the very friendly feelings which animate the United States towards this country. At present there need be no talk of an alliance. That may or may not come. But there should be no serious difficulty in maintaining and strengthening the good understanding now established between the two great English-speaking countries. For ourselves, we are somewhat sceptical about the uses of treaty alliances. They are like written constitutions, apt to bring to the front, at moments of excitement, points of difference which, in the intimacy of diplomatic intercourse, would hardly be felt as serious obstacles to a good understanding. For the present, however, we cannot but be pleased with the early prospect of seeing irritating questions, not supremely important in themselves, but containing infinite possibilities of dangerous disagreement, finally settled in a spirit of friendly compromise. The three main questions are—seals, fishing rights, and tariff; and the importance of the tariff question will be easily appreciated when it is stated that at present more than a third of Canada's exports are taken by the United States, while more than a half of her imports are from the United States. The existing revenue laws seem framed merely to check and frustrate trade. In the present state of feeling there should be no difficulty in arranging a system which will reciprocally develop the trade of both countries, and so intertwine their various interests as to render future differences all but impossible.

Is there room also for the hope that the closer contact between Great Britain and America now likely to prevail may help to modify the craze there for "exclusive" tariffs? We are inclined to think so. The results of the Dingley tariff have been anything but an unmixed blessing to the trade of the United States. In some instances, at least, their home trade has been more damaged by it than the foreign trade against which it was meant to militate. It is probable that the irritation which has existed so long against this country may have unconsciously inspired these hostile tariffs. With the partial or total disappearance of this sense of irritation may there not therefore come a disposition to reconsider the tariff question, and to lean towards that freedom of trade which would be more beneficial to the United States than to foreign countries trading with it? That the American Government have no objections to special arrangements with other countries is shown by the convention just concluded with France. This convention is all the more significant in that it has been concluded at a time when the relations between the two countries seemed to be getting somewhat strained. By the convention the Dingley tariff is so far suspended, the most favoured nation clause is introduced, and France grants to the United States reciprocal advantages in the importation of pork, lard, and kindred products, which had recently been subjected to an increase of duty. The new arrangements are already in force, and the reductions in favour of France are estimated at two and a half million francs. But the arrangement is most satisfactory as indicating that improved relations exist with France as well as with England, and that America is showing more appreciation of the advantage of suspending rather than extending tariff restrictions. Let us hope that America is rapidly learning the lesson that these tariff restrictions are unmitigated evils, and had better be swept away altogether.

The Trade of Japan in 1897.

An interesting report on this subject has been issued by the Foreign Office, compiled by Mr. A. H. Lay, assistant Japanese secretary to her Majesty's Legation in Tokio. As was to be expected, the figures he quotes show a large increase both in imports and exports. The total of the imports amount to £22,828,683, and the total of the exports to £16,398,212. This is an increase of £4,075,294 in the imports, and of £3,769,190 in the exports compared with the returns for 1896. Japan, therefore, is extending her trade with great rapidity, but not quite on safe lines. Indeed, as Mr. Lay points out, the position of the country is fully worse than even these figures reveal, because imports are taken into the returns at the original cost of the goods at the place of production. Add 15 per cent. to this, and we obtain a total of £26,269,968 as the true cost of her imports to Japan. Assume that the same addition has to be made to the value of the exports as representing the profit to the exporter, and still the trading account of the country is in a position very far from sound. Japan, notwithstanding the large sums of money paid to her by China as indemnity, is rapidly assuming the position of a debtor State. Her Government owes money abroad, and her people have no foreign investments to set against this debt. The nation, therefore, depends upon its trade for the means to pay its way, and it cannot go on buying goods to a larger extent than the value of its sales of goods abroad without falling into a position of great danger at home. A continuance of imports largely in excess of the value of the exports must mean, before long, a steady drain upon Japan's metallic money, and if continued long enough it would throw the country into the disastrous chaos of a forced paper currency. We hope better of Japan and of Japanese energy and ability than such an end to her finances would lead us

to imply; and it is no doubt the case that the money obtained from China explains to a considerable extent the excess of imports at present. Great prudence and energy, however, will be requisite to prevent the country from continuing to be extravagant, when the means justifying her in a measure in being so have been exhausted.

The Italian Trouble.

The Ministerial crisis in Italy seems to show that the real lesson of the recent revolutionary riots has not been learned by the ruling politicians. The Marquis di Rudini has quarrelled with some of his colleagues because he either cannot or will not recognise the profoundly disturbing influence which the vicious economic condition of Italy exercises upon the fortunes of the country. It was hunger that led to the recent rioting; the Marquis di Rudini seems to see in these riots only the hand and head of the designing priest. The Government have been active in suspending ecclesiastical newspapers, in suppressing Catholic clubs and other semi-ecclesiastical associations. Now it may be perfectly true that the priests have been active and crafty agitators. The Archbishop of Milan was culpable in fleeing from Milan just at the moment when the rioting commenced. The Pope was certainly very mild in his rebuke of the Archbishop, and seemed specially anxious to turn the occasion to the detriment of the civil government. But to begin a struggle with the Vatican now would serve no good purpose. On the contrary, it might do considerable mischief. It would raise the cry of persecution, and help rather to strengthen than weaken the ecclesiastical authorities. We have very little doubt that the priests have, in a way, been agitating against the Government, and doing their best to foment discontent; but the Italian Government have supplied them with a most fertile field for activity in oppressive taxation, extravagant expenditure, and constant endeavours to play the Great Power, even if the country is ruined in the process. The Government may close every Catholic club and suspend every ecclesiastical journal in Italy, but they will be no nearer a solution of their accumulating difficulties. Rather will they be further from it, for priestly irritation would only be intensified and priestly agitation redoubled. The first duty of the Italian Government is to encourage the development of trade and industry, to relieve it from the heavy taxation which is choking it, to reduce the national expenditure, and to moderate Imperial pretensions. Only thus can they free themselves from apprehensions of priestly machinations and of that revolutionary movement which will dog their steps until they have forsaken their present methods of administration and assumed the proper functions of industrial government.

Russian Shipping Innovations.

The law promulgated at St. Petersburg the other day relating to Russian registry for foreign-built ships is likely to prove a rather good thing for British shipbuilders, and a rather bad thing for British shipowners. All the maritime nations of the Continent have for long been possessed with a desire to strengthen their several mercantile marines, and Germany is the only one which finds itself in a position to produce first-class steam and sailing vessels capable of comparing, for cheapness of construction and general efficiency, with British-built ships. Even Germany cannot do this with no aid whatever, and as for France, Italy, and Austria, they have found their aggregate tonnage decline year by year in spite of the generous support accorded through the medium of bounties not only for construction but for navigation as well. France, indeed, offers to the world the pleasing spectacle of a bounty system that is self-destructive. Its shipbuilders are granted allowances on the basis of tonnage and (in the case of steamers) horse power on all the vessels they turn out of their yards; but all the advantage that might be supposed to be derived from this is swallowed up by the heavy cost of materials of construction, and as for the navigation bounties—which take the form of a premium for every thousand miles traversed by French-built ships between home and foreign ports—they are rendered nugatory in large measure because of the large initial outlay, though it remains that the French shipowner has a far better chance of making money out of the system than the French shipbuilder.

Russia has refrained from adopting this policy. It is unable to produce modern vessels on a commercial basis, but it has endeavoured hitherto to afford some degree of protection for its own industry, such as it is, by charging a duty on ships acquired from abroad for the foreign trade and by imposing stringent regulations for the control of the coastwise and inland sea trades. The latter it proposes to aid still further by the imposition of duties which in the case of iron sailing vessels purchased from abroad will run to twenty gold roubles per ton, and in the case of steamers twenty roubles per ton in addition to three gold roubles per square foot of boiler heating surface. But foreign-going vessels of iron and steel will be exempted from a tonnage tax for ten years from July 1, old style; and it is here that the British shipbuilder will have a look in. Some of the vessels to be acquired will no doubt be second-hand, and of a character which it will cause their present owners no pang to part with at a fair figure. But probably the better half will consist of new vessels, mostly steamers, which, along with the second-hand ones, will be employed in competition with British ships in trade to and from Russian ports.

The Welsh Strike.

The end of the South Wales coal dispute, we fear, is not so near as was expected. All that can be said of the conference between employers and colliers at Cardiff is that points of disagreement were more conspicuous than points of agreement. The employers adhere, at least in principle, to the sliding scale arrangement. The men suggested a conciliation board, composed of owners and colliers, with an umpire to be called in in the event of disagreement. The employers, however, emphatically rejected the proposition. Nor would they listen to the demand for an immediate advance of 10 per cent. in wages, in view of the high cost of working and of the fact that many of the collieries had been worked at a loss. The price received for coal from time to time had always been and must continue to be the factor governing wages, whether in the exact form of the agreement recently in force or not. The reply of the workmen to this was that the wages should regulate the price of the commodity rather than the price of the commodity wages. This is rather an ancient notion, which would be comfortable and comforting for most of us if only it could be generally applied. But that is impossible. The masters would doubtless be glad to apply it also in arranging the scale of profits, but do what traders—colliery owners and others—will, prices will rise and fall, and if wages—and profits, say—are only to be subject to a rise, it does not seem clear how business could be conducted, at least under such conditions as those to which we have been accustomed. Attempts have been made to regulate autocratically the rate of wages, but they have invariably failed, and if workmen were strong enough to enforce such a provision as that suggested by the Welsh colliers, they would have to prepare themselves for a very serious contraction, if not extinction, of the trade done by the United Kingdom. The result, indeed, would be disastrous for both masters and men. But the conference has been adjourned until Saturday. Let us hope the workmen will by that time have more carefully considered their suggestions, will have discovered their impracticability, and be ready to accept some more rational scheme. If not, there seems nothing for it but the indefinite prolongation of the strike. The employers spoke with emphasis and decision; and it can hardly be expected that they will waste time and effort in the discussion of crude fallacies such as were served up by the colliers' representatives at Cardiff on Tuesday.

Another Chilian Loan!

We regret to see the announcement in the papers that the Chilian Government is endeavouring to raise yet another loan, a loan in Germany of 80,000,000 marks, or say in round figures £4,000,000. Amid all the afflictions through which this interesting and progressive Republic has been passing we have stuck by her and spoken well of her, hoping the best and believing in the honesty of her administration. To a great extent we adhere still to the opinions on this point so often expressed in this Review. At the same time a feeling of doubt, if not of alarm, begins to occupy the mind lest Chili should be plunging into debt beyond her depth. Including her internal burdens, her public debt now approaches £20,000,000, which is heavy for a population of less than three and a half millions. Indeed, the present burden of the State could not be carried but for the fact that Chili has obtained for many years a large revenue from the heavy export duty she levies on nitrate of soda, a product she fell heir to after the war with Peru. Out of the total revenue of less than 80,000,000 pesos, nearly 40,000,000 pesos came last year, or was estimated to come, from this nitrate export duty. But there is reason to fear that the trade in this alkali has been much injured and impeded in development by this taxation, and we cannot at present regard the revenue from this source as other than precarious. Even if it were an assured revenue, surely great weakness is exhibited by the determination now expressed to pledge it specially for a loan. This means that a valuable security is to be taken away from the existing debts of the Republic, a security pledged to them, and we are sorry to see the Chilians entering upon such a doubtful course. Sorry also are we to find that they cannot do without more European money for a few years. They must be suffering from causes of depletion which are unknown to us. Perhaps the resolute adherence to an honourable endeavour to restore their currency to a fixed gold valuation of 1s. 6d. per dollar, or peso, has something to do with these continually recurring appeals of the Government to the European moneylender. We trust patriotic Chilians will earnestly endeavour to direct their country's interests into a better way in the near future. If they fail in this the Republic runs in danger of going the way of so many of its neighbours.

The Capture of Lake Tsad.

Of what has our Colonial Office been thinking? Where has Mr. Chamberlain, where Sir Ellis Ashmead-Bartlett been, that a French expedition has been allowed quietly to slip into possession of Lake Tsad, or Chad—the exact spelling being, of course, a matter of minor importance? The essential thing is that a huge lake in the north of Africa, in the Soudan itself, has been captured by the French, when, according to all proper Imperial notions, it ought to have been included among the infinite number and variety of Imperial claims we have been assiduously pegging out all over the world for our especial posterity. How posterity can get on without it it is difficult to conceive. What Sir Ellis Ashmead-Bartlett's feelings must have been when he read of the success of the Gentil mission we almost shudder to think. What he may say to the Colonial Office when he has summed up the full measure of its negligence in this momentous matter we leave to the imagination of others. The Colonial Secretary must prepare to face searching questions on the subject, and the Colonial officials had better immediately look up the geography of the region. It is a wonderful lake. It covers some 10,000 square miles in the dry season; and in the wet expands to some four or five times that extent. It has no natural outlet, but occasionally flows over into a great sunken plain 300 miles to the north-east. How many mills might not be kept grinding by such a volume of water! No gold is yet reported to have been discovered; but that, no doubt, only awaits the shrewd labours of a keen-witted syndicate clever at prospecting and at drawing up prospectuses. If there be difficulties in the way of constructing a railway from Lake Tsad to Khartoum or Cairo, natural canals abound, and their extension would offer no serious obstacles to enterprising syndicates. There are numerous islands in the vicinity, with a considerable population of semi-amphibious negroes. These may be cannibals now, but doubtless they could easily be converted into an imposing army of cheap and willing labourers. Why was such a noble possession allowed to fall into the hands of mere Frenchmen? Must we indeed regard it as theirs hopelessly beyond dispute? Is not the whole Soudan and all that to it appertains clearly within our sphere of influence? Mr. Chamberlain should be up and doing. Another warlike speech at Birmingham might help us. Some portion of the Reserve might be called out. But if Lake Tsad is permitted to be annexed by the French without protest or demand for "compensation," how can we avert the reproach and scathing scorn of posterity?

Industrial and General Trust.

It was a graceful and a wise measure of this board to withdraw the resolution which would have altered the Articles of Association so as to lead to the cessation of the publication of the list of investments. After the painful history of the old company it would have led to all sorts of anxieties as to the management of the board, and would have certainly caused the stocks of the Trust, which we consider to have improved much in intrinsic value of late years, to deteriorate in public opinion. Criticism has certainly been directed to the list of investments—we ourselves sharply criticised certain holdings—but we fancy the board would be the first to admit that the securities we picked out were not even of mediocre value. Criticism of this kind is precisely what a trust board requires, and it was the absence of it that assisted the previous board to play ducks and drakes with the money of their shareholders.

Protection Shackles in Germany.

Germany, if we may trust our Baden consul's diagnosis of the situation, is bent on more thoroughly shackling her home trade than it even now is. The urgent calls for this policy originate, as they mostly do elsewhere, with the landed interest. That wants higher duties on agricultural imports. This seems most surprising in Germany, of all places; for probably in no other country, as we have before shown, is so much done for the encouragement of agriculture and the assistance and education of the agriculturists. Better equipped for the struggle of industrial life than their competitors in other countries, why should German farmers insist on the coddling of protective imposts, and avow themselves eager to accept the enervating influence of State alms? Natural laziness may account for much; but what is there in agriculture which makes so many of its followers calmly insist that it cannot possibly stand on its own legs: it must be propped? German foreign merchants are showing no slackening of energy or enterprise; but what would happen if they were to demand a subvention from Government, because they find it difficult to make big enough fortunes in these times of increasing foreign competition? Their claim would be at least as reasonable as that of the farmer. But it is expected that the German Government will grant the demands of the native agriculturist as soon as existing treaty engagements permit. Mendicity is to be encouraged. The industrial classes may complain, but they will have to pay, though they may ask for and receive the fatal gift of higher duties on foreign manufactures, so that German home business may the more thoroughly be crippled. It is the old vicious cycle. Our consul thinks the result will be that Germany "will become more and more dependent for her export trade upon Great Britain and the British colonies." Of course it will. Yet our "fair" traders would have us throw away such advantages by adopting the Protective system ourselves. But we know too well the blasting influence of such a policy. Only hard experience apparently will teach Germany. Her profound

philosophy seems hardly to include political economy. It is unfortunate for her; but she might easily know better and do better if she would.

The Exploration Company.

The resignation of the Hon. H. C. Gibbs from the board of this company is probably of no immediate interest, but the fact may come to be important when the history of this concern is written. The quotations of the mining issues of the Exploration Company still seem to suffer from dry rot, or the dribbling out of shares upon a market reluctant to purchase, and since our article upon the company in the issue of January 21 last, there has been considerable depreciation, as the following table, which we bring up to date, sets forth :—

	Price at or about Special Settlement.	Highest Price.	Price Jan. 20.	Present Price.
Anaconda Copper ...	6⅛	7⅜	5 11/16	5
Aroha Gold Mines ...	1½	1¾	⅛	1s. 6d.
Beacon Gold Mines ...	1 5/16	1	⅞	—
Cons. Goldfields N. Zealand	4	4⅜	2⅜	2
Grand Central	2 5/16	3½	1⅝	1 11/16
Lake George Mines ...	2 3/16	2¾	2½	¾
Norseman Gold Mine ...	7/16 pm.	2	⅜	7/16
New Zealand Crown ...	2 1/16	2¼	¼	¾
New Zealand Exploration	*	3⅜	¾	¾

* No price obtainable about this date.

As we explained on January 21, the Special Settlement usually fixed the date of the commencement of market activity in these shares, which generally were issued without the advertisement of a prospectus. Launched usually at a high premium, the quotation advanced further after the Special Settlement and then seemed to experience a "burst up," with the melancholy result set forth in the prices now current for the shares. The above table is clear proof that a buyer of Exploration specialities should not come early into the market, and we should imagine that those who do not touch the shares at all will get off best. Yet there are people in the City who speak of the Exploration Company with bated breath, as if it were one of the solid buttresses to trade and commerce!

The Suez Canal.

Though the directors of the Suez Canal Company, in their report to the meeting of shareholders to be held in Paris next week, announce a falling off in traffic for 1897 of over £260,000, the report cannot, on the whole, be considered an unsatisfactory one. Much of this diminution in traffic is attributable to temporary causes, such as the famine and plague in India and the decrease caused in Australian traffic by the drought and the great mortality in cattle. This temporary character of the diminution of the traffic is further shown by the fact that, so far, this year's returns indicate a substantial increase over those of the corresponding period of last year. The trade from the Far East in 1897 showed a decided improvement, the movement in trade from that region to Europe and America having risen from 2,408,100 tons in 1895 to 2,738,000 tons in 1897. In this connection Japan stands out conspicuously; for while in 1895 only two Japanese vessels passed through the canal, last year there were thirty-four. The receipts for last year amounted to £3,024,281, and the expenses to £1,451,660—showing an excess of receipts over expenditure of £1,572,621. Adding to this £35,607 from the special, and £28,324 from the ordinary reserve, the directors are able to recommend a dividend of £3 12s., or about 2s. less than that of last year. As the reserve fund is still £107,193 in excess of the statutory amount, the result can scarcely be regarded as other than satisfactory. £124,165 has been spent during the year in repairs—chiefly in widening and deepening the canal, both matters of great importance as seen in the ease with which the large steamers of 10,000 tons on the Australian service passed through the canal last year. The Japanese ironclads *Fuji* and *Yashima* also went safely through the canal—a fact which seems to show that it may become useful in time of war for the Power that can seize it and hold it. As we have said, the returns for this year are very favourable up to the present, and if we look to the increasing shipments of wheat from India, and the opening of additional ports in China to European commerce, as well as the construction of new railways in that empire, the returns of the Suez Canal Company should show a steady improvement during the present year.

Harried Uruguay.

It will surprise no one to learn, as we do from Mr. Consul Grenfell's report to the Foreign Office, that the trade and commerce of Uruguay for 1897 showed a serious falling off as compared with the previous year. Trade and revolution never do agree; but at least the revolution of last year in Uruguay, though disastrous for a time, may be regarded as having been not altogether wanting in beneficent influence. It broke with a bad past. Trade had been dwindling for years in consequence of the oppressive taxation to which the country had been subjected. The Dictator Cuertas seems at least in a fair way to put a stop to that; for the first step of his administration has been to insist on economy all round, and the removal of obnoxious taxes. Our consul seems to have confidence in the new provisional President, and to believe in the honesty of his efforts to open the way for expansion of trade and the reduction of taxation. If President Cuertas continues as he has been doing for the past year, the revolution will have been a real blessing for Uruguay. The great shrinkage in the trade of 1897 is shown in the diminution of the imports; and as this falling off was most conspicuous in soft goods, of which Great Britain is the chief exporter to Uruguay, she is of course the greatest sufferer by the present decline in trade. The shringage in the exports has been even greater. There is every indication, however, that the check to trade will only be temporary. Confidence has already been restored, and business has resumed its normal state. More land has been brought under cultivation; and the agricultural outlook seems generally good. Very interesting details are given of the value of articles imported from Great Britain, the United States, Germany, France, and Belgium; but it need only be noted that England still maintains a good lead in the trade as a whole. The Uruguayan trade returns for this year will be looked for with considerable interest; for if they turn out as well as it is hoped, it will give assurance not only of a genuine revival of trade, but of the honesty of the Dictator in relieving the country of an incubus which was slowly killing trade and commerce and reducing Uruguay to a desert.

Trade in the Cyclades.

It is pleasant to hear from our consul in Syra, who discourses hopefully on the trade of the Cyclades, that the international financial control now established may prove a blessing in disguise to Greece. At least the trading community are glad of it as likely to bring about the reform of a defective fiscal system, and so to raise the credit of the country abroad, while benefiting trade at home. It is no less pleasant to find our consul —who should be a good authority—looking forward with confidence to a steady revival of trade and commerce in Greek ports after the somewhat ruthless interruption of the war. But there is one thing which Mr. Consul W. H. Cottrell insists upon. If British traders are to reap the full benefit of the revival of trade in Greece and Crete, they must be prepared to send competent commercial travellers, with abundant samples, to tempt the Greek dealers. It is all very well to sneer at consular agents, who are accused of dwelling on this theme as a handy means of explaining the cause of British decline abroad. That, we are assured, is a great mistake. Neither French nor German dealers treat the matter with that ignorant impatience; for no sooner was the "war scare" over than French and German commercial men appeared on the scene, primed with samples and glib in the Greek language, and contrived to do a good trade. Only one British firm had listened

to the repeated appeals of the consuls, and sent a representative. This was a Paisley firm, and its experience may possibly be sufficiently encouraging to induce others to follow the example. We hope so. In these days it will not do to neglect what may hitherto have been regarded even as insignificant markets.

SOME INDIAN RAILWAY COMPANIES.

The reports so far issued referring to the operations during the second half of last year are more satisfactory than might have been expected considering the widespread effects of the plague and famine. The business of the Bombay, Baroda, and Central India Company naturally suffered a good deal, but the other lines make a very respectable showing, as will be seen from the following figures :—

	Gross Receipts.	Working Expenses.	Proportion of Expenses to Receipts.		Net Earnings.
			Dec. 1897.	Dec. 1896.	
Bengal & North W.	Rs. +141,726	+ 76,442	48·84	48·55	+ 65,284
Bengal Central	Rs. +169,836	+ 61,232	54·68	60·83	+108,603
Bombay Baroda,&c.	Rs. −191,104	+251,553	54·98	52·68	−442,657
Madras	£ + 24,191	+ 1,126	48·68	50·83	+ 23,065
South Indian	Rs. +207,149	+154,304	54·20	53·23	+ 52,846
Southern Mahratta.	Rs. +217,214	+158,342	60·72	60·08	+ 58,872

Surplus profits come out very well, and these have been brought home at a rate of exchange more favourable to the companies than for some time past, with the result that in three cases out of four, shareholders receive increase dividends :—

	Surplus Profits.		Available for dividend.		Dividend for half-year.	
	1897.	1896.	1897.	1896.	Dec. 1897.	Dec. 1896.
	Rs.	Rs.	£	£	per cent.	per cent.
Bengal and North Western	731,158	705,823	43,329	40,673	2	1¼
Bengal Central.....	77,440	50,289	4,154	3,134	2½	£2 6s.
Bombay, Baroda, &c.	204,321	334,560	—	—	2⅝	£2 16s.
Madras	3,615	—	—	—	—	—
South Indian.....	158,820	146,418	16,523	13,559	2½	2½
Southern Mahratta ..	383,416	366,327	25,379	22,891	2½	2½

Taking the Bombay and Baroda Company first, as being the most important, we find a reduction in the number of passengers carried on the company's line of as much as 1,376,000, or nearly 23 per cent. ; the decrease in coaching receipts being £54,005. This is due to the continued prevalence of causes that adversely affected the traffic in the previous half-year, the principal being the plague, and the consequent restrictions on travel and fairs enforced under Government orders in districts served by the company's lines. Goods traffic, however, did much better, there being an increase of 29,935 tons carried and of £14,969 in receipts, although trade had not recovered from its previous condition of local depression, and the bountiful crops resulting from the favourable rains of the monsoon had not become available for purposes of export, so that the actual effects of the changing condition of the company's district upon its business were but slight and showed only partial improvement. The quantity of grain carried was 13,015 tons against 7,082 tons in 1896, of other food grains 68,327 tons against 35,465 tons, and of salt 53,981 tons against 44,574 tons ; but of cotton only 14,573 tons were carried against 22,607 tons, and of oil seeds 37,369 tons against 42,678 tons in 1896. This left a net decrease in receipts of £38,896, but in spite of this revenue charges increased by £26,510, of which £30,000 was in carriage and wagon expenses, and was due to charges for renewal of vehicles unavoidably postponed from the previous half year, owing to the non-arrival of English materials required, while expenditure on the change of bridge girders in progress represented £38,078 against £35,458 in 1896. Net earnings per train mile were only 3s. 7d. against 4s. 8d. in 1896, and the net profit for the half year fell short by Rs.237,893 of the amount required to meet interest on the guaranteed stock and bonds and the usual contribution to the provident fund. On its own line, therefore, the company did badly, but the State lines worked for Government, did very much better, there being an increase in receipts, and a saving in expenses, so that the net earnings were Rs.4,702,737 as compared with Rs.4,431,873 in 1896. In fact, the whole of the company's surplus profits is derived from the State lines and amount to Rs.204,321 against Rs.143,462, which improvement, and the better exchange rate largely offsets the poor result on the company's own line.

The South Indian Company did better than in the corresponding period, and with the higher exchange is able to pay ½ per cent. more dividend. The Madras Company also makes a better display. Practically the whole of the increase in gross revenue is retained as net, the result being that the Company is at last able to show a surplus after providing for the guaranteed interest. The surplus is small, Rs.7,231, of which the Company's share is one-half. On the Southern Mahratta line traffic continues to grow, the gross receipts being the largest in its history ; but expenses have grown nearly as fast, so the increase in net is less than Rs.60,000, and the same dividend is paid as in 1896. Passenger traffic fell off largely owing to the plague, but merchandise traffic was much larger, the increase being 22 per cent. in receipts and nearly 11 per cent. in weight, due chiefly to larger movements of food grains owing to famine. The Bengal Central did well and puts up its dividend a little. The increase in receipts is pretty equally divided between passengers, goods and sundries and while nearly all items under expenses show an increase, the total is little more than one-third of the improvement in earnings. The Company's receipts, however, do not expand very rapidly. Neither do the earnings of the Bengal and North Western Company grow much considering the increase in mileage, but it is a line worked cheaply, this and the Madras having the lowest percentage of expenses to receipts in the list. The Company did moderately well during the past half year having a large increase in third class passengers, due mainly to increased attendance at fairs and to the extra mileage open. Merchandise traffic was smaller owing to the grain scarcity, but goods carried on the steamers increased through the continued imports of Burma rice. The higher exchange rate, however, enables the Company to pay a trifle more in the way of dividend, which should assist it with its proposal to raise £750,000 more capital for rolling stock, workshops, and new extensions.

THE BANK OF FRANCE.

The Bank of France, which is not so old as the Bank of England, was created by Napoleon the First. It commenced operations in 1800, with a capital of 30,000,000 francs, in order to aid in the reorganisation of public credit, so unsettled by the Revolution, and to facilitate commercial transactions, for the rate of interest, as a rule, then oscillated between 12 and 20 per cent. It had also to advance to the Government the sums necessary for war. It soon fell into difficulties, and nearly failed in 1805, and also in 1848 and 1865 ; it did not enjoy a normal and progressive course before 1870. In consequence of the suppression of local banks in 1848, it alone possesses the right to issue banknotes. Its present capital is 182,500,000 francs, divided into 182,500 registered shares of 1,000 francs. It does not now, as was the case at first, limit itself to issuing paper money, but practises most of the ordinary operations of financial companies. The Governor, nominated by the State, is assisted by two vice-governors and the Assemblée Générale, composed of the 200 largest shareholders, who elect the Conseil Général, which is formed of fifteen regents and three censors ; the Governor (now M. Pallain) presides at the meetings of the General Council, and alone has the right to sign all treaties and conventions. Without going into details, we may mention that in 1897 the business of the Bank amounted to 15,308,125,000 francs, giving a profit allowing of a dividend of 109 francs, against 115 in 1896. Its shares, now quoted at 3,600 francs, valued 6,500 francs in 1881 and 1882, when the profits were more than one million per week and a dividend from 250 to 290 francs was distributed. This increase in the profits was chiefly due to the crisis brought about by the failure of the Union Générale. As a rule, the Bank has afforded its shareholders dividends varying from 8 to 12 per cent., but since 1889, when it risked losing two and a half millions in advancing by command of the Finance Minister 140 millions to the Comptoir d'Escompte, its business has been constantly diminishing. It must be remembered, however, that the Bank did not wish its business to appear too flourishing, and it willingly renounced the idea of maintaining its shares at their old level, because excessive profits would have served as a valuable argument against it at the time of the negotiations for the renewal of its privilege.

Without speaking of the monopoly, we shall simply consider the Bank from a financial point of view. Its metallic reserve has taken

such proportions that any monetary crisis would find it admirably prepared. The reserve gold amounts to £74,500,000 and that of silver to £48,500,000. A diminution of only about £7,000,000 has occurred in the gold reserve since the end of October, 1897, the time when the withdrawals of gold from the Bank of France commenced. Paris maintains its rate of discount invariable at 2 per cent., and the financial world did not appear at all agitated by the withdrawal of several hundred million francs required for the purchase of cereals. The latest weekly balance-sheets do not lead one to suppose that the Bank will be obliged to modify its rate, and Paris looks unconcerned on the present situation while seeing that the reserves of the European banks will suffer somewhat when business in America resumes its normal course. The total value of the banknotes in circulation exceeds the cash in reserve by £26,500,000, which is not contrary to its statutes. The rate of discount of the Bank has been 2 per cent. only for several years. The importance of the metallic reserve seems to have completely freed France from the influence of the Bank of England, and it appears, in fact, that the Bank of France has foreseen all the difficulties to be overcome. It is well to remember that the month of May is usually that in which its reserve attains its highest level, but the present year may be regarded as exceptional, for the payments have been, and will still be, somewhat abnormal. If at any moment the situation should cause legitimate anxiety, the Bank would certainly renounce artificial means, and employ without hesitation a really efficacious defence—that of raising its rate.

For the moment, however, it is not feared that any grave disturbance will result from the present situation. The Government has hitherto acted too strongly and directly on the Bank, but it will do well to profit by past experience and allow it henceforth to observe more strictly the ordinary laws of banking, instead of battling with difficulties by special expedients and trusting to mere chance. The cheque rate on London, now at 25·34, is favourable to England; but Paris can support some loss of gold without trouble, and if its reserve should diminish, no great danger will at present arise. The Bank is the sole depository in France of the precious metals, and from its reserve depends absolutely the degree of facility of its operations abroad. But it must not be overlooked that a monetary crisis affects it in a peculiar manner, for it suffers all the inconveniences of bimetallism. Compelled to receive specie in silver as repayments, it cannot pay with it, owing to the fact that operations with foreign countries can only be conducted in gold, and that home commerce prefers notes. As soon as the Bank puts a large amount of silver into circulation it is returned to it again, the public finding it too heavy and cumbersome. The condition of the B.D.F., then, apparently so strong, requires in fact great prudence and much care in treatment. Gold constitutes but two-thirds of its total reserve, and of what proportions of silver coin and bar silver the other third is composed is not known.

In the event of a crisis, the Bank would pay out silver money at home which the French people are obliged to receive at its nominal value, but it could not thus utilise its silver bars, the law and international conventions prohibiting their transformation into coin. The only thing the Bank could do would be to sell them for their real value on the market, that is to say, at a loss of at least 55 per cent., which would represent a loss equal to more than twice its capital, for there is more than a third of its metallic reserve which it cannot make use of. To furnish and maintain gold in its safes and to dispense with the necessity of raising the Bank rate to defend itself against withdrawals of gold, the State pays in banknotes and silver exclusively the salaries of its functionaries, and the bills of its contractors, as well as the coupons of the holders of Government stock, and the agents of the Treasury remit to the Bank all the gold received by them. The balance-sheet of the Bank, that all the financiers of the world consult assiduously, and which is the only source of authentic information offered to the public, teaches nothing during a crisis concerning the outgoings of gold; it simply indicates the difference between the demand for gold by commerce and the remittances effected by the Treasury, and the drainage is performed clandestinely. It is to be hoped that the optimist previsions of M. Méline will be realised, and that an abundant harvest will exempt France from the necessity of again spending large sums abroad as it has had to do during the past two years. It is affirmed that she possesses more gold and silver in coin than all the rest of Europe together, and that her metallic capital exceeds 8,000 million francs, of which about 5,500 millions is in gold. Thus France has more gold than is really necessary, and it would be profitable for her to part with some of it, which is, moreover, what the Bank is trying to bring about. The premium on gold imposed by the Bank, which was 3 per cent. at the end of 1896, fell to par about the middle of 1897, but rose again towards the end of that year to 4 per cent., and is now as much as 5 per cent. On the other hand, the Bank easily maintains its gold reserve at such a high level through the increase of its commercial exportations, and the interest received in gold on foreign investments. It is, of course, impossible to foretell what America will require, and how far it will be possible to protect the metallic reserves of the Old World against the assaults which are, or will be, made on them; but the situation of the Bank of France shows that its reserve is not appreciably exhausted by the payment for very exceptional quantities of grain, and its immediate available resources, which it was feared would disappear, remain abundant.

Critical Index to New Investments.

THE GOLDSMITHS' AND SILVERSMITHS' COMPANY, LIMITED.

This is a new company, with a share capital of £600,000 in 60,000 £5 5 per cent. cumulative preference and £300,000 £1 ordinary shares. Only the preference shares are offered for subscription, the price asked being par. All the ordinary shares are taken by the vendors in part payment of the price of £600,000 to be given for the business. A certificate of five years' profits is given, signed by Price, Waterhouse, & Co., and it shows rapid progress. No valuation of the assets is supplied, which is a pity, as we think the character of the business could have well stood this publicity, but these preference shares ought to be a very fair industrial investment.

PLYMOUTH CORPORATION STOCK.

Tenders will be received by the National Provincial Bank of England on Tuesday next for an issue of £385,000 2¾ per cent. stock, which will be entitled to a full six months' dividend on September 30 next. It is redeemable at par in 1958, or on three months' notice from February, 1918. Minimum price of issue 98 per cent. Money is wanted chiefly for reproductive works, including extension of waterworks and markets, of tramways, electric lighting, &c., and also to pay off part of the existing debt, which amounts to £1,038,688. Population is estimated at 100,000, and the rateable value of the borough is £409,844. At the price the issue does not look very tempting, but it is a trustee stock, and will be assisted by the fall in the value of money.

THE (NEW) CONVALMORE-GLENLIVET AND SCAPA DISTILLERIES, LIMITED.

The capital is put at £135,000 in £10 shares, of which 7,500 are 5 per cent. cumulative preference and the remainder ordinary. The object is to acquire two Highland malt distilleries for £114,945 in cash, and the stocks of whisky and casks are to be purchased at a valuation. We see no inducement to investors this side of the border.

PIGGS PEAK DEVELOPMENT COMPANY, LIMITED.

The company announce an issue of £50,000 7 per cent. first mortgage debentures at par. They can be converted after June, 1900, at 103, and those not previously redeemed are to be paid off at this price on June 30, 1908. The security is a first mortgage on property and concessions of about 40,000 acres in Swaziland, South Africa. With such a history as the company has, none but the bravest speculator will, we imagine, come forward.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Rock Life Assurance Company.—Last year, the ninety-second of this company's existence, 1,010 new policies were issued, insuring £506,903, and yielding £20,257 in new premiums. A small part of this was reinsured. The total premium income of the company was £149,389 net, and it paid in claims and bonuses £109,786, the claims arising on ninety-six deaths, which was fifty-eight below the actuarial expectation. Expenses and commissions took 20 per cent. of the premium income, which was high. The income from interest and dividends was £79,348, £44,086 of which was received on the capital stock paid up and "subscribed." Including the money received for annuities sold, the total income of the company was thus £294,000, and after meeting all outgoings, surrenders, bonuses, &c.,

the funds were increased at the year's end by £54,000. This is a small increase out of such a large revenue, but in addition to heavy current expenses the company had £38,302 to pay in annuities, and paid a dividend bonus of £25,000 to the proprietors out of £44,086 received as interest on their capital. The company's funds, including "subscription" and paid-up capital, amounting to £1,052,057, amounted to £3,191,046, and is well invested, principally at home.

London Scottish American Trust.—The revenue of this Trust improved in every way last year, and, including £603 brought forward, the total income was £70,073. After meeting debenture interest and management expenses, the balance permitted of the placing of £16,000 to reserve, the payment of preference interest and the usual dividend of 3 per cent. on the deferred stock, leaving £1,170 to be carried forward. Included in the income was £7,895 from profit on realisation of securities and £2,757 premium on debenture stock, so that only a little more than £5,000 was put to reserve out of revenue. We should prefer to see such items of income kept out of revenue altogether, as the better managed Trusts have always done. The reserves now amount to £30,000—they are split into four, but they all mean the same thing—and the investments amount to £1,284,227, upon which there is a depreciation of about 6 per cent., after deducting the reserve. The securities are mostly United States issues, so that the depreciation of about £75,000 thus admitted may easily be wiped off later on. Owing to paying off of debenture bonds and loans, the Trust has actually £85,000 less debt than two years ago, so that it has done very well to reduce the depreciation, for it is often the case that the better issues are sold when money is wanted. Unfortunately, the board does not publish its list of investments, so that one dare not recommend its stocks as an investment.

Brazilian Submarine Telegraph Company.—The revenue from messages in the past half-year amounted to £97,448, as against £86,608 in the corresponding half of 1896, and with a little more received from miscellaneous sources the total income was £100,300, of which £26,166 was absorbed by working expenses, and after interest and other charges had been met, the net balance of £69,580 was left. Two interim dividends, making the usual 3 per cent. for the half-year, are declared, the Jubilee bonus to the staff absorbed £4,139, the sum of £25,000 is added to reserve, and £8,662 is carried forward. A closer working arrangement is being arranged with the Western and Brazilian Telegraph Company, and thus the bickering that has gone on for so long between the two concerns should come to an end. The reserve fund amounts to £919,236, of which £689,637 is invested in high-class securities, and £240,340 in shares of other telegraph companies. These, however, yield a poor return, about 2 per cent., and their chief value probably is represented in the control obtained over subsidiary lines. Trading balances, however, are very much in favour of the company.

Dumont Coffee Company.—Although there is no dividend on the ordinary capital, nor any allocation to reserve, we like the report just issued by this company better than the one of twelve months back. The profits amounted to £54,425, and with £11,411 brought forward the disposable sum was £65,836. Out of this £51,989 was absorbed by interest on debenture and preference capital and the remaining £13,847 was carried forward, the directors stating that they thought it was more prudent to do so than to declare a small dividend on the ordinary shares. This is the first sign of prudence that we have noted on the part of this board, and let us hope that the caution thus lately instilled into them will be for the benefit of the undertaking. Undoubtedly the company has had to meet considerable difficulties, for the average price of Santos coffee last year was only 31s. 7d. per cwt, as against 51s. 10d. per cwt. in 1896, and an average of about 78s. per cwt. for the four preceding years. This only shows what an astute financier the vendor was, and as we believe he has been selling the shares he received in payment whenever it was possible, the future may not be too pleasant. Still the board has done the right thing, and, with a fairly clean balance-sheet and closer attention to management, the preference shares and debentures may yet prove a tolerable investment.

Tingri Tea Company.—Last year this company must be considered to have done poorly, for the net revenue was £2,847, as against £4,059 in 1896. With £752 brought forward the disposable balance was £3,600, which allowed of a dividend of 5 per cent., as against 6 per cent. a year ago, and the carrying forward of £775. There is an excellent report from Mr. Magor, one of the board, who has just visited the property.

Rajmai Tea Company.—Contrary to the experience of most Indian companies, this concern obtained a much better profit for last year. The result of the operations was a surplus of £8,783, which with £4,793 brought forward gave £13,576 to deal with. Dividends amounting to 10 per cent. for the year were proposed, and the balance forward was increased to £7,976. A good deal of the improvement was due to the purchase of a new property at the end of 1896.

Malta and Mediterranean Gas Company.—This company had to meet the competition of the electric light at Malta, and at the same time the Corfu undertaking was sold two years ago, so that no revenue was received from that station. Compared with two years ago, the sale of gas in 1897-8 diminished by £9,015, and residuals also realised less, so that the total revenue of £26,417 was £9,537 below that of 1895-6. Working expenses were less all round, but thanks chiefly to an improvement in exchange, upon which account only £388 had to be provided, as against £4,837 two years ago, the net profit of £9,734 was actually £105 better than in 1895-96. Dividends on the two issues of preference shares were paid, the usual distribution of 6 per cent. upon the ordinary shares was made, and after £1,500 had been put to reserve, the balance of £827 carried forward was about half the amount brought in. The reserve fund now amounts to £4,191, and is wholly invested, besides which there is a reserve account of £4,805. Investments to the value of £6,104 are also held on account of the realisation of the Corfu property, and as the balances of the company are good, the board may possibly continue the process of reducing the loans on debentures, which now only amount to £19,400, and upon which 5 per cent. interest has apparently to be paid.

Backus and Johnston's Brewery Company.—The profits of this reconstructed company improved very remarkably last year, being £10,692, as against £4,882 in 1896, and £263 in 1895. Let us hope the improvement is healthy. Out of these profits certain exceptional outlays had to be met, such as two years' directors' fees, and £1,718 for expenses of conversion of debentures, while debenture interest was larger than it will be in future. Altogether about £3,500 of exceptional expenditure was provided for, and after setting aside £1,568 for depreciation, the balance permitted of a distribution of 1 per cent. on the income stock. If profits keep up, this latter stock ought to receive more in the shape of dividends, but the value of the report would be increased if some particulars of the Lima expenditure were added.

Rosbach Springs, Limited.—This is a tiny company not yet got into full working order, and last year there was a debit balance of £482 on the profit and loss account. It is stated in the report that an agency has been opened for the sale of this company's Natural Sparkling Water in the United States, and from this much is expected. Here the company is impeded by the monopolies established through the connection of hotels with the Appolinaris Company, and in other ways.

Bank of Montreal.—This great bank does not publish a report, at least not in England. But its balance-sheet for the year ended April 30 last is before us, and it shows a total of £13,509,104, of which £2,465,736 is capital paid up, and £1,232,659 "rest" or reserve, The note circulation amounts to £1,143,286, against which the bank holds, £524,096 in gold and silver coin, as well as £583,157 in Government demand notes. The deposits aggregate £8,346,000, of which £2,440,739 bears no interest. The profits for the year were £259,993, and £182,242 was brought forward. After paying two dividends of 5 per cent. each, £195,659 is left to be carried forward. The balance-sheet is not very well divided up, and we cannot say under which heading the large amount of drafts issued by the head office on its London branch is embraced. Loans and advances, of a total of £8,079,146, are all in one item.

Guardian Fire and Life Assurance Company, Limited.—Last year the new life business of this company consisted in the issue of 704 new policies, insuring £413,789, and producing £15,918 in new premiums, of which £1,975 represented single premiums. A small amount of these risks was reinsured. The company also received £21,252 for £1,491 of annuities granted. Claims on 158 policies with bonuses took £135,857, number and amount being within expectations, and expenses and commissions came to about 14½ per cent. of the premium income. Interest income was £109,559. The life funds were increased by £167,000 during the year, and now amount to £2,956,239, chiefly invested at home. In the fire department the premium income was £342,161, and the losses £233,849, the income being about £2,800 less, and the losses £31,000 larger than in the previous year. Losses, *i.e.*, came to 68·34 per cent. of the premiums, against 58·75 per cent. in 1896. Expenses and commissions took £122,186, or 35·71 per cent. of the premiums, against 34·4 per cent. the previous year, and consequently, owing to the Cripplegate fire, the year's business resulted in a loss of £13,544. But the fire fund gave an income of £20,381, and £1,031 was realised as profit on investments sold, consequently a net balance of £7,868 remained to be carried to the credit of profit and loss. The total funds of this department stand at £525,850. Including balance brought forward, and £13,200, the year's proportion of life profits, together with £40,286 received as interest on investments, the total available for division is £94,144, and £80,000 of this is taken to pay dividends aggregating 8 per cent. on the share capital. This leaves £14,144 to be carried forward, plus the final portion of the life profits appropriated to the proprietors, as per last quinquennial valuation. Were the company less rich it would feel the inroads made by big fires the more. As it is, good years will now be wanted to sustain the dividend.

The South Australian Company.—The sixty-second annual report of this company for the year to April 30 last in England and to December 31 last in South Australia is of the usual complexion. But for the fact that the company is old and solidly based, with excellent possessions in houses, land, and wharves in the colony, it must have suffered greatly from the effects of the appalling drought which has affected all these Australian settlements for several years back. As it is, the revenue was slightly reduced, but not really very much. In spite of the drought the yield of wheat in South Australia amounted to 3 bushels and 46 lb. per acre, an average which left 19,000 tons for export. This was better than in the previous year, but the effect of the drought was none the less most disastrous, especially on market gardens near Adelaide, and several of the company's tenants there had to surrender their leases. Nevertheless, the land sales were by no means stopped, several farms having been disposed of during the year at fair prices, chiefly to tenants, although attempts to sell by auction proved a failure. Allowing for a slight increase in the rent-roll and a decrease in the revenue from the wharves, the gross income of the year was much about the same as in 1896 and amounted to £32,703. After meeting all expenses a balance of £28,861 was left, out of which the directors paid the usual 10 per cent. dividend, or 40s. per share. This left £461 to be carried forward.

Nerbudda Coal and Iron Company.—After thirty-eight years of a chequered career, the board of this company appeal to the shareholders to provide fresh capital, and thus save the property. Last year the working led to a loss of £625, which follows upon smaller losses in the two preceding years. The old mines of the company are admitted to be worked out, and they are not considered worth carrying on after the heavy rains of this season. The company, however, has opened out a new field, and the coal obtained from there is claimed to have stood severe trials by the Great Indian Peninsula Railway Company. The latter has contracted to take 14,000 tons of the coal this year, and other customers are expected to bring up the sale to 18,000 to 20,000 tons for the year. Later on the new field is expected to yield easily 40,000 tons per annum. But in order to make the new field available considerable expenditure will have to be effected, and the board, therefore, propose to issue shortly £10,000 in preference shares. It is a miserable statement after nearly forty years of work, but we presume the best thing for the shareholders to do will be to find this fresh money and thus give the old undertaking another chance.

Indo-China Steam Navigation Company.—A distinct improvement is seen in the past year's working compared with 1896, the net earnings amounting to £80,575 against £28,956. Depreciation absorbs £43,362 compared with £40,260, and £3,086 has had to be provided out of revenue for loss in exchange, whereas last year there was a gain on exchange account of £3,919, which was transferred to an exchange reserve. The directors recommend a dividend of 5 per cent., leaving £1,370 to be carried forward, whereas last year there was no dividend, although £16,318 was transferred from underwriting account to profit and loss. The improvement is due to better freight rates and to the increased tonnage of the fleet.

THE PROPERTY MARKET.

The business done in the Auction Mart last week seems almost trifling, when compared with the corresponding week last year, the totals being £87,881 and £368,919 respectively. But it has to be noted that last year, in anticipation of the Jubilee, the May sales were heavy, while last week's sales were affected by the Derby and by the Whitsuntide holidays. The next few weeks will probably see a considerable difference in business, and probably by the end of June the balance against this year may be reversed. The property offered last week was also, for the most part, confined to small investments, for which, although the demand was good, the amounts received are not conducive to big totals. Yesterday week there was an excellent supply of minor properties, but only one ran into four figures. This was No. 1, Hercules-road, Holloway, with range of stabling, leasehold for fifty-four years at £9 9s. per annum ground rent, rental £142, for which Mr. T. G. Wharton secured a purchaser at £1,500. Among other lots placed by the same auctioneer were :—Nos. 3, 5, 13, 15, and 17, Hercules-road, held for the same term as No. 1, subject to ground rents amounting to £26 5s., £1,395; Nos. 31 to 34, Market-terrace, East Ham, freehold, rental £165, £2,975; and No. 87, Darenth-road, Stamford Hill, held for eighty-six and a half years, ground rent £10, £715. Messrs. Fuller, Horsey, Sons, & Cassell sold the leasehold dwelling-houses, Nos. 1 to 15 (odd), and 2 to 32 (even), Barrow-road, Streatham, held for eighty years at £176 8s. ground rent, and producing £825 per annum, for £6,725; four dwelling-houses, Nos. 28, 30, 38, and 40, Elms-road, Clapham, leasehold for eighty-two years, at a ground rent of £44, and let at rentals amounting to £217 10s. yearly, for £1,840; four leasehold dwelling-houses, Nos. 69 to 75 (odd), Brynmaer-road, Battersea, term sixty-two years, ground rent £25 18s., rental £140 10s., for £1,180; and several other lots. Messrs. Stimson & Sons, and Newbon, Edwards, & Shephard were very successful with a number of Metropolitan and suburban investments, all of their lots finding purchasers at good prices, their respective totals being £6,075 and £4,180. Altogether the proceeds of the day amounted to £43,440. Some leasehold properties offered on Friday by Mr. A. J. Sheffield sold well.

Messrs. Newbon, Edwards, & Shephard announce for to-day at the Mart the sale of an important long leasehold estate at Tottenham, comprising 115 private houses, twenty-eight houses and shops, and building land, as well as leasehold and freehold properties in Notting Hill. On Monday next Mr. Alfred Richards is to sell gas and water stocks and shares in the Aldershot Gas and Water Company, Harrow and Stanmore Gas Company, Barnet District Gas and Water Company, and the Melton Mowbray Gas Light and Coke Company.

Business after the holidays was resumed at the Mart on Wednesday, but the attendance was moderate, and a quiet tone prevailed. Neither were the properties offered of first-class importance (eight remained unsold), and the total for the day only amounted to £16,330. Some freeholds at Hounslow were disposed of by Mr. Thomas Woods at a total of £7,125, and two freehold ground rents at Earl's Court, offered by the Messrs. Woods, brought £3,775.

TRADE AND PRODUCE.

The downward tendency in wheat has now been confirmed. There was a good attendance at Mark-lane on Wednesday, and sellers held firmly to the prices of the previous Friday for some time; but no business was done, and it by-and-bye became evident that no business could be done without a fall in price, and a reduction of 1s. per quarter soon after took place. Flour fell 1s. per sack. This is but repeating what has happened in the provincial markets during the week. Farmers were very reluctant to give way, and in some cases prices were maintained; but in most instances a reduction of from 1s. to 2s. was submitted to. The tone throughout was dull, and business inactive. It is improbable that activity will be restored until there has been a further fall, though much now depends on the reports as to the coming crop. So far they have been excellent, with very few exceptions. The heavy demand for France has slackened. It is understood that it has now a sufficient supply on hand to last until the beginning of August at any rate. The amount of wheat and flour imported into France from August, 1897, to the end of April, 1898, is believed to have reached the unprecedented quantity of 6,507,000 quarters. At present there is on passage to France about 1,500,000 quarters. The shipments to Europe during the week have exceeded 1,300,000 quarters, of which some 250,000 quarters come from India. The quantities shipped from America continue large. According to *Dun's Review*, the exports from Atlantic ports have in three weeks been 7,955,586 bushels, against 4,778,742 bushels last year, and from Pacific ports 1,738,123 bushels, against 610,637 bushels at same period last year. It would seem, then, that our further supplies, at least up to the beginning of August, are pretty well assured; and the nearer we approach the harvest the more generous will the "corner" men be in disposing of their stocks. They can hope for no further increase in prices now. While the urgent demand for France has suddenly ceased, the markets at Antwerp and Hamburg have ruled very dull. The price of bread in London has come down to 6½d., but until the exhaustion of bakers' present stocks, the reduction is not likely to go further. It is improbable, however, that it will be long delayed. Millers are complaining of continued slackness. The supplies into the United Kingdom last week were: Wheat, 282,164 quarters; flour, 99,521 sacks. Less wheat but more flour was sent from America for Europe last week, so that the total breadstuffs shipped represented a falling off of 50,000 quarters. Extraordinary prices are still quoted for May wheat in America, and the July option is held at a high price considering the large crop that is expected to begin arriving during that month.

Cotton is reported firm in New York, with a good export demand, and prices firm, but at home business continues very quiet, the holidays having of course increased the dulness this week. Want of activity in the cloth market is reported from Manchester, and, though prices remain firm, an attempt to advance them at once checked business. The orders executed for India are unimportant, and there is practically no demand from Calcutta. But the tone of the home market on the whole continues firm. Nottingham reports little alteration in the lace trade, but the general demand is declared to be disappointing, and the home demand is as yet below the average.

Rather better reports reach us as to wool. At Huddersfield both manufacturers and merchants have been busy, mostly for the home trade. There is little alteration in price, but the turnover has been growing for a month past, and the clearance of best black goods was last week beyond all precedent. Mill operations are on a larger scale than at any previous period of the year. The United States trade is described as almost a blank, and American reports do not encourage any hope of improvement there. There has been some unsettled feeling in the Canadian market, but that is regarded as temporary. There is a more hopeful tone at Leeds, and rather less depression in Leicester, though there prices continue at a very low level. On the whole, however, the tendency is towards improvement.

Though the statistical position of copper continues strong, with stocks standing at only 27,800 tons against 33,700 at the same date last year, the market is still fluctuating, with the tendency rather downward. During May the price of G. M. B.'s fell 11s. 3d., while stocks declined 1,452 tons, and the total visible supplies 1,100 tons. These reductions, however, as Messrs. Lewis, Lazarus, & Co. remind us, took place during the first fortnight, and the second half of May shows an increase in both positions. There was rather an improved tone at the morning market on Wednesday, but that disappeared at the afternoon session, and there was a decline of 2s. 6d. on the day. Settlement price £51. Cash and near dates £50 17s. 6d; three months £51 1s. 3d.

Very satisfactory reports are received of the iron and steel trades, though at Wolverhampton business is said to be restricted, and makers are rather indifferent as to inquiries for the execution of expiring bargains, looking forward to paying more for pig iron. There is a healthy home demand, and export houses offer good indents. In best bars there is a steady business, and merchant and common qualities are in frequent request. Glasgow reports all departments fully employed. In Sheffield the position is highly satisfactory; so at Newcastle, Birmingham, and Barrow-in-Furness. Orders are steadily flowing in, and prices are everywhere well maintained. Yet the pig-iron market is reported quiet, and in Glasgow on Wednesday, Scotch, Cleveland, and hematite each lost 1½d. Trade, however, is in a thoroughly healthy condition, and the prospects for the future are excellent.

As to coal there is now some doubt. A tendency to a decline in prices had appeared in some quarters in view of the early termination of the Welsh strike; but after the Cardiff conference on Tuesday a settlement is not by any means so certain. In these circumstances prices are well maintained, and some large railway contracts, it is understood, will only be renewed at an advance.

The Corean Government is showing its independence in an admirable way. It has decided to open three more ports, and to make Sing Yang an open market.

The steamer *Umbria* has left New York with £82,000 in specie for London.

Diary of the War.

May 27.—Nothing new. How wearisome the iteration! Impatience in America; excited irritation in Spain. Admiral Cervera not discovered for certain, but it is "believed" he is in Santiago de Cuba. It is the only plausible inference; for had he been cruising at sea all this time he must have called somewhere for coal, and so must have been heard of. But if he be in Santiago, why so much uncertainty about the fact?

May 28.—Continued doubt as to the position of the hostile fleets. Gloom deepening in Spain as it becomes more and more evident that no help will be obtained in Europe. Another Ministerial crisis seems approaching in Madrid.

May 29.—A day of terrible rumour. Admiral Cervera had escaped from Santiago de Cuba with his ships, destroyed the American fleet, killed Admiral Sampson, and set off on a further career of destruction. The rumour came from Jamaica, but has not been confirmed, and is not likely to be confirmed. Another rumour is that Washington authorities are to send balloons to Commodore Schley to be used in finding out whether the Spanish Admira is in Santiago or not.

May 30.—The strange rumour that Admiral Cervera had escaped from Santiago de Cuba, and destroyed the American fleet, has certainly not been confirmed, nor does it seem to be believed anywhere, but it still circulates in a mysterious way in Madrid, in Washington, and New York. But the absurdest rumours gain strength when no direct news is available. The possibilities of peace are discussed by the Madrid papers, but none of them seems to see how steps can be taken by Spain in that direction. "Honour" is not yet satisfied. There is no truculence in the tone of the journals, however; they clearly wish for peace, and would welcome an intervention which might even seem to force peace upon Spain. But Spain herself cannot yet act. To do so would be to raise the spectre of revolution. Another bad reverse might, however, have the same effect.

May 31.—Nothing but rumours. Commodore Schley had seen Admiral Cervera's ships in Santiago Harbour, says one, and was determined not to allow them to escape. But telegrams are still being received from the Commodore at Cienfuegos, so that he can hardly be at Santiago as well. At Washington, says the *Times'* correspondent, there is a pronounced feeling of uncertainty about the Spanish squadron. President McKinley is anxious; and the American intelligence department can hardly be complimented on its smartness. The Madrid Ministry seem to be getting a little alarmed about the increasing exportation of silver. People are becoming somewhat timid about banknotes, and there has been a slight run on the bank for silver coins, most of which are exported. The Finance Minister has been authorised to draw up a Bill preventing this exportation. Several nonsensical rumours about negotiations for an alliance between England and the United States.

June 1.—There is even yet no certainty that Admiral Cervera and his squadron are "bottled up" at Santiago de Cuba; but apparently American war authorities are acting on the belief that the Spanish Admiral has been securely trapped. The expedition for the invasion of Cuba, it is said, will leave Tampa immediately, and may even be at the island on Saturday. General Miles is reported as having left Washington to assume the command. Another rumour—vague and suspicious-looking—is that Admiral Cervera had attempted to escape from Santiago, was at once attacked by the American fleet, and after a sharp encounter retired to the harbour again. The forts of Santiago, as well as the ships, were attacked, and the firing for a time was "very heavy." The news, however, has not been confirmed. It is said that the sailing of the Cadiz fleet has been postponed in consequence of the discovery of defects in the torpedo-boats.

June 2.—The Spaniards claim a victory. There are, however two sides to the story; and we rather think the American side the more plausible. The broad facts seem to be these. Two torpedo-boats crept out of the harbour of Santiago on Sunday night, evidently with the intention of blowing up one or two of the American war-ships. The boats, however, were discovered by the look out on the *Texas*, search-lights were turned upon them, and shot and shell immediately fired. Other American ships took part in the fray, and the upshot was that the torpedo boats, though coming within 500 yards of the *Texas*, ran back to harbour without launching a single torpedo. The other story is that Commodore Schley attacked the forts at Santiago on Tuesday afternoon, bombarded them for ninety minutes, did no harm, and retired rather the worse for the encounter. The probability is that Commodore Schley made a reconnaissance in force towards Santiago harbour to ascertain, if possible, the strength of the forts and ships there, and that, having satisfied his curiosity, he retired. However that may be, the engagement does not seem to have been a very big one, and there seems nothing to justify the Spanish claim to a victory. Altogether, however, the presence of Admiral Cervera and his squadron in Santiago harbour appears now to be satisfactorily established. It is presumed that the force for the invasion of Cuba is being got together at Tampa, but only routine news is allowed to escape from that camp.

Herr Jan Szczepanik, the young inventor of the telectroscope, announces another invention which, if it can do what is represented, will work a revolution in the textile industry. It is the application of photography to the production of stencil plates for the Jacquard loom. In figured textiles, at present, the designer must fill up millions of squares before the stencil plates can be punched, but by employing ruled screens on photographic glass plates, the inventor claims to be able to weave direct from the original design, with the aid of electricity.

Notes on Books.

L'Affaire Dreyfus. Le Procès Zola devant la Cour d'Assises de la Seine et la Cour de Cassation (7 février, 23 février—31 mars, 2 avril, 1898). Compte-Rendu Sténographique "in extenso" et Documents Annexes. Paris: Aux Bureaux du *Siècle*, 12, Rue de la Grange-Batelière, et P. V. Stock, Editeur, 8, 9, 10, 11, Galerie du Théâtre Français (Palais Royal).

These two volumes will possess considerable historic value dealing, as they do, with a question which is not only agitating France at the present hour from end to end, but is of great interest in every civilised country, as embodying the struggle between civil liberty, freedom of the citizen, and classes or sects bent on domination. Those, therefore, who care to go through these two volumes will find them full of dramatic interest and very lively human documents indeed. At the end of the work, and elsewhere, fac-similes are given of the memorandum on which Captain Dreyfus was condemned, and also of sundry writings of the Commandant Walsin-Esterhazy. It does not require an expert to prove that the memorandum attributed to Dreyfus is in Esterhazy's handwriting. For people who cannot go through this large work there is a little pamphlet drawn up by M. Yves Guyot, called "L'Innocent et le Traitre," which gives a brief history of the case from the beginning This is well worth reading and ought to be translated so as to be available for the general public here. M. Guyot has thrown himself into this case with a single-mindedness that we think places him on a higher pedestal than even M. Zola himself; for in order to fight for justice in this instance, he has had in great measure to sacrifice his career as an elected political leader in France. He did not become a candidate at the last election, because, as he frankly said, nowhere in France could he have found a seat as the avowed champion of the unjustly condemned Alsatian Jew, Captain Dreyfus. Not only was he obliged to stand aside for this reason, but he has had to endure all manner of base accusations hurled at his head by the faction which supports the army in its violent defiance of justice and civil freedom. He is accused of being the mouthpiece of a syndicate formed to discredit the army and so forth. But M. Guyot has stuck manfully to what he believes to be his duty, and we can only hope that the day is not distant when the principles advocated by him will triumph and he with them.

The Mining Manual for 1898. Edited by Walter R. Skinner.

The tenth issue of this volume appears as complete as its predecessors, and if possible more comprehensive than ever. The secretaries of companies registered abroad are now included in its pages, there is also a dictionary of mining terms, and the care with which the whole has been compiled makes it a reliable book of reference for all things appertaining to mines and mining. Mr. W. R. Skinner, in his preface, gives some interesting statistics of the returns of gold from the various mining centres, from which we may quote the following table showing the world's production for the past three years:—

	1897. Oz.	1896. Oz.	1895. Oz.
Australasia	2,924,153	2,376,132	2,365,165
South Africa	3,034,675	2,286,084	2,287,773
United States	2,946,300	2,283,445	2,273,580
Russia	1,200,000	1,150,000	1,250,000
India	389,790	321,523	250,640
Other countries	1,860,000	1,747,000	1,798,000
	12,354,918	10,164,184	10,225,158
Value	£43,859,958	£36,082,653	£36,299,310

We have received a sheet containing general and comparative tables of the world's statistics, which has been compiled by Mr. Jules Ayer, and is published by Effingham Wilson at the price of 2s. net. The statistics are wonderfully complete, and must have been compiled with great labour. Owing to the method of arrangement the figures are readily available for reference and may be hung on the walls in the offices of bankers, financiers, and others interested in international statistics with great advantage, embracing as they do the areas of the various countries or states of the globe, their population, religions, military and naval power, financial position, railway and telegraphic mileage, &c.

Chili is said to be negotiating a loan of 80,000,000 marks in Germany, secured on the nitrate deposits of Iquique and Tarapaca.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the Investors' Review, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

CENTRAL PACIFIC RAILROAD.

SHAREHOLDERS' PROTECTION COMMITTEE.

A MEETING of SHAREHOLDERS and BANBURY CERTIFICATE HOLDERS, favourable to the policy of the Protection Committee appointed at the Shareholders' meeting of the 24th of February last, as opposed to the policy of (1) Mr. C. P. Huntington, (2) the Directors, and (3) the Banbury Committee, will be held at Winchester House, Old Broad Street, London, E.C., on Tuesday, the 7th of June, 1898, at 2.30 p.m.

The Right Honourable Sir WILLIAM MARRIOTT will take the Chair.

Prints of Notices and other documents affecting their property may be obtained by all Shareholders on application to—

W. C. GUNNER,
Secretary Shareholders' Protection Committee.

124, Chancery Lane, London, Room No. 12, 2nd June, 1898.

THE LONDON AND MIDLAND BANK, LIMITED.

NOTICE IS HEREBY GIVEN that the Rate of Interest allowed on Deposits at seven days' call at the Head Office and London Branches, will be One-and-a-Half per cent. until further notice.

E. H. HOLDEN, General Manager.

52, Cornhill, E.C., June 2nd, 1898.

THE UNION DISCOUNT COMPANY OF LONDON, LIMITED.

Capital Subscribed	£1,300,000
Paid-up	650,000
Reserve Fund	250,000

NOTICE IS HEREBY GIVEN that the Rates of Interest allowed on money on deposit are this day Reduced, as follows:—At call to One-and-a-Half per cent.; at Seven and Fourteen days' notice to One-and-Three-Quarters per cent. The Company discounts approved bank and mercantile acceptances, receives money on deposit at rates advertised from time to time in the London daily papers, and grants loans on approved negotiable securities.

39, Cornhill, 2nd June, 1898. CHRISTOPHER R. NUGENT, Manager.

THE LONDON JOINT STOCK BANK, LIMITED.

NOTICE IS HEREBY GIVEN that the Rate of Interest allowed at the Head Office and Branches of this Bank on Deposits subject to seven days' notice of withdrawal, is this day reduced to One-and-a-Half per cent. per annum.

W. F. NARRAWAY, General Manager.

5, Princes Street, Mansion House, 2nd June, 1898.

THE MANCHESTER & LIVERPOOL DISTRICT BANKING COMPANY,
LIMITED (LONDON OFFICE).

NOTICE IS HEREBY GIVEN that the Rate of Interest allowed on Deposit Accounts at this Office will be One-and-a-Half per Cent. until further notice.

THOS. FERGUSSON, Manager.

The Investors' Review.

The Week's Money Market.

Bank Rate 3 per Cent.

The weakness of the money market made further rapid progress during the past seven days. In addition to lending money on the market, the Japanese Government bid so energetically for the India sterling bills that the whole amount went to it at the remarkably low figure of 2⅛ per cent. The bills taken being for twelve months, the release of at least £2,500,000 of the Japanese funds becomes more absolute than if the course of merely lending its balances on the market for short dates had been persisted in.

With a further large sum thus to be released, and with money coming out from other sources there was naturally a swift drop down in rates for short loans to 1½ to 1¾ per cent., as against 2 per cent. current a week ago. The India Council, too, was only able to lend small amounts each day, and its rate gradually dropped to 1⅝ per cent. for loans for about three weeks. The reduction in the Bank rate yesterday to 3 per cent. hardly affected rates, but the discount houses have reduced their allowance on deposits by ½ per cent. to 1½ per cent. for "call" and 1¾ per cent. for "notice" money. The joint stock banks also brought down their deposit rate by ½ per cent. to 1½ per cent.

Large additions to floating balances in the market both from home and foreign sources have had an even more marked influence upon discount rates in the course of the week than on the rates for loans. Competition became very keen for bills, and each day saw discount quotations decline until Wednesday, when at one time three months' remitted paper was quoted a "weak" 1⅞ per cent. After that, however, a steadier tone prevailed in spite of the further reduction in the Bank rate from 3½ to 3 per cent., and rates have hardened slightly. The New York exchange has fallen back rather quickly, and the ease in money here has produced a demand for gold on Russian account, which has raised the quotation of bar gold outside to 77s. 10½d. per ounce, and sweeps off the major part of the gold arrivals, although the Bank of England continues to offer a price above its usual price for the metal. American houses have also begun to offer bills freely again, which looks as if the weakness in discounts had reached its limit for the time. But, even allowing for these circumstances, there does not seem any prospect of the market becoming distinctly harder, save in the event of an energetic demand for gold from New York. The Continental demand for gold is seldom a pressing demand, and Japan cannot be counted on as a prominent bidder now that it has locked up so much of its funds. No strong demand, therefore, can be expected to come upon this market except from America, and with the coin and bullion at the Bank of England standing at over thirty-seven millions, and the quiet summer season approaching, it will be difficult to maintain rates short of such a demand. We on the whole look, then, for a short period of comparative quiet in the Money Market, and it will be very welcome. The violent fall in rates which has marked the past fortnight is not wholesome in any sense, or indicative of a position of real strength. Should it be followed, after a brief time, by an equally sharp upward movement, the consequences must be distressing in many directions. As far as we can form any definite

opinion the next movement should be upward, for influences are already apparent adverse to a further decline in the Bank rate. But when it does come we trust the advance will neither be severe nor unduly sudden.

The £2,500,000 of India sterling bills were competed for with great vigour, the applications amounting to no less than £18,834,000. As we have said, the whole issue went to one quarter, in twelve months' bills, at 2⅛ per cent., and it is known that this quarter represented Japan. Such a rate was about ½ per cent. more favourable to the Indian Government than could have been obtained from the open market on paper of the same usance, for it demanded 2⅜ to 2¼ per cent. on three months' bills. An issue of £100,000 3½ per cents. by the City of Capetown was fairly well received, the amount being covered about two and a quarter times, tenders at £100 1s. per cent., or £1 1s. above the minimum, receiving in full. The last issue of 4 per cents. by this Corporation realised an average price of £100 1s.

This week's Bank return is weaker than last at several points. The banking reserve is down £499,000 to £26,046,000, and "other" deposits have declined as much as £1,047,000 to £42,405,000. These changes, however, are not material to the position of the market, being due in part to the outflow of currency at the end of the month. Further, the market has paid the Bank on one account or another £962,000 in reduction of the total of the "other" securities to £32,650,000. Had gold not come in from abroad to the value of £401,000, the reserve must have shrunk nearly £900,000, in which case the rate would scarcely have been lowered to 3 per cent. As it is there is nothing in these figures to encourage an expectation of prolonged cheap money.

SILVER.

The Spanish demand for the metal is becoming an important factor in the market. Not only has it cleared off a certain proportion of the floating supply, but at times it becomes most pressing for more, so that the usual market haggle has to be dispensed with. In these conditions the ordinary dealers in the metal are thus put about at times to cover operations previously entered upon, and for the last day or two in May quite a scramble ensued for the metal. The opening of the month did not see any real relaxation in the quotation, and the price of bars for immediate delivery at 27⅛d. per ounce is ⅛d. above what it was a week ago. With a special demand of this character upsetting ordinary conditions it is impossible to speak with any degree of confidence about the future. Spain will continue to buy silver while it is able, for it represents in coined pesetas nearly two and a half times its value as bullion to that needy Government. But we are afraid that its ability to turn honest, or other, pennies in this way is approaching an end, and when the inevitable *curso forzoso* comes into play, the motive to purchase silver will no longer exist. The market is now particularly hard, but no one knows when the source of the firmness may disappear, and so the forward price is no better than 26⅜d. per ounce. The India Council sold its drafts at a higher figure, and, in face of large applications, the amount offered next week is reduced to forty lacs. This reduction of 50 per cent. in a fortnight is rather rapid in view of the sixteen millions sterling to be realised this year, as, although close upon four and a half millions has been obtained in a little over two months, it is the best period of the whole year for their sales. The Bank of Bengal had reduced its minimum from 11 per cent. to 10.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, June 1, 1898.

ISSUE DEPARTMENT.

	£		£
Notes Issued	51,585,970	Government Debt	11,015,100

Stock Market Notes and Comments.

As we write, business has hardly been resumed on the Stock Exchange. It is not likely to become active, either, until the public mind has overcome what may be called the "Chamberlain funk." As far as we can judge that still dominates, at all events, the speculative class of individual, and it is all the more powerful because nobody can in the least guess why there should be such a ferment among politicians as Mr. Chamberlain's wild words led us to think existed. The French difficulty in West Africa, which was at first blamed for the disturbance of the Colonial Secretary's peace of mind, is in a fair way to disappear and there does not seem to be any new trouble going on between us and our neighbour across the Channel. Neither have we any immediate or acute difference with Russia, except the one Mr. Chamberlain's words caused, and that has, the newspapers say, been conjured away by the explanations and apologies of the Prime Minister, who as usual has to act the peacemaker. No alliance between us and the United States for the purpose of annexing those parts of the world still unclaimed by other Powers, or for other objects, has been talked about, and it is unlikely that we can be drawn into any conflict over disputes amongst the members of the Triple Alliance. We have not heard yet of any plot to annex Spain, nor is Austria in a condition to reassert her sway over any part of disunited Italy. Guess as we may, it is impossible to discover a reason for the extraordinary outbursts politicians, headed by Mr. Chamberlain, every other day treat the nation to. But, as we have said, the vague and the indefinite increase the popular apprehension, and at the present time there is no man sworn at on the Stock Exchange more often or more vigorously than the Secretary of State for the Colonies. He is, in fact, blamed more than he deserves, because even had he held his tongue, we cannot see where active business was to come from.

At all points markets are beset by a prospect of a troubled future. There is no motive for buying any foreign security, not even Brazilian bonds, under the proposed scheme for paying old debts with new. It is, on the contrary, probable enough that the financial difficulties of more than one State will bear with increasing severity upon the resources of the bourses during the remainder of this year, and in the collapse of Spain or Italy the entire structure of international State credit may be put to a severe strain. Home securities, again, still appear to us, and no doubt to most people who can look at the subject with a calm mind, too high in price. The position of our foreign commerce does not warrant us in looking for a recovery in the prices of Home railway stocks to the level of 1896, and when we take into account the effect of dearer bread upon the spending capacity of the masses of the people it seems probable that passenger receipts will suffer this year, or at any rate give no compensation for the decline in goods receipts. Despite cheaper money, then, the probability is that no solid advance can be looked for this summer in the prices of the ordinary stocks of our Home railways, and these form by far the largest interest which our stock markets deal in.

Considerable activity continues to be displayed in the market for United States railroad shares and speculative bonds, but it is the activity produced by the "bull" and the "bear." Perhaps some of the bonds tossed about between London and New York, or New York and Amsterdam, may be worth purchasing as speculative investments just now, such as the so-called prior lien bonds of the Northern Pacific or Erie Companies, the two issues of the Missouri Company, Union Pacific 4 per cents., or Southern 5 per cents. Yet, although the prospects of these and similar issues may be fair, at present there are none of them so cheap as to admit of large operations for the rise in them. And as for the shares, they have mostly reached points which we should not consider representative of their permanent value. Doubtless, the state of war in which the United States now find themselves gives a great impulse to many kinds of traffic, and will benefit the railways accordingly, but there can be no greater mistake than to look upon these transitory gains as permanent. The prudent speculator will be more inclined to count upon a reaction when the war is over, when the special traffic ends and the country is obliged to economise in order to make up the large deficit created by the strife.

It is not necessary to continue this weekly survey further, for we have always to harp on the same string. Not even in the miscellaneous market is there any appreciable scope for an advance in prices, although speculation does linger in some corners of this depart-

ment and manages to get considerable excitement out of such creations as Welsbach stock and Russian Oil shares. In a general way, however, we cannot honestly say that we see reason for an advance in the prices of good securities of the miscellaneous class any more than the others, and as for those not good, or indifferently good, the probability is that as the autumn approaches they will see lower prices than now prevail.

The truth of the matter is that our great accumulation of banking capital is preying upon itself, and sadly requires a new outlet. It is not profitable, and cannot in the long run benefit anybody, to employ this capital in raising the price of existing securities higher and higher without reference to the intrinsic qualities, or future developments affecting the intrinsic qualities, of these securities. The end of this kind of business must be very heavy losses, which would at once begin to disclose themselves were a genuine outlet found on a large scale for our waste capital in new directions. If we come to open up China, for instance, with our capital and business knowledge and skill in conducting great enterprises, and to draw away millions of money in that direction, the effect must be to lower prices all round on the Stock Exchange, because part of the means now employed in sustaining them will be drawn off for use elsewhere. The mischief of all large recent financial operations in which we have been engaged lies in the fact that they have not tended to withdraw capital from us for investment abroad. Our Colonial loans, our Indian loans, and some, at any rate, of our advances to countries like Chili and Japan, have mostly remained here to meet bills falling due for goods bought or interest on previous debts, and thus such concentrations and "fixings" of capital have had the effect of stimulating our markets by putting more means into bankers' hands to be used for forcing up prices. The new loans, &c., subscribed have not had the effect of denuding the market and sending prices down.

Should, however, a really large outlet be found for our capital abroad, and should it begin to be drafted away in large amounts for use out of the country, the whole aspect of our stock markets would at once be changed, and not even the steady influx of new gold from the mines could be trusted to be sufficient to sustain prices on the Stock Exchange, and at the same time to cover the demands made upon us by our fresh commitments abroad. There may be no immediate probability of such a new development as this, and it certainly does not enter into the thoughts of the ordinary dealer in securities; still, we must weigh all chances in estimating the future, and it is by no means improbable that a change in the direction indicated will occur in one form or another before many months have passed by. If we merely send gold to India, as the Simla Government desires, the effect we speak of will be produced in a moderate degree, and our market is so sensitive that the mere anticipation of such an export of gold materially assisted in depressing prices during the months of April and May. Whatever lies ahead, business in stocks and shares cannot, it seems to us, be genuinely large and good with prices at their present height. Dear money has not lasted long enough, nor brought markets down far enough, to encourage the general public to renew its "dabbling" habits, nor yet to invest with liberality.

The Week's Stock Markets.

Holidays have monopolised most of the time and attention of members, and they have been spread over nearly the whole of the week; consequently the volume of fresh business has been extremely small. The general tone continues good owing to the ease of money, the market for United States railroad shares being the only really active one, but a moderate improvement in the whole list of investment stocks is noticeable. Indian railway and Home railway premier stocks have been most in favour, but Colonial Government issues, and the leading Home corporation and county stocks have also been marked up steadily. Consols have more than recovered the dividend just deducted, and the "carry over" disclosed a reduction in the "bear" account, the rate being no more than 2 per cent.

The finer weather prevailing towards the close of last week was responsible for the moderate rise in Home railway stocks, and the returns containing the first part of the Whitsuntide traffic were on the whole satisfactory, the greatest disappointments being the Brighton, South-Eastern, and North-Western Companies figures, all of which show a falling off compared with the week before the holiday last year. Changes in the list are unimportant, Great Western showing a further decline, the new stock now being called only 4¾ premium, and Metropolitan ordinary also fell rather sharply and only partially recovered. Metropolitan District ordinary has again met with support, the supply of stock showing a further shrinkage.

The market for United States railroad shares, although the most active one in the Stock Exchange just now, is still not much troubled with outside business, although the demand for bonds is said to be keener now than for a long time past, both on Continental and New York account. There has accordingly been a steady rise day by day in this class of security, but the absence of any definite news as to what is really going on in Cuban waters continues to prevent any very great increase in speculative business. The principal support has again been given to Milwaukee shares, which mark a further substantial gain, and Union Pacific, Louisville and Nashville, and Northern Pacific preferred are all considerably higher. Last week's eastbound traffic from Chicago amounted to 102,000 tons, while for the corresponding period of last year the tonnage carried amounted to only 49,000 tons. Grand Trunk stocks have been the most conspicuous feature of the week, and the present prices are the highest of the year. The April working statement came out better than even the most sanguine estimates, and the preferences advanced by leaps and bounds, while the prior charge and debenture stocks have also risen considerably. Canadian Pacific shares have not been quite so active, but still mark an advance, the revenue statement for April being about what the market had expected, and the news that the company has obtained control of the Minneapolis and St. Louis road was considered to be a favourable point, as it is expected to prove a valuable extension.

All the Continental bourses were favourably affected by the reduction in the Bank rate here last week, and the firmer tone has lasted. The remarks made by the French President on Sunday, when he declared that France was resolved to observe the strictest neutrality with regard to the war between America and Spain, still further helped the upward movement. Italian Rente has been one of the weak spots in the foreign market, the difficulties in the Cabinet, which at one time threatened to assume serious proportions, sending down the price rather sharply, but a moderate reaction followed when the syndicate which has lately been supporting the market was again seen to be a buyer. Spanish 4 per cents. have not fluctuated much, or received much attention, but the price, which had been dwindling away, recovered quickly when Paris operators began buying, their action following the announcement of the prohibition of silver exports from Spain, and the news that the new loan is now thought to be practically arranged for. The settlement on the Paris Bourse, which commenced on Wednesday, was easily arranged, money being very abundant and rates again much lower. This encouraged speculators, and prices were sent over higher, about the only exception being Turkish groups, which declined on Vienna sales, from which quarter

a report of troubles in Servia emanated. Greek bonds, Chinese 1895 and 1896, and Hungarian 4 per cents. have been inquired for, but other inter-bourse stocks are unaltered and hardly mentioned. Some profit taking after the recent rapid rise in Brazilian bonds caused a temporary set-back, but it was short-lived, and the Rio exchange, again moving up, helped in the recovery which followed the announcement made on Wednesday that the proposals for paying the coupons of the debt for three years in 5 per cent. funding bonds have been accepted. Argentine Government and the various Cedulas advanced steadily and close nearly at the best, the resumption of full dividend payments at a comparatively early date being no doubt one of the inducements held out to attract investors, already partly influenced by the improvement shown in the revenue returns of the Republic due to the big rise in the price of wheat. Chilian bonds moved up in sympathy, but Uruguay 3½ per cents. were inclined to weaken.

Argentine railway stocks advanced steadily in sympathy with the rise in Government bonds, and the good traffics which are again published stimulated buyers. Other South American companies' emissions have also been well supported, and business in this market has been quite brisk. The old Mexican Company's stocks were not much affected, either by the good traffic return or the rise in the price of silver.

In the Miscellaneous market a good deal of time has been absorbed in arranging the Lipton and English Sewing Cotton special settlements, which were very heavy. The rate on Lipton was 2d. to 3d., and that on "Cottons" 3d., both for the end of June. There was a decline in the price of the latter company's shares, owing to the heavy contango and the disclosing of a weak "bull" account. Welsbach ordinary has come into favour again; Coats' ordinary has met with a good deal of support from Glasgow operators, and Anglo-American and one or two other telegraph companies' issues mark rises, Commercial Cable stock rising 5. A slight scare was administered to holders of Russian and Schibaieff Petroleum shares by the publication of statements questioning the validity of the titles of the various petroleum companies working the Russian oil fields, but the reassuring reports which promptly followed prevented anything very serious happening. One or two other movements of importance are noticeable, Dunlop debentures falling 5 (to 65), New River stock 5, and Savoy Hotel ordinary and preference ½ to 1, but on the other hand Guinness has risen 10, Allsopp preferred ordinary 2, and the preference 3, and several other brewery debentures 1, while Harvey Steel ordinary and Fairfield Shipbuilding preference have also advanced.

Markets closed with a slightly irregular tendency. Foreign Government stocks were well supported, all the Continental bourses sending over higher quotations, and Brazilian bonds were strong on the fresh rise in the Rio exchange. Spanish 4 per cents. closed almost without change on the week, and Italian Rente finally recovered the whole of the earlier loss. United States railroad shares presented a ragged appearance at the last, but the bond list shows an unbroken string of rises, the steady inquiry for all the leading descriptions being the feature. Foreign railway stocks closed dull, and Grand Trunk issues also suffered a little and closed below the best. Among Home railways, Midland and Hull and Barnsley left off firm, but Metropolitan ordinary was a weak market.

Mining and Finance Companies.

The South African market has presented a deserted appearance, and prices have been left to take care of

themselves. Changes are therefore trivial. In West Australian ventures Golden Horse Shoe is the feature, the news of the striking of a rich lode bringing in several buyers, and South Kalgurli and Hainault also show a rise on the week, Adelaide again sending over a few buying orders. Among copper-producing concerns Mount Lyell shares rose sharply, the dividend being up to expectations, and the news of the starting of another furnace more than counterbalanced the effect produced by the announcement of a new issue of capital. Indian shares keep very firm, especially Mysore.

ONTARIO'S GOLD RESOURCES.

The province of Ontario is making progress in the production of gold. In other minerals, if we except nickel and copper, it did nothing remarkable last year, and its gold total will not bear comparison with that of British Columbia. But at least it shows a really considerable percentage increase, and the progress made in the five or six years during which the province has been engaged in this branch of mining activity has been relatively rapid. The output in 1897 amounted to 11,412 oz., which compares with 7,154 oz. in the preceding twelve months, 3,038 oz. in 1895, 2,022 oz. in 1894, and 1,695 oz. in 1893—in all 25,321 oz. for the five years. But perhaps the most striking feature of the position is not the present aggregate, but the outlook for the immediate future. It is only within the past three years or so that the authorities have made any systematic study of the auriferous rocks of the province, and it is only now that prospectors, encouraged by the discoveries and conjectures of Dr. Coleman, are beginning to take up claims in the districts more particularly associated with gold—the Upper Seive, Shoal Lake, Manitou, and Lake of the Woods regions. Last year 1,255 locations, representing 115,800 acres, were sold or leased, compared with 1,026 locations of 93,821 acres, for the five previous years; while the new companies formed, nearly every single one for gold mining purposes, numbered 140, with an authorised capital of 101,531,000 dollars, compared with 146 companies with 62,529,000 dollars during the preceding nine years.

NEXT WEEK'S MEETINGS.

Monday, June 6.

Arizona Copper	Edinburgh, 12.30 p.m.
City of London Real Property ...	110, Cannon-street, 1 p.m.
Clogher Valley Railway	Aughnacloy, 12.30 p.m.
J. Lyons & Co.	Trocadero Restaurant, noon.
Quebec Central Railway	5, Gt. Winchester-street, noon.
Warner Estate	Norfolk-Street, Strand, 3 p.m.

Tuesday, June 7.

Bengal and North Western Railway	Winchester House, noon.
Leibig's Extract of Meat	Cannon-street Hotel, 2 p.m.
London Scottish American Trust ...	Cannon-street Hotel, noon.
Norwich Union Fire	Norwich, noon.
Royal Bank of Scotland	Edinburgh, 2 p.m.
Russian Petroleum	Winchester House, noon.
Suez Canal	Paris.

Wednesday, June 8.

Backus and Johnston's Brewery ...	Winchester House, 2 p.m.
Brazilian Submarine Telegraph ...	Winchester House, noon.
Grand Junction Waterworks ...	21, Surrey-street, W.C., 2 p.m.
Madras Railway	61, New Broad-street, 1 p.m.
Milner's Safe	Winchester house, 2 p.m.
Nerbudda Iron and Coal	Gresham House, noon.
South Australian Company	54-5, London Wall, noon.
Southern Mahratta Railway ...	44, Finsbury Circus, noon.
Southern Punjab Railway	Cannon-street Hotel, 1 p.m.
Sun Insurance...	63, Threadneedle-street, 2 p.m.

Thursday, June 9.

Indo-China Steam Navigation ...	29, Cornhill, 2 p.m.
Torquay Hotel	Torquay, 3 p.m.
Victory Gold Mining...	Winchester House, 2 p.m.

Friday, June 10.

Bombay, Baroda, and Central India Railway	Cannon-street Hotel, 1 p.m.
Dumont Coffee	Winchester House, 11.30 a.m.
Northern Assurance	Aberdeen, noon.
Streeter & Co....	18, New Bond-street, 3 p.m.

A. J. White, Limited (Mother Siegel's Syrup) made a net profit of £88,988 in the first year of its existence, ended March 31 last. This pays preference dividend, gives 10 per cent. on the ordinary shares, and allows £11,773 to be carried forward after £5,000 has been set aside to be invested in first-class securities as the nucleus of a reserve fund. The directors state that they have decided to waive their right to 25 per cent. of the profits after 10 per cent. has been distributed on the ordinary shares, in order to assist in the establishment of the reserve fund. This is a very commendable decision. Nothing in the balance-sheet calls for observation, but we think the profit and loss account might be a little more detailed.

Answers to Correspondents.

Questions about public securities, and on all points in company law, as well as on the position of life insurance offices and their promises, will be answered week by week, in the Review, on the following terms and conditions:—

A fee of five shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of five shillings must be sent to cover the cost of such letter, the fee then being ten shillings for one query only, and five shillings for every subsequent one in the same letter. While making this concession the Editor will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The Editor has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The Editor further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the Investors' Review, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

W. D.—(*g*) Apply for return of application money at once. Capital impertinently large, no chance of success. (*a*) There is little hope for this concern, sell if you can. (*b*) (*c*) Both mere counters, sell if any opportunity offers. (*d*) So far the Company has been a miserable failure; if you can send me a copy of the report of investigation committee appointed last year, I will look into it. (*e*) Sell. I have no faith in this concern. (*f*) I am afraid you will find it difficult to get rid of these shares, but you should try. The Company's prospects are not brilliant.

Security.—They are a very fair bond, though certainly not equal to a home security of a similar nature. If your powers permit, I see no reasonable objection to a purchase.

MINING RETURNS.

Bayley's United.—Cyanide plant treated 887 tons tailings yielding 802 oz. gold.

New Bultfontein.—The production of diamonds for three weeks and two days, ended May 21, amounted to 5,900 carats, or an average of 30½ carats per 100 loads.

Victoria and Queen.—Crushed 550 tons for 943 oz.

Alaska Treadwell Gold.—Return for April:—Bullion shipment, $42,389; ore milled, 22,266 tons; sulphurets treated, 314 tons; of bullion there came from sulphurets $11,968.

Brilliant Block.—Have crushed during six weeks 1,932 tons of quartz for a yield of 1,531 oz.

Broken Hill Proprietary reports that 23,472 tons of ore were treated for the four weeks ended May 26, 1898, including product from ores purchased, and that the output from the refinery was 1,095 oz. gold (estimated), 461,682 oz. silver, 2,606 tons of lead, and 53 tons antimonial lead (estimated), the copper matte containing 26 tons of copper (estimated) and 26,245 oz. silver (estimated).

East Murchison United.—Great Eastern.—Clean up May 17, 1,620 tons of ore crushed, 1,100 oz. of gold obtained. Donegal Leases.—390 tons of ore crushed, 356 oz. of gold obtained.

Ottos Kopje Diamond.—6,818 loads washed during week ended May 26; 152 carats won.

Hauraki.—Crushed 150 tons producing 403 oz.

Aladdin's Lamp.—510 tons of ore crushed, yielding 472 oz., and one ton of special ore has been shipped containing 68 oz.

Day Dawn Block and Wyndham.—Result of crushing for the fortnight ended May 28:—Tons crushed, 1,500; yield of gold, 1,533 oz., including tailings.

Eaglehawk Consolidated.—General clean up yielded for the last fortnight 189 oz.

Frank Smith Diamond Mines.—3,700 loads washed, producing 177 carats.

Melbourne Democrat.—Crushed 330 tons of ore, producing 127 oz. of gold.

New Australian Broken Hill Consols.—Fortnight's output:—Three tons, containing 6,600 oz. of silver.

Menzies Mining and Exploration.—During month of March and following month, 284 tons crushed, 193 oz. Month of May, 100 tons crushed, 169 oz. Since when 30 tons crushed. Treated by cyanide 180 tons, 50 oz.

Britannia (Mount Malcolm District).—Crushed 580 tons, yielding 734 oz.

Brilliant.—2,250 tons of stone has been crushed for a yield of 2,300 oz. of gold.

Bonnie Dundee.—Crushed 189 tons of quartz for 100 oz. of gold.

Day Dawn P. C.—For fortnight ended May 28:—Crushing No. 3 shaft 430 tons, 824 oz.

Great Eastern Collieries.—Last month's output, 14,700.

Highland Chief.—For the last fortnight crushed 140 tons for a yield of 49 oz.

Koffyfontein.—Returns for May, 3,550 carats.

Londonderry.—Crushed 450 tons for a yield of 675 oz.

Mount Usher.—Fifty two tons ore crushed, 55 oz. gold.

Myalls United.—Crushed 1,600 tons of ore for a yield over the plates of 307 oz. bullion; with 2½ dwt. per ton in the tailings: by the cyanide process 1,700 tons tailings were treated for a yield of 264 oz. of bullion.

Central Boulder.—Number of tons milled 320, total yield 487 ounces.

Norseman Gold Mines.—Return for month of May, 1,015 oz. from 715 tons crushed. Expenses £1,050, profit £1,950.

Prices of Mine and Mining Finance Companies' Shares.

Shares £1 each, except where otherwise stated.

Australian.

NOTICES.

Northern Pacific Railroad general first mortgage bonds for $43,200 were drawn on the 13th inst. for payment on July 1 at 110 per cent. The amount of such coupon bonds outstanding and undrawn is now reduced to $3,214,000.

All interest in the business of Richard Quincey & Son has passed to Edmund de Quincey Quincey and Richard de Quincey Quincey, sons of Roger de Q. Quincey.

Messrs. George Trollope & Sons give notice that, her Majesty's Commissioners of Works having acquired and pulled down No. 15, Parliament-street, Westminster, which had been occupied by their firm since 1777, they have opened new offices at 14, Mount-street, Grosvenor-square, and at 5, Victoria-street, Westminster.

Coupons of the bonds of the St. Lawrence and Ottawa Railway falling due on June 15 will be paid, on and after that date, at the London office of the Canadian Pacific Railway Company, 1, Queen Victoria-street, E.C.

Messrs. Arthur G. Morrish and Francis O. Grant have amalgamated their businesses under the style of Morrish, Grant, & Co.

The amount of Northern Pacific Railroad general first mortgage bonds recently drawn for redemption is $432,000, not $43,200, as previously stated.

The numbers are published of $432,000 Northern Pacific Railroad general first mortgage bonds, which have been drawn for repayment on July 1 next at 110 per cent.

Notice is given to the holders of Railway Equipment Company of Minnesota 6 per cent. bonds dated June 1, 1891, that the Atlantic Trust Company will receive, at its New York office, until July 11, offers for the sale of the bonds to the amount of $50,000 at not exceeding par and interest to the date of payment. If $50,000 in amount of the bonds are not offered for sale the trustee will redeem by lot bonds to the amount not offered, in accordance with the provisions of the deed of trust.

Baring Brothers & Co., Limited, announce that all unconverted Russian 5 per cent. Transcaucasian Railroad (formerly Poti-Tiflis Railroad) bonds still in circulation are called in for repayment on July 5. Bonds should be presented on or before June 20.

The directors of the Mount Lyell Mining and Railway Company, Limited, have announced their attention to issue 25 000 of the unissued shares, in the proportion of one share for each ten shares held at £3 per share premium (£6 per share), to all shareholders whose names shall be on the registers on June 15.

The London Joint Stock Bank, Limited, announces that branches at Muswell Hill and Lower Edmonton, and sub-branches at Winchmore Hill and Palmer's Green, are now open.

Messrs. J. S. Morgan & Co., and Messrs. J. P. Morgan & Co., in referring to their circular of February 19, 1898, offering to exchange various New York Central and Hudson River Railroad Company bonds for the new 3½ per cent. gold mortgage bonds of 1997 of the same company, now give notice that their offer to supply the new bonds at 103⅜ and interest will be withdrawn on the 10th inst., after which date the rate will be 104 and interest. New York Central 4 per cent debentures of 1905 will be received at 103·08 ex coupon due June 1.

The numbers are announced of eight bonds of £100 each of the Matanzas and Sabanilla (Cuba) Railroad 7 per cent. loan for £300,000, which have been acquired by purchase and are withdrawn from circulation; also of ninety-two bonds of £100 each which have been drawn for payment on June 15, and will, together with the half-yearly interest due on that date, be paid at the counting-house of Messrs. J. Henry Schröder & Co.

The numbers are published of the first mortgage bonds of the Nitrate Railways Company, Limited, which have been drawn for redemption at the rate of 105 per cent. on July 1.

Mr. Luis Camacho announces the numbers of twenty-two bonds of the Mexican 6 per cent. consolidated external loan of 1893, which have been purchased and cancelled.

The Western Australian Bank has opened a branch at Leonora, Western Australia.

Messrs. R. Anderson & Co., of 14, Cockspur-street, Charing-cross, have opened a City office at 15, Great Winchester-street.

Mr. Douglas M. Hogg's connection with Hogg, Curtis, Campbell, & Co. having ceased, the power granted to him to sign "per procuration" has been withdrawn. Mr. Colin Algernon Campbell, eldest son of Mr. William Middleton Campbell, will henceforward sign for the firm "per procuration."

DIVIDENDS ANNOUNCED.

MISCELLANEOUS.

MOUNT LYELL MINING AND RAILWAY COMPANY, LIMITED.—Dividend of 4s. has been declared, payable on July 1.

MOUNT MORGAN GOLD MINING COMPANY, LIMITED.—6d. per share for the month of May, payable on June 1.

VICTORY (CHARTERS TOWERS) GOLD MINING, LIMITED.—6d. per share has been declared, payable on June 23.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk. Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf., Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 23. New Series. FRIDAY, JUNE 10, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Investment Index,

A Quarterly Supplement to the "Investors' Review."

Price 2s. net. 8s. 6d. per annum, post free.

THE INVESTMENT INDEX is an indispensable supplement to the Investors' Review. A file of it enables investors to follow the ups and downs of markets, and each number gives the return obtainable on all classes of securities at recent prices, arranged in a most convenient form for reference. Appended to its tables of figures are criticisms on company balance sheets, State Budgets, &c., similar to those in the Investors' Review.

Regarding it, the *Speaker* says: "The Quarterly 'Investment Index' is probably the handiest and fullest, as it is certainly the safest, of guides to the investor."

"The compilation of securities is particularly valuable."—*Pall Mall Gazette.*

"Its carefully classified list of securities will be found very valuable."—*Globe.*

"At no time has such a list of securities been more valuable than the present."—*Star.*

"The invaluable 'Investors' Index.'"—*Sketch.*

"A most valuable compilation."—*Glasgow Herald.*

Subscription to the "Investors' Review" and "Investment Index," 36s. per annum, post free.

The Investors' Review.

Our Wasteful National Expenditure.

Business was resumed on Monday by the House of Commons with, amongst other things, a debate on this subject which ought to do good. Unhappily, nothing is more difficult at the present time than to get people to pay any attention to the waste of the nation's substance now so fashionable. We have reached a gross revenue, as Sir William Harcourt pointed out in his most interesting speech, of nearly £117,000,000, twelve of which we hand back to the local authorities, or to landlords and voluntary schools without one penny of advantage to the local ratepayer. On the contrary, this money stimulates local spending bodies to extravagance, and rates keep advancing in rural and urban districts, until they now press very severely in many places upon the great majority of those who have to meet them. In most cases the extravagance is accompanied by local borrowing which, in some quarters, has become almost colonial in its recklessness, and has already told with marked effect upon the standing of many of our municipal securities in the market. These are all much cheaper than they were two years ago, and the tendency for them is to sink still lower in price. We might expect that intelligent citizens would take note of these things, and become earnest in pressing upon their representatives in Parliament the necessity to economise. The reverse of this appears to be the

truth. Parliament spends money as a fountain gushes out water, and nobody seems to care the slightest thing about it.

To those who can look back even for ten years, the contrast between the present attitude of the nation towards excessive expenditure and that old fashion of economy and carefulness, once the glory of the Liberal Party, is sufficiently startling to bewilder the mind. The truth appears to be that the disease of transpontine Imperialism, as fostered by that charlatan statesman, Lord Beaconsfield, has crept over our mental faculties like a fungus, rendering us incapable of realising in what direction the nation is drifting. From no economic point of view whatever is there justification to be found for the habits of extravagance now prevailing. Let us apply a very simple test to them. The Jingoes are continually harping upon the necessity for "a great fleet" to protect our commerce and maintain our Imperial domination in all parts of the world. They have so successfully preached this pernicious doctrine that we have now an expenditure upon the Navy amounting to nearly £24,000,000. The average for the five years ended with March 31, 1874, was under £10,000,000. In other words, we have increased the national outlay under this head by more than 140 per cent. in less than thirty years. An increase not quite so phenomenal, but almost equally unjustifiable, has taken place in the outlay upon the army. It ranged from about £13,500,000 and £15,000,000, including part cost of small wars, between 1870 and 1874, and it is about £19,250,000 for the current financial year. Putting the two branches of the Service together, we find an increase of fully 72 per cent. in the outlay compared with what it was in the early seventies.

What justification is there for this monstrous outlay in the expansion of our trade? None whatever. If we take the figures of our imports and exports for the five years ended with 1874 we do not find the slightest evidence that they have expanded in a manner at all proportionate to the increase in our military and naval outlay. The average value of the imports for those five years was about £346,000,000. For 1897 their total value was about £451,000,000. This shows an increase of £105,000,000, or about 30 per cent., as compared with an increase of 72 per cent. in the cost of our military and naval establishments. But there has been practically no increase in the exports since 1874. The average for the five years ended then, including foreign and colonial merchandise re-exported, was £290,000,000, and for last year the total was only £294,000,000, an increase of about 1½ per cent. There is nothing, in fact, more serious about the present business position of the nation than this stagnation of our exports, especially when placed alongside the comparatively steady increase in our imports. No doubt the volume or bulk of the goods manufactured by us and sent out of the country has increased possibly 20 per cent. to 25 per cent., comparing now with a quarter of a century ago; but this increase, when placed alongside the diminished monetary return, may imply, and probably does imply, considerably reduced profits, while the steady expansion of our imports means either that we are living more and more on the proceeds of our capital invested abroad, or that we are pledging and expending capital and assets accumulated in the past, in order to maintain extravagant habits of living. Look at the question from whatever point we may, it is perfectly obvious that the extension of our Empire, and the horrible drain upon our resources which Jingoism has succeeded in imposing under pretence of providing for the maintenance and safety of this Empire, finds no justification in the figures of our commerce.

Our own distinct opinion, formed many years ago and confirmed by constant observation, is that the hideously wasteful expenditure of the nation as it now stands is being met to an increasing extent out of capital. We know very well that the proceeds of the "Death Duties" are a direct levy upon capital, but in an indirect manner the income tax also, to no insignificant extent, represents the same thing, and so do part at least of the proceeds of our Customs duties. Assume that the expansiveness of our imports is due to returns from the investment of British moneys abroad, and how far can we say that the wealth thus placed out at interest is permanently invested with safety, and to be relied on as a continuous source of income?

The answer to this question, it seems to us, must be that the bulk of our foreign investments are of a most transitory and unreliable character; and anybody who looks to the position of our debt-burdened dependencies abroad, without prejudice and in the calm light of reason, must come to the conclusion that very little of a catastrophe would be required to upset the equilibrium of every one of them, and in doing so to dry up at once the source of our apparently abounding and inexhaustible revenue. The "clever idiots," to use an expressive Americanism, who direct the nation in its insane policy of military expenditure and "Imperial" expansion, emit the most blood-curdling shouts, speaking metaphorically, over the danger we should be in in time of war through the stoppage of some of our food supplies. "What would England do," they bellow in all keys of real, or more probably simulated, terror, "were the fleets of her enemies to prevent the regular supply of grain from reaching her shores? The people would starve; there would be revolution and bloodshed and heaven knows what." Language of this kind is stupid enough, even when honest, and unjustified by any sane view of our position. It is scarcely possible to imagine a modern war which could prevent us from receiving all the food we required through one channel or another.

There is, however, a real danger of starvation which these pestilent creatures overlook altogether, and which they are, by their mischievous and misdirected energy, doing their best to make imminent for us all, and that is the danger that we may be unable to find the means to pay for sufficient food were our trade once deranged and our credit system breached by the consequences of a great war. In plain English, as we have again and again insisted, and must continue to insist until the nation becomes aware of the gulf towards which it is plunging, a war on a great scale in which we might be involved would probably at once stop the flow of interest from every one of our colonies and dependencies, because we should have no money to lend them to pay interest with. In regard to them we are most emphatically at the present moment living upon capital. They pay us interest which we advance to them under loans, raised upon various pretexts, but whose real purpose is to keep them from stopping payment. We revel in the income thus supplied and think we are happily living upon their earnings, when we are in actual fact eating up our own capital.

How long this can go on no man dare venture to predict. It is pretty sure to continue as long as our credit system in London is able to keep the appearances of solvency untainted and unbroken in these dependencies, but we may be perfectly certain that if we had to go to war with France or Russia or Germany, or with any two European countries combined, and had to draw off capital from our money market in order to sustain the cost of this war, the immediate consequence would be a suspension of payment, partial or complete, by India, by every colony in Australasia, and probably by the Cape of Good Hope, Natal, and Canada as well, not to mention minor possessions of ours, all of which we have carefully wrapped up in a Nessus shirt of debt. Will the nation look at matters a little in this light, instead of giving the ear continually to those men who bawl every day into the ears that more and more money must be spent on the navy "to make us strong," that the army must be increased by this and that number of battalions and batteries of guns and regiments of cavalry, and so on, lest we be caught napping? Sir Charles Dilke takes a leading part in this hounding the nation to its destruction, and we venture to say that he ought to know better and to be ashamed of himself for helping to conduct such a campaign—a campaign of destruction—which must end in throwing this country back far more than it could ever possibly advance were it to take possession of the entire African continent and half China within the next five years. Nor is throwing back the worst of it. We are positively so encumbering ourselves with armour as to be placed out of all capacity to fight. We are drawing our national revenue out of capital more and more every year, and probably this explains why the nation accepts its fate with such apparent apathy. Were it really a national income taken out of incomes of the people the outcry for reduction in the burdens might have been irresistible long ago. As it is, we shall arise some day and discover that we have consumed our resources in riotous living, spent them upon useless ironclads we can neither arm, man, coal, nor put food and powder in, that our army is a phantom, and that the nation stands cheek by jowl with starvation, because it has not the wherewithal left to purchase foreign grain.

Indian Financial Gymnastics.

A fit of economy must be coming over the India Office, for the annual effusion of the Secretary of State in explanation of the Budget has been reduced to ten pages and a cover. Perhaps the figures usually appended to it will be given in detail in the British reprint of the Indian Budget, a reprint, by-the-bye, which ought not to be necessary if a sufficient number of the original document, printed as a "Gazette extraordinary" in Calcutta, were imported for the use of Members of Parliament and the general public. Taking this memorandum as it stands, though, we are rather glad that no more money than was absolutely necessary has been wasted upon it. It tells us nothing new, and its shiftings, tossings, and arrangements of the Budget figures do not tend to anybody's enlightenment, if that "body" wants to know how it really stands with India. The usual parade is made of the saving by exchange, the "economies" in this and that, and the extra revenue from t'other, with hopes of nice sums from arrears of rent which fell behind in famine years, and, of course, "a surplus"—bless it when it comes! But no particular attention is drawn to the significant fact that the trade of India has declined steadily during the last three years. The exports of merchandise were 1,143 odd millions of rupees in 1895, about 1,004 millions of rupees in 1896, and little more than 976 millions last year. The famine, &c., is of course officially condemned to bear the blame of this decline, not the barrier set up by the artificially high exchange. But why did not famine force imports also down. If the people had less to sell how could they increase their buying? The truth is that exports were depressed and imports stimulated by the abnormal exchange, and consequently the balance on the commercial account in favour of India has fallen from, say, 414 million rupees in the first year named to 240 millions in the last. Including the movement of treasure both ways, the decline has been from Rs. 323,000,000 to Rs.106,000,000, and, to meet all demands, Government and private, India requires a favourable trade balance of 450 to 500 million rupees every year. This curtailment of the favourable trade balance is one of the most brilliant and striking results imaginable of the Indian Government's currency policy in closing the mints. It compels an increase in European borrowings, and the wisdom of a Solomon is not required to enable an unwarped mind to understand that this progress downwards by the "primrose way" of debt and ever more debt, has only to go on a few years longer to bring the Indian Empire to the end of its tether. Nevertheless, the officials can go on dreaming of "savings by exchange" and constructing surpluses which are never realised, and all the time be earnest only in discovering fresh pretexts and excuses for adding to the debt. They are going to add Rs.30,000,000 this year to the rupee debt of India and at least some £2,750,000 net to the sterling debt in England. Since March, 1896, the paper money has been augmented by Rs.20,000,000 —which are less hurtful to Indian credit than they might be if they could be got into circulation—by six millions sterling in bills of exchange raised to meet current expenditure in England and still afloat, and by seventy millions of rupees of interest-bearing debt launched in India and up to now in the hands mostly of the first subscribers, besides smaller borrowings on the part of the railway companies. As long as this free borrowing can go on the Indian Government can manufacture surpluses of a sort most years and boast that it is rich.

But if there was not much enlightenment in the Secretary of State's Memorandum, we may perhaps find it well supplemented in the debate on the Indian Budget which took place on Tuesday in the House of Commons. Thanks to the necessity the Indian Government lies under to obtain power to raise a loan "not exceeding £10,000,000" here, this debate came thus early instead of at the very tail of the Parliamentary session. The change has not been one of good augury for the affairs of India. It has always been an excuse hitherto that, owing to the period in the session when the Indian Budget was discussed, it never got thoroughly looked into. Well, we have had the debate early this year, and it was more perfunctory than ever. The members were conspicuous for their absence, so that Lord George Hamilton spoke to nearly empty

benches, and the few who remained to take part in the debate never once, if we except Mr. McLean and Sir William Wedderburn, lifted the debate into a plane above that of the mere routine official. And it is significant of the attitude of the British public towards the population of India that most of the newspapers suppressed Sir W. Wedderburn's appeal for inquiry into the condition of the ryots. Lord George's explanation of the Budget was clear and straightforward from his point of view, which is the bureaucratic one, but reading it one would never suppose that there was anything in the shape of danger to our rule in India from the poverty and discontent of its population or in the extravagance of its Government. He boasted that although in the past three years famine, plague, earthquake, and war had cost the Indian Budgets upwards of Rs.243,000,000, the deficit for that period was under Rs.61,000,000, so that Rs.182,000,000 had come from the current revenue. Also he was mighty proud of the fact that during the famine about 829,000,000 units had been fed, being an average of 1,814,000 per day for fifteen months, and he was reasonably and fairly elated at this feat.

Nevertheless, India has to borrow more and more heavily as time goes on, and we may well ask how her deficits would have been filled without these borrowings? We have stated the net borrowing intentions of the present year as far as the Memorandum enables us to gather them, and the mind which is not befogged with official glosses can easily understand how it is that revenue keeps up and that obligations of India in London are partially met, while from £6,000,000 to £10,000,000 of fresh money continues to be poured by us into the country at the call of the Indian Government. That the people are being impoverished by this steady imposition of foreign capital upon them, capital which imposes continually additional burdens for interest, never appears to be suspected by the ordinary mind. So far is it from being so that we find Sir Henry Fowler boasting, in that singularly wooden and pretentious speech delivered by him in the debate, that although the total charges of the Indian Government payable here may amount "to £15,000,000 or £16,000,000" (they are really more, but that does not matter to a great mind like Sir Henry's) "when one analyses that amount one finds that the railway loans, interest, and management will represent next year £8,815,000 of the £16,000,000, which," as he triumphantly exclaims, "is no drain upon India, as it is paid out of the revenues of the railways." Indeed, Sir Henry, and pray how are the "revenues of the railways" collected in India converted into sterling money payable in London? Is it not by the sale of Indian produce, and is not this Indian produce furnished by the labour of the people of India; and if the amount of these exports in excess of the imports be insufficient to cover the annual charges payable here by the Indian Government, must not commerce be disarranged? Are not these railway charges, in other words, a form of indirect taxation, which may be crushing in its weight upon the Indian people? Even if it is sufficient, does not all this produce exported from India, in order that its proceeds may be devoted to meeting Government charges here, imply that the profits of the trade go not to the producer, not to the cultivator and humble taxpayer, but into the Exchequer, and is not the real question that the Government has to investigate the question whether the strain thus placed upon the natives of India is or is not altogether in excess of their capacity to bear it?

We have no doubts upon these points, and have not had a doubt this many a year. We find proofs continually accumulating that the burdens are excessive, and not least in the news which comes from India by all mouths and mails regarding the increasing disaffection of the people. Their hatred of our rule is becoming so intense as to be an imminent danger to our position there, and unless the whole system of Indian finance is changed, it seems to us that our governors may soon have to deal with a strike of the population against our dominion which will be far more difficult to cope with than any mutiny of armed men could be. Passive resistance will take the place of active warfare against us; in sheer despair the weary Indian will lie down and die rather than be ground to the dust any longer by our exactions, and the still more ruthless exactions of the moneylenders whom we have made the drone-bees of the Indian community.

In order to really fathom the depth of the stupidity which is manifested in many quarters by people who profess to know India and Indian affairs, we must go outside the dreary and hollow House of Commons debate, and look at what a person who might be deemed unprejudiced has to say on the subject of Indian "wealth." In last week's *Economist* an "East Indian Merchant" delivered himself of an attack upon Sir Robert Giffen, a portion of which we will here quote, partly because the "views" Sir Robert gracefully attributes to the City in his letters, and which this letter writer attacks, are exactly those which we have been hammering away at these many years back, and especially during the past six years in the pages of this Review. In a manner, therefore, we are defending our own position when we take up the cudgels against this Eastern merchant. Here is the paragraph:—

> A "poor" and "debtor" country, not so rich even as Egypt, which, Sir Robert says, has got Cook's tourists: not to be compared with a creditor country like France, one of the richest in the world. Now, a "debtor," on a balance of transactions, I take to be one who has to find, and a "creditor" one who has to receive money to square the account. Is it not, then, a notorious fact, of which Sir Robert Giffen and the "City," whose views he says he represents, seem to be unaware, that India for the past sixty years has gone on receiving millions on millions of gold and millions on millions of silver? In the House of Commons, on March 29 last, Sir Samuel Montagu said: "There is an enormous quantity of gold in India, which has been estimated at over £300,000,000, and I feel sure from my knowledge of what has been sent to India during the last fifty years that £300,000,000 is even below the mark." That, besides tons upon tons of silver, has been received by "a poor and debtor" country, which has paid not only for all this great mass of bullion, but for all her other indebtedness as well. In the last official year to March 31, the returns of which are just to hand, famine notwithstanding, the net imports of gold were forty-nine millions of rupees, and of silver eighty-four millions. But then, Sir Robert suggests that if not a poor country as a whole, it has a poor population. There is such a lot of them, such a large divisor, that, however big the dividend, the quotient is small. Now, I hold with the immortal Micawber, that wealth is relative. "Annual income," he says, "twenty pounds; annual expenditure, nineteen nineteen six; result, happiness. Annual income, twenty pounds; annual expenditure, twenty ought six; result, misery." The former position, I take it, describes the normal condition of the frugal, industrious, and saving peasantry of both France and India. Says Sir Robert Giffen: "France is clearly not an example for India in this matter." It seems to me that no two countries, both in soil and people, have industrially more in common. If Sir Robert Giffen wants relative poverty, in the Micawber sense, I think he will find it nearer home.

This, to be sure, is very eloquent and striking, but if the

enthusiastic writer had paused to look a little below the surface he would have found that the "tons upon tons" of silver, and "millions on millions" of gold which India has imported afford no proof whatever that India is growing richer, but the contrary. If a country is rich, in the sense of wealth disseminated more and more amongst the people, it buys increasing quantities of articles of consumption or luxury. Bullion is not what it wants, but merchandise; and the fact that India prefers bullion to merchandise in such large amounts demonstrates that the small class which is enriched through the peace we secure for the whole country, or through their participation in the commerce we have established, is a hoarding class which imports gold and silver to hide it away, having no use for our merchandise and no scope for the employment of their gains as fructifying capital in domestic industries, by reason of the utter poverty of the masses beneath them. Looked at in their true light, these bullion imports of India are perhaps the most emphatic condemnation of our rule which could be adduced. One might have imagined that a merchant would have been the first to see this, and that the mere fact that, assuming him to be an importer of goods into India, he found only an extremely limited outlet for these goods, at the same time that gold and silver continued to pour into the country, might have warned him of something wrong in the body economic. But no, he cites this bullion movement as a proof that the "wealth" of India, of the Indian people, is great and expanding. The wealth of a class may be, doubtless is. The zemindars and other landowners, the moneylenders, the mercantile houses of native origin, and a comparatively small number of people engaged in professions and industries in the cities and on the railways, may all be making money; indeed, some of them must be; but it is money of no use to them, except to turn into ornaments or to hoard as coin or bullion. They accumulate it and bury it, and it is as much lost to us, and to any beneficial employment for the development of India, as if it had been all sunk in the Indian Ocean. All the while that the few heap up this useless gold and silver the great multitude of the people sinks into deeper and deeper poverty. But the merchant never thought of that, nor does the serene official.

Some Company-Mongering Flotsam.

Among the flood of new ventures that were launched last year, not a few were of a kind that did not appeal to the public. Indeed much of the going to allotment and issuing letters of regret must have partaken rather of the character of a farce. Companies thus badly received are often slow to file their lists of shareholders at Somerset House, but there is a limit to the indulgence granted by that long-suffering institution, and so long a time has now elapsed that reluctant promoters have been compelled to disgorge their information. A visit to that shrine of company knowledge has enabled us to look into the position of a few of these new creations, and we must say that the company promoter does not seem to have fared very well. First on our list is

Hood and Moore's Stores.

This represents a collection of corn and forage shops which was brought out as a company in December 9, 1895. The capital is, or was, £150,000 in £1 shares, divided equally into preference and ordinary, and the £75,000 of preference shares were offered for subscription. Bearing in mind the uninviting fate that has befallen similar issues, it is not surprising to find that two-thirds of the amount offered went into the following twenty-two names:—

Preference.

	No. of Shares.
Industrial and General Trust	2,500
H. Evans	3,000
A. F. G. Gardner	1,000
G. A. Touch	2,500
T. Pim	3,000
Hon. C. N. Lawrence	3,000
W. C. Slaughter	650
Sir R. Quain	500
H. P. Norton	3,000
A. J. Simpson	1,000
H. Lavarack	1,000
Jessie Touch	2,500
G. Taylor	1,500
New Imperial Investment	2,500
W. May	3,000
J. E. Touch	3,000
Hon. H. A. Lawrence	2,940
W. Robertson	1,800
Hon. Mrs. C. Lawrence	950
W. Lander	1,900
G. M. Simmonds	2,640
H. P. Weaver	1,000

Ordinary.

Alan F. G. Gardner	35,000
G. W. Hood	10,000
C. Moore	10,000
T. R. Moore	10,000

It is a significant circumstance that since the prospectus was issued, Mr. J. E. Touch has become a director, and he, with Mr. G. A. Touch, Mrs. Jessie Touch, Mr. W. C. Slaughter, the Industrial and General Trust, the Hons. C. N., H. A., and Mrs. C. Lawrence, and Messrs. W. Robertson and W. Lander, of the Imperial Ottoman Bank, represent a little coterie who have taken over 21,000 of the shares amongst them. Did the issue flag, and the Touches and their following come to the rescue? If so, they have not been very happy in their choice, for the £1 preference shares are now quoted about 10s. Another peculiarity of the issue is this: that Mr. A. F. G. Gardner, whose name did not appear in the prospectus, took no less than £35,000 of the ordinary shares. They are, we should imagine, worthless, so it does not matter to the public.

Monger's West Australian Stores.

Issued as a company in May, 1897, this concern was to buy up the store business of J. H. Monger & Co., Limited, and the stores, hotel, and transport business of the West Australian Goldfields, both, of course, in Western Australia. The former business was being managed by Dalgety & Co., Limited, owing to the decease of the former owner, and there might have been a good reason for the formation of this concern, which, however, was quite spoiled, from an investment point of view, by one fact. The businesses were first sold to the Colonial Industries Company, Limited, which then re-sold to Monger's West Australian Stores, Limited, at a profit not stated. Now, five out of the seven directors of the latter company were directors or shareholders in the Colonial Industries Company, and thus arranged the purchase and sale for themselves. It is a position that no honourable man should have taken without disclosing the profit netted. The capital was

fixed at £255,000 in £1 shares, of which £5,000 were founders' and the balance was equally divided into ordinary and preference shares. In May, 1897, there were 66,500 preference, 66,750 ordinary, and a few of the founders' shares offered for subscription. The result does not seem to have been a great success in the way of subscriptions from the public :—

	No. of Shares.		
	Pref.	Ord.	Founders'.
A. A. Baumann	500	—	—
B. H. Blyth	—	1,000	5
Lord Crawshaw	1,000	3,000	40
J. Craven	1,205	1,025	62
L. Craven	500	500	10
A. Chalk	—	1,000	10
Colonial Industries, Limited	3,505	470	2,269
A. G. Dalgety	—	2,000	20
General Assets Trust ...	500	—	5
E. T. Hooley...	—	1,000	20
W. Henty	600	510	31
Industrial and General Trust	1,705	1,270	277
H. W. Jefferson	905	760	46
N. C. Ogle	—	1,015	30
S. Pope	—	510	15
J. Reixach	2,000	—	40
R. Stapley	300	510	23
W. Smith	300	255	15
Scottish Colonial Goldfields	300	255	15
Trustees, Executors, and Sec. Insurance	—	1,525	45
Stock Conversion and Investment Trust... ...	1,205	—	32
London and Australasian Debenture Corporation ...	600	—	16
United States Debenture Corporation	1,505	—	40
G. W. Wolff	1,505	1,280	77
G. S. Woodman	1,203	1,525	127
West Australian Goldfields	20,000	—	400
G. Younger	1,205	510	47
J. Younger	1,205	510	47

Roughly speaking, this short list contains about half the capital, and, noting the similarity in the number of shares held, it is presumable that underwriters had to take up a considerable percentage. The Industrial & General Trust again figures largely, and it has drawn in its train the other trusts that meekly follow its lead. One would almost fancy that the gay old times of Winchester House finance are beginning to be repeated. Mr. E. T. Hooley is not the Ernest Terah of Dunlop and other notorious examples, but is Mr. Edward Timothy Hooley, chief manager to Dalgety & Co., Limited, a gentleman who, we imagine, would not think himself flattered just now by being mistaken for that brilliant financier, now under a cloud.

The British Du Bois Manufacturing Company.

In May, 1897, this concern was issued with the modest capital of £100,000, and there was a decided cycle-finance flavour about the promotion, although the article to be produced was lead traps. No less than two companies had to combine in producing the affair, but the shares were not relished by the public, who apparently subscribed very moderately. Leading holders are contained in the following list :—

	No. of shares.
Reed Exploration Syndicate	470
E. S. Torrey...	30,900
J. B. Purchase	4,000
C. K. Vokins...	920
A. Du Cros	4,000
A. P. Du Cros	4,000
F. Purchase	1,523
Du Bois Manufacturing Company ...	30,000
W. H. Purchase	1,000
F. D. Barker...	1,100
C. E. Hill	1,880
P. E. Pilditch	940
J. Lang	3,200
E. K. Purchase	4,940
A. J. Reed	940

These few names account for about £80,000 of the capital. The Du Bois Manufacturing Company was, of course, the vendor, and Mr. E. S. Torrey is chairman of the British Du Bois Company, Mr. E. K. Purchase is a director, and Messrs. J. B. and F. Purchase are probably members of the firm of John B. and F. Purchase, who are solicitors to the company. Mr. J. B. Purchase, by-the-bye, is a director of the Dunlop Pneumatic Tyre, and thus the connection between those interested in the concern and the Messrs. Du Cros seems to be rather close. Mr. C. K. Vokins is the auditor, so that the "family party" in this company appears to hold a large proportion of the capital. The shares are included in the official list, but at present the compilers of that compendium have not ventured upon a quotation.

Jarrahdale Jarrah Forest and Railways.

Created in October, 1897, this speculative undertaking offered £100,000 in £10 preference shares, the £200,000 of ordinary capital going to the vendors. The preference capital does not appear to have been taken up to any extent by the latter, but some significant names appear as holders of a fair proportion of the issue. We give the holdings in sterling, as the shares are £10 each :—

	Preferred.
	£
London and Chicago Contract Corporation ...	7,270
Omnium Investment Trust	230
Debenture Securities Investment	1,000
Brewery and Commercial Trust...	1,000
United Discount and Securities Company ...	1,000
London General Investment	1,200
City of London Contract Corporation	7,850
Government and General Investment	220
Imperial Colonial Finance and Agency ...	250
J. R. Ellerman	250
H. O'Hagan	1,000
T. O'Hagan	2,000
C. Morrison	6,500

In these thirteen names stands, therefore, nearly one-third of the total issue. The London and Chicago Contract Corporation and the City of London Contract Corporation are the pet trusts of the two Messrs. O'Hagan, whose record as company promoters is not a happy one. The Debenture Securities Investment, Brewery and Commercial Trust, United Discount and Securities, and London General Investment are companies that are submissive to Mr. J. R. Ellerman, who seems to have joined hands with the brothers O'Hagan in the floating of this concern. The other trusts probably came in as underwriters. The shares are fairly maintained, standing about par, but then this is the "heyday" of Jarrah companies.

Maison Virot, Limited.

The last issue of the André Mendel group. 70,000 ordinary £1 shares of the company were offered to the public last July at £1 10s. each. The response to this appeal cannot be considered to have been favourable, and the leading holders of the ordinary shares are as follows :—

	No. of shares.
A. von André	2,916
M. Abrahams	1,000

	No. of shares.
C. Krebs	3,000
E. McLoughlin	1,700
W. Mendel	15,753
C. Meyer	1,000
W. Nocton	1,000
J. H. Parks	1,000
E. Seligman	500

Thus two-fifths of the issue is in nine names, and of these no less than 17,669 shares are in the names of Messrs. A. von André and W. Mendel, who are the leading members of the issuing firm of André, Mendel & Co. In the meantime, the quotation of these ordinary shares has fallen to ¾ to 1, so that the poor public who subscribed at 1½ must be having a bad time. Of course, Messrs. André and Mendel obtained their shares at a very different figure, and so they can probably be philosophically indifferent to the fall in the market price.

Our Foreign Trade in May.

No change for the better is to be seen in the figures of this trade for the past month. In order that readers may understand how it is going we have compiled the subjoined summary of tables, which will enable them to follow the movement of our commerce out and in, both for the month and for the five months of this year and the preceding two years :—

Imports in May.

	1896. £	1897. £	1898. £
Merchandise	33,349,988	36,346,438	37,706,378
Gold	2,608,212	3,527,593	8,241,182
Silver	1,194,310	1,415,008	925,297
Total	37,152,510	41,289,039	46,872,857

Exports.

British and Irish Produce ...	18,835,243	19,322,146	17,891,354
Foreign and Colonial Produce	4,748,642	4,954,692	5,106,534
Gold	1,613,902	2,291,196	1,598,971
Silver	1,182,195	1,640,918	933,641
Total	26,379,982	28,208,952	25,530,500
Excess value of imports over exports	10,772,528	13,080,087	21,342,357

Imports for Five Months ended May 31.

Merchandise	181,325,730	189,031,470	196,987,003
Gold	11,729,517	13,084,856	22,572,817
Silver	6,019,087	6,743,877	4,956,426
Total	199,074,334	208,860,203	224,516,246

Exports.

British and Irish Produce	98,585,679	98,320,455	93,024,483
Foreign and Colonial Merchandise	25,166,803	26,912,849	26,356,559
Gold	8,892,585	9,941,848	14,398,605
Silver	5,934,714	6,189,521	5,784,708
Total	138,579,784	141,364,673	139,564,355
Excess of imports over exports	60,494,550	67,495,530	84,951,891

By these figures it will be seen that, including everything, the adverse balance on the month's trade was £21,342,000, and on the five months' trade about £85,000,000 this year. Compared with the two previous years this shows a progressive increase in badness, but we do not wish to magnify too much the significance of this widening gap between what we buy and what we are able to sell, because it is just possible that the causes producing it may be temporary. We know, for example, that wheat has been much dearer this year than last, and, indeed, the cost of cereals accounts for the whole May increase in our imports over the totals of a year ago. We imported, for example, rather less wheat last month than in May, 1896, but the cost of this smaller quantity was fully £1,100,000 in excess of last year's. In other words, while wheat in 1896 cost us about 6s. 9d. per cwt. it cost us last month 11s. In the same way maize, of which we import enormous quantities, principally from the United States, Canada, and Roumania, has risen in price from about 3s. 2¼d. per cwt. a year ago to 4s. 5¼d. Assuming this rise to be temporary there is no reason why the divergence between our imports and exports, so far as it is dependent on dear grain, should not soon begin to grow less. In the meantime, however, it must not be lost sight of that we are, up to date, nearly £24,500,000 to the bad compared with 1896, and about £17,500,000 worse than in 1897. As the adverse balance is a continuous one it ought to follow that this autumn, if we have no extraordinary resource to fall back upon, bullion will again have to be exported, or securities sold for export, in order to make good the additional deficit; because it may fairly be assumed that the returns from our foreign investments have not increased in volume at a sufficient pace to meet the extra demand upon the nation's purse.

The worst part of the entire trading account undoubtedly continues to be the stagnation of our exports. Had they been increasing ever so little there would have been ground for believing that our larger current expenditure abroad was bearing its legitimate fruit in the larger purchases of our foreign customers. As yet this has not been the case. The total exports for the month of British and Irish produce are worse than those for either of the two preceding Mays, and including foreign and colonial merchandise, and gold and silver, the exhibit is not very materially improved. But there was one working day less this May than last, owing to Whitsuntide, and we must not make too much of one month. If we take the totals for the five months a progressive decrease is to be seen, although it is very slight indeed this year as compared with 1896. And it may, of course, be that sufficient time has not yet elapsed to enable our larger expenditure on foreign products, principally foreign foods, to tell upon the buying power of our customers abroad. We must guard ourselves, therefore, from drawing too gloomy a conclusion from the actual position of our foreign commerce. It stagnates unquestionably, but there are many circumstances at work to make it backward, not least of which is the poverty that has overtaken Continental nations, through their extravagant Budgets, through bad harvests, or, as in the case of Spain, Italy, and Greece, through threatening social upheavals and wars. In the Far East, also, Chinese trade has never recovered from the effects of the war with Japan, and is not likely to recover so long as the former great export of Chinese tea to this country keeps on its way to disappear. In our exports of cotton manufactures it remains true that, but for the heavy shipments to India—shipments which require watching because they are unhealthily stimulated by an inflated rate of exchange, and which may lead to serious mercantile difficulties—a sensible decline would

be visible, because nowhere else is adequate compensation for the loss of business, with China and the United States more particularly, being found. Our woollen trade with the United States goes from bad to worse, until it threatens to disappear in some classes of goods, and there also fresh outlets have not arisen in adequate absorbing power. Our Australian colonies do not buy more, but rather less; in fact, our own dependencies outside India are not helping us very much to meet an adverse trade balance at the present time, in spite of their liberal contributions of bullion. The iron trade is recovering somewhat, especially machinery and mill-work, but a melancholy array of declines is visible in all our other great branches of export, even in raw materials; for last month foreign customers took away £220,000 worth less of our coal than in May, 1897. For all this, we are inclined to limit the moralising on our trade position for the present to a warning against over-confidence in regard to the maintenance of "cheap money" during the autumn. If these trade figures mean anything, they mean that we shall have to draw on our stock of gold then to pay for the excessive amount of imports now reaching this country.

Wheat on the Down Grade.

The effect of the "war scare" on the price of wheat has ended, and things are rapidly getting into a more natural condition. The war itself never really did interfere with the supply, but there was a fear that it might, and that gave the speculators and the "corner" men the opportunity to operate for their own advantage. But the prophets who prognosticated a continued dire scarcity in wheat and a rise in price to at least 60s. a quarter have proved mistaken. The scarcity even now is not so very terrible to contemplate, for the attraction of high prices has brought supplies in great abundance, and from quarters where wheat for export was not believed to exist. The arrivals for last week amounted to the extraordinary amount of 1,663,000 quarters, and to that amount Russia, who was supposed to have none to spare, contributed no less than 584,000 quarters; the United States, 543,000; and India, 377,000. What further supplies Russia may be able to afford we are not in a position to say; but the American exports still continue abnormally large, and there is no reason to expect any immediate diminution in their volume. In the week ending May 28, the Atlantic exports of wheat, flour included, amounted to 3,726,442 bushels, against 1,536,607 at the same time last year. It is true the Pacific exports fell to 92,184 bushels, against 314,955 last year; but that deficiency is not at all disquieting in face of the quantities coming from Atlantic ports. Wheat receipts at the West again, according to *Dun's Review*, do not diminish, but run far beyond those of a year ago; for the week mentioned they were 4,625,253 bushels, against 2,969,173 at the same period last year. In the four weeks from both coasts the exports have been 13,691,874 bushels, against 5,704,334 last year. As to future supplies from America there seems no present reason to fear, and as to the condition of the coming crop, all accounts, including the official returns, agree in the estimate that the wheat yield will this year be remarkably large, in spite of the acknowledged deficiency in California. The harvest has already begun in several of the Western States, and some parcels forwarded to New York from Texas confirm the estimate as to the quality of the wheat. Our supplies from India are more likely to increase than diminish; and, taking these and other sources of supply into account, we need, we think, have no fear of the future. Of the home crops we have also, on the whole, favourable reports, and at least a full average crop is counted upon.

In these circumstances, it was, of course, inevitable that there should be a fall in prices. Last week there was a decline in American descriptions of about 2s. 6d., and the loss has certainly not been recovered this week. In the English provincial markets the universal tendency was downwards, and the drop up to the present amounts to from 2s. to 3s. per quarter. The decline has been wrung from the sellers. They stood out bravely for a long time against all reduction; but buyers were equally dogged, and it in time became evident that, if business was to be done at all, reductions must be submitted to. The feeling in Mark-lane on Wednesday was very despondent. But it is doubtful if the decline will be allowed to go very much further—not, at least, until we have more precise information about the amount and quality of the coming crop. Speculators are evidently very uncertain about the future. There have been great fluctuations in New York and Liverpool, but it is very seldom that rises are long maintained. Options also fluctuate greatly, but the tendency is to keep on a low level, though on Wednesday there was in New York some upward reaction. For some Manitoban wheat almost due, 49s. 6d. has been paid, and a parcel just shipped, 48s., while 47s .3d. and 47s. 6d. have been paid for May-June shipment. For September-October shipment there have been sellers of No. 1 Northern at 33s. 6d. and of Kansas at 33s. 9d. On the whole, however, we are inclined to think that, unless the coming crops greatly exceed in quantity and quality present estimates and anticipations, the price of wheat will not go very far under 40s. per quarter. The war may not greatly interfere with our supplies of wheat; but if much prolonged, as seems not improbable, it must exercise a certain adverse influence on prices. There seems, then, every indication that the present "fat year" on which the Chancellor of the Exchequer recently congratulated the English farmers may be followed by another —not perhaps so very fat as this, but still not so very lean as they have for some time been accustomed to.

On the important question of the price of bread, not very much can be said. One reduction from 7d. to 6½d. has already taken place. It might by this time have easily been followed by another of equal amount; but bakers, like farmers, have been slow to move on the down grade. Their excuse is that, having bought in stocks at the higher figures reigning a week or two ago they cannot make a further reduction until these stocks have been exhausted. That in itself is plausible enough and reasonable enough; but we should not have thought that prudent bakers would have bought largely when prices were at the fever heat of a fortnight ago. They are more likely to have bought only to supply present and pressing needs; so that the most adventurous purchasers among them cannot now have big stocks of the dear wheat. They urge also, however, that it is not sure that the present

downward tendency will continue, that there may not indeed be a sudden turn in the opposite direction. The facts we have just stated, however, certainly point in the opposite direction. As far as ordinary intelligence can discern the price will go down rather than up; and even cautiously prudent bakers might risk a further reduction in the price of bread without immediate serious loss, or any great danger of being caught in some sudden upward swirl of prices. They cannot long defer following the downward tendency in the price of wheat.

New South Wales Trade Statistics.

A correspondent has sent us the subjoined extract from a Colonial newspaper; which one he has omitted to inform us, but we judge it to be a Sydney paper :—

A week or two back we quoted some adverse comments on New South Wales conditions in Mr. A. J. Wilson's new financial paper, founded on a set of figures greatly erroneous. We anticipated that the next issue would contain a correction of the mistake, discovered by some representative of the colony. But no one has been on the alert, or Mr. Wilson is not taken as a serious authority, for nothing of the kind has been published, and it still remains before the London public on the authority of the Investors' Review that the colony in 1897 had an excess of imports amounting to £2,500,000, instead of an excess of exports amounting to £1,983,000. The case is represented as four millions and a half sterling against the colony. Is there any wonder, with such statements prominently under the notice of investors, that New South Wales securities should have within six weeks lost the relative advantage they then had over those of the other colonies? This makes it apparent why our securities should have fallen more than those of New Zealand and South Australia, and brought them to the level of the stocks of this colony. On looking at the figures we find that the Investors' Review took the trade of Sydney to represent that of the whole colony. The real difference is shown in the following statement :—

	Imports.	Exports.	Excess of Imports or Exports.
Sydney	£15,229,128	£12,281,109	Excess of Imp. £2,948,019
Colony	15,051,000	17,034,543	Excess of Exp. 1,983,000

The Sydney figures are simply the aggregate value of the imports and exports without regard to the re-exports, and obviously cannot be quoted as representative of the net trade of the colony—that is, the imports for home consumption and the exports of its own produce. This is really represented in the second line (Mr. Coghlan's figures), which show an excess of exports amounting to £1,983,000. Sydney undoubtedly does the bulk of the foreign trade of the colony; but, as an expert, Mr. Wilson ought to have known that the trade of a capital does not count as that of all the colony. No one would think of treating the imports and exports of London as representing the trade of the United Kingdom, or of setting its imports as against its total exports to furnish an illustration of its solvency. Yet that is equivalent to what has been done.

Part III. of the "Statistical Register," dealing with commerce, has just been published by Mr. Coghlan. The main features of the trade of the colony have already been published. The following figures show the value of the imports, exports, and total trade per head of population for the past four years :—

	Imports.	Exports.	Total.
1894	£12 15 5	£16 12 7	£29 8 0
1895	12 12 11	17 6 11	29 19 10
1896	15 19 4	17 17 4	33 16 8
1897	16 11 10	18 2 6	34 14 4

These figures indicate improvement, though not very rapid. The drought seriously affected the trade, particularly the export trade.

It is with much regret that we thus, for the first time, learn of our mistake with reference to the trade of New South Wales; but we cannot help thinking that the mistake was a very pardonable one, seeing that to the best of our recollection no indication whatever was given in the newspaper from which we quoted that the figures referred only to the trade of Sydney or to the trade of the colony minus re-exports, we are not even now sure which.

And there is another reason why the blunder was not so serious as it looks in the eyes of colonial journalists, and that is the obvious unreality of these figures, whether as we took them or as now given. As will be seen from the extract quoted above, New South Wales claims to have exported produce last year to the value of £18 2s. 6d. per head of the population, and to have imported £16 11s. 10d. worth per head. We have often expressed our doubts as to the genuineness of these totals, and will once more state some of the grounds for them. Probably even Australians will grant that their territories and industries are not quite so well developed as those of the United Kingdom, and that their wealth, however much it may bulk in the statistical compilations sent us, is not so great as our own. Moreover, they can hardly deny that the great strength of England consists in the magnificent foreign trade which she does, not only with her colonies, but with all parts of the world, civilised and uncivilised. Also it cannot be gainsaid that in the matter of industrial products the United Kingdom has an immense variety of articles to offer to its customers, while the colonies have nothing except raw produce. Great as our trade is, however, we only managed to import £12 10s. worth of goods and bullion per head of the population in the past year, taking that population at 40,000,000. We include bullion because it figures on both sides of the account in the New South Wales returns, as in those of all the Australasian colonies. Our imports last year thus fell fully £4 per head below those of New South Wales, which is a sufficiently remarkable fact in itself; and it is still worse with the record of our exports. These, including re-exports of foreign and colonial merchandise, and also bullion, only amounted to about £8 11s. per head last year, or, say, £9 10s. per head less than the per head value of the exports of New South Wales as set forth above. There must be something very far wrong in colonial statistics which produce a disparity like this. We are New South Wales's creditors, drawing two and a half to three millions or more from it in hard cash every year, and yet it can spend £4 a head more per annum on foreign goods than we are able to do with all our advantages.

In the articles written by us during 1892-93 upon the finances of these Australasian colonies we pointed out that their official figures were unreliable in many respects, and as far as regards the statistics of trade, specially so, the same article being counted several times over as it passed out and in across the frontier of different colonies, and was returned in the trade statistics of each. Probably enough the same cause of misleading returns prevails to-day, but we cannot help thinking that there is at least one other. Last week, for instance, in mentioning the decline in the value of the Australasian wool crop, we quoted figures, presumably taken from official returns, which showed that the value entered in colonial returns was worked out upon the price of the wool in the London market. This is an entirely misleading way of stating export values, and we fear in some instances even this false standard is not adhered to, but that the wool is sometimes entered at prices which the exporter imagines he ought to receive; and if such a practice is followed with wool it doubtless is so with other articles. Until the obscurity on this point is

satisfactorily cleared up we must be pardoned for laying very little stress upon the apparent excess value on exports over imports shown by the figures quoted above. For, obviously, if exports are overvalued in a systematic way, as well as duplicated in various returns, neither the colonist nor the statistician here can have any true conception of the position of the foreign trade of these settlements.

The true test value of a crop of wool is the price which it fetches on the markets of the various colonies. Doubtless there may often be no market on the spot in the true sense of the term to apply this test by, because the pastoral industries of the colonies, and most of their other industries, are conducted on credit in such a manner that the finance companies and banks have control of the entire production and need not in any way locally compete against each other. Competition only arises when the wool reaches Europe, and has to be sold against our home supply and the supplies from South America, the Cape, and other parts of the world. It may, therefore, be an excuse for the colonial statistician that he has no local test of any reliability to apply, and that the London market price is the only genuine measure available. Even so, 15 per cent. at least ought to be deducted from totals thus arrived at to cover freight, insurance, commissions, and other expenses incident to conducting trade.

Still another test may be applied to these figures. We may compare them with those of the United States, which is a country much more developed than Australia, and, although more hampered by tariffs than New South Wales, still a country full of industrial capacities and resources well organised, such as no Australasian settlement can boast of. The figures of the United States' foreign trade for past year have not yet reached us from the Statistical Bureau in Washington, but we have those for 1896 before us, and they indicate that the value of the imports of the American Union was about £2 3s. 2d. per head in that year, and the value of the exports £2 10s. Is it possible to trust figures such as those New South Wales presents us with in view of a fact like that? We think not.

And there is still another source of doubt. When we turn to our own statistics, which are probably on the whole the most accurate in the world, we find that our total exports to the entire Australasian group only amounted to £24,355,000 in 1896, and that our imports from there were only worth £29,402,000. New South Wales took less than £6,400,000 of our goods in 1896. Where did her other imports come from which brought the total up to £15,000,000? A great deal more light is wanted on this point, and until it is forthcoming we must continue to treat these Australasian statistics with deep distrust, as all works of the fancy ought to be treated when thrust into the domain of facts.

Let it be admitted, however, that the figures are approximately correct, and that New South Wales last year succeeded in exporting nearly £2,000,000 worth more of her own and other colonies' goods than she imported, and still the situation of the colony is not satisfactory. At a moderate estimate, her obligations payable in London, in the shape of interest on the public debt and of interest on corporate capital borrowed or raised in this country, amounts to £3,000,000 a year. Indeed, we believe it to be considerably more, counting in the cost of carrying her goods over sea to and fro, but put it at £3,000,000, and the trade of the country does not, on the very best exhibit possible, show a sufficient margin to cover this obligation without allowing anything in the way of profit to the trader. It follows, therefore, that New South Wales, strongest colony of the group though it be, must continue to live by the help of the English moneylender. The people, whether as individuals or as an infant nation, cannot pay their way.

The writer whose paragraph we quote does us too much honour in ascribing to the statement we made the fall which took place in New South Wales securities at the early part of the year. It was not our criticism which brought that about, but the fact that the colony had just issued a fresh loan on this market about the time money with us began to advance in price, and the weight of this loan, which was not then all placed with investors, but lying mostly in the hands of middlemen, was sufficient to press down the quotations for the previously issued stocks of the colony. Now that money in London has become cheaper again these stocks have gone up, and they will continue at high prices until once again money becomes dear. We should like serious colonial politicians to note this fact. It is a warning to them, or ought to be a warning, of the fate that will overtake them should money ever become so dear in London as to paralyse our lending power. When a crisis breaks out here which stops our capacity to go on manufacturing credit for these dependencies at their demand, every colony in the group will find itself unable to meet its engagements. This is not a prophecy or any mere "croaking"; it is the strict logical conclusion to be drawn from the circumstances of the case. While they borrow here New South Wales and the other colonies will continue to make an appearance of meeting their obligations; when borrowing becomes impossible their bankruptcy will declare itself, and when overtaken by that bankruptcy, miscalculations or misinterpretations of statistics imperfectly presented, and in whose genuineness at the best we have extremely little faith, can count for very little. But how soon is a credit upset coming in England? We may not guess, but let colonial politicians note this one significant fact: when money was 4 per cent. in the City of London, and looked like going to 5 per cent., the securities of all these settlements not only declined in price, but became absolutely unsaleable at any price, except in minute amounts. The market seemed to be literally gorged with them until it could hold no more. If 4 per cent. did this, what will 5 or 6 per cent. do?

Economic and Financial Notes and Correspondence.

"With a Hooley, Hooley, Ho!"

We knew it must be so. The subjoined paragraph is cut from the *St. James's Gazette* of Wednesday, and it gives the opening scene in the story of a comedy of company-making which should deepen in interest as it unfolds. We need not say that Mr. Hooley's resolution takes us in no way by surprise, and we feel sure it cannot be a shock to our readers. But we do not at all desire to jump upon the poor fellow, and are fully disposed to believe that Mr. Beyfus, his lawyer, spoke only the literal truth when he assured Mr. Registrar Brougham that his client had not made very large sums through his promotions, and that "he had been victimised to an extent which would be quite a revela-

tion to the public." We who have amusedly watched the play from the first could not but be amazed now and then at the childlike, or childish, simplicity of the man. He allowed the schemer with something to vend to humbug him, and he was pounced upon by troops of aristocratic and "society" people, whose impecunious pretentiosity is ever forcing them to hunt down every creature from whom they think money may be wrung. They "subscribed" for shares in his companies, lent him their names on promise of gain, "underwrote" on commission like furies, and when unable to sell their allotment letters at a premium, or to wriggle out of their contracts, got him to back their bills for the calls, or left him to "finance" the stew as best he could. In return they made him a member of the Carlton Club, got him baptised by a bishop, it is said, and fooled his vanity to the point which was fatal to the frog in the fable. Now that he is "down" they will turn their backs upon him and forget his existence, if their creditors will allow them—not so much because they are specially cruel or selfish beyond their class and kind, as because their hunger compels them to be ceaselessly on the prowl for some other victim to suck dry.

At the Bankruptcy Court to-day, Mr. Registrar Brougham, upon the application of Messrs. Beyfus & Beyfus, solicitors, made a receiving order in the case of Ernest Terah Hooley, who has presented his petition, describing himself as of Hill-street, Berkeley-square; of Risley Hall, near Derby; and of Papworth Hall, in the county of Cambridge, company promoter, carrying on business at the Midland Grand Hotel, St. Pancras, and at the Royal Insurance-buildings, Nottingham.

Mr. Beyfus, in making his application, said he regretted to have to ask his Honour to make a receiving order on a petition presented by Mr. E. T. Hooley, whose name was well known through the magnitude of the affairs in which he had been engaged. He desired to state that this step had only been taken by Mr. Hooley after making the most enormous sacrifices and solely in consequence of the necessity of preserving the assets for the general body of creditors instead of allowing some individuals to obtain payment at the expense of others. Mr. Hooley had no doubt that if he had been met in a reasonable way by some of the most pressing of his creditors, this step would have been unnecessary. There seemed to have been a perfect run upon him, and in consequence of the enormous amount of claims which had been made, for which he was totally unprepared, it was perfectly impossible for him to do justice to bonâ-fide creditors while having to attend to the mass of litigation with which he was threatened. It was impossible at present to say what were the liabilities. No doubt they would be very large, but, on the other hand, the assets also were very large, and would no doubt show a good result. This must depend a great deal upon their realisation, which was another reason for coming to the court, so that this might be effected without any undue sacrifice. Looking at the amount which would be involved, Mr. Beyfus said he thought it right to add that he was not prepared, at present, to state whether any scheme would be propounded, as this was a matter which would require the gravest consideration. It was due to Mr. Hooley to say that from what he (Mr. Beyfus) could learn he had not personally reaped the benefit of the very large sums which had been made in connection with some of his promotions, and that he had been victimised to an extent which would be quite a revelation to the public. Now that he had presented his petition he would do his best to have a statement prepared and laid before his creditors at the earliest possible moment.

Inquiry at the Midland Grand Hotel this morning elicited the information that Mr. Hooley and the whole of his staff have left the place.

Mr. Ernest Terah Hooley is in his thirty-ninth year, having been born at Long Eaton, Derbyshire, in 1859. He is the only son of Mr. Terah Hooley, and was married in 1882. His education was private, and he started life as a stockbroker in Nottingham, afterwards becoming a financier; and it was in this sphere that he became famous. Among other enterprises he has floated are the Dunlop Tyre, Bovril, Schweppe, Humber, and Singer Companies. He presented St. Paul's Cathedral with a gold Communion Service. He owns estates in Derbyshire, Cambridgeshire, Huntingdonshire, Essex, Wiltshire, and Scotland.

After reading the above pregnant little story, it does not seem unreasonable to suggest that the Chapter of St. Paul's Cathedral ought to take immediate steps to have that brilliant service of communion plate included among the assets available for Mr. Hooley's creditors. This is the seemly and honest course to follow, and the sooner it is adopted the better will it be for the credit of the Church. Apart from this episode, which involves a question of decency and public morals, the subject which interests us most may be indicated best by the question, "What bank, or banks, will lose most by this failure"? We have from the first appearance of this meteoric financier among us been curious on this point, and now look forward to receiving enlightenment. Money from somewhere he must have had in heaps. Who gave it to him? There will be surprises in the answer to this question, unless we are more than usually mistaken.

Is the Petroleum Committee Corrupt?

In its issue of Tuesday last the *Star* newspaper brought two charges of the most damning character against Mr. Jesse Collings in his capacity as chairman of this committee. First, it declared that he was "safeguarding the Standard Oil Trust" by deliberately delaying the issue of the committee's report; and, secondly, as corollary to this, it accused him on the authority of the *Times* of incorporating in his draft views practically identical with those expounded by the late Sir Vivian Majendie, "an official who was notoriously influenced by the pundits of the Standard Oil Trust." To allow no one to mistake its meaning the *Star* winds up its article in these words:—"Mr. Collings is merely quibbling when he professes a tender interest in 'trades which employ petroleum for other purposes than illumination.' Let him exempt them from the general law, if he likes, as gunsmiths and quarries and mines are exempted from the laws as to explosives. But let him not sacrifice the lives of the poor to fill the coffers of John D. Rockefeller."

It is impossible to exaggerate the significance of language like this applied to a public man. If it has any definite meaning, it amounts to an insinuation that Mr. Collings has been "bought up," "nobbled," or in some way "squared" by the Standard Oil Trust. Is he going to sit down in supineness under such an accusation. Will his colleagues in Parliament allow him to pass it by in silence? A more odious innuendo from all points of view could not be imagined, for it implies that this man, who has hitherto posed as the friend of the poor—the old "three acres and a cow" champion, in fact—is allowing himself to be made a tool of by a foreign trading organisation which cares no more for human lives than if men were no better than beetles. It is a perfectly abominable thing that insinuations of this kind should be bandied about so constantly in connection with the Standard Oil Trust's murdering and fire-raising explosive oils, but if Mr. Collings sits still under the attack of the *Star*, and if he does get his committee to report that the true cure for the horrible slaughter and waste of property now allowed to go on unchecked—not even protested against by the over-fat and careless "ring" insurance companies—is to invent a safety lamp and not to properly refine the oil meant for illumination, why then we fear we shall come to think pretty much as the *Star* seems to think now. Yet no, the scantiness of Mr. Collings's understanding will even then be the safeguard of his honour.

Australian Federation.

We have taken, it must be confessed, but a slender interest in the agitation which has been going on throughout the Australian colonies on this question. It does not seem to us that a genuine federation can be within the range of practical politics, with these settlements situated as they are. The motive pushing the agitation on is plain enough, in some at least of these settlements, and we are not surprised that Victoria, South Australia, and Tasmania gave more or less large, although insufficient, majorities in favour of the project, or that it should have been rejected by a very halting poll in New South Wales. New South Wales is regarded with envious eyes, quite unreasonably, by some of the other settlements, who would be very glad to see it take up a portion of their debt burdens. To shift the load of the debt, in short, is the mainspring of this agitation. The Victorians, who are being dragged down towards despair by the horrible pressure of their debts, seized upon the scheme, doubtless with the hope that some kind of mixing up would be accomplished, whereby the various colonial debts, including their own, would be refunded into one large stock, and erected into a trustee security

here, so that it might be emitted at or near 2½ per cent. By an arrangement of this kind the Victorians would not only shift part of their burden on to New South Wales, but the gross weight of that burden would be in itself reduced. From some points of view we should have no objection to this course being taken, although we do not consider that even such a stock is good enough to be stamped a "trustee" security, but it is impossible to federate on a mere re-arrangement of the debts basis. Dozens of other questions must crop up, with their jealousies and conflict of interests, which for a long time yet will render any real fusion of these various infant "States" on the model of the United States Federal Republic almost impossible. When the colonies have developed and have compounded with their creditors once or twice more they may reach a more reasonable frame of mind on railway management, local legislative independence, multiplicity of office-holders and so forth, and be willing to sacrifice individual pride of "nationality" in order to become merged in one considerable and promising State. At present any such union is impossible.

The New York Life Insurance Company.

Mr. John M. McCall has courteously sent us some interesting statistics and the fifty-third annual report of this company, being that for 1897. We gladly bear witness, as we have already done, to the fulness of detail in which this company sets forth its investments, and to the superior quality, as far as we are able to judge, of its investments as a whole, compared with those of its rival American companies. If we have any criticism to make it is that too much of the money seems to us to be invested in real estate, which of course would be impossible of realisation were a genuine pinch to come for money, and much of which may very well be overvalued now. Assume, however, that the investments are all first-class, and that the company, as viewed from its own standpoint, is in a sound financial position, it still seems to us that a great deal more information is wanted before we can say that its policies are good investments here. The money drawn from here is all invested in the States, and British policy-holders have no special lien on any part of it—on any of the securities. Moreover, the business of this company is run on the same lines that the other American companies have made us familiar with.

The great bulk, that is to say, of its "new" business never lives to become old, and we remain quite unable to understand how this can be if the business is that of genuine life insurance. We could understand something at least of the peculiarity of American business did this and other companies lend largely on their own policies. It might then be that an enormous number of merely temporary policies would be taken out, which, having served their end, would be dropped as a matter of course in a year or two; but this company does not lend freely on its policies, although it does more in this way than its rivals known here. It is against the habits of all such companies to encourage this practice, and if their policies are taken out for the purpose of raising loans elsewhere, as might be the case with the Mutual, which has the New York Guaranty and Trust Company to work its lending business by, there is still no accounting either for the waste in policies or the cost of new business. Policies raised to form collateral security for loans ought not to be costly to procure, because that is a business which would come to the companies mostly of its own accord, so to speak. This New York Life Company did $135,556,000 worth of new insurance last year, and lost $87,359,000 by death, maturity, surrender, expiry, &c. Thus nearly 64½ per cent. of the gain by the new business disappeared in the loss of the old, and only $14,053,000 of this consisted in claims paid on matured policies. No wonder that in such circumstances and in spite of nearly 25½ per cent. of the premium income going in commissions and expenses, the company should have had $13,982,000 to add to its funds at the end of the year. Much of that money represented somebody's loss. We shall soon return to this subject.

Resources of Natal.

It was a pretty picture that Sir W. Hely-Hutchinson drew of Natal to the London Chamber of Commerce on Monday. Not that the lecture was a search after the picturesque in language. It was rather a plain statement of facts as to the present position of the youngest of our self-governing colonies; but that position is, on the whole, so good, and has been so sturdily won, that the interested reader cannot help taking with him a pleasant impression of Natal. It seems to have an almost ideal climate. Europeans can live and thrive in it; consumptives may be benefited by it; blacks luxuriate in it; and tea and sugar keep much of the not very luxuriant coast region cultivated like a garden. And sugar in Natal is a paying speculation. It is not protected by the ruinous bounty system, but it is to some extent by an import duty which, if the sugar fields expand, the growers may feel themselves strong enough to dispense with. The imports in 1897 amounted to £5,983,589, while the exports were only £1,621,932.

This means a heavy bill to meet and pay even if we assume, as is indeed the case, that a large portion of the import total represents mere transit trade; but it is inevitable in a young colony, and while Natal was the first of the South African colonies to build a railway—of two miles in length—she has now 466 miles of open line; and the income from the railways is enough to pay the interest on the public debt of £8,020,000, incurred mostly in remunerative public works. More than that, the railways last year contributed £208,271 in reduction of taxation. These railways must yet become a valuable property and remain a perennial source of income to the growing colony. With nearly 800,000 acres of land under cultivation, it is a matter of surprise that Natal should have to import such quantities of preserved and frozen provisions, as well as grain and flour. Something must be wanting in its agricultural development, but that fault can and doubtless will be mended. And as to its coal, it seems to have a great future. Of course the quality varies; but there is excellent household coal, and that for steam purposes is only 10 to 15 per cent. worse than the best Welsh. It is already a thriving trade, and as new seams of coal are being discovered its steady expansion is inevitable. The steam coal can be supplied for £1, where the Welsh article would cost 40s. Durban, a city and port reclaimed from the sea sand, has already become a coaling station for the mercantile marine, and will probably soon become a naval coaling station as well. With fairly careful administration, and a rigid determination to keep down the debt, except when incurred for remunerative necessities, Natal's future seems the brightest among any of the South African States. There is no race-trouble as yet. Though there are 700,000 Kaffirs in the colony, they seem quiet and contented; and with 60,000 Europeans, and only 5,000 Dutch, there seems no reason to dread racial differences.

Company Cobbling.

For manipulation of assets we presume no one can beat the board of a mining development company. One of these concerns with the accompanying area of mining claims, grazing land, and water rights has only to spend a few thousands, perhaps hundreds, in opening out a likely or unlikely reef, and, presto! they can claim to have an asset worth £100,000, £200,000, or just what valuation the board likes to put upon it. The shares of this newly-born babe may be peddled out to the public, distributed to the shareholders as a bonus, or retained in the treasury—an American phrase this—in order to add to the beauty of the balance-sheet. If gold could only be won as easily as companies can be manufactured, the race of mining millionaires would be greatly extended.

And the production of companies in this manner

serves a good many ends. Take for instance Willoughby's Consols, which owns 4,451 gold mining claims, 554,000 acres of land, 206 building sites in Bulawayo, Umtali, and Victoria, besides interests in the Zambesi and Tuli coalfields. The issued capital of this huge conglomerate is £813,960, and, needless to say, since the company was formed in 1894 no dividend has been paid. But some little time back the directors took 217 mining claims, and out of them formed two fresh companies —the Bonsor and the Dunraven—with an aggregate capital of £340,000. This capital was all paper, and of course the shareholders in the Willoughby's Consols possessed nothing more by the formation of these two companies than they did before. But the board had now fresh divisible entities which could perhaps be rendered vendable, and so it magnanimously distributes to the shareholders one share in each of these two companies to every holder of twenty-five shares in Willoughby's Consols. The value of these bits of paper is problematical, but on face value it represents a bonus of 8 per cent., and of course takes away from the parent company the stain of paying no dividend. This nicely sugared bolus, however, contains, as usually is the case, an unpleasant core in the shape of a further issue of shares by the two embryonic companies, which the shareholders are asked to subscribe at par. The sum of £20,000 in each case is proposed to be issued, so that by distributing 64,000 fully paid shares "for nothing," it is hoped to obtain £40,000 in cash from the shareholders on the other shares to be paid for. It is far better from the board point of view to do this than to say that Willoughby's Consols wanted to raise £40,000 more capital, and after all it does not cost much to print a few additional nicely decorated certificates. To an outsider the operation is very much akin to the proceeding of the Irishman who lengthened a garment by cutting a piece off the top and sewing it on the bottom. But then latter-day finance is very much of this pattern. And who knows but what good may come of it? At present the maxim is, "If you want gold manufacture shares." Some day it may come to be, "If you want to lose gold buy shares."

The German Sugar Trade.

With the help of bounties and other things the sugar trade of Germany seems to be rapidly losing the elasticity and expansion which at one time characterised it. According to our Consul at Stettin, beet growing is one of the few German industries that did not participate last year in the economic progress so noticeable in the country, and no branch of trade had to fight for its existence so strenuously as the sugar business. This struggle still continues; and Mr. Powell, our consul, thinks that it was only the general prosperity of German commerce that prevented the industry from failing completely. This is a serious statement, and a very striking indication that the bounty system weakens rather than strengthens industry. To what is the falling off said to be attributable? The total production of sugar in Germany last year was over 180,000 tons more than in the previous year, but it is significant that the quantity exported was 280,000 tons above that of the year before. While the home trade is diminishing greatly, the export business is steadily increasing. That, of course, is the result of the bounty system, as the bonus is only paid on exported sugar. But other damaging influences have been at work. These are the new Bourse law and the prohibition of time bargains. These latter have been forbidden by the German legislature because of their gambling character. But really, there is very little, if any, of the gamble about them. If a trader agrees to sell wheat, say, or sugar, or any other commodity, at a certain price three months hence, it is because he has satisfied himself, by calculations of the crop prospects and otherwise, that he can do so without loss, and probably with considerable gain. The element of chance scarcely enters into it at all. No trader or manufacturer can omit a careful consideration of the possible future course of the markets; and, though he may make no "time bargains," his care and shrewdness in making calculations as to the prospective values of the materials he uses form an important element in his success in business. The prohibition of time bargains has, Mr. Powell assures us, driven German capitalists from the sugar markets, which have fallen largely into the hands of foreigners, who are thus able to keep prices down. Over-production, uncertainty in regard to the Cuba crops, and the new United States tariff, which not only raised the duty, but imposed a differential duty on sugar from countries which granted export bounties, also seriously affected the industry in Germany. The trade is clearly in a bad way in spite of the bounties, whose only real use has been to show their utter worthlessness, or worse, as a protection to industry. It now, however, seems doubtful if the Brussels Conference, which opened on Tuesday, will result in the abolition of the bounties. The French cling to the "secret bounties," and Austrians and Hungarians declare they cannot renounce preference bounties in consequence of German competition. Then some Germans oppose abolition on the ground that it would render the competition of cane sugar more formidable. How strangely do people, otherwise sagacious and shrewd, cling to the most obvious fallacies, even when the mischief they are doing is made manifest by the injury wrought on the "protected" trade.

The Guardian Fire and Life Insurance Company.

In dealing with this company's annual report we remarked last week that it was only its wealth which prevented it from feeling the smart of heavy fire losses more than it does. In this remark we were not quite accurate. Looking back for the last six or seven years we find that the company has suffered a great deal and has to all appearances drifted into a position where its wealth cannot quite save its shareholders from greater disappointments than they have yet experienced. Take a few figures as an example. In 1891 the fire business resulted in a loss of nearly 2 per cent., in 1892 in a loss of over 4 per cent., and in 1893 in a loss of 2·3 per cent. The next three years, 1894-5-6, show gains of 5·8 per cent., 11·6 per cent. and 5·9 per cent. respectively; but last year again resulted in a loss of 4·1 per cent. For the whole seven years, therefore, the company has been more or less slipping backwards, the profit on 1895 alone being in any degree approximate to what the company should enjoy as an average minimum. No wonder that its dividend has had to be reduced, or that its business, allowing even for the lopping off of the American part of it, should be on the decline. In 1890 the premium income was £579,000. Last year it was only £342,000, and in the same time the fire fund has fallen from £761,000 to £633,000. It fell off £43,000 last year, and in the circumstances we think that the payment of the dividend, which took £80,000, was hardly justified by the record. The company will have to brace itself up and mend its ways if it is not to be distanced in the race by stronger and better-managed concerns.

The South Wales Strike.

The industrial contest in South Wales seems at present further from settlement than ever. The men's delegates received plenary powers for concluding an arrangement, but they presented demands to the employers which they knew could not be accepted. They asked for an immediate 10 per cent. advance, which the employers have from the first declared their inability to grant. There was no hint at modification, or to the possibility of accepting less. They complain of the want of a conciliatory spirit in the employers; but in what have the colliers shown conciliation? They began the war without funds, without organisation; and yet they now seek rather to dictate terms than invite discussion. Besides the 10 per cent. advance, the men asked for a conciliation or wages board, with an umpire to come in and take the decision out of the hands of

the board when the delegates forming it could not agree. Now this, too, the employers had emphatically declared their inability to accept, and the workmen's delegates must have known that in presenting these demands they were merely taking measures for the prolongation of the strike. If that was their object they seem to have completely attained it. Yet every week but increases the sacrifices of the men, not to mention the employers or the trade of the district, which is suffering all round. Business in Cardiff is at a standstill. It will take many months, perhaps years, to recover from the blow struck by this strike at trade. The local railways up to May 28 had lost by diminution of traffic alone £146,000; but if we remember that, previous to the strike, the returns of these companies were weekly increasing, the actual loss to them may be reckoned at a considerably higher figure. The Great Western has also been a loser of over £60,000. This must all tell seriously on the dividends of these companies. Of course, in other districts coal-owners and colliers are both reaping a rich harvest by the enforced idleness and stagnation in South Wales. Is it not about time that Welsh colliers were considering these things, and asking themselves whether it was not time that they should give some indication of a spirit of conciliation and compromise? They cannot gain by delay; they only make a settlement more difficult and less satisfactory for themselves.

British Business Methods.

So much has been said in consular reports for some time on the want of adaptability and push among British merchants in their foreign trade, that we welcome the enterprise of a news agency in trying to get the views of British merchants themselves on the matter. But we can hardly say that the result, so far, has been entirely satisfactory. It is said that considerable friction exists between British consuls and British merchants—which seems to imply a serious charge against the consuls of being actuated, to some extent, by personal feelings in drawing up their reports. That, however, is a matter which might be cleared up and remedied by a little exertion on the part of the Foreign Office. If such friction does exist a remedy ought to be sought for. It is the opinion of one merchant that Continental traders are ready to undertake risks which no English exporter would incur, and that German trade, if apparently expanding, is not flourishing, because heavy losses have been incurred in consequence of the cheap and risky business done abroad. If that be so, then German travellers are much less shrewd than they ought to be. Still another merchant who was interviewed, however, admitted that a little spurring was required, that English travellers were not good linguists, but that British merchants have really as much trade as they can manage. This last remark points the moral of many a consular criticism. It seems to account in some measure for the want of push, for the want of care in studying markets, indifferent packing, and the absence of trade circulars in the language and currency system of those to whom they are addressed. The careless confidence implied in the assurance that the British merchant has really as much trade as he can manage virtually leaves the door open to more wideawake competitors, who move energetically, know the wants of their customers, and adapt themselves to their ways. If German traders have lost by bad or risky debts, it will teach them greater care and discrimination in the future. They have already shown a considerable capacity for learning from experience, but the English trader, with his confident assurance of having as much trade as he can manage, may soon find that he is losing that which he has for want of freer and more intelligent intercourse with his customers. If our foreign trade is ample and good, it will not continue so unless carefully tended. There is danger of loss from over-confidence as well as from want of discrimination in undertaking risks.

Chinese Liberality and Eccentricity.

The Government of China has lost no time in conceding the demands of France for "compensation" for the murder of Père Berthollet, the Catholic missionary. The condemnation of the culprits, or some who may pass for culprits, the punishment of the authorities, an indemnity of 100,000 francs, the erection of a commemorative church on the spot where the murder was committed, and the concession for a railway line connecting the treaty port of Pak-hoi, in the province of Kwang-tung with the valley of the West River at Nanning-fu. These were the French demands, and the Tsung-li-Yamen has conceded every one of them. They were highly practical. The Church is benefited, the French nation is benefited, and the representatives of the murdered priest, if any are alive, will doubtless get their share of the 100,000 francs. But what does China think of it all? The Tsung-li-Yamen may well be getting tired of saying "Yes" because they dare not say "No." May there, therefore, be truth in the story current that the Emperor has consented to flee from Peking, and set up his household gods in the far-off capital of Shen-si, So-gan-fu. It is not impossible. This city was the capital of China before the Manchus made their appearance there. It is situated on the banks of a river which, though 2,500 miles in length, is wholly unnavigable. It is 600 miles from Peking, and can only be reached by caravan. No battleship can approach it. The "mailed fist" might be shown in vain once the Emperor were safely ensconced at So-gan-fu. Ambassadors would be useless. As in Chitral, we might spend loads of money in making roads to get troops to So-gan-fu. But if that were done, the Emperor might come to the resolution to slip over the frontier into Tibet, which is close at hand. Certainly this "flitting" to So-gan-fu, if really resolved upon, would practically mean the forsaking of the country to the tender mercies of the European Powers. But perhaps his Majesty the Emperor thinks it just as well that these Powers should take what they want as that he should have, every other week, to go through the painful, if somewhat farcical, formality of graciously granting concessions or drawing up "leases." It is altogether a queer story, and probably it would be as well to wait for official confirmation before pinning our faith to its accuracy.

Our Trade with Switzerland.

While our exports to Switzerland during the past year ran up in value to two millions sterling, we received from her in exchange nearly six millions. Not a very promising kind of speculation. The worst of it is that the disproportion seems permanent. Germany, on the other hand, sends Switzerland twelve millions, and receives in return only seven millions, a very substantial and paying account for Germany. Though the Swiss finances are in a sound condition, and the expenditure is prudently restrained, Switzerland has her financial worries. She proposed the conversion of her 1887 loan, bearing 3½ per cent. interest, into one issued at par, and carrying only 3 per cent. interest. But the operation did not succeed, not more than half the amount having been taken up. This was a great surprise and disappointment. There seemed no competent cause for it, though in some quarters it was attributed to the policy of nationalising the railways, and the apprehension of the public as regards the £40,000,000 required for that operation. Another matter which is somewhat troubling Swiss traders is the possible ultimate result of the denunciation of the British treaties with Germany and Belgium, as there is no guarantee in the future in regard to the treatment of Swiss goods in the British colonies. Switzerland must lose her present assured position under the terms of her treaty of 1855 with Great Britain, while Canada will be placed in a better position to compete with European countries. What if Canada in her new and improved position were to enter into competition with Switzerland in the condensed milk trade? She might easily do it, and the Swiss dairy farmers could not

well afford the loss of British custom for this commodity. Switzerland may well, in the circumstances, feel some alarm ; and, according to the report from the British Legation, in which the state of Swiss trade in 1897 is discussed, "more liberal terms for British goods may, it is hoped, result from the readjustment entailed by the present policy of Great Britain."

Critical Index to New Investments.

CITY OF AMSTERDAM THREE PER CENT. BONDS.

Lloyds Bank are authorised to receive subscriptions for an issue of about £1,433,333 bonds at 95¾ per cent., which includes 3 per cent. interest from April 1. The loan is raised for the purchase by the city from the Imperial Continental Gas Association of the existing gas works and undertaking in Amstersdam, the income from which, judging from past years, will be sufficient to provide a surplus towards the municipal revenues beyond the amount required for the service of this loan. Existing debt of the city, the population of which is 506,277, is £6,456,200, and the annual ordinary income £1,070,000. The loan is redeemable at par by annual drawings of one-thirtieth part, commencing in 1900, but power is reserved to at any time redeemed it at par. The city pledges all its corporate assets as security for the due payment of the drawn bonds and coupons, both free of taxes. Amsterdam is a wealthy city, and the bonds are well worth the attention of investors satisfied with a yield of 3¼ per cent.

BOMBAY, BARODA, AND CENTRAL INDIA RAILWAY COMPANY.

Tenders will be received by the company up to noon on Wednesday next for an issue of £400,000 3 per cent. debentures guaranteed by the Secretary of State for India. The minimum price is fixed at par ; debentures will be dated July 8, and will run for three, five, or seven years from that date. Interest is payable in sterling, January 8 and July 8.

GREAT NORTHERN AND CITY RAILWAY COMPANY.

Another attempt is made to float this enterprise, the former effort having been in the early part of 1895, when the public did not take at all kindly to it. The share capital is £1,560,000 in £10 shares equally divided into preferred ordinary "A" shares and deferred ordinary "B" shares, the whole of which are offered at par. On the previous occasion the capital was £1,500,000 in one class of share, of which two-thirds only were offered. The board has been strengthened, and now includes Sir Charles Scotter and Sir Allen Sarle, but surely a more practical man could have been obtained than Sir Francis Knollys. The line will be three miles long, and run from Finsbury Park to Moorgate-street, with three intermediate stations. The motive power will be electricity, and both tunnels will be 16 ft. in diameter, thus taking the Great Northern Company's heaviest suburban trains. After the "A" shares have received a dividend in any year of 4 per cent., the "B" shares are to have 5 per cent., remaining profits to be participated in rateably. The Great Northern Railway Company guarantees the new concern a minimum annual payment of £20,000 for traffic carried, while S. Pearson & Sons, Limited, the contractors, guarantee 4 per cent. on the "A" and 3 per cent. on the "B" shares during the period they work the railway, not exceeding three years after opening of the line, which will help it over what may prove its most difficult time. With the continued growth of suburban traffic, and the ever-increasing desire for quicker transport, we should think the line woutd attract sufficient business to make the venture a success. The Great Northern guarantee is less than on the former occasion, but it represents two-thirds of the dividend on the "A" shares, so they at least seem worth the attention of investors.

LEOPOLDINA RAILWAY COMPANY, LIMITED.

This company, which has a share capital of £5,500,000, made up from conversions of old bonds, was formed to consolidate several Brazilian railways, comprising a system of 1,326 miles. It now offers an issue of £1,300,000 4 per cent. debenture stock at 85 per cent., forming part of an aggregate amount which shall not exceed two-thirds of the share capital. Interest due January and July. The stock is a first charge on the property and undertaking and can be redeemed at par after January 1, 1928, on six months' notice. On acquiring possession, the company had to compromise certain preferential claims and arranged to pay £700,000 of 4 per cent. debenture stock, as well as £250,000 in cash, so that apparently only £350,000 is left for repairs and improvements, which it was last year estimated would require £984,000. It is anticipated that when these repairs are completed the debenture stock may reach £2,000,000. Brazilian securities have been out of favour with investors for some time past, in view of the arrangements being made to allow the Government to make an easy default upon its debt, but the stock now offered, yielding almost 4¾ per cent., and being a first charge on the railway, should prove a satisfactory investment, though, of course, existing bondholders of the railway are wiped out.

KHEDIVIAL MAIL STEAMSHIP AND GRAVING DOCK COMPANY, LIMITED.

Company is formed to buy the steamers, docks, and other properties belonging to the Egyptian Government, and known as the Poste Khedivieh Administration, which has been sold to Messrs. Allen, Alderson, & Co., of Alexandria, and Mr. Frank Reddaway, of Manchester, who are the vendors. The Egyptian Government grants the company an annual subsidy of £6,150 for fifteen years ; while the total revenue from ships, docks, and workshops is estimated at £30,525 per annum. The share capital of the company is £300,000, in 40,000 5½ per cent. cumulative preference shares of £5 each, and 100,000 ordinary shares of £1 each. The preference shares are now offered, together with an issue of £100,000 4½ per cent. first mortgage debenture bonds, at par. The latter are redeemable on June 30, 1918 at par, but can be paid off at any time on six months' notice at 110. All the ordinary shares, with £175,000 in cash, go to the vendors as purchase money. Sir Auckland Colvin is chairman, and the board includes Sir John Stokes of the Suez Canal Company. This seems a fair venture, and as the vendors take all the ordinary shares, a moderate investment in the preference shares or debenture bonds should turn out all right.

NEW BRIGHTON TOWER AND RECREATION COMPANY, LIMITED.

The company was formed in 1896, and now owns thirty-six acres of freehold land. Six per cent. preference shares to the amount of £175,000 were then subscribed, and since then £100,000 of 4 per cent. first mortgage debentures have been placed. Subscriptions are now asked for 125,000 £1 ordinary shares at a premium of 5s. each, upon which a dividend of 10 per cent. (exclusive of premium) is guaranteed from June 30 next to September 30, 1901, for the payment of which equivalent funds have been deposited with the bankers. These shares are offered on behalf of the vendors who were entitled to the shares on the transfer of the estate, but preferred to postpone their issue until the undertaking was completed. By their patience they will be rewarded with £31,250 in the shape of premiums if the shares are subscribed, which is very fine interest for two years. The "guarantee" may act as a bait, but it is a venture that may well be left to Brighton, Old and New.

LONDON, YUKON, AND BRITISH COLUMBIAN MINING AND INVESTMENT CORPORATION.

With a share capital of £175,000 in £1 shares, of which 47,000 go to the vendors with £62,000 in cash, this company is formed to carry on the business of a prospecting, exploration, mining, and financial corporation. Prospects are truly magnificent, and some may no doubt be realised as these sort of undertakings generally do pretty well in their early years ; the point is not to hold the shares too long.

GEORGE GALE AND COMPANY, LIMITED.

Company was formed in 1888 to take over a brewery and wine and spirit business at Horndean, Southsea, and Newport (Isle of Wight), and the share capital is £75,000. Applications are invited for an issue of £60,000 4 per cent. first mortgage debentures at par. They are redeemable twenty years after allotment at 110 per cent., and are a first mortgage on freehold and leasehold properties valued at £90,400. Profits for last three years, after adding the saving of rental by purchase of freeholds, are certified at £7,453 in 1895, £6,016 in 1896, and £6,612 in 1897. The business is old established, over forty years, but the security is not particularly fine, and the profit statement does not indicate a very progressive trade. Still there would be a large margin after paying debenture interest, and the debentures may therefore be set down as a fair third-class investment.

GOLDSMITHS' AND SILVERSMITHS' ALLIANCE, LIMITED.

Since the prospectus appeared we have been asked several questions about it. We pointed out last week that the omission of a valuation of the assets was against the company, and this is one of the points inquired about. Would it not be as well for the directors

to give some statement showing the value of the stock-in-trade? Is it a fact or not that two of the vendors are owners of a small private concern which is to some extent a rival of this company? We hear that the capital asked has been largely over-subscribed, but it is not too late for a little more information on these points.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Empire of India and Ceylon Tea Company.—The profits of this company in 1897 amounted to £30,471, which permitted of a dividend of 9 per cent., as against 10 per cent. a year ago. The balance forward, however, had to be reduced from £429 to £143. In spite of the high dividend the balance-sheet is not particularly good, and the reserve actually was debited with a proportion of the income tax. This is a novelty in company accounts, but shows the ingenuity of a board when pressed, for without the £500 thus obtained, the 9 per cent. dividend would not have been possible. The directors would have done better if they had declared a dividend of 7 per cent., and put the balance to reserve.

Borelli Tea Company.—Another sufferer from the earthquake. The crop was 92,426 lb. under the estimate, and the net profit only came to £2,901, as against £4,153 a year ago. The directors had, therefore, to reduce the dividend by 1 per cent. to 4 per cent., and then could only carry forward £2,557, or £534 less than a year ago. The company has no reserve, and we presume the heavy cost of renewing and repairing buildings damaged by the earthquake will have to be found from other sources.

Kynoch, Limited.—This blown-out concern has gone into two speculative businesses—that of supplying cycle components and soap and candles—and the balance-sheet does not seem to have improved by the operation. No less than £103,697 is owing to sundry creditors, and there is an advance on mortgage on the mills, while the debtors' item only stands at £98,652. The cash in hand, indeed, was only £329, in order to meet dividends amounting to about £36,000, so that the addition to the capital now proposed seems very necessary. The profits for the year ended April 6 are stated to have been £50,160, which allowed of a 10 per cent. dividend and the carrying forward of £8,444. But stock-in-trade is returned in the balance-sheet at £241,906, and this is a suspicious item when you are dealing with a soap, cycle components, ammunition company. We must see more of this company before being ready to think much of its shares in the present form.

Sun Insurance Company.—In 1897 this company received in premiums £1,012,340, being an increase of £42,655. Of this sum losses absorbed £588,296, or 58·11 per cent., and expenses and commission took £343,252, or 33·91 per cent. Including £387,873 brought forward and £78,671 income from investments, and deducting the usual 40 per cent. reserve for unexpired risks, there is a balance of £142,401 carried to profit and loss account, making a total of £270,749. Of this sum the directors have devoted £100,000 to the creation of a special reserve fund to cover the liabilities incurred by retaining large amounts on individual risks, £8,000 has been transferred to the pension account, increasing it to £40,728, and dividends absorb £102,000, leaving a balance of £58,731 to be carried forward. The investments are good and mostly domestic.

The British Linen Company Bank.—This large Scotch bank did not last year come into a windfall of £103,000 as profit on sales of investments, and therefore its net profits were about £84,000 less than those of the previous year. Nevertheless, the outcome was exceedingly satisfactory, and enabled the directors to pay another dividend of 18 per cent. per annum, namely, 8 per cent. at Christmas and 10 per cent. now. A balance of £44,355 was brought in, and after writing £5,000 off cost of bank premises, £66,109 is left to be carried forward. Including the reserve fund of £1,500,000 and the pensions reserve fund of £100,000, created a year ago, the report says that the undivided profits will now amount to £1,666,109. Is this quite accurate? Should not part of the reserve fund be ascribed to the heavy premiums received on recent issues of new shares? In one sense, of course, these premiums are profit, but not in the ordinary sense of money saved out of current earnings. The paid-up capital remains at £1,250,000, and the liabilities of the bank on deposits and current account balances were, at the date of the balance-sheet, April 15 last, £11,981,277. The bank was also liable for £656,229 on acceptances, and its note circulation amounted to £889,809. Among its principal assets are "gold and silver coin, notes of other banks, cash balances with London bankers, and money at call or short notice in London," all put in one heap, which amounts to £1,770,777. This does not strike us as an excessive cash reserve, and does not compare very favourably with similar entries in the balance-sheets of English banks which have no note circulation, but perhaps the call and notice money, which is not cash, is of small account in the total. Besides its cash and credit out at interest, the bank holds about £4,300,000 of fixed investments, all of an improved description. Its bills discounted and advances amounted to £5,781,212, and its short term loans on stocks and other securities to £3,756,498. The securities held against the acceptances balances the amount of them. These are the principle heads of the balance-sheet and we have nothing to say about them. Business appears to be of quite the ordinary character, so much so that the profit-earning capacity of the bank remains something above the common.

New Zealand Trust and Loan Company.—From the balance-sheet made up to the end of last year the company appears to have in no way improved upon the unsatisfactory position disclosed a year ago. It has £1,206,739 invested on mortgage in New Zealand, against £1,323,000 at the end of 1896, but the admitted contingent loss, which was then £81,467, has only been reduced to £81,441, while the reserve has declined from £128,000 to £124,091, because it has been drawn upon to provide the amount paid to Mr. Hunter upon his retirement, as well as the expenses incurred in connection with calling capital home for the redemption of debentures and the inspector's special visit to this country. Deducting the contingent loss through depreciation in securities, the net reserve is only £42,550, which is a very small margin. The balance-sheet would have looked better if these items had been charged against the year's revenue, but this would have affected the dividend come what may. The net profits for the year, with £1,827 brought forward, were £34,060, which provides the preference dividend and 5 per cent. on the ordinary shares, and leaves £11,560 to be carried forward. But it has been usual to charge the revenue account with provision for the preference dividend six months in advance. This represents £12,500, so it has been done this time. The directors say they have materially reduced expenses, but the full effect is not seen in the present account. The sooner they reduce the dividend on the ordinary shares the sooner will they display wisdom.

Diary of the War.

June 3.—Some details of the cannonade at Santiago de Cuba have been vouchsafed us. American accounts still assert that Commodore Schley engaged in a reconnaissance to discover the strength of the forts and masked batteries at Santiago; that he discovered this by destroying them; and retired without damage. The Spanish Minister of Marine assures us that Admiral Cervera was present at the "battle," and that it was through his superior strategy that the fight was won. The American reports seem most plausible; but it is impossible to ascertain with certainty what did occur.

June 4.—The Cadiz squadron is reported to have sailed, but of course its destination is unknown. It is said that the Americans are preparing to despatch an expedition of 15,000 men to Puertorico under General Sir Fitzhugh Lee. Messages received by Berlin business firms from representatives in Manila state that there is no symptom of insurrection in the town, and that there is a plentiful supply of food from the interior. The natives and the Spanish troops live almost entirely upon rice. The European residents, however, feel the want of various articles of food which can no longer be imported. Commerce and industry are, of course, at a standstill.

June 5.—Another engagement is reported as having taken place at Santiago de Cuba on Friday the 3rd, but the accounts received are very contradictory. What seems to have occurred is that two or three of the American warships fired on the Morro and other forts at Santiago, while a cruiser guided the *Merrimac*, an old Transatlantic trader and coal ship, towards the harbour, the object being to sink the hulk so as to block the entrance. The *Merrimac* would appear to have turned over and sunk sooner than was expected. At any rate, American despatches speak of the event as a "check" to the Navy, though there seems no doubt about the sinking of the *Merrimac*. It was manned by a volunteer crew of eight or ten men, who were drowned according to American accounts, but were taken prisoners according to Spanish despatches. The Spaniards speak of the sunken ship as a cruiser, and claim credit for having sent her to the bottom. The firing from the Spanish forts is said to have greatly improved.

June 6.—For once we have prompt confirmation of a notable action in the present war. Admiral Sampson, in a brief despatch to the Navy Board at Washington, confirms the sinking of the *Merrimac* at Santiago de Cuba, and gives us to understand that the operation was more important and more completely accomplished than seemed indicated in the first accounts. It was conducted by Naval Instructor Hobson and a crew of seven men. So impressed was Admiral Cervera—leaving no doubt now as to his whereabouts—with the bravery of these eight men that he sent an officer with a flag of truce to inform the American Admiral that they had all been saved, and were prisoners of war, two of them having been slightly wounded. Steps were immediately taken to arrange for the exchange of these prisoners for a like number of Spaniards who are prisoners of war at Atlanta. They have certainly succeeded admirably in a very notable achievement. There can be no further doubt that Admiral Cervera is in Santiago with his squadron, and that they are most effectually "bottled up" there by the sinking of the *Merrimac*. And there is the end of Admiral Cervera's magnificent strategy. He has sailed deliberately into a trap of his own seeking. Perhaps he could not help himself. Cruising in the open sea implies a great waste of coal, and perhaps his only hope of getting a new supply was to go to Santiago. Probably, however, he did not at first contemplate being shut up there. But now he and his ships are rendered useless. The *Epoca*, of Madrid, publishes an article reciprocating what it regards as the *New York Herald's* plea for ending the war, but the peace must be secured on "honourable terms" for Spain. It may be noted that the sinking of the *Merrimac* was regarded in Madrid as a Spanish victory. There was great rejoicing in consequence until the real facts were published.

June 7.—Little additional news. Much praise for Lieutenant Hobson, who sank the *Merrimac* at Santiago de Cuba, and for the chivalrous appreciation by Admiral Cervera of the bravery of Lieutenant Hobson and his crew. In Madrid they have now

awakened to the fact that the sinking of the *Merrimac* was not a "victory" for Spain; but they take comfort from the statement that the sunken vessel does not entirely block the harbour, and is to be blown up by dynamite. There is a report in Washington that Sir Julian Pauncefote has asked what terms of peace the United States would grant to Spain; and the reply was that the Spaniards must evacuate Cuba, and give the United States Puertorico in lieu of a war indemnity. On these conditions the Philippine Islands would be restored to Spain.

June 8.—News of another attack on the forts at Santiago de Cuba, which the Americans claim to have completely demolished. Morro Castle is described as a heap of ruins. While the bombardment was in progress—it was stopped, by the way, while the American seamen went to dinner—it was observed that the *Reina Mercedes* was trying to blow up the sunken *Merrimac*, and so to clear the harbour entrance; but a shell from the attacking fleet hit the *Reina Mercedes* so hard that she had to be abandoned where she lay. It seems also that an American force landed, and, in conjunction with the insurgents, made an attack on the fortifications from the land side. The fact of the landing is indirectly confirmed by Admiral Cervera's despatch, which states that the Spanish troops lost three officers killed, and one wounded, while seventeen soldiers were wounded. A Havana despatch states that a landing was attempted, but was repulsed. There has been considerable fighting in Manila between the rebels and the Spanish troops, in which the advantage remained with the former. Their leader is said to have declared himself confident of taking the city, and proposes to set up a government under an American protectorate. Spain still writes and speaks of peace, but takes no step in that direction herself. She pleads that the European Powers should come to her rescue.

June 9.—No further definite news as to operations at Santiago de Cuba; but American despatches point out that these operations were not undertaken for the purpose of taking the town, or to force an entrance to the harbour. They were entered upon as a sort of practice for the fleet, and for testing the strength of the Spanish batteries. In this respect they are regarded as having been perfectly successful. The Spaniards still insist that the Americans were "repulsed," but admit greater damage to the defences than Admiral Sampson seems to have realised. The Spanish Captain-General of Manila describes the situation there as very serious. The revolt is described as general. The United States expeditionary force for Santiago de Cuba left Tampa on Wednesday, and may reach its destination some time to-night or to-morrow. If so, we may look immediately for the delivery of the real attack on Santiago, and so for the first big engagement of this somewhat dilatory war.

THE PROPERTY MARKET.

Last week's total of sales at the Mart was low, £86,680, as compared with the corresponding period of last year, £129,745; but that is accounted for by the holidays and by the smaller character of the investments offered. The returns for the month of May were £1,594,905, as compared with £1,258,694 last year. The most notable sale at the Mart last Friday was that of Messrs. Newbon, Edwards, & Shephard, including a number of leasehold houses and shops and freehold building land at Tottenham, known as the Russell Estate, which produced the fine total of £26,890. Messrs. Protheroe & Morris, Messrs. Dowsett, Knight, & Co., and Messrs. Cronk added fair quotas to the day's total of £37,741.

Monday's business at the Mart did not begin the week well. The total of the day's sales amounted to £19,586; and of the twenty-one lots offered, nine were returned unsold. Only three of the lots sold went into four figures. Of these, two improved rentals under perpetual Corporation leases, arising from the "Clarendon" public-house, Oxford-street, and shop property adjoining, offered by Mr. W. Rolfe, produced £14,300—the former bringing £7,900, and the latter £6,400. Mr. Alfred Richards obtained a total of £4,396 for various gas and water shares.

Several properties of some importance offered at the Mart on Tuesday had to be withdrawn. Among these was the Hafod-y-Bryn, belonging to Mr. S. Pope, Q.C. Icklington Hall Estate, Mildenhall, Suffolk, comprising 5,000 acres, offered by Messrs. Walton & Lee, was withdrawn at the moderate price of £35,500, and a freehold building estate of forty-three acres, at Upper Tooting, offered by the same firm, was also withdrawn at the somewhat high figure of £56,000. Wray Castle, however, on the banks of Lake Windermere, was disposed of for £25,000. As it was stated that £60,000 had been expended on the castle alone, and that there are 800 acres of land attached to it, the price can hardly be described as extravagant. Messrs. Ellis & Son sold freehold offices at 21, Water-lane, City, covering an area of 530 square feet, and let on lease at £120 per annum, at £2,830. The same firm disposed of the business premises, 47, Eastcheap, leasehold for a term of sixty-four years at £80 ground rent, for £2,000. A freehold residence known as Fox Hall, in Baker-street, Enfield, with about two and a half acres of land, submitted by Mr. Alfred Richards, changed hands at £3,025. The total for the day reached £49,500. At the Masons' Hall Tavern the licensed house, the Crown, High-street, Kensington, was sold for £35,000.

The results of Wednesday's business at the Mart only totalled £23,755, but the attendance was fair, and the competition good. Messrs. Douglas, Young, & Co. top the list with an aggregate of £10,420, their principal lot being a block of freehold building land in High-road, Ilford, which realised £5,250. Another consisted of leasehold houses in Westbourne-grove, and brought in £2,010. Messrs. Edwin Fox & Bousfield's sale of stocks and shares attracted a good many visitors.

A very important sale of landed estate has just been accomplished by Messrs. Millar, Son, & Co., Grafton-street, Bond-street, W. It is that of the domain known as Gregynog, Newtown, Montgomery. It is residential, sporting, and agricultural, comprising over 1,800 acres. The mansion is a fine building in the Early English style, and there are 195 farms on the estate, with about fifty cottages. The price obtained for it is said to be satisfactory, though the amount is not given.

TRADE AND PRODUCE.

Reports from trade centres are just a little "mixed." They are not exactly discouraging as a rule, and in some cases—as in shipbuilding—they are confidant, buoyant, and hopeful; but suggestions crop up here and there as to some checking influence, ill-defined, and not very palpable. It may be only the influence of the Whitsun holidays that has not yet exhausted itself. These holidays prolong themselves unduly in some trade centres, as they have a habit of doing in the House of Commons. We merely note the hints and suggestions. We do not think they point to any serious slackening in trade. The dulness in the wheat markets continues. There was quite a feeling of depression in Mark-lane on Wednesday, and dealers offered wheat and flour at a shilling reduction from previous market; but even at this decline, comparatively little business was done. The unsettled and somewhat gloomy feeling was somewhat intensified by a report that one of the most respected Mark-lane houses was in difficulties. The dulness has also characterised the English provincial markets, where there was a fall of from two to three shillings on the week. Futures fluctuated a good deal, but the tendency was lower; and so it was with options, until Wednesday at all events, when there was a slight upward reaction, though it was not strongly maintained. We are still disposed to think that there will be some further decline, though probably not to a very serious extent. It will be some time before we come near the figures of a year ago. New crop reports from America continue favourable. The harvest is almost general in the Western States, and some parcels of new wheat from Texas have already appeared in the New York market. As to supplies for the immediate future, those from America seem still large. More may be expected from Russia, and India is still exporting pretty liberally. Stocks of English wheat are getting low; but harvest prospects are considered very good, especially should June prove warm, and favour us with a little more sunshine than he has hitherto done.

The Irish linen trade is in a critical condition. Several houses in and about Belfast have collapsed, with liabilities estimated in some quarters as high as £750,000, and very moderate hopes are entertained as to the realisations. Five shillings in the pound is about the highest figure stated. The more substantial Ulster houses have weathered the storm pretty successfully; but business, they assert, has been thoroughly demoralised, and these better houses have suffered indirectly in their returns from being unable to sell unless they entered into competition with a class who had nothing of their own to lose. Considerable quantities of goods have been disposed of in London and Manchester, agents freely admitting that they were instructed to sell in order to secure funds to stave off the evil day.

Metals are still active, and trade prospects are good. Copper has suffered reverses, though there is an undertone of firmness, and on Wednesday prices rather improved. There is, however, some uncertainty, not to say uneasiness, as to what Spain may do in the way of imposing war duties, and no real improvement in prices can be looked for just now. The latest quotations for copper are £51 3s. 9d. three months, and £50 17s. 8d. cash. The iron and steel trades show moderate activity. Sheffield steel works and cast steel makers are busy with good Continental orders, but new ones are coming rather sparingly. In Glasgow steel-makers cannot deliver material fast enough; so busy are they that they were obliged to decline tendering for a large quantity of plates for a foreign Government. There is great firmness in hematite pig-iron. New labour troubles are threatened. The Glasgow malleable iron makers are very busy, but there is some danger that work may be stopped by a strike. It is in the coal industry, however, that the greatest danger lurks. The Welsh strike seems to have been prolonged indefinitely. Negociations have been entirely suspended. Members of the Miners' Federation are at present taking a ballot as to the propriety of lodging a demand for 10s. advance in wages. The result will be known in the beginning of next week; and if the demand is made, the chances are the mine-owners will refuse to concede the advance. In that case there would probably be another strike—a calamity that would prove very disastrous in the present condition of trade.

In a review of the tea trade during the past year, to May 31, Messrs. W. J. & H. Thompson utter some useful words of warning to growers in India and Ceylon. Messrs. Thompson urge these growers to modify the policy of making the heaviest crops possible, irrespective of quality. China may yet again become a competitor, especially if the superior character of the Indian and Ceylon teas is not sustained. Messrs. Thompson, therefore, think the truest wisdom of the growers is not to work for heavier crops, but to pay the closest attention to improvement in quality. Thus only can they maintain the lead they have secured in the tea market. Very sound advice, indeed, and, if the Indian and Ceylon tea-growers do not take it to heart, they may live to rue it.

The Paris *Coulisse* credit establishments have resolved on emigrating to Brussels. About a hundred million francs have been subscribed as a guarantee fund.

Notice to Subscribers.

Complaints are continually reaching us that the Investors' Review cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the Review to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the Investors' Review is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the Investors' Review, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

NOTICES.

THE STOCK EXCHANGE.—NOTICE.

NO MEMBER OF THE STOCK EXCHANGE is ALLOWED to ADVERTISE for business purposes, or to issue circulars to persons other than his own principals.

Persons who advertise as Brokers or Share Dealers are not Members of The Stock Exchange, or under the control of the Committee.

A List of Members of The Stock Exchange who are Stock and Share Brokers may be seen at the Bartholomew-lane entrance of the Bank of England, or obtained on application to

EDWARD SATTERTHWAITE,
Secretary to the Committee of the Stock Exchange.

Committee Room, The Stock Exchange, London, E.C.

ABRIDGED PROSPECTUS.

The LIST will be OPENED on MONDAY, June 13th, and CLOSED at or before 4 p.m. on TUESDAY, the 14th.

CITY OF AMSTERDAM THREE PER CENT. BONDS.

ISSUE of Fl.17,200,000 (about £1,433,333).

LLOYDS BANK LIMITED, London (in conjunction with Messrs. Lippmann, Rosenthal & Co., Amsterdam), are authorised to RECEIVE SUBSCRIPTIONS for the above BONDS at £95 15s. per Fl.1,200 (£100 nominal), which includes interest at 3 per cent. from the 1st April.

Payable— £5 0 0 on Application.
£40 15 0 on Allotment.
£50 0 0 on 11th July.

Payment in full may be made on allotment under discount at the rate of 3 per cent. per annum.

The Loan is redeemable at par by means of annual drawings of one-thirtieth part of the whole Loan, to commence in 1900, and to take place in August of every succeeding year until the whole Loan is redeemed.

The object of the Loan is to provide funds for the purchase by the City from the Imperial Continental Gas Association of the existing gas works and undertaking in Amsterdam; the income arising from which, judging from the results of past years, will be sufficient to provide a substantial surplus towards the municipal revenues beyond the amount required for the service of this Loan.

The existing debt of the City of Amsterdam, the population of which on the 1st of April, 1898, was 506,277, is Fl.77,474,400 (say £6,456,200), and the annual ordinary income of the City is about Fl.12,840,000 (say £1,070,000).

The Bonds will be to bearer in the following amounts—

Fl.12,000	Equivalent at the exchange of 12 Fl. to the £, at which Dutch issues are quoted on the London Stock Exchange.	£1,000 0 0
6,000		500 0 0
1,200		100 0 0
1,000		83 6 8
100		8 6 8

bearing Coupons due 1st April and 1st October. The Coupon due 1st October, 1898, will be for a full six months' Dividend.

Coupons will be payable at the Counting House of Messrs. Lippmann, Rosenthal & Co., and at the Nederlandsche Bank, Amsterdam, or will be negotiable at Lloyds Bank Limited, 72, Lombard-street, London, at the exchange of the day, but in any case at a rate not less favourable to the holder than Fl.12.15 per £.

Application will be made to the London Stock Exchange for a settlement and quotation in due course.

Full Prospectuses can be obtained from Lloyds Bank Limited, 72, Lombard-street, or any of the Branches of the Bank; and from Messrs. Hichens, Harrison & Co., 41, Threadneedle-street, or Messrs. Steer, Lawford & Co., 3, Drapers'-gardens.

THE UNION DISCOUNT COMPANY OF LONDON, LIMITED.

Capital Subscribed	£1,300,000
Paid-up	650,000
Reserve Fund	250,000

NOTICE IS HEREBY GIVEN that the Rates of Interest allowed on money on deposit are this day Reduced, as follows:—At call to One per cent.; at Seven and Fourteen days' notice to One-and-a-Quarter per cent. The Company discounts approved bank and mercantile acceptances, receives money on deposit at rates advertised from time to time in the London daily papers, and grants loans on approved negotiable securities.

39, Cornhill, 9th June, 1898. CHRISTOPHER R. NUGENT, Manager.

The Investors' Review.

The Week's Money Market.

A further sharp decline has taken place this week in rates for short loans. The large sum released by the Japanese Government, and the continued influx of gold, combine to render market balances available for lending more and more plentiful. With a diminishing foreign trade and less speculative activity in the stock markets, the difficulty of employing the sums placed at the disposal of dealers in money becomes aggravated, so that day to day loans now command in the afternoons, no more than ½ per cent., while the all-day rate is no better than ¾ per cent., as against 1½ per cent. a week ago. The India Council has had to further reduce its terms and now obtains a mere 1¼ per cent. for its advances until the end of the month. Although the Bank rate was left at 3 per cent. yesterday, the discount houses have reduced their allowances for money on deposit by ½ per cent. to 1 per cent. for "call," and 1¼ per cent. for "notice." and had no choice but to do so.

Discount rates have also dropped steadily each day, and the "fine" rate for three months' remitted paper is no better than 1 5/16 to 1⅜ per cent., as compared with about 1⅞ per cent. a week ago. The Continental demand for gold has not proved sufficiently pressing to outbid India, which has taken the bulk of the metal arriving during the week. This outflow to the East is becoming a feature that will need watching. Whether it be the result of the currency policy of the Indian Government or not, the purchases of the yellow metal by India, compared with the old favourite silver, have for some time past been becoming relatively more important than they used to be. This has happened in spite of the fact that much of the silver imported into India is really taken there for coinage at the Bombay Mint, in order to be sent to the Straits Settlements.

If the Indian hoarder, or the dealer in the bazaars, is turning to gold instead of silver, the change may play an important part in the developments of our money market. Be this as it may, gold has been steadily bought for India this week at about 77s. 10½d. per ounce, a price above what the Continent could afford to pay. The arrivals of sovereigns, however, and the return of cash from circulation led to a favourable Bank return; but this has not been followed by a further decline in the Bank rate, the Directors evidently considering that they had moved quite rapidly enough in reducing their minimum two weeks running. Unless something meanwhile happens, a reduction to 2½ or 2 per cent. next Thursday seems inevitable. The American exchange tends to rise rather than decline, and without a demand from that quarter, the weakness in our market is likely to make further progress.

The Stock Exchange settlement showed that less stock was being carried there than ever, and although 2½ per cent. was as a rule asked for loans for the fortnight, a good deal of business was done at 2¼ per cent. An issue of £385,000 two and three-quarter per cent. stock by the Plymouth Corporation was poorly received. Only £441,200 was applied for, and the average price of £98 3s. 8d. was no more than 3s. 8d. above the minimum. This was quite what we expected, municipal loans having fallen a little out of favour of late.

The temporary nature of the dip in the reserve of the

Banking Department last week was demonstrated by the figures in yesterday's Bank return. They show an increase of £1,290,000 in this reserve, which now stands at £27,336,000. Gold to the value of £406,000 only came in from abroad, but it was supplemented by £565,000 in coin, and £318,000 in notes returned from the internal circulation. Money to the amount of £869,000 has also been released by the Treasury and Government Departments bringing "public" deposits down to £10,911,000, and as the market had nothing more to pay off at the Bank all these sums have gone to augment the "other" deposits, which have increased £2,148,000 to £44,554,000, a total that sufficiently accounts for the depressed and limp condition of the credit market; the more so as the agents of the Japanese Government continue ready lenders of its balances. Yesterday the Bank lost £597,000 net in gold exported.

SILVER.

After rising to 27½d. per ounce at the end of last week, the price of bar silver for immediate delivery fell back on Tuesday to 27d. per ounce, owing to a cessation in the demand for Spain. The next day orders again came in from that quarter, and the quotation has risen to 27⅛d. per ounce. The sudden weakness on this temporary falling off in a special demand shows how dependent the market is upon this extraneous source of support, and although the continued run for cash upon the Bank of Spain may at times cause Spanish buying to become more urgent, the inevitable result of the run cannot be far distant, a result which would stop the bank's power to buy most summarily. At the same time, there has been a certain amount of "bear" selling for forward dates which should act as some sort of a protection to the market against the loss of Spanish orders in the near future. The "forward" quotation is almost nominal at 26½d. per ounce. Indian exchanges at one time were weak, coming at 1s. 3⅛d., but hardened up again when it was found that the India Council refused to allot transfers below 1s. 4d. Chinese rates have moved up to a moderate extent, but they are well below the quotations at which silver could be taken at a profit.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, June 8, 1898.

Stock Market Notes and Comments.

This is account week on the Stock Exchange and consequently it is a week more or less dead as regards new business. In fact, business has not been resumed to any extent since the holidays, and the account to settle is a very small one. That lying ahead of us is what is called a "nineteen day" account, and we may therefore see some lively movements during the rest of this month. It is a tradition, or superstition, on the Stock Exchange that "long accounts," as they are called, always produce either excited speculation in some quarter or nice little messes, or both. There is not much chance of the latter at present, greatly though the market would benefit by a good scouring out of some of the riff-raff element it contains. The only direction in which we see indications of what might be called a large gamble is in United States and Canadian railways. These have been going up in price, with small pauses and set-backs, pretty rapidly for some time back, and now that money has fallen diseasedly cheap, it is more than probable that a combined effort will be made to give outsiders who buy "a good run" for their money. We might infer this for another reason. It appears, as far as we can gather, that much of the recent advance has been the work of speculators on the other side of the Atlantic. Brokers and dealers here tell us that the English public has not yet joined in the gamble to any great extent. Until the other week, at least, people here sold rather than bought, because there is always in the early part of an American railroad boom a tired division of people, who have been holding on to depreciated securities for perhaps years back, until they have become absolutely sick of the phrase "American railroad bond" or share, and are eager to dispose of their property at any loss which is less than the one they had made up their minds to endure.

Looking at the subject in a philosophical spirit, we may say that speculation in American railroad securities, whether United States or Canadian, always follows a regular course from the bottom upwards, and from the top downwards. As a preliminary to the rise, there is always a more or less prolonged time of stagnation and decay, during which scandals multiply, railroad companies pass into the hands of the receivers, bondholders discover that their securities have no value, reorganisations get effected at immense profit to the financiers, and the outlook is most of the time painted in most gloomy colours. During this time prices either sink very low or become altogether shadowy, it being often impossible to deal in a great many stocks at the nominal market quotation or any quotation. As the end of this dark period approaches speculators across the Atlantic begin to buy, and the newspapers commence the publication of reassuring assertions; but this does not go very far until a greater or less number of the roads which were derelict have been reorganised. Then, when in the process of reorganisation a few large capitalists in the United States have acquired possession of immense quantities of bonds and shares at quite frivolous prices, the campaign for the advance begins in solid earnest. Traffic returns become wonderfully good, working expenses phenomenally low, and prophecies of dividends appear, pointing to a coming value on the market for bonds or shares the miserable holders of which had long since been resigned to write off as not worth the paper they were printed on. All the time these favourable symptoms are developing, American speculators buy steadily, until they succeed sometimes in pretty well clearing our European markets of any floating stock, or remains of old ruinous "investments," to be had. As we have said, for a considerable time it is very easy to do this, because of the willingness of sickened holders on this side to part with stuff they had lost so much money by. And for a time the British public looks on indifferent. The business is left to the Stock Exchange itself, or pretty much. Members of that institution may and do share in the preliminary upward movement, and hop out and in as accounts come and go, pocketing what profits they can make out of each other, or out of short-winded operators in Wall-street. But it is all a hollow sort of affair until John Bull rises to the bait, and charges, full bodied, down on the Exchange. When this great change comes, and the British public commences to buy, at first slowly, and with an air if anything indifferent and sceptical, the "boom" has begun. A new multitude, which has not the scars of old wounds to contemplate, seeing prices always advancing, soon learns to entertain the opinion that there "must be something good" in this or the other security after all. From this mere "view, don't y' know," to the possession of a firm, settled conviction that these things are first-class investments well worth buying at the high prices current, is only a week or two, or month or two's time according to circumstances, and soon a roaring, ever-increasing horde dashes into markets, eager to secure the valuable bond or share on which a dividend is about to be, or has been, declared. On this the Americans, whose safes were jammed up with this paper, throw it back to us again at magnificent profits;

and go on their way rejoicing to victories new. Having accomplished this splendid feat, things begin to get bad again, usually, in the United States. Traffic earnings fall off, or a "rate war" breaks out—outcome often of some nefarious concession of low rates to trusts and other trading companies—expenses mount up, and by and bye it is once again discovered that a mysterious "floating debt" has developed itself, without anybody knowing anything about it. At the end of the downward sweep another crop of bankruptcies and reorganisations becomes the proper order of harvesting. At present we are in the comparatively middle region of the upward movement, and the British public has not yet arrived at the full conviction that "Norfolks," "Northern Pacifics," "Atchisons," "Missouries," "Southerns," and "Eries" are the very things to speculate in in order to make fortunes. But they are getting that way, and will soon be stoically staking their money and losing it just as they have always done.

No other market except that for railways is worth wasting two sentences upon. There is a Rhodesian "boom" on the way, we are told. Some mines are going to be furnished with machinery, and there are to be wonderful crushings, with an astonishing amount of ounces to the ton in the early autumn, or as soon as the often-washed-away Bulawayo Railway carries the stamps up. Then "look out for a rise," the market tipsters tell us, and we hope holders of these shares will light upon it and sell when it comes.

The oddest thing about the foreign Government bond section is that some addlepates among us have "gone bulls" of Spanish 4 per cents. "Worth 45," they sapiently aver. Perhaps they mean shillings; perhaps they were "bears" early; perhaps—no, we really cannot guess the motive. But we know these enterprising "Johnnies" will have a mighty time to wait for their profits.

The Week's Stock Markets.

Business remains very quiet on the Stock Exchange, but a little more support has been forthcoming from the general public, owing to the absence of political alarms coupled with the fall in the value of money. The market for United States railroad shares has again been the most active one, being well supported by Wall-street for a time, but profit taking has been the order of the day just towards the close, and prices on the whole show a slight loss on balance. Foreign Government stocks, with one or two exceptions, keep firm, owing to the steadiness of the Continental bourses, and the chief and almost the only feature in the mining market has been the rise in some of the higher-priced Western Australian shares. Consols were exceptionally weak, although the further decline in discount rates increased the demand for investment stocks. Home railway issues, after being let alone for several days, finally hardened, and then again weakened in several instances. The settlement was not by any means troublesome, and rates were of the lightest description.

Highest and Lowest this Year.		Last Carrying over Price.	BRITISH FUNDS, &c.	Closing Price.	Rise or Fall.
113⅛	109¼	—	Consols 2¾ p.c. (Money)...	111⅜	− 1/16
113 5/8	109½	111¾	Do. Account (July 1)	111⅜	- 1/16

Among Home Government and other "gilt-edged" securities there has been a steady advance in the 2½ per cents., Local Loans, and Bank stock, but large blocks of Consols have come on the market, and the price has dwindled, while all the Indian Government sterling loans exhibit a loss on the week. The announcement of the new Indian loan seems to have been the principal reason for the decline in Consols and the Indian loans. Most of the leading Colonial Government inscribed stocks mark rises, and a further appreciation in the leading Home railway companies' premier securities is noticeable.

117⅛	105½	113⅜	South Eastern Def.	113⅞	+ 1⅜
98⅜	87	93⅜	South Western Def.	94	—

In the Home railway market business was inactive during the greater part of the week, and with one or two exceptions changes are unimportant, the prospects of stock being scarce for delivery at the settlement and the cheapness of money not leading to any very great increase in the number of transactions. Chatham and South Eastern stocks rose sharply on a report of some sort of a new working arrangement (for dealing with the Paris Exhibition traffic, said one rumour, which seems a little premature), but the advance in Chatham second preference was due more than anything else to the prospect of an increased dividend this time. North Eastern Consols met with a good deal of support, the traffic being a very fine one, and Great Eastern hardened when it was found that the stock after being carried over "even" at first finally went to ¼ "back." Metropolitan ordinary gave way, it being stated that a Bill for a line between Ealing and High Wycombe has been deposited giving the Great Central Company a connection with the District. There was also a heavier contango this account, the rate being fully ½ per cent. The recent rapid rise in Metropolitan District ordinary seems to have been carried too far, and the inevitable relapse has since taken place. Lancashire and Yorkshire was slightly weaker on the news of the collision on their system, and a decline has also to be recorded in Waterloo and City, some holders, it is believed, having sold out to reinvest in the Great Northern and City Electric Company. The traffic returns were all considered satisfactory.

New York operators have done their best throughout the week to keep up the prices of United States railroad shares to last week's level, but realisations on this side in view of the settlement caused an almost general relapse, and then Wall-street followed the lead of London, while the absence of very reliable information from the seat of war has tended to restrict business. Union Pacific, Northern Pacific, Southern preferred, and Denver preferred have been the most active counters, but Milwaukee and Louisville and Nashville shares have again attracted a considerable amount of attention, but at slightly lower prices than those ruling at the end of last week. In the bond list there has again been a steady and continuous advance, Wall-street being a large buyer, and a better demand on Home account was also reported. The account was an easy one, money rarely being more than 3 per cent., but stock was found to be rather more plentiful than on the last occasion, Milwaukee this time being carried over "even."

Holders of Grand Trunk stocks had an unpleasant surprise when the traffic return showing an increase of about £700 only was published, whereas the market was going for an increase of anything up to £20,000. The price of the first and second preference stocks came down rapidly, and, recovered afterwards on large buying orders from Montreal, and, as is usually the case, these orders were at once taken to mean that the rate war was going to be settled in a hurry. Up to the present, however, the only arrangement arrived at is said to be one for restoring at an early date the rates east of Chicago. Canadian Pacific shares have been rather neglected, and leave off without much change on the week.

In the Foreign market the principal feature was the strength of the Brazilian bonds, the further rise in the exchange causing re-purchases by "bears," and it is stated that the funding scheme has now been practically accepted by the Brazilian Government. Argentine and Chilian stocks, however, have been flat, rumours that war was imminent between these countries over the western boundary question again cropping up. In addition to this, the action of the Chilian Government in endeavouring to launch some £500,000 in Treasury bills on the London market helped still further to depress the whole list of Chilian bonds. Among inter-Bourse securities, the notification that the July coupon will be paid entirely in gold caused a little bear closing, and this, and the scarcity of stock, helped to raise the price of Spanish 4 per cents., but the rise was not maintained, and the Paris Bourse withdrawing all support, the price drooped in the face of selling orders from Madrid, presumably on behalf of the Bank of Spain. Italian Rente advanced on Berlin purchases. Turkish groups rose somewhat sharply on conversion rumours, and Ottoman Bank shares were bought on the announcement of a satisfactory dividend. Egyptian and Greek loans are slightly higher, and this also applies to Portuguese stock. Continuation rates were very light, Italian being carried over "even," Spanish at about 1 per cent., and Argentine and Brazilian at from 1 to 3 per cent.

Among Foreign railway issues changes have been numerous, and generally in the upward direction, the principal rises having taken place in Argentine Great Western, East Argentine, and the Leopoldina group, but Buenos Ayres Northern has fallen 5, and Cordoba Central income stock is also rather lower. A smart rise has occurred in the old Mexican Company's first preference and ordinary, and Inter-Oceanic "A" debenture, owing to the rise in silver.

The most prominent change in the list of Miscellaneous securities is a big rise in Allsopp preferred ordinary, due to the light continuation rate and the shortness of stock. Suez Canal shares rose sharply on the satisfactory meeting, and P. & O. deferred on the publication of their report. Gas Light "A" is 3 higher, and rises have also occurred in Aerated Bread, Callender's Cable, and Fairfield Shipbuilding preference. Hudson's Bay shares declined, the dividend not being up to expectations, and falls ranging from 2 to 10 are noticeable in Asbestos and Asbetic ordinary, General Hydraulic Power, United Alkali debenture, and Welsbach ordinary. Electric lighting companies' shares have slipped back a little more; and several tea companies' emissions are weaker, the reports, which are now coming out, showing up rather badly. Very little notice was taken of Mr. Hooley's failure, and the effect upon prices was practically nil. Russian Petroleum ordinary shares are now being dealt in on a £1 basis, the quotation being about 2½.

Markets closed the week quietly, the reported settlement of the Niger question, and rumours of the fall of Manila having little or no effect on prices. Consols picked up a little at the last, and home railway stocks closed strong, especially the Scottish and southern lines. Grand Trunk issues were put up a little towards the close in anticipation of a good traffic, and Canadian Pacific shares were favourably influenced by the contradiction of the rumour of a new issue of capital. United States railroad shares closed firm, especially Northern Pacific preferred and Denver preferred; and Milwaukee and Louisville both recovered from the worst points of the week, although still finishing below last Thursday's level. Among Foreign Government bonds, Spanish 4 per cents. closed weak on Paris sales, and Brazilian and Chilian issues were also weaker at the last for the same reason.

Mining and Finance Companies.

Taking the mining market as a whole, there has been little or nothing doing, speculation being almost at a standstill, and the business, what there was of it, was of the purely professional type. Western Australian shares exhibit a few substantial gains, notably Hainault, Hannan's Brown Hill, and Golden Horse Shoe, on buying orders from Adelaide, and the settlement disclosing a rather short supply of stock, rates were light, a small "back" being at one time paid on Golden Horse Shoe. Indian shares were well supported, the returns for May being good; but among copper-producing companies prices are if anything slightly weaker.

SOME HOOLEY COMPANIES AND THEIR RESULTS.

In the brief time which has elapsed since this wonderful promoter braved his fate and put the Bankruptcy Court between him and his creditors, we have had slender opportunity to put together a skeleton record of his feats. Such as it is, however, the following table will prove interesting to many people and not without instruction to some :—

CYCLE CONCERNS.

Name of Company.	Nominal Capital. £	Present Market Value. £	Depreciation, *i.e.*, loss to public. £
Amalgamated Tyres... ...	1,000,000	150,000	850,000

United Ordnance and Engineering, Preference ...	275,000		
United Ordnance and Engineering, Debenture ...	250,000		

* Improvement in value.

In considering these two tables it should be remembered that the cycle companies represent usually the earlier efforts of the industrious Mr. Hooley, and therefore sufficient time has elapsed in their case for his vicious methods of finance to work their full effect. The other companies were of a later date, and time has not brought its inevitable harvest in the shape of that depreciation in value such issues merit. Then the worst of them, perhaps—things like Blaisdell Pencils and Dee Estates—are precisely those that have no quotation at all. As far as our information allows, the two tables may be summarised in the following manner.

Sixteen cycle issues with a nominal capital of ...	£8,875,000
Value at prices obtainable	3,885,000
Loss to public if it held the issues	£4,990,000
Ten issues of other companies with a nominal capital of	£4,850,000
Value at prices obtainable	4,642,000
Loss to public if it held the issues	£208,000

If the latter group is going to follow the example of the cycle companies there is plenty of worry and disappointment for the sanguine holder in the future.

THE CENTRAL PACIFIC RAILWAY COMPANY.

The following is a full report of the portion of Mr. Morshead's speech of June 7, which was briefly reported in the *Financial News* of the 8th. It deserves attentive perusal, and if the stockholders of the company here would only join their fellow sufferers in the States in adopting the course here recommended, they might not only save their property, but administer a lesson to the unscrupulous financiers by whom they have been so often and so systematically robbed, which would do good for all time to come :—

"After the address of Sir William Marriott little can be usefully said on the present occasion of the past history of the Central Pacific Railroad, but you may like to hear, from one of the shareholders who protested in 1894 against the latest and continuing aggression of Mr. C. P. Huntington, a few observations as to our present position and the measures which are in progress for the protection of our investments. Millions of English capital have been lost in American railroads during the last few years, but as an investor in Erie, Atchison, Louisville, and Nashville, Central Pacific, and one or two others, I have no hesitation in saying that so far as my researches have extended, the greatest sufferer by far at the hands of American plutocrats has been the Central Pacific Railroad of California. Four large fortunes, amounting in each case to many millions sterling, have been carved out of its assets by Mr. C. P. Huntington and his three associates, Messrs. Stanford, Hopkins, and Crocker. Fortunately for us, however, the Government and people of the United States, who advanced large subsidies and made extensive land grants to the promoters, are our fellow sufferers. Our property, which, since the sale of the promoters' interests in Europe, has been systematically sucked dry by the vampire company of which Mr. Huntington is president, is the security for £11,000,000 sterling of public money belonging to the Government and people of the United States. This fact suggested to the Fairchild-Lubbock and Protection Committees a short, simple, and practical plan for liquidation of the Government debt and the recovery of the property by the action of the Government. It provides by foreclosure, receivers, and application of the sinking funds, for reorganisation without assessment on a solvency basis, payment of the Government debt, and restoration of the property to its owners with independent control. Evidence and advices from America show that by the adoption of this plan the road could at once pay 4 per cent. on all its liabilities and substantial dividends on the shares. The plan, which had the approval of Mr. Fairchild, Sir John Lubbock, and Lord Monkswell, and is supported by mass meetings at San Francisco, the independent shareholders in America, and the populist Press, has been submitted by your committee to the authorities at Washington, and has met with a friendly and favourable reception. The Banbury proposals, which in our judgment are ruinous to our interests, involve the loss of an opportunity, which can never recur, of rescuing our property by the action of the Government. With the assent of the shareholders, without any money contribution, and their dissent from the plans of Mr. Huntington and his board, which has just been re-elected by the votes of the Banbury committee, your committee are of opinion that success is assured, and we are confident of your assent when the facts are known. The Banbury committee have been publicly challenged to explain them, and we pause for a reply. Frequent communications by letter and cable are passing between the Protection Committee and our supporters at Washington, New York, Rochester, and San Francisco, and the more the shareholders are acquainted with the facts the greater will be the certainty of saving the property. In conclusion, I am in a position to assure you that your committee has a reserve of strength sufficient, in my opinion, with your assent, to insure success, and that our strength will be utilised in defence of our property before any further interference therewith by Mr. Huntington's board or the Banbury committee will be tolerated by the shareholders to whom the facts are known."

THE ST. LOUIS TERMINAL CUPPLES STATION AND PROPERTY COMPANY.—According to advices received the earnings of this company derived from rentals of the terminal warehouses from March 15, 1897 (date of incorporation), to May 1, 1898 (13½ months) were as follows :—Receipts, $311,739.51 (including only two month's rent from four new buildings just completed, which are all leased ; expenses, $68,070.50 ; net earnings, $243,669.01 ; interest on $3,000,000 4½ per cent. first mortgage gold bonds, $151,875.00 ; surplus, $91,794.21. In addition to usual fire insurance this company now also insures its rents.

Answers to Correspondents.

Questions about public securities, and on all points in company law, as well as on the position of life insurance offices and their promises, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway ?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

R. K.—1. There has already been a very substantial rise in all the issues of this road, and I do not think they are now tempting for an investor. If you wish to speculate wait until a flat day and then buy. There are chances of ups and downs which may give you opportunities of getting a profit, but if you lose your money don't blame me. 2. How can any one answer this question ? If it were possible to foresee the financial effects of the present struggle it would be fairly easy to predict. In my opinion, the market at the present moment is inflated. It is quite likely it may remain so and some of the cheaper shares rise, as trade is on the whole good, but any sudden stringency for money would bring prices down with a run.

TONK.—The debenture issue should be safe enough, but I am not very much in favour of the preference shares. The company's career has been a chequered one ; recently it has done better, thanks to some of the schemes it has been interested in turning out profitable. Its own business is run very close, and at present prices the preference shares seem rather dear.

NEW CLUB.—As the company has been at work not much more than six months in its present form, it is too soon to say that it is on a firm basis. Its directorate is fair—some of the members are connected with prominent firms in that country, but everything depends on the maintenance of traffic. For the first six months the receipts show well, but the debenture debt is heavy, and a buyer of the ordinary shares accepts considerable risk.

SHARK.—No doubt the accounts look well, but every effort has been made to make them appear so. The directors are not a very strong lot. Several of the businesses absorbed were weak, and this is the principal cause of the company finding it difficult to place its shares. The whole affair looks like having a struggle for existence. There is not enough solidity about the assets.

MINING RETURNS.

AUSTRALIA UNITED MINING COMPANY.—Crushed 345 tons, yielding 715 oz.

MYSORE WEST AND MYSORE WYNAAD.—Return for May :—381 oz. gold from 1,500 tons ore crushed.

NINE REEFS COMPANY.—Gold return for May :—900 tons of stone crushed yielded by amalgamation 51 oz. of gold ; by cyanide process, 68 oz. of gold.

NORSEMAN GOLD MINES.—Return for May :—Ounces of gold, 1,015, from 715 tons of ore crushed.

HALL MINES, LIMITED (BRITISH COLUMBIA).—2,902 tons of ore smelted, yielding 123 tons matte, containing approximately 47 tons copper ; 38,780 oz. silver ; 216 oz. gold.

CHAMPION REEF GOLD OF INDIA.—Last month's return :—7,640 tons of stone produced 9,183 oz. ; 2,445 tons of tailings produced 598 oz. ; 6,105 tons (cyanide process) produced 1,569 oz.

COROMANDEL GOLD.—Last month's return :—1,200 tons of stone produced 701 oz. ; 1,200 tons of tailings (cyanide process) 100 oz.

NEW COMET GOLD.—Crushing for last month :—Tons crushed, 5,080 ; ounces recovered from mill, 1,991 ; tons treated by cyanide, 4,007 ; ounces recovered, 1,146.

NUNDYDROOG COMPANY.—May return :—3,040 tons of quartz produced 2,809 oz. ; 800 tons of tailings produced 95 oz. ; and 3,016 tons (cyanide process) 356 oz.

TOLIMA MINING.—Estimated returns for May (65 tons), £2,000.

NORTH BOULDER.—Crushing for past fortnight :—385 oz. gold from 433 tons crushed.

PRINCESS ROYAL (CUE).—Clean up from 200 tons gave 141 oz. (exclusive of tailings).

CENTRAL BOULDER.—320 tons ore milled produced 487 oz.

NEW PINOS ALTOS.—Bullion shipped for May, £3,200. Estimated profit, £300.

KOMATA REEFS.—Preliminary clean up for four weeks, 400 tons, £1,660.

MENZIES' CONSOLIDATED.—554 tons crushed, yielding 725 oz.

TOKATEA CONSOLS.—96 oz. from 44 tons crushed.

UNITED IVY REEF.—985 tons crushed, produced 670 oz.

TWIN LAKES PLACERS.—Result for May :—Estimated value of bullion produced, $4,000.

OOREGUM.—5,727 tons quartz produced 3,704 oz. of gold ; 4,700 tons of tailings produced 742 oz. gold.

CONSOLIDATED GOLDFIELDS OF N. Z.—New Progress mill treated 2,650 tons, yielding £4,700.

OTTOS KOPJE.—4,912 loads washed ; 195 carats of diamonds won, including one stone of 31 carats.

IVANHOE.—Clean up for May :—1,751 tons crushed yielded 2,823 oz. gold. Average assay of tailings, 13 dwt. per ton.

HANNAN'S OROYA.—Crushed 891 tons, yielded 544 oz. gold.

MENZIES GOLD REEFS PROPRIETARY.—Crushed 51 tons ore, 61 oz. Cyanide process, 1,100 tons (yield) 730 oz.

MYSORE.—Return for May :—7,045 tons of quartz produced 11,633 oz. of gold ; 1,910 tons of tailings produced 573 oz. of gold ; 6,447 tons of tailings (cyanide process) produced 416 oz. of gold ; obtained from old plates and sands, dismantling Nos. 1 and 2 mill and Nos. 2 and 3 tailings, 5,270 oz. of gold.

NIGEL.—Last month's crushing yielded :—Battery 1,605 oz. ; cyanide 1,607 oz.

STANHOPE.—May crushing yielded 918 oz.

LADY EVELYN.—364 tons crushed for 513 oz. gold.

WEALTH OF NATIONS (in liquidation).—640 tons crushed yielded 396 oz. gold.

PADDINGTON CONSOLS (in liquidation).—1,290 tons crushed yielded 780 oz. gold.

GRASKOP.—First crushing 471 tons, yielding 430 oz.

SONS OF GWALIA.—940 tons quartz crushed, yielded 958 oz.

ANGELO GOLD.—Tons crushed, 6,944 ; ounces from mill, 3,566 ; tons cyanided, 5,413 ; ounces recovered from cyanide, 2,095.

BRILLIANT AND ST. GEORGE UNITED.—Crushed 2,257 tons of quartz for 3,209 oz. of gold.

BARRETT GOLD.—May yield : 670 oz.

BURMA RUBY.—Result for May :—39,000 loads washed, producing rubies valued at Rs.61,000.

GREAT BOULDER PERSEVERANCE GOLD.—May return :—Milled 879 tons for 1,035 oz. ; smelted, 300 tons for 752 oz.

GOLD FIELDS OF MYSORE.—Last month's return : 41 oz. obtained from 750 tons sand, cyanide process ; 181 oz. from amalgamation.

HENRY NORSE GOLD.—Crushed 8,500 tons, producing 5,130 oz. ; 6,170 tons cyanide treated, yielding 3,186 oz.

LANCASTER GOLD.—8,390 tons crushed, yielding 2,954 oz. ; 5,145 tons of tailings treated, yielding 1,160 oz.

MONTANA.—Output for May :—Gold, 3,050 oz., and silver, 20,680 oz. obtained from 6,725 tons of ore crushed in the mills and 11,864 tons of tailings from the dams brought under treatment.

NEW QUEEN GOLD.—Crushing for past fortnight, 400 tons, yielding 190 oz.

PIGG'S PEAK DEVELOPMENT.—Crushed, 2,400 tons for 390 oz. ; cyanided, 2,600 tons for 510 oz.

STANHOPE GOLD.—Last month's crushing yielded 918 oz.

ST. JOHN DEL REY.—Gold produce for May, £23,400 ; yield per ton, '90 of an oz. troy.

SHEBA GOLD.—9,000 tons of ore, 3,070 oz. ; 4,620 tons of tailings, 1,010 oz. ; 155 tons of concentrates, 1,225 oz.

WAITEKAURI GOLD.—During the month ended May 21 mill yielded £4,322 from 1,805 tons.

WAIHI GOLD.—During the month ended May 28 6,150 tons of ore yielded £18,708.

WEALTH OF NATIONS.—Crushed 640 tons, gross yield 396 oz. gold.

BEACON GOLD.—Return for May :—Oz. of gold, 262, approximate, from 548 tons of ore crushed.

DRIEFONTEIN CONSOLIDATED.—Tons crushed, 13,250 ; ounces recovered, 3,757 ; tons treated by cyanide, 12,969 ; ounces recovered, 3,665.

GRAND CENTRAL.—Crushed 5,150 tons, yielding bullion $60,700. Concentrates estimated at $20,300.

PESTAKENA UNITED.—503 tons produced 543 oz. of gold ; 305 tons tailings concentrates (cyanide process) produced 260 oz.

SALISBURY GOLD MINING.—Last month's crushing yielded 1,700 oz.

ROODEPOORT UNITED MAIN REEF.—Crushed 6,653 tons, producing 3,157 oz. ; cyanide, 621 oz.

VAN RYN GOLD MINES.—Crushed 12,012 tons, yielded 3,156 oz. gold. Cyanide works : 7,980 tons of tailings treated yielded 1,201 oz.

WEMMER GOLD MINING COMPANY.—Crushed 6 945 tons, yielding 4,424 oz. Cyanide plant, 4,750 tons treated, yielding 957 oz., and from concentrates, 139 tons caught, assaying 100 dwt. per ton.

VICTORIA (CHARTERS TOWERS).—295 tons crushed, yielded 513 oz. gold.

PREMIER.—438 tons crushed for 403 oz.

BURBANK'S BIRTHDAY GIFT.—Crushed 910 tons, yielding 1,238 oz. gold, exclusive of tailings.

BONANZA.—From mill—crushed, 5,453 tons ; obtained, 5,474 oz. of gold. From cyanide and slimes works—treated, 5,447 tons, yielding 2,475 oz. of gold.

CONSOLIDATED MURCHISON.—Crushed, 505 tons ; obtained 509 oz.

CROWN DEEP.—Tons crushed by 160 stamps, 22,946 ; yield in fine gold from mill, 6,092 oz. ; tons of sands and concentrates treated by cyanide works, 18,449 ; yield in fine gold from sands and concentrates, 4,185oz. ; tons of slimes treated, 3,797 ; yield in fine gold from slimes, 70 oz.

DE LAMAR.—During May 2,796 tons leached ; bullion produced from cyanide treatment, $22,000 ; surplus from clean-up of old mill, $5,819 ; estimated value of ore shipped to smelters, $1,100 ; miscellaneous revenue, $180 ; total produce for May, $29,099.

FERREIRA GOLD.—Crushed, 11,006 tons ; bar gold extracted, 8,297 oz. ; concentrates caught, 250 tons ; assay value of concentrates, 5 oz. 5 dwt. fine gold per ton, equal to say 1,312 oz. ; bullion produced from tailings, 3,016 oz. ; bullion produced from slimes, 420 oz. ; total gold from all sources, 13,045 oz.

GELDENHUIS DEEP.—Tons crushed by 190 stamps, 23,750 ; yield in fine gold from mill, 7,257 oz. ; tons of sands and concentrates treated by cyanide works, 17,220 ; yield in fine gold, 3,540 oz. ; tons of slimes treated, 5,742 ; yield in fine gold, 417 oz.

GLYNN'S LYDENBURG.—From mill.—Crushed, 1,583 tons, obtained 615 oz. of fine gold, equal to 671 oz. standard gold. From cyanide works.—Treated, 1,008 tons, yielding 266 oz. of fine gold, equal to 290 oz. standard gold. From slimes works (two months' working).—Treated 772 tons, yielding 268 oz. of fine gold, equal to 292 oz. standard gold. By products (and balance from April).—332 oz. of fine gold, equal to 362 oz. standard gold ; total, 1,481 oz. fine gold, equal to 1,615 oz. standard gold.

GREAT BOULDER.—Return for the fortnight ended June 6 :—Tons of ore crushed, 1,410 ; yield of gold in ounces, 3,076.

HANNAN'S VIRGINIA.—Crushed, 350 tons ; yielded 88 oz. gold.

JUMPER'S DEEP.—Tons crushed by 80 stamps, 11,571 ; yield in fine gold from mill, 4,107 oz. ; tons of sands and concentrates treated by cyanide works, 8,395 ; yield in fine gold from sands and concentrates, 2,410 oz.

LUIPAARD'S VLEI.—During May the mill crushed 3,035 tons, yielding 1,433.

MEYER AND CHARLTON.—Crushed, 9,184 tons ; gold won, 2,680 oz. ; extracted from tailings, 1,323 oz.

NEW KLEINFONTEIN.—Tons crushed, 10,240 ; ounces recovered from mill, 3,347 ; tons treated by cyanide, 7,369 ; ounces recovered from cyanide, 1,162.

NEW MODDERFONTEIN.—Output for May :—7,178 tons ; yielded, 3,107 oz. ; cyanide, 1,137 oz.

ROSE DEEP.—Tons crushed by 122 stamps, 14,824 ; yield in fine gold from mill, 5,486 oz. ; tons of sands and concentrates treated by cyanide works, 9,802 ; yield in fine gold from sands and concentrates, 2,149 oz. ; tons of slimes treated, 4,443 ; yield in fine gold from slimes, 455 oz. Total yield in bullion ounces, 10,106 ; equal to 8,090 oz. fine gold.

WORCESTER.—Last month's crushing yielded 2,764 oz.

QUEEN CROSS REEF.—Crushed 350 tons for 414 oz.

JUBILEE.—1,200 oz. of gold obtained from 3,115 tons crushed. Tailings, 330 oz. Mill working 17 days.

NOTICES.

The Council of Foreign Bondholders are advised by the London and River Plate Bank that thay are this day in receipt of the following cable message from their Montevideo branch, dated the 1st inst.:—"We have remitted by to-day's mail to Glyn, Mills, Currie, & Co., £34,600 for the service of the Uruguay 3½ per cent. debt." This remittance represents the 45 per cent. of the Customs receipts for the second fortnight of May.

The committee appointed at a public meeting held on August 4, 1897, to protect the interests of the holders of the first mortgage 7 per cent. gold bonds of the Busk Tunnel Railway Company requests holders of such bonds to forthwith deposit the same with the agents, Messrs. C. J. Hambro & Son, 70, Old Broad-street, E.C., where copies of the committee's report as to the present position can be obtained, and the form of certificate to be issued by the committee against deposited bonds can be inspected.

With reference to the death of Mr. George Jackson, which took place on May 24, Messrs. Jackson Brothers and Cory intimate that the business will be carried on by the surviving partner, Mr. Walter Jackson, under the same style and in the same manner as heretofore.

The New Victoria Consols Gold Mining Company (no liability) has opened a London registry office and agency at 70, Cornhill, and Messrs. Stonehams and Wethereds, Limited, have been appointed London agents.

Messrs. Glyn, Mills, Currie, and Co. have received advice by cable from the London and River Plate Bank at Montevideo announcing the despatch by mail of a remittance amounting to £4,200 for the service of the Uruguay 5 per cent. loan of 1896.

Of the West Virginia and Pittsburgh 5 per cent. gold bonds, the coupon on which, due April 1 last, was passed by the lessees, the Baltimore and Ohio Railroad Company, nearly 70 per cent. have now been deposited with Messrs. Brown, Shipley, & Co.

The transfer books of the 4 per cent. debenture stock of the Buenos Ayres and Rosario Railway Company, closed from the 6th to 18th inst., for the preparation of warrants for payment of the half year's interest due July 1.

The English Association of American Bond and Share Holders, Limited, will act on behalf of depositing bondholders in the Wheeling and Lake Erie Railway Company in receiving and forwarding deposited bonds. Copies of the plan of reorganisation can be obtained at the office, 5, Great Winchester-street, London, E.C.

Messrs. John Venn and John Dalton Venn, carrying on business as notaries public under the style or firm of "John Venn," at 50, Gresham House, E.C., and 7, St. Martin's-place, Trafalgar-square, W.C., are not, and have not at any time been, in any way connected in business with Mr. W. E. Venn, notary public, of 2, Pope's Head-alley, Cornhill, against whom a receiving order was made on the 2nd inst.

Messrs. Stewart Brothers & Spencer have admitted Mr. Percy Malcolm Stewart into partnership.

NEXT WEEK'S MEETINGS.

Monday, June 13.

Bargang Tea ... ... 138, Leadenhall-street, noon.
Beyrouth Waterworks ... ... 17, Throgmorton-street, 3 p.m.
Dickson & Mann ... ... Armadale, 11 a.m.
Great Boulder Perseverance ... 32, Old Jewry, noon.
North Western of Uruguay Railway Winchester House, noon.
Royal Insurance ... ... Liverpool, 11 a.m.

Tuesday, June 14.

Bengal Nagpur Railway ... ... Gresham House, 2.30 p.m.
Chester's Brewery ... ... Manchester, noon.
Commercial Bank of Scotland ... Edinburgh, 1 p.m.
Malta and Mediterranean Gas ... 60, Gracechurch-street, noon.
Manila Railway ... ... Winchester House, 2 p.m.
Mungledye Tea ... ... 138, Leadenhall-street, 2.30 p.m.
New Zealand Trust and Loan ... 9, King William-street, noon.
Peninsular and Oriental Steam Navigation ... ... Leadenhall-street, 1 p.m.
Southwark and Vauxhall Water ... Southwark Bridge-road, 1 p.m.

Wednesday, June 15.

Bengal Central Railway ... ... Gresham House, 2.30 p.m.
Borelli Tea ... ... 138, Leadenhall-street, 2.30 p.m.
General Life Assurance ... ... 103, Cannon-street, 1 p.m.
Grand Junction Waterworks ... 65, South Molton-street, W., noon.
Kynoch ... ... Birmingham, noon.
Read'm Drift Land ... ... Winchester House, noon.

Thursday, June 16.

Arica and Tacna Railway ... ... 31, Lombard-street, 1.30 p.m.
Empire of India and Ceylon Tea ... Winchester House, 1 p.m.
Sambre and Meuse Railway ... 10, Moorgate-street, 11 a.m.

Friday, June 17.

Great Indian Peninsula Railway ... Winchester House, 12.30 p.m.
Indian and General Trust ... Winchester House, 1 p.m.

Messrs. N. M. Rothschild & Sons publish the numbers of 663 bonds, amounting to £66,300, of the Spanish quicksilver mortgage loan, which have been drawn for payment at par on July 1.

RAILWAY TRAFFIC RETURNS.

Mobile and Birmingham Railroad.—Traffic for third week of May, $4,808; decrease, $1,216. Aggregate from July 1, $328,599; increase, $62.

Algeciras (Gibraltar) Railway.—Traffic for week ended May 28, Ps. 39,202; increase, Ps. 22,702. Aggregate from July 1, Ps. 996,914; increase, Ps. 72,594.

West Flanders Railway.—Gross receipts for week ending June 5, £2,119; increase, £123. Total from January 1, £53,093; increase, £1,892.

West of India Portuguese Railway.—Week ending May 14, Rs. 8,242; increase, Rs. 4,091. Aggregate from January 1, Rs. 93,200; increase, Rs. 27,518.

Villa Maria and Rufino Railway.—Traffic for week ending June 4, $326; increase, $60. Aggregate from January 1, $7,841; increase, $1,506.

Southern Mahratta Railway.—Receipts for week ended May 14, Rs. 1,23,343; decrease, Rs. 29,874.

Bengal Central Railway.—Traffic receipts for week ending May 14, Rs. 14,838; decrease, Rs. 502. Aggregate from January 1, Rs. 369,902; increase, Rs. 62,450.

Delhi Umballa Kalka Railway.—Receipts for week ended June 4, Rs. 28,800; increase, Rs. 4,900. Aggregate from January 1, Rs. 7,53,700; increase, Rs. 1,78,100.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, June 4:—Ps. 10,500; decrease Ps. 2,500. Aggregate from January 1, Ps. 190,000; decrease, Ps. 6,870.

Western of Santa Fe Railways.—Gross receipts for week ending June 4, $16,360; increase, $3,025.

Great Western of Brazil.—Traffics receipts for the week ending April 30, $22,597; decrease, $2,375. Aggregate from January 1, $594,494; increase, $73,735.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending May 7, Rs. 9,716; increase, Rs. 2,173. Aggregate from January 1, Rs. 1,44,244; decrease, Rs. 603.

Assam Bengal Railway.—Traffic receipts for week ending May 7, Rs. 23,409; increase, Rs. 5,703. Aggregate from January 1, Rs. 4,69,383; increase, Rs. 86,005.

Burma Railways.—Traffic receipts for week ending May 7, Rs. 1,99,024; increase Rs. 2,669. Aggregate from January 1, Rs. 38,57,261; increase, Rs. 1,270.

Quebec Central Railway.—Traffic receipts for third week of May, $7,888; decrease, $256. Aggregate from January 1, $143,056, decrease, $15,536.

Bolivia Railway.—Traffic return for month of April, £1,017; decrease, £2,445. Aggregate from July 1, £20,257; decrease, £9,334.

North Western of Uruguay.—Traffic receipts for month of May, $15,000; increase, $3,823. Aggregate from January 1, $73,741; increase, $17,172.

Cleator and Workington.—Gross receipts for the week ending June 4 amounted to £1,027, an increase of £9. Total receipts from January 1, £22,815, a decrease of £670.

Cockermouth and Keswick Railway.—Receipts for the week ending June 4, £1,215; increase, £287. Aggregate from January 1, £18,918; increase, £1,986.

The managing director of the Anaconda Copper Mining Company informs us that the fire at the mines is now under control.

Mr. Bertram Stuart Straus has retired from the firm of Hale & Son, and the business will be conducted by the remaining partners.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf. Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

Working-Capital Column.—In working-capital column, D stands for *debit*.

* Company formed this year. † Interim dividends are given as actual distribution made. ‡ Interim div. only. § Crop 1896.

DIVIDENDS ANNOUNCED.

MISCELLANEOUS.

Anglo-Chilian Nitrate and Railway Company, Limited.—Dividend of 14s. per preference share.

New Hudson Cycle Company, Limited.—Interim dividend at the rate of 6 per cent. on the preference shares.

New Hudson Cycle Extension.—Dividend at the rate of 10 per cent. for the past fifteen months.

Singer Cycle Company, Limited.—Interim dividend at the rate of 5 per cent. per annum on the ordinary shares for the six months ended March 31, 1898.

Boston Steam Trawling.—10 per cent.

Royal Electric Company of Montreal.—2 per cent. for the quarter ended May 31.

Webster's Brickworks, Limited.—Dividend at the rate of 6 per cent.

Western and Brazilian Telegraph Company, Limited.—Dividend of 6s. 9d. per share, making, with the dividend paid in November, £3 5s. per cent. for the year.

Craven's Caledonia Gold Mining Company (Charters Towers).—3d. per share.

Grand Junction Waterworks Company.—Dividend at the rate of 7½ per cent. on the A, B, and C shares, and at the rate of 7 per cent. on the D shares.

New Zealand Trust and Loan Company, Limited.—2s. 6d. per share, making, with the interim dividend paid in December, 5 per cent. for the year.

Great Boulder Perseverance Gold Mining Company, Limited.—4s. per share.

Hudson's Bay Company.—Dividend of 13s. per share.

Indian and General Investment Trust, Limited.—3 per cent. on the deferred stock.

City and Suburban Gold Mining and Estate Company, Limited.—7½ per cent.

New Zealand and River Plate Land Mortgage Company, Limited.—Interim dividend at the rate of 5 per cent. per annum.

Electric and General Investment Company, Limited.—Further dividend on the ordinary shares at the rate of 30 per cent. per annum, and a bonus of 10 per cent., making, with the interim dividend, 35 per cent. for the year. A dividend of £50 on each founder's share, with £20 per share from the founder's share reserve fund.

Commercial Cable Company.—Quarterly dividend of 1¾ per cent.

Brilliant and St. George United Gold Mining Company.—Dividend of 9d. per share.

New Heriot Gold Mining Company, Limited.—25 per cent.

Zeehan Montana Mine, Limited.—Further dividend of 9d. per share.

Boston Deep Sea Fishing and Ice Company, Limited.—10 per cent.

Gold Patents Company, Limited.—Interim dividend of 5 per cent. payable to shareholders registered on June 30.

Rio De Janeiro Flour Mills and Granaries, Limited.—Interim dividend at the rate of 5s. per share will be paid on the 15th inst.

Victoria and Queen Gold Mining Company, Limited.—1s. per share payable on the 23rd inst.

British and Foreign Marine Insurance Company.—Interim dividend of 8s. per share for the half-year.

Tower Tea.—A final dividend of 1s. 10½d. on ordinary shares, making with the interim dividend 8¾ per cent. for year.

Wolhuter Gold Mines.—A half-yearly dividend of 4s. per share, and an interim dividend of 2s. per share have been declared.

Associated Gold Mines of Western Australia.—Interim dividend at the rate of 2s. per share.

RAILWAYS.

Bengal Dooars Railway Company, Limited.—Dividend of 3½ per cent. for the six months ended December 31, making 5 per cent. for the year.

Alabama Great Southern Railway Company, Limited.—Interim dividend of 3 per cent. on the "A" preference shares.

INSURANCE.

Royal Insurance Company.—Dividend of 20s. per share, making, with the 18s. paid in December last, 38s. for the year.

Norwich Union Fire Insurance Society.—Dividend of £2 per share, and bonus of £1.

Northern Assurance Company.—Further dividend of £1 5s. per share, and bonus of 15s.

British and Foreign Marine Insurance Company, Limited.—Interim dividend of 8s. per share for the half-year.

SHIPPING.

British India Steam Navigation Company, Limited.—Dividend at the rate of 10 per cent. for the year.

Peninsular and Oriental Steam Navigation Company.—Usual interim dividend at the rate of 5 per cent. per annum on the preferred and 7 per cent. on the deferred stock.

BREWERIES.

Chesters Brewery Company, Limited.—5 per cent., making with the interim dividend already paid, 8 per cent. for the year.

Westlake's, Limited.—Interim dividend at the rate of 8 per cent. per annum payable on and after the 13th inst.

BANKS.

Imperial of Persia.—Interim dividend for the half-year ended March 20 of 3s. per share will be payable on and after the 28th inst.

The numbers are published of the 6 per cent. bonds of £100 each of the Cantareira Water Supply and Drainage Company of the City of Sao Paulo, drawn for payment at the British Bank of South America on July 1.

Messrs. N. M. Rothschild and Sons announce that under the operation of the sinking fund bonds of the Brazilian 4½ per cent. loan of 1883, amounting to £90,000 nominal capital, of the Chilian 4½ per cent. loan of 1887, amounting to £12,700 nominal capital, and of the Chilian 5 per cent. loan of 1896, amounting to £24,700 nominal capital, have been purchased.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 24. New Series. FRIDAY, JUNE 17, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

THE

LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,

On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.

The advantages of such insurance are as follows:—

1. The Debentures being guaranteed by the Society can be placed at not less than par, thus saving discount.
2. A lower rate of interest is willingly accepted.
3. The Society acting as Trustee for Debenture Holders also adds to the Security.

MORTGAGE INSURANCE.

CONTINGENCY INSURANCE,

In respect of Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.

Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

HEAD OFFICE:

49, CHANCERY LANE, LONDON.

CITY OFFICE:

56, MOORGATE STREET, E.C.

CALEDONIAN

INSURANCE COMPANY.

The Oldest Scottish Insurance Office.

LIFE ASSURANCE WITH AND WITHOUT MEDICAL EXAMINATION ON EXCEPTIONALLY LIBERAL TERMS.

Example of the Company's Threefold Option Investment Policy.

Entrant at age 26 may secure in return for an Annual Premium of only £30 the following benefits—

A. An Assurance of £1,000, payable if death occur before age 65;

B. An Endowment of £2,000 on attainment of age 65; or in lieu of B. one of the following options:

C. A paid-up Assurance of £2,800, commencing at age 65; or,

D. An Annuity after 65 of £106 : 11 : 8,* with a paid-up Assurance of £1,400 commencing at 65; or

E. An Annuity after 65 of £213 : 3 : 4,* without any paid-up Assurance.

* The Annuities quoted are for males, and are dependent on the present prices being still in force when age 65 is reached.

Fire Insurance at moderate rates and on good security.

Head Office: 19, GEORGE ST., EDINBURGH.

LONDON: 82, King William Street, E.C.;
14, Waterloo Place, Pall Mall, S.W.

The Investors' Review.

The Looming Conflict in China.

The Marquis of Salisbury made an eminently wise and sensible speech on Tuesday to the deputation that waited upon him with reference to the construction of railways and other matters in China. He did well to remind the nation that British progress has been a thing of private enterprise in the past, and his profession of faith in the power of British energy and resources to win against all enemies, in spite of adverse tariffs, was thoroughly opportune. Nevertheless, we fear events will be too many for his Lordship, and for any Government that may have the handling of British interests in China in the near future. And in spite of the desirability that British railway construction in China, as elsewhere, should be carried out by private enterprise and capital, it seems not improbable that the action of other Powers commercially hostile to us, and full of sullen resentment at our free trade prosperity, may gradually force us into active efforts at annexation in various parts of that empire. Russian aggression, as we may call it without question, in Northern China drove us to obtain the lease of Wei-Hai-Wei; German and French pretensions in Central and Southern China have hurried forward the occupation of those portions of the mainland of China opposite Hong-Kong, which have long been considered necessary to the safety of the island, and now the latest news from China, sent by the always well-informed

correspondent of the *Times* in Pekin, probably heralds the occupation by us of some point of vantage in the Yang-tse Valley. It is all very well for Lord Salisbury to say that we have not surrendered any of our rights in China under the existing Treaty of Tientsin and that we do not intend to surrender any of them. If, however, Russia and France, using Belgium as a cat's-paw and financial agent, proceed to the construction of a railway between Pekin and Hankau it is perfectly obvious that we shall have to assert our rights to the freedom of trade through Central China in a manner quite incompatible with pacific representations to the Chinese Government, or with the slow development of the empire by private capital. Private enterprise, in short, cannot hold its own against imperial "mailed fists." In a telegram dated the 14th inst. the *Times* correspondent says :—

> The British Government cannot be ignorant that the Peking-Hankau Railway as now being negotiated is not a commercial line, but is controlled by hostile political considerations and is destined to thwart British action in the Yang-tse Valley. The Belgian Minister is merely acting for the Russian and French Legations. China is thus deluded into giving the contract to Belgium as a small, unaggressive Power. She has hitherto repudiated all intention to place the railway so constructed within the power of Russia and France, but now the Tsung-li-Yamên officially admits that the three Legations have been acting conjointly.
>
> It becomes more and more imperative for England to define her sphere of interest in the Yang-tse region, and to insist upon the right of first refusal as to all railways there. If it is too late for her to veto the *pseudo* Belgian railway scheme, she must demand first refusal in case the contract be transferred.

The truth is that France, Germany, and above all Russia, have designs upon China totally antagonistic to our liberal trade policy. They are all exclusive traders, and they see China helpless, a derelict among nations, endowed with splendid natural resources, filled with a dense and most industrious population, and the sight is an irresistible temptation to them to enter in and take possession. By one pretext or another they will seize lines of communication and gradually block the way to the extension of British commerce. The question for us, therefore, is, shall we enter into this conflict and battle with the whole of our enemies at once, or shall we retire from the contest bit by bit protesting. Probably neither course will be actually adopted. It is much more likely that we shall take a middle line, not actively fighting these Powers at any point, but sturdily resisting their encroachments as long as we can. In doing this, as we have said, it may be necessary for us to seize, or lease, as the phrase is, more than one place in the Yang-tse Valley, and political considerations might even drive us into building that extremely difficult and costly line of railway between Burma and Western China. We hope, however, that much of this kind of counter aggression will not be forced upon us at present. Our hands are full enough, and, as Lord Salisbury said, we have quite as much territory already as we can govern ; he might have added, as we have the means to develop. Had our hands been less full elsewhere we might, in the interests of our Indian Empire as well as of our own commerce, have taken a more resolute attitude in regard to the partition of China now apparently imminent. As it is, the waiting game appears to be the only one really open to us—waiting and watching, and as we do so laying hold of such positions as may be available for us in the assertion of our undoubted rights, so as to be ready for the day when these militant appropriators and exclusive traders fall out amongst themselves, as they certainly will do.

Another thing we must be careful to do, since this attitude has been forced upon us, is to see that no British money is given to Belgium or Russia to help them to build their projected railways. Let France find the money if she can. If isolation in trade is to be the fashion with these military Continental Powers, let us practise isolation in the investment of our capital. There, at least, we are still strong above all these Powers put together, and if Russia and Germany do enter upon ambitious projects of railway building in China it is not at all improbable that we may yet buy their roads at bankrupt prices. We do not believe that exclusive trading, combined with the exhausting strain of universal military service, is going to win in the industrial struggle of the world ; nor do we believe that France is capable of finding the money for Russia to carry out her ambitious schemes all over the northern half of the Chinese Empire, nor yet France and Belgium together. Let none of our money, then, go there, except to further enterprises of our own, and they will not be long, any of these Powers or all of them, before they come to the end of their tether. In the meantime, it is consoling to notice that events are shaping more and more towards a gradual fusion of interests, and co-operation between the United States and ourselves in the Pacific. From this point of view it is excellent news to hear that the Germans are sending a squadron of observation to Manila, with a view perhaps to raise objections to the presence of the United States there as ruler by right of conquest. By all means let the Germans assume an attitude of protest there. In doing so they will more and more alienate the United States from Continental Europe and help to convince American statesmen that England alone, with her free, impartial and liberal commercial policy, can be their friend, can help them to obtain a share in the great trade which the development of China, now to be begun and by one means or another carried out, is sure to create.

The United States "War Revenue" Measures.

It does not seem to us that the United States Legislature has acted altogether wisely in the provisions it has made for paying the cost of the war with Spain. Details of the measure are not yet to hand, but we are able to gather from the outlines telegraphed from time to time, and from the observations in the American newspapers, that the Government is empowered to have recourse to borrowing much more than to prolific sources of new taxation. Sensibly enough, both Houses of Congress have recognised the futility of putting on more tariff duties. This is cheering, because a tacit recognition of the failure of the Dingley Tariff. In this respect, however, the legislators probably could not help themselves, for, without counting anything for the cost of war, the deficit produced mainly by this tariff in the current year's income may reach nearly £15,000,000. The Government of Washington, in short, has begun the war with an empty Treasury, and

already would have had to resort freely to the moneylender had it not possessed a considerable unspent balance remaining out of the last credit-sustaining loan raised by President Cleveland. In such circumstances, as the New York *Financial Chronicle* has pointed out in a wise and thoughtful criticism of the Government proposals, the true policy to have pursued was one of abundant taxation levied upon internal sources of revenue. These have lain almost untouched by the fiscal policy of the United States, which has prevailed since the time of the Civil War until now. The country meanwhile has advanced enormously in wealth and population; it therefore ought to have been a comparatively easy matter for the Government and Legislature to open out large sources of revenue in the form of internal taxes. At one point only were they barred; they could not impose an income tax in face of the decision of the Supreme Court in 1895 that such a tax is unconstitutional. Short of this, they might have done much in the way of stamp duties and legacy and succession duties, as well as in taxes upon the gross profits of corporations, to find the bulk of the war expenditure out of revenue.

In reality they have done very little, so little that we are disposed to doubt whether the resulting revenue will amount to the estimated $100,000,000. There is to be a duty of 10 cents per pound on tea, an article the consumption of which is still very moderate in the States, and a stamp tax is to be imposed on all speculative sales of stocks or produce, but how the character of the sales is to be determined we do not know. Further, an excise tax of one-fourth of 1 per cent. is to be imposed on the gross receipts of the Sugar Refining Corporations and on the Standard Oil Trust, when such gross receipts exceed a quarter of a million dollars per annum. The proposed tonnage duty has been abandoned, and what else there is to take its place we cannot say; but if these are all, or the main, new taxes imposed we believe they will prove to be as thoroughly inadequate as they are undoubtedly, at some points, vicious in principle. The singling out of two of the particular businesses conducted as monopolies and the striking at them with an infinitesimal tax of a vexatious character is a concession to the "populist" vote, but not in any sense a wise step. Such a tax may in itself be defensible enough, but it ought to have been imposed upon all corporations or on none. It might then have been graduated so that the larger ones paid a higher percentage than the smaller, but it ought not to have been imposed, nominally as a special punishment on two of the most conspicuously successful monopolies, in reality as a thing so light as to give occasion to the mocker. There was also an increase of the beer duty proposed, and we believe this proposal has been retained. There could be nothing to say against that, nor yet against a considerable increase in the duties upon alcoholic drinks of every description, or on tobacco. Assume that the additional tax on beer is prolific, and still we must come to the conclusion that no sufficient provision has been made in new taxation by Congress for the cost of the war, no provision at all commensurate with the capacity of the people to bear taxation.

But if the taxation imposed is insufficient, and therefore an indication of weak-kneedness on the part of the Government and Legislature, what is to be said of the concessions made to the silverites in the proposal to coin monthly $1,500,000 out of the silver in the Treasury? This measure cannot possibly do any good and it may do an infinity of harm. The silver already coined lies idle in the Treasury. At the end of April, the last date we have, there were 401,323,414 million coined dollars lying there, the public preferring notes. It is impossible to force this debased money into circulation: the people are not used to it, and would not have it even if they were accustomed to handle coin instead of paper, because they regard all the paper money in circulation, even the silver certificates, as payable in gold. To add to this coinage is only to embarrass the Treasury, and to open the door to an inflation of the paper money which has already gone far enough to produce dangerous confusion in the United States currency. There are, in addition to the silver, nearly $100,000,000 worth of bars also lying in the Treasury, purchased under the Sherman Act, and it is this bullion which the Government now propose to coin at the rate of $18,000,000 per annum. The question of seigniorage is stated to have been left in abeyance as long as this rate of coinage continues. It was unnecessary to say anything about it, because the mere fact of coining the metal into dollars stamps it with a fictitious value in the books of the Treasury nearly 100 per cent. in excess of the market value, and notes representing the nominal, not real, value of the metal can be issued. Thus in ten years' time, when the coinage of this bullion at the proposed rate is about completed, the United States Government will have converted about $100,000,000 worth of bars into, say, $175,000,000 worth of silver dollars, against which paper money may be forced into circulation.

We cannot imagine a greater folly than this, and that it should be perpetrated at a time like the present, when it is of vital importance to the States that their credit abroad should be maintained at the highest possible point, is nothing short of exasperating. What can they have been thinking of, these members of the House of Representatives, when they so far backed down to the Senate's demands as to adopt a scheme like this into the war Ways and Means Act? Its ultimate practical effect must be to force the United States back upon silver, the discredited metal, as their national standard. Should this new measure be carried out to its full limit as indicated by the bullion in the Treasury, and should the seigniorage or profit on the dollars already coined be also availed of to issue more paper money, the States must become a silver country whether the people like it or not, and may reach that low-grade credit standard only as a half-way step to becoming a forced paper country.

Meantime, all these provisions together will not go very far towards paying for the present war. As the *Chronicle* points out in the article already alluded to, the first year of the Civil War cost the Northern States $431,000,000, and in some respects the present war will be much more costly while it lasts. Everything has had to be got ready in feverish haste, and therefore at extravagant cost. Two expeditions on land will soon be at work, one in the Philippines and the other in Cuba, in addition to the two fleets. Money, therefore, has been and will be poured out like water, and had taxes to the amount of $400,000,000 of estimated yield been imposed the revenue would still have been insufficient to meet the outlay in the year 1898. This is recognised by the Government and another weak measure is the conse-

quence. Power is taken to raise new funded debt to the amount of $400,000,000, or, say, £80,000,000, and half of this is issued now in 3 per cent. bonds—not gold bonds, but bonds of the usual ambiguous type as to payment. No doubt the money will at once be forthcoming—indeed, banks and people are tumbling over each other after it—because American banks and large classes of the American people are at present flush of money, but when the second half of the loan comes to be offered, as it will have to be before many weeks are over, the nation's free resources may not be so abundant, and in order to fill the subscription, securities which can be sold abroad will then have to be offered in Europe so as to obtain the necessary funds. The provision for coining fresh silver money is not calculated to increase the appetite of European investors even for United States railroad gold bonds. Average minds are unable to distinguish between the risks these bonds carry and the risk of payment in silver attached to the debt of the Government. Mr. McKinley's administration has, therefore, allowed itself to be seriously handicapped by this new "coin" loan at several points. Had Congress authorised the raising of a gold loan, the whole of the money might have been found in Europe —in London—in twenty-four hours. Congress has not given this authorisation, and the money to pay for the war must be raised at home. Securities which can be marketed abroad will have to be exported, and they will come upon a bad market, created by the distrust originating in the subservience of Congress to the Silver Party in the Union. For the present, enthusiasm for the war in the United States will carry off the distrust this shilly-shallying policy is calculated to engender, and the weakness displayed by Congress in keeping taxes light, and in providing that posterity shall bear the brunt of this war, may excite little comment. But here, where we are not in the swirl of passions stirred up by the war, the effect of these measures will be immediate; and it will make itself visible on our stock markets, where the activity in "American rails," up to the present, has not been produced by the investments of British money in American railroad securities, but merely, as we have often explained, by the preparations of the market for such investments to come.

We are sorry to write in this strain, but there is no help for it. The Washington Government and Legislature have been weak, lamentably weak, in their fiscal provisions, before a great national crisis. A manlier course would have dictated a minimum of borrowing and heavy taxation, so that the men who sanctioned and made the war should have paid for it. An upright policy would have forbidden further truckling to the Silver Party; and we are perfectly sure that if Mr. McKinley had had the courage to demand legislation on these lines, and to declare emphatically that the war must be paid by taxation, and that he would not issue more bonds payable in cash without specifying the metal, the enthusiasm of the people would have so backed him up that both Senate and House of Representatives would have been compelled to do his bidding. As it is, when the war is over the people of the States will once more find themselves entangled in a whirlpool of currency blunders and fiscal ineptitudes, out of which they may well see no way of escape, except by repudiation of the hitherto acknowledged moral obligation to pay all Government debts in gold of a fixed standard.

Wonder-Working Argentine Finance.

According to summaries which have reached this country the message of the President of the Argentine Republic, delivered at the opening of Congress last month, contained two statements which seem irreconcilable. On the business of the year, as we might call it, the national income and expenditure showed a net deficit of about $9,160,000 gold; nevertheless, the accumulated deficits of previous years, which amounted to $52,273,318 paper, are said to have been "reduced to $39,000,000" at the end of the year. How this was done seems to be a mystery in Argentina itself, and it is doubly a mystery here. If the year 1897 ended in a considerable deficit one would naturally expect to see this deficit added to those accumulated in previous years. This does not seem to have been the case. It must have been subtracted and a good deal more besides, in order to arrive at the brilliant result disclosed in President Uriburu's essay. Or was it merely funded by the issue or sale of various descriptions of bonds of which the Federal Treasury appears to keep on hand a supply to be used in emergencies? We really cannot say until the detailed figures are before us, and even then perhaps the matter will not be clear.

One thing, however, is perfectly plain, the Argentine Republic is not now paying its way and has not paid its way any year since the bankruptcy of 1890. It has dodged and shuffled along—snatching up funds here and there, increasing the paper money, or neglecting to reduce it, grabbing bonds in the Treasury to be sold more or less surreptitiously, raising forced loans, taking shares in the National Bank into account as cash, and so on. Why this trouble should have been taken to seem solvent we cannot guess, except on one supposition. The Government is permanently anxious to resume once more the dangerous habit of coming to European markets for loans. Possibly it is unfair to ascribe this desire altogether to the initiative of the politicians; they may have been merely the tools and instruments of European financiers in adopting the policy conducive to this end. Undoubtedly they were tools and fools in resuming full payment of interest on the various bonds of the national debt when the Treasury was continually wrestling with deficits. It was, of course, hoped by these means to "restore confidence" in Europe, so as to permit large fresh funding loan operations to be entered into on the London, Paris, and other money markets.

And the motive of the financiers for dictating this course is as plain as a pikestaff. They have had to nurse Argentine deficits for nine years now, and in the process have incurred very considerable engagements which they cannot hope to liquidate except by means of money drawn from the investor. Argentina itself will never repay them. Its rulers would, doubtless, be quite prepared to hand them paper to any amount, but paper does not liquidate debts; it only swells them, and if hard cash has to be given continually by the nursing financiers in exchange for this paper, the day does at last arrive when their resources are used up. They become bankrupt and the Government they have been coddling with them. This is the inevitable finale ahead of the Argentine Government and its backers at the present moment, unless the public in Europe with money in its pockets can be persuaded to exchange its cash for the mountains of paper now

piled up in the safes of enterprising banks and finance-houses who have kept Argentina going as an apparently solvent State. At present we see no prospect of the public becoming easily persuaded to do this. To put matters straight, we estimate that about £10,000,000 as a minimum is required, and to enable Argentina to maintain a solvent aspect before the world for another eight or nine years, provision ought to be made for borrowing at least £15,000,000 net in London or elsewhere.

To dribble out a loan of hers in small amounts might be possible, but any attempt to raise even £5,000,000 at once would probably meet with very scanty success. We believe the last loan of the neighbouring Republic of Uruguay still remains mostly in the hands of the financiers who created it, and, therefore, these same financiers have to continue to keep Uruguayan credit on its legs. That is a comparatively light enterprise, but to keep Argentina going and to hold a large loan, unplaced, at the same time that continual fresh advances had to be made, might prove a task too great for the strength of the houses implicated. For our part, we should be glad if it did prove too much. These nursing financiers are a curse of nations. They entice them into debt, and wind obligations about them till they become corrupt and paralysed. Could we only bring about the bankruptcy and complete extinction of a few of these malodorous and heartless financiers many a country would get a little breathing time. Apart from this side of its affairs, the Argentine Republic is making considerable progress in many directions, but it can never be sure of holding that progress while corruption sits atop, forging new fetters faster than the strength of the community can grow up to be equal even to bearing the old.

Collapse of the Wheat Corner.

The collapse of the Leiter wheat corner was inevitable sooner or later. Corners never have succeeded, probably never will, and certainly never should. As a chain is only as strong as its weakest link, so a combination in wheat, or anything else, against the public interest, can only be as strong as the weakest conspirator who joins the combination. A few weeks ago young Mr. Leiter was supposed to have realised a profit of at least five million dollars. His losses, however, have swallowed up his gains, and on Monday his options were hastily closed. Instead of his five million dollars profit, Mr. Leiter only escapes the mortification of an assignment in bankruptcy by placing his cash wheat in the hands of trustees. There seems little doubt that one of the causes of the crash was that at least one member of the combination holding wheat in the North-West had broken faith and was trying to save himself at the expense of his co-conspirators. It is also understood that Mr. Leiter's father had refused to back him longer, thus forcing him to sell his holdings, which he did on Monday, throwing on the Chicago market alone between eight and ten million bushels, mostly for September. This caused a fall of 11 cents in the market and completed the ruin of Mr. Leiter. In a letter which he published a few weeks ago defending his action in connection with this wheat corner, Mr. Leiter said: "All I have done was to back my own judgment." Experience has now shown him that he rested on a broken reed. He has helped to force up the price of wheat to a purely fancy height, thoroughly demoralised the markets, and in encouraging reckless speculation among others has indirectly brought ruin on them as well as himself. Some failures have already taken place here in consequence of the wheat gamble, and probably more may follow, though we are not disposed to think that the evil effects of the collapse on this side the Atlantic will be very serious.

It would be more curious than useful to enter upon an inquiry as to the causes of young Mr. Leiter's failure to accomplish what more mature heads than his have attempted and failed in. They are inherent in all such vicious enterprises. His failure is not a matter of regret to anybody, nor a matter of surprise to any one who has carefully considered the rise and fall of previous corners. But, though there may have been treachery on the part of some of his fellow-conspirators, the main cause of failure lay in Mr. Leiter's own conduct. He held on too long, became latterly too reckless, trusting more to mere chance than to reasonable probability. It is said that, if he had remained satisfied with his May commitments, and retired from the struggle then, he might have retired with very handsome fortune. Perhaps so; but his was case in which "appetite grows with what it feeds on." Having been successful in May, he straightway proceeded to bind himself with June commitments. He began laying the foundations for a corner in July wheat. The war scare had greatly helped him—to his ruin. While his cornering operations had secured an advance on May quotations to $1.09¼, the war panic rapidly drove the quotation for May delivery up to $1.50 per bushel, a figure not reached during the previous twenty years. So he went on committing himself hopelessly for June, July, and September futures. He tied himself hand and foot—he could not extricate himself. He could not see, probably did not consider, that the war scare would only be temporary, and by the time that the glowing reports about the growing crops began to be received, he had so committed himself that he could only wait and hope for a miracle. He was caught in his own trap. The reports as to the coming crops improved; the influence of the war scare vanished; supplies of wheat unlooked for by poor Mr. Leiter or his friends came pouring in, not only from the States, but from Canada, from India, from Argentina, and even from Russia. It was impossible long to ward off the inevitable fall. English farmers and dealers struggled against it; Mr. Leiter went on "manipulating" prices with, for a time, a superficial show of success. But you cannot go on struggling against natural forces; the longer the conflict the more sure and the greater must be your discomfiture. This is what Mr. Leiter has found. He loses all he possessed, and a good deal more. How his creditors may fare will depend very much upon how far the senior Mr. Leiter may be willing to come to his assistance. But it must go very hard with many banks and other firms who have been "in the swim;" and the harder it is, the better it will be, if the lesson of the utter futility of such foolishly ambitious enterprises is to be driven home as it ought to be. But unfortunately fools are not taught by experience, and wise men "fight shy" of corners—especially wheat corners.

It is too soon yet to estimate the effect likely to be produced by the collapse on the English markets. Its worst effects will probably be felt in Liverpool, where

on Tuesday there was a serious panic, and wheat fell over a shilling per cental. But there was a slight rally before the close, and it may be that the decline has touched bottom. Undoubtedly, however, this Leiter collapse will accentuate the downward tendency which has been prevalent in the English markets for the last fortnight or three weeks. At Spalding, for example, on Tuesday, there was a fall of 4s. per quarter on the top of another fall of 3s. on the previous Tuesday. Wheat which a fortnight ago would have commanded 46s. to 48s., or perhaps 50s., may now be had for from 38s. to 40s. Hard Manitoba is offered for September as low as 31s., while white Indian, May-June, is offered at 36s. 6d. Even at these prices buyers hold aloof. But then this is a time of some excitement, and a good deal of uncertainty. Though dealers generally feel relieved at the collapse of the Leiter corner, which, as one expressed it, had been hanging over the trade "like a great black cloud," there still remains an element of uncertainty which will tend to make sellers as well as buyers cautious, at least for a time. Three or four weeks ago wheat was being offered —and not pressed—at 55s. and 56s. per quarter. If any merchants or farmers, as bereft of ordinary common sense and insight as was Mr. Leiter, then bought stocks as a speculation, they must now be serious losers, if they be not completely undone. But we doubt if such speculators were numerous, and we are inclined to think that the decline in the price of wheat will not go much further at present. And what about the price of bread? Why are bakers so slow in moving downward? If wheat is not likely to decline much further at present, there is certainly not the slightest possibility of its going up. Whatever Leiter's folly may be made an excuse for, it cannot be put forward as an excuse for the continuance of dear bread.

Legal Aspects of the Workmen's Compensation Act.

On July 1 all contracts whereby a workman relinquishes any right to compensation from his employer for personal injuries arising out of and in the course of his employment shall terminate under conditions specified in the Act. The liability imposed by the Act is exceedingly wide, for the employer will be liable to compensate his workman for all injuries caused in the course of the employment. How the accident happened appears to be quite immaterial, and in three cases only does the master seem to be exempted from his liability, viz., where the injury was due to the serious and wilful misconduct of the workman himself, where the accident in question did not arise in the course of the employment, or where such employment was not within the meaning of the Act. However, there will be no liability for trivial injuries, as the employer will not have to pay compensation unless the injury disables the workman from earning full wages for at least two weeks.

Now, what is the employment to which this Act applies, and upon which the workman must be engaged to enable him to recover under the new enactment? Section 7 applies the Act to employment by the "undertakers" on, in, or about a railway, factory, mine, quarry, or engineering work, to employment on, in, or about any building exceeding thirty feet in height, being constructed or repaired by means of scaffolding, or being demolished, or on any building upon which machinery driven by steam, water, or other mechanical power is being used for its construction, repair, or demolition. Thus, a building being pulled down which is above thirty feet, although no scaffolding or machinery is being used, it is submitted, will be within the Act, though when such building has been brought within the thirty feet limit, the employment would cease so to be.

Having thus stated what employment is within this Statute, one must shortly consider how these words are defined in themselves which make up the definition. The "undertaker" in the case of a railway is the company, but where factories, quarries, or laundries are concerned, it means the occupier within the meaning of the Factory Acts; and in the case of a mine the owner within the Mines Acts, 1872 and 1887. However, if it is an engineering work, or a building, the person liable is the one who undertakes the construction or repair. In the same section, railways, factories, mines, and quarries are defined, and the same meaning is to be given to those words as they bear in the Acts regulating their use and working.

Although by no means exhaustive, the foregoing will show the enormous number of industrial concerns which will come within the field and range of this enactment, but before leaving this part of the subject it is worth while shortly considering what the compensation payable will amount to. Where total or partial incapacity arises, a weekly payment not exceeding 50 per cent. of the average weekly earnings, but in any case not exceeding £1 a week, is to be made, and as there is no limitation in the Act this may have to be continued during the whole of the injured man's life. In the case of death there are three scales. Where there are dependants wholly dependent upon the deceased, the amount payable is between £300 and £150, according to the rate of wages, but any weekly payments which have been made may be deducted. If, however, they are only partially dependent, then the amount is to be fixed by arbitration, but may not exceed the above limits. Where no one is left, then the medical and funeral expenses of the deceased need only be paid, but they must not exceed £10. This is practically the legal liability created by the new Act, but it will only furnish the workman with an alternative and extended remedy, for his rights at Common Law and under the Employer's Liability Act of 1880 will only be slightly affected, if at all. Next week we hope to treat shortly with the limited power of contracting out conferred by this Act, the schemes thereunder, and the powers of the arbitrator in the case of disputes.

Economic and Financial Notes and Correspondence.

The Approach of Political Chaos in France.

So "Le Père la Ruine" has gone at last. He was a well-meaning man, M. Méline, but weak, and therefore he deserves ill of his country. Subservient to each class interest in turn, he has pleased none, and ended by exciting general distrust, not to say contempt—contempt much more than hatred. The agriculturists despise and blame him because his violent protectionism has still

further sterilised their industry instead of causing it to expand and become more profitable. The military faction mocks at him, and plotted his overthrow, because he meekly allowed it to put its foot on his neck, and saw him bid justice defiance at its bidding. To the clerical host he has ceased to be a *persona grata* because he had not the strength of will or of character boldly to set up a despotism and proclaim himself dictator by the grace of an unpatriotic ultramontane Church. Socialists have most cause of all to bless him, for he has done more by enacting measures calculated to grind the faces of the poor, to propagate their doctrines of anarchy and revolution than any Minister France has had since the restoration of the Republic. Yet they will be as ready as the rest to revile him. Alone among the numerous interests and parties he has tried to serve and appease, the anti-Semites may have a good word for him, because he was with them at the last and to the last. In obedience to them he has driven many of the Jews out of Paris, and by so doing has rendered life more difficult for the "native Frenchman" domiciled there. Miserable indeed is the lot of a politician who has to stoop so low as this in order to hold on to the semblance of power. Because he has thus fallen, because he has all through his tenure of office been the conscientious lacquey in other men's hands, M. Méline goes back to his obscurity unlamented, unblest.

But what is to happen in France now that this weak, amiable man of good feeling and no fixed political principles has gone? His helpless subserviency to reactionary factions has resulted in bringing into existence a House of Representatives which is nothing but a cock-pit of factions. We do not see how it will be possible for M. Ribot, M. Bourgeois, or any mere constructor of Ministries to get together, and keep together, a working majority out of such unfusable materials. If Republicans of all shades outside the purely Socialist-Anarchist were to coalesce and support a Ministry devoted to healing the wounds the nation has suffered through the raids made upon its substance and liberties by the protectionists of all types, there might be hope that peace and contentment would be in some measure restored to the nation. But there is no prospect of any such self-denying union being accomplished. What we may look for rather is a greater activity than ever in the intrigues of cliques, groups, and emissaries of reaction. No sooner will one combination be formed than all the factions excluded from it will set to work to stir up discord within it or to form still other combinations with the view to the overthrow of the one for the moment in power. Amid the clash and dust of Party conflicts the interests of the nation will be lost sight of, and what is even more lamentable, the opportunity to place before the country a policy of enlightened reform and civil and industrial emancipation will be denied to every Ministry that may be set up. The teachings of reason and the demands of justice will be smothered in the babel of contending partisans intent on yelling each other down. A dissolution, which seems unavoidable, and the election of a fresh Chamber gives, for this reason, small prospect of the evolution of a majority inspired by a nobler political ideal. We fear the future is lowering and stormy for France, and sad are we to think so.

The Prospects of the Money Market.

As far as is visible at present our money market has entered upon a period of calm which may last for two or three months. At no point is it seriously threatened, bearing in mind the help it receives from the new gold continually pouring in from Africa, Australia, India, and other places. Whatever requirements Japan may have the power to make effective can be met out of the open market. Russia has lately betrayed a tendency to take gold, but this cannot, we should think, develop much energy, unless fresh Russian loans are floated on the Continent. Her trade position does not give her command of our bullion market. Austrian buying has ceased and it is by no means improbable that a large hoard accumulated by the Imperial Government in Vienna may be exported again. The political troubles of the empire undoubtedly tend that way, and the wealth of the country is not great enough to admit of its retainiug the gold, except by costly artificial means. No other European country can take the metal from us, and there is nothing to be feared from the small demands which might arise from Egypt or South America. To get our gold most countries that want it would have to borrow the means to buy it.

This is becoming true even of the United States, whose people have, so far as we are concerned at the present time, cancelled a considerable portion of Europe's indebtedness to them for cereals by the purchase of their railroad securities. At the same time, when serious danger does next arise to our market it is probable that it will come from this quarter, because the expenses of the war with Spain will involve the selling back to Europe of large amounts of these same securities. We do not think that the new Government loan will be subscribed, or held, to any extent here, whatever finance houses may do, and do reasonably enough; but it may become necessary for the Union to raise money in Europe, to enable its own people to subscribe for this and other loans, by the sale of other stocks for which we can afford a market. Also the collapse of the great "corner" in wheat might produce a large temporary indebtedness on the part of Europe to the States, some of which would be paid in gold. From this quarter, however, we do not expect much immediate demand, and therefore think that our money market will remain more or less stagnant for the summer months. Beyond that it is quite useless to attempt to prophesy. All we can hope for is calmness, without confidence.

The Petroleum Question.

Whatever may be the decision of the Parliamentary Committee now professing to investigate this subject, we trust the public will not let it rest until a thorough and common-sense reform is brought about. And we even make an appeal to the insurance companies. They ought not to sit silent and supine at a time when a question of such vital importance to millions of people, and of no small consequence to their own bankers' balances also, is under discussion. Except the *Star* and, we think, the *Chronicle*, none of the London papers have done much to stir up public opinion on this subject, and we actually have to go to the United States for the facts most intimately bearing upon it. For example, in the latest circular by Mr. George Rice, of Marietta, Ohio, which has reached us, we find extracts from a report of the London County Council issued in January last that we do not happen to have seen published by or commented upon in the leading London newspapers. According to this, the London fires caused by petroleum lamp accidents in the five years ended with 1897 amounted to 12½ per cent. of the total number of fires; but 30 per cent. of the lives lost by fires during the same period came from this cause. And these figures do not represent the entire truth, for the report goes on to say that only seventy-eight deaths from lamp accidents were during the past three years reported by the Fire Brigade, whereas 115 such deaths came to the knowledge of the chief of the department from various sources, and the report adds:—

> It is also necessary to point out that, in addition to these reported accidents, there are numerous small fires of daily occurrence which do not come to the knowledge of the Fire Brigade. Many of these small fires had, however, come to the knowledge of the fire insurance companies, and I understand that the claims made in respect of these small fires, unreported by the Fire Brigade, outnumber the reported cases; and that, of these unreported small fires, more than 50 per cent. are caused by petroleum lamp accidents. There are also unquestionably a very large number of petroleum lamp accidents which are not in any way recorded.

No wonder that in such circumstances the County Council should advocate compulsory measures to prevent this wholesale destruction of human life. What these measures are Mr. Rice indicates with great precision in the remaining portion of his circular. To be

sure, this gentleman has his knife into the Standard Oil Trust always, and his main purpose always is to smash that Trust, and to expose its abominations. He is, however, perfectly justified in this retaliatory warfare, for the Trust has done its utmost to crush and ruin him. And the fact that this is his attitude does not lessen the value of his testimony or of his recommendations in regard to good burning oils, because he is probably the most experienced refiner of oil in the world; certainly, in the United States no man bears a higher character in this capacity than he does. What, then, does he recommend? Oils, he states, should be sold by weight. This would tend to insure quality and would overcome those extraordinary shortages which occur on sale by measure. A good burning oil should not be of less weight than 795 degrees specific gravity, or 46 degrees Beaumé; and should be prime white in colour or better. The fire test should not be less than 150 degrees, nor the flash test less than 120 degrees—tested by the Abel or Tagliabue Close Cap. This would insure safety and decrease insurance rates.

But it may be said that fineness of this description would greatly increase the cost of the oil to the consumer. Mr. Rice answers that it only costs three-eighths of a cent a gallon, that is, less than one half-penny, to refine illuminating oils, and less than this to manufacture the high price grades, owing to less cost of labour, fuel, and acids. This cost of manufacture added to the cost of crude (1⅛ cents a gallon), with a quarter of a cent pipeage to refineries, makes the total cost of a gallon of oil in its manufactured state 1¾ cents, *i.e.*, less than a penny. The public, he says, has paid to the Standard Oil Monopoly hundreds of millions of dollars for oil in excess of the natural price, to the extent of the rebates allowed by the railroads to the Trust. This is true, but we are not concerned just now with that aspect of the question. If Mr. Rice's estimates are to be trusted, and we think they are, there can be no reason whatever, apart from that furnished by the greed of a corrupt monopoly, why safe oils of the high standard demanded should not be sold at prices which would make them accessible to the poorest. As a matter of fact, the Scotch oils now, which are refined to a flash standard of 105 degrees, and therefore practically as safe as water, can be had at prices which compete with the crude explosive stuff thrust upon the community by the American monopolist corporation. It is time that this sort of thing should be put an end to, and if the Government will not move, the people must take the law into its own hands and refuse absolutely to accept these dangerous oils from the retailer. Were this systematically done there would be a speedy end to the criminal waste of property and life which now goes on unchecked. We call upon the fire insurance corporations to aid in bringing about this reform. It is their interest to do so, unless they are so rich that they do not care what they lose.

We cannot do better than quote the following from yesterday's *Star*, which, if it correctly describes the drift of Mr. Collings's draft report, should lead to immediate action on the part of those who are more anxious to save lives than to harass English traders :—

> We have reason to believe that great stress is laid in Mr. Collings's draft report submitted to the Petroleum Committee on the damage which the raising of the flash-point would inflict upon those trades which use petroleum in manufacturing processes. No such injury can possibly result, for the simple reason that all these trades, without exception, use petroleum spirit (*under* 73 deg. flash-point), which would be entirely unaffected by legislation directed to raising the flash-point of petroleum oil, all of which has a flash-point of 73 deg. or higher. Petroleum spirit is still obtainable for trade processes, although it is far below the existing flash-point of 73 deg.; it would be equally procurable if the flash-point were fixed at 105 deg. Raising the flash-point would only affect lamp oil, and especially the lamp oil of the Standard Oil Trust. We admit that a law regulating lamps would harass English traders, but that is what the *Times* says Mr. Jesse Collings proposes to substitute for flash-point reform.

The Electric Lighting Debate.

With its usual absence of knowledge, Parliament gave the London electric lighting companies a good drubbing on Tuesday last. The opposition raised on their behalf to the Bill authorising the Bermondsey and Marylebone Vestries to lay down mains and supply energy in their districts was treated by the House as a flagrant attempt to set up a monopoly. Now, amongst temperate supporters of the lighting companies there has been no desire to create such a monopoly, and a due regard has been paid to the competitive tendencies of the Electric Lighting Acts. But after all there is such a thing as justice, and it is indubitably unfair to allow the vestries, after private enterprise has borne the burden and toil of creating a business and demonstrating its paying character, to step in and harass the joint stock concerns. Let competition between one joint stock company and another be fostered if the public so desire, for these compete on the same footing. The companies are all leaseholders and therefore have the same liability to prepare for the end of their concession. But the vestry is virtually a freeholder, and so ought always to be able to work cheaper, quite apart from the other economies at its command, in the shape of low interest charges, lighter cost of installation, and cheaper administration. It is all very well to hark back to the Act of 1888, but it should be remembered that one important change has been effected since that Act was passed, which we believe modifies the position to a very important extent. After urgent representations, local bodies have obtained the right to spread the repayment of loans created in order to supply the electric light over a much longer period than is usually allowed. This concession in itself is a great relief to the local bodies, especially at the start, when expenses are heavy and revenue is light, and must be considered a direct incentive for them to compete with companies working in their districts. If conditions have been altered in this respect, surely the electric lighting companies are justified in asking for an alteration on the other side that shall prevent private enterprise being placed entirely at the mercy of public authorities.

Absolutism in Austria.

Count Thun has been no more successful than his predecessor in reconciling the crazy Nationalists on the language question. The Reichsrath, after a few noisy sittings, has been again adjourned by Imperial decree. Of course, the Emperor had no choice in the matter; it may be regarded as almost fortunate that such an exceptional clause existed in the constitution as enabled him to substitute absolutism for anarchy. For the jarrings and warrings of the rival Nationalists rendered the Reichsrath worse than useless—it made it ridiculous. The adjournment was therefore inevitable; but what of the future? This adjournment by Imperial decree cannot be kept up for ever, yet who can now hope for anything from the reassembling of the Reichsrath? The *Ausgleich* was not so much as mentioned in the Imperial Parliament while it remained in session, and undoubtedly this delay in adopting the working arrangement between Austria and Hungary is weakening the ties that bind the two countries together. It is indeed doubtful whether, if the Emperor Francis Joseph were to die during the present crisis, Hungary would not at once declare her independence. She is becoming accustomed to the notion, and not only is the *Ausgleich* in virtual abeyance, but the Austrian and Hungarian deputations have not been able to agree as to the proportion of the respective contributions of the two countries towards the common expenditure. The friction between the two is steadily increasing. The disintegration of Austria may therefore almost be said to have begun.

The leaders of the Austrian-German party openly declare their intention to seek reincorporation with the Fatherland. Of course the notion is officially scouted in Germany, and we have no doubt it is really distasteful to the German Government at present, but no one can tell what changes of view a continuance of this racial agitation may develop. Many dangers threaten Austria; but until this senseless quarrel between Germans and Slavs is arranged—and of that there is no present hope—

Austria can do nothing to ward them off, or to solidify her domestic or international position. As to trade and commerce, progress in these is impossible while the Empire is distracted over the discussion of nice linguistic points of divergence which mediæval schoolmen would scarcely have considered worth exercising their ingenuity upon. But while these modern schoolmen quarrel and squabble over trifles, the country grows leaner and weaker, until there are suspicions that some of Austria's neighbours are beginning, at least in imagination, to peg out claims in portions of her territory which may conceivably be useful to their posterity. Democracy can play queer cantrips at times. The suspension of the Reichsrath only gives the Government a short lull. If they cannot come to terms with the rival Nationalists there seems nothing for it but to continue the reign of absolutism. Would that satisfy the Germans?

The Meaning of Seigniorage.

The matter of the seigniorage on silver in the United States is not generally understood, or perhaps it would be better to say that the total in question is not generally recognised. The Act of July 14, 1890, known as the Sherman Silver Purchase Act, and since repealed only as respects the purchasing section, requires the Secretary of the Treasury to purchase silver bullion to the aggregate amount of 4,500,000 oz., or so much thereof as might be offered, in each month, at the market price, not exceeding $1 for 371¼ grs. of pure silver, and to issue in payment Treasury notes, redeemable in coin, and a legal tender in payment of all debts, public and private, except where otherwise expressly stipulated in the contract, and receivable for all dues, and when so received, reissuable. The Act required that the Secretary should coin each month 2,000,000 oz. of the bullion so purchased until July 1, 1891, and after that date to coin so much as might be necessary to provide for the redemption of the Treasury notes, and "any gain on seigniorage arising from such coinage shall be accounted for and paid into the Treasury." On May 1 there were in the Treasury 109,355,514 oz., of the coinage value of $141,363,089, the seigniorage being $42,488,427. There have been coined from 59,319,168·53 oz. of silver 76,639,157 standard silver dollars, on which the seigniorage is $19,645,376. Up to May 13 last, there had been redeemed $53,536,722 of Treasury notes issued in purchase of bullion, there were in the Treasury 5,427,059 standard silver dollars available for the redemption of an equal amount of Treasury notes, and there were outstanding such notes to the extent of $102,394,280. The Treasury notes are payable in coin, at the option of the Secretary of the Treasury, but, in order not to discredit silver, the cheaper money, the Secretary has redeemed them in gold, when so demanded. Thus these notes operate the same as greenbacks to deplete the Treasury of its gold, and are so many links in that endless chain against which President Cleveland so strongly protested. While the silver certificates issued against the seigniorage are redeemable in silver, they increase by the sum of $42,000,000 the amount of currency which the Treasury is compelled to keep as good as gold, although intrinsically of inferior value.

Compounding Founders' Shares.

Another electric lighting company—the Metropolitan—has compounded with the holders of its founders' shares. On the whole we do not think the terms agreed upon were satisfactory, and fear that for some time to come this company will suffer from the enormous amount of new capital injected into it by the operation. It is not as if the founders' shares had even received a dividend, for they were only to share after 7 per cent. had been distributed upon the ordinary shares, and so far the highest dividend received by these latter has been 6 per cent. No doubt, however, exists that better dividends will be paid shortly, perhaps even this year, and since these wretched founders' shares form an irremovable part of the capital, the board was perhaps wise in proposing a composition.

But the terms proposed seem to be excessively favourable to the holders of founders' shares. These are to have the right to subscribe for 225 £10 ordinary shares at par for every one founders' share held, and as there are 100 founders' shares the arrangement involves the issue of £225,000 more capital. This represents just two-fifths of the present capital, and although hard cash is a good thing, it may be difficult for the company to find profitable employment for the huge sum thus thrown at its head. Of course, when its useful employment is accomplished the burden taken up by the company will be a little less troublesome, but we do not believe that the operation can ever prove profitable to the present ordinary shareholder.

The cash thus supplied by the "converting founders" could very well have been raised piecemeal by debenture issues as wanted, but supposing it to be worth 4 per cent. to the company—a high figure when such debentures can be issued at 3½ per cent.—the relief per annum to the fixed charges of the company would be £9,000. Deducting this amount from the balance due to the founders if 10 per cent. were declared upon the new capital of £225,000, we get a sum of £13,500 paid to them as pure bonus on account of their founders' rights. If the same dividend were declared upon the present capital the amount payable to the founders would be £9,310. If the dividend were 12 per cent. the new shares would receive £18,000 after deduction of £9,000 for interest, while the founders under their original rights would have obtained only £15,200.

In no circumstance can we imagine the ordinary shareholder benefiting by this liberality to the founder, and we do not think much of the suggestion that these privileged shareholders could have interfered with the financial working of the company. That, to a great extent, is under the control of the Board of Trade auditors, who would prevent any undue division of profits, as it is their especial duty to see that the *corpus* of the undertaking is well maintained. As things have gone, the company has to face increased competition loaded with this incubus of fresh share capital, and it will have a hard struggle to improve upon recent dividends. Of course the founders will not care very much about this, for they can net a comfortable bonus by selling the new shares in the market.

Japan's Gold Standard.

It is freely stated that Japan will use some portion of the indemnity money now in London for the rehabilitation of its gold standard. This may or may not be true, but it is pretty certain that if something heroic is not done the country will soon be depleted of the whole stock of its gold. It will be remembered that a gold standard was adopted in Japan as from October 1 last, and 62,000,000 yen of new gold coins were minted, this quantity being thought ample for the use of the people and for the proper carrying on of a foreign trade in which an excess of imports over exports had already become chronic. We have received the official returns to April 1, and they show that down to that time the country had shipped abroad no less than 39,063,000 yen in gold, or nearly two-thirds of its whole new gold currency, and, in addition to this, it has exported some 20,000,000 of silver yen, which were withdrawn from circulation for the purpose of being reminted into subsidiary coins. The latter, probably, shows more forcibly than the former the real position of the finances of the country, because if the Government had not found its gold supply inadequate, it would not have parted with these silver coins, which were intended for recoinage to replace to some extent the large number of small paper notes now in circulation.

The paper money in circulation is of the nominal value of between 350,000,000 and 400,000,000 yen, and the Government's notion in issuing this relatively vast

quantity appears to have been extremely hazy. In their desire to carry out the ambitious programme of naval and military extension inaugurated after the war, the authorities have so recklessly used these paper yen that the rates of labour and prices of commodities have increased two or even three fold, till the common people find themselves so flush of this spurious currency that nothing but foreign food and foreign products will satisfy them—for which the country has to pay in solid cash. It is in this way that the imports are increased, while the price of labour is so high that the Japanese cannot employ it profitably in manufacturing, as hitherto, in the production of goods for export, and, as a consequence, this side is going down steadily month by month. In April imports reached the large total of 25,809,751 yen, whereas the exports only amounted to 10,947,502 yen, being an excess of imports over exports of 14,862,249 yen. The excess of exports over the imports of coin and bullion amounted to 14,481,137 yen, leaving a balance unpaid for of only 381,102 yen. Meanwhile the foreign loan hangs fire. It has already been decided that the land will stand no further taxation, and one or two small loans have been decided upon on the security of productive works. But the financial condition of the country is worse than ever.

The Niger Settlement.

We are glad that it has arrived, but never doubted its arrival. The idea of two nations like England and France going to war about a wretched bit of territory, or a "town" or two, in Africa, was too absurd to bear serious discussion. As far as the semi-official and other reports go, the settlement seems to have been arrived at by the usual way of making mutual concessions; and really, where neither country had any very lofty right to the territory in dispute this was the only sensible course to take. We have no sympathy at all with those who are nagging already at Lord Salisbury for "giving way," and it does not appear to us that anything beyond reason has been conceded to the French. They had a right to the free navigation of the Lower Niger under the Treaty of Berlin. It was our Royal Niger Company which tried to bar their way here, and its action doubtless provoked the French to attempt retaliations up country. The right to navigate necessarily implies the right to have stations on the river. It was therefore proper to make this concession also to them. Equally proper was it to allow them to retain Niki as a sort of half-way post between their coast territory of Dahomey and the upper regions of the river where they have undisputed sway. Altogether, we are glad that the settlement has been made, and sincerely congratulate the Marquis of Salisbury on the common sense which has distinguished, as far as we can judge, his treatment of this small question—small, but irritating as the sting of the mosquito.

The Position of New Zealand.

We have come across, in the *Wairarapa Times*, a very sensible article on the finances of this colony which we summarise and commend to the study of colonists in general. After pointing out that the excess of New Zealand exports over imports have gradually decreased, so that instead of amounting to £3,955,714 as in 1889-90 —the year ending on September 30—it has fallen to £1,852,097 last year, the writer goes on to indicate how this decline bears upon the country's prosperity. In the year ended September 30 last, he says New Zealand exported £9,626,936 worth of goods, and if it had had no external debt and been self-contained this would have been so much gain to the country. Imports, however, were valued at £7,774,839, and when these were paid for there was still a balance of £1,852,000 left to the good. This looks very well until we remember that, as the writer puts it, the colonists have to find annually a sum not far short of £3,250,000 to pay interest on their public debt and private obligations to the outside moneylender, Mr. John Bull. Adding this amount, which we think under rather than over the mark, to the value of the exports the apparent surplus is turned into a deficiency of nearly £1,400,000. How, the writer asks, was this money obtained? The only way was by borrowing, and that is exactly how the transaction was completed.

Confronted by a hard fact of this description, the folly of the Seddon Government in boasting of closing the year with a "surplus" becomes conspicuous enough, and the writer of this article shows that it is a hollow pretence, this surplus, even on the Budget exhibit. Any fool can make a parade of prosperity when borrowed money is available for him to do so with, and New Zealand behaves like a splendid fool in this respect. Not only is the country steadily going backwards, because getting deeper in debt, but it seems to be misled in a most shameless manner by those in charge of its public affairs. The railway "surplus," we are told, does not exist; it is produced by charging to "unauthorised" outlay and on capital account items that any joint stock company would have met out of the revenue. The apparent profit is thus most fictitious and the system of book-keeping which enables it to be shown is simply scandalous.

By borrowing and borrowing, on this pretext and the other, labour can be employed, and of course the money disbursed in wages goes to swell the import totals, as the people who receive the wages must live. But when the days of borrowing are over what will the position of the settlement be? That is the true question which all colonists have to ponder, and we need not again press home the answer. They may, however, just consider one point. Leaving out of account altogether the principal of the debt, treating it as something which never will be paid and which nobody ever intends to pay, could New Zealand, on the existing basis of its trade, population, and industrial development, meet the mere interest burdens upon its various debts for twelve months without any assistance from the foreign moneylenders? It could not. The immediate consequence of a cessation of the loan-raising policy which Seddon and his colleagues have lived and flourished by in their ingenious, but also in their shameless, manner would be the bankruptcy of the State and the ruin of the community for a generation to come. Or might it not be the community's salvation? The way it now pursues is the way of inanition and death.

The "Sharpshooter" Gunboat.

We quote the following from an obscure corner of Tuesday's *Daily News* and should like very much to know where this useless vessel was built. Who was responsible for her? She is only about four years old and already, apparently, is in such a bad way that the only thing to do with her is to either sell her for old iron or take her to pieces and build her over again. How many vessels of this description are we getting into the Navy under the present demoniacal haste to have the greatest number of ships in the world, no matter of what quality? The taxpayers have to find the money for these failures, and Parliament is just as helpless as a congregation of field mice to prevent them from being swindled by having foisted into the fleet abortions such as this. Can the Press do nothing to expose, and, by putting to shame bunglers and worse, to stop this kind of thing? Somebody appears to want hanging. "A question or two in the House?" Nay, that would not do any good; the House only knows how to vote away money, and cares nothing for the position of those who pay it. "Waste and come to want" seems to be the modern political motto:—

Her Majesty's torpedo-gunboat *Sharpshooter*, which has been a source of so much trouble and expense ever since she was first commissioned, has been surveyed at Devonport, and it is found that she is generally in a very bad state. It was known that her machinery, as a result of her continuous running on instructional duties, was defective, but it is now discovered that her hull, magazine, and other compartments need such extensive repairs to fit her for further service that it is doubtful if she is worth the expense that would be involved. It was intended that she should take part in the forthcoming naval manœuvres, but there is now no possibility of

her doing so, for even if it is decided to keep her in commission she cannot be got ready for sea until September next at the earliest.

The Rock Life Insurance Company.

A fortnight ago, in dealing with the figures of this company, we expressed some doubt as to the meaning of certain entries in its balance-sheet. Since then we have been trying to get some light on this subject, and will now state the facts as far as we have ascertained them. It appears that originally this company had a share capital consisting of 200,000 shares, on which 10s. per share was called up. This still appears in the balance-sheet as a paid-up capital of £100,000. For many years, however, thanks to a proviso in its constitution and to the prosperity of its business, the company was able to pay dividends of 7s. or 8s. per share, as we are informed, and the consequence was that the price of those shares rose to £7 and upwards. This by itself might not have mattered very much. It is the tendency of life insurance companies to make large profits on small emissions of capital if they are successful at all; but some time ago the company obtained power to invest in its own shares, and we believe it has bought back half these shares at a price something like £7 10s. apiece. Hence the entry in the balance-sheet of "subscription capital stock," which amounts to £1,059,000, including the paid-up capital of £100,000. That is to say, £950,000 of this sum represents the book value of the shares bought in.

At present these shares are not worth much more than £4 10s., and there has consequently been much loss upon them as an investment. Part of this loss has been written off, but the shares still stand in the balance-sheet of the company at about £546,000, which we estimate to be about £80,000 above what they are worth taken at their actual market value. As far as we can see, no provision whatever has been made for this depreciation. Why did the auditors allow an item of this kind to escape their notice when they signed the balance-sheet? They give no certificate at all, but that does not exempt them from a charge of carelessness which might become of serious import to the insured if anything went wrong with the company. And it is not a particularly prosperous company, because its constitution handicaps it. Under that constitution one-third of the net profits goes to the proprietors. This is a very serious preventive, indeed, to the obtaining of new business, because it necessarily reduces the amount of bonus which can be given to the policy holders. As the ratio of expenses to premium income is also fairly high, it follows that the company makes little or no progress, and the best thing that could happen to it would be amalgamation with a more vigorous concern, upon lines which would deliver its business from the burden of dead capital and of shareholders' claims it now has to carry and meet. The shareholders, in fact, ought to sell the business for what it is worth and divide the proceeds as far as these can be claimed to represent a return of capital.

West Australian Timber.

The subjoined letter, coming from Banbury, West Australia, may serve as a useful warning to investors against listening too readily to the blandishments of the touter for West Australian timber companies :—

To the Editor.

Sir,—You will be doing only a simple act of justice if you warn investors in Britain against putting their money into timber workings here when the concern is so overloaded with capital as are those lately floated in England to work Karri and Jarrah. The business is a sound one fairly treated, but it will not carry such capital as £250,000 and £300,000, as is usual in these companies. Like the gold mines of Coolgardie, which were similarly overloaded, it will only lose the money invested. Africa has paid big prices lately for timber, and hence the present prosperity, but competition is bringing these down, and then ruin. I say £50,000 is ample capital for a mill, and £40,000 of that should be working capital, and then the thing is sound; over this amount merely fattens speculators.

Karri and Jarrah.

Excursion in the Congo State.

Mr. Consul Pickersgill takes a sanguine view of the future of the Congo Independent State; for in his report just presented to the Foreign Office he declares his conviction that the time is fast approaching when Cook's tourists may be personally conducted from Angola to Stanley Falls without wild adventures. The anticipation is hardly consistent with his own experience. There may be no wild adventures, it is true, but there seems to be considerable abundance and variety of malarial fevers, from which few escape and very many die. It is estimated that of every ten whites who become officers of the State, nine are either buried or invalided within three years, while it is calculated that the employés of the largest Belgian trading company, who number 120, only maintain an average service of seven months out of the twenty-four for which they contract. Even in the absence of "wild adventures," these facts are not likely to encourage an inroad of tourists. Though there must be considerable trade done in the Congo State, Mr. Pickersgill says comparatively little about that, but devotes a large portion of his space to a consideration of how the white invasion has affected the black aborigines. Equatorial Africa is certainly not a white man's country; without the assistance of the blacks he would have to give up the country altogether. We doubt if there would be much loss if he did so, and left the fever-stricken land to its original inhabitants. But the Belgians seem determined to stick to it; and they have taken the "civilisation" of the black in hand with a persistency which may, on the whole, be commended, though some of their methods do not seem to be particularly wise. There is too much drilling and more martinetism than there need be; but withal the blacks thrive. There is no active discontent apparent. They are well fed, and more wealthy than they could have been before they became habituated to regular work as porters or labourers in the factories. Their womenkind get more "finery," but it would also seem that they are neglecting more and more the cultivation of their little plots of ground. Their villages are being deserted, and if factories increase in number, the natives will doubtless cluster more and more round these in their small huts. The liquor traffic is very vigorously restricted; and there is every indication that the supply of black labour will be well kept up. If the Government looks sharply after the blacks, they look equally carefully after the taxes. Everything has to pay official toll. "Nothing," say the missionaries, "is free except the fevers," and they have a way of asserting their freedom which not even bureaucrats can withstand.

THE BRUSSELS BOURSE.

The migration of a large section of the open stock market of Paris to Brussels attaches a new interest to the Bourse of that city. We, therefore, extract some particulars about its constitution from our interesting and valuable French contemporary *Le Moniteur des Tirages Financiers* of the 9th instant. The Brussels Bourse, it states, is a free market held in a building owned by the municipality of the city. All that is required from those who desire to act as brokers or *Agents de Change* in this building is a payment of 240 francs to the City Treasury for each principal in a firm, and of 120 francs for each employé of such firm or individual broker. Further, the applicant for admission has to satisfy the Commission of the Bourse that he has never been declared a defaulter and has never suffered any condemnation.

It is not, our contemporary adds, the intention of the immigrants from Paris to enter into competition with the Belgian brokers. They have subscribed a fund of one hundred million francs in order to conduct on a solid basis of capital precisely the same business which they have been accustomed to do in Paris, and they will not deal in specially Belgian securities. Under these limitations we can well believe that "the welcome accorded" to four delegates sent by the *Coulisse* to arrange matters in Brussels "has been particularly warm." The municipality has seen in them "the advent of the goose with the golden eggs. A hundred millions of francs! It is enormous." And it is not all. Sundry Berlin firms, almost equally harassed by the new German laws for the regulation of operations on the Bourse, also contemplate a like transfer of their business to this free market. As London is ready to enter into close relations with these houses it follows that Brussels is on the way to become a great international stock mart.

MR. HOOLEY "IN 'ERCLES VEIN."

Yes, he means to clean out the Augean stable of City Press corruption, not by turning rivers into it, but by playing upon it with the search light of Truth. He has vowed the vow, and behold it recorded in the pages of the *Daily Telegraph* of Friday and Monday last. Here are his words, as taken down by the faithful reporter. Read and tremble, ye bribed ones and blackmailers! We rejoice, but also with trembling, lest the valiant financier's courage should at the last moment fail. Indeed, we have grounds for doubting his "pluck," for he has given no reply to the offer we at once made to him to publish at our own risk whatever fully established and authenticated particulars of bribery and blackmailing he could furnish. We made this offer a week ago, and shall give him still a week to think over it.

"Ask me any questions you like," said Mr. Hooley. "Never mind how straight they are."

"Well, Mr. Hooley, the public would, I think, wish to know to what causes you attribute your present position."

"It is principally due to actions for which I am really not responsible, and the depreciation of the value of cycle securities generally. But first of all, let me say I am not insolvent. I have £400,000 to the good if the estate be properly realised. I have half a million of freeholds."

* * *

"The estate will principally be freeholds—houses, lands, and cattle. There are Risley Hall, Derbyshire, 1,000 acres; this one at Papworth, Cambridgeshire, where I farm 1,000 acres; then 14,000 acres in Wiltshire; 3,500 acres in Essex, which I purchased of Lady Warwick; 8,000 acres in Scotland; 300 acres in the Isle of Wight, next to Osborne; and 1,000 houses in the Midlands, in the Nottingham district."

* * *

"I have not a penny piece in the world."

* * *

"I have gone on paying blackmail until I am sick of it. As soon as I am ready with my statement I am going to give a list of all the people I have paid blackmail to, with the several amounts so paid. A certain class of newspapers have gone for me; they have turned round upon me lately. So I went to the Official Receiver and I turned over everything to him. I made no settlement on my wife for her benefit, nor have I made any for the benefit of our seven children."

* * *

"I made £3,000,000 in hard cash. But I did not make these three millions for myself. There were a lot of people standing in with me; but all these men deserted me when I wanted their support at the finish.

"The chief reason why I filed my petition is to put myself right with the public. When all the papers that have drawn thousands of pounds out of me turned against me I could never have brought out another company. I now intend to show how I promoted companies, how much I paid, and to whom I paid the money, and I am confident I shall receive more sympathy and good than I have yet done. You quite see that I could never bring another company out when they (the papers) were all going for me, don't you?"

* * *

"It has been said of you that you did not manage companies; you only bought and sold them?"

"That is so. I don't say that I can manage a business. I have never said so. I am a dealer—a born dealer. I never worked the businesses at all."

"And having bought a business and sold a business——"

"I had nothing further to do with it. Why should I?"

"Well, what about the man who may have taken shares on the strength of your name?"

"Well, he was a fool," said Mr. Hooley curtly. "That is the truth." He continued: "If I acquire a business for a million, and divide it into debentures, preference, and ordinary shares, and so cut it up for the public, and sell it piece-meal, I am entitled to my profit, am I not? Supposing I buy a business for a million and sell it for £1,100,000, is that too much?"

"Then you do not consider that the public have a right to look to you for the ultimate success of the business you sell to them?"

"Not at all," was the candid reply. "But none of my companies are rotten. Every one is a good going business."

"You do not know what period may elapse before you can put a statement before your creditors?"

"No, I do not; but every effort will be made to get it ready as speedily as possible. I am now working at it myself, and I hope to have the assistance of my solicitor at the end of the week; but he is so pressed with work and inquiries on all sides, and there are such numbers of matters to investigate, and such an enormous amount of detail to go through, that he tells me that it is quite impossible to fix any precise time in which the statement should be forthcoming. I may say I do not consider I have any private debts."

"Will there be a large number of creditors?"

"I should not think there will be fifty."

"And not one of these fifty creditors belongs to the 'widow and the orphan' class—the small investors?"

"Oh, dear no. You see, I have been the man to make the contracts. I have divided the profits with other people, and I have got left in the cart, with all the actions. It is very hard on me. I could name a man who has made through me in gold—not in shares—£797,000, and another who has made £500,000. There are plenty of men who made £100,000 apiece; and some of the solicitors I have employed have made big fortunes out of me alone. I won't say much about this, because probably there will be further investigation in regard to them. I think it fair to add that this remark does not apply to Messrs. Beyfus & Beyfus. In fact, as I told Mr. Beyfus only a few months ago, if he had been acting for me from the first I should have had a million of money in the bank instead of being in this position."

* * *

Reiterating his policy, Mr. Hooley said:—"There was a run upon me. I have paid off £150,000 liabilities in five months. If a man is to devote his life to fighting lawsuits he had better get his position ascertained at once. If I remained in business six months longer they would leave nothing for the Official Receiver. I am going to put myself right with the public before I start again, and when they have heard all, they will see that I have been victimised, and will say, 'That fellow has been badly treated.' Just look at what I have recently experienced. There was an attack made upon me in connection with the Beeston Pneumatic Tyre Company. I volunteered to give evidence, with the result that the Judge found that there was not the slightest imputation against me; but this meant my having to devote many hours with the eminent counsel I employed, not to speak of the large fees I had to pay them. Then, again, a few weeks ago I had a claim for very heavy damages, in connection with which, on the eve of the trial, I was asked for £25,000, and £500 costs. Mr. Beyfus told me I should win, and I did win, without paying a penny; but there again I had heavy responsibility, and what is of far more consequence, the worry and trouble incidental to the litigation. And so it would be to the end. Why, I have had a so-called respectable paper come to me at half-past eleven at night with proofs of two articles—the one would cost me £1,000, and the other nothing, and I was to choose which of the two should appear in the morning. No, nothing will frighten me. I have been offered £10,000 a year to work for a syndicate—composed of the very men who have been pressing me. This business of mine is going to cause a hubbub, I fancy."

So much for the first interview. The threats it contained made a bit of a sensation, as well they might, and the *Telegraph* reporter sought Mr. Hooley a second time. He found him busy, with four secretaries classifying the people and papers he meant to expose, dealing with and replying to "4,000 letters" he had received, many of them containing money he was sending back, and altogether in first-rate fighting condition. Here is the concluding portion of the cross-examination that followed:—

"And you will not shorten your black list in any one particular?"

"No; I am so satisfied that the step I have taken will put me right with the public that nothing would prevent my going through with it. I have four secretaries at work in getting at the details of all money I have paid in blackmail during the last three years; and, by the way, let me add that I am perfectly satisfied, after the interview I had with Mr. Brougham, the Official Receiver, that he will investigate to the utmost each separate case. And, incidentally, I may state that I have seen in the papers that Mr. Wreford has been mentioned as a suitable trustee on account of his former connection with the Bankruptcy Court. I may say that I know nothing about this nomination."

"Mr. Hooley, can you explain this? I have heard people say that a weak point in your explanation is that you consented at all to pay what you call blackmail."

"Well, show me any company promoter who does not. There is not one in the City who does not have to submit to the system. They make you pay according to the profit you are receiving. The profit is very well known. According to his profits so the promoter has to pay the blackmailer."

"Then it is a system of sharing profits which is in vogue?"

"With this difference. Though the promoter may make a loss, the blackmailer gets his cash down in advance. I am referring to the gutter Press."

"You did not pay blackmail that these papers should disseminate lies to mislead the public, did you?"

"No; that they should not tell lies about me. I venture to say most emphatically that, however genuine the company, if these men were not paid they would make an attack upon it. Let me give you an instance. I remember to have seen once an advertisement in a leading daily paper to this effect: 'Before investing in —— Company, read such and such a newspaper, on such a date.' The company referred to was mine. In the interval I paid what was asked as blackmail, and the result was that when the paper appeared it contained a favourable article, instead of the damning one which the public had been led to expect. I should like you to quite understand that the money for the majority of industrial companies does not come from London. We are all inclined to think that London is the place that supplies their capital; but it is nothing of the kind. The bulk comes from the provinces, and if you get an attack made upon you in the London Press, it is certain to be copied into fifty provincial journals, not perhaps of the highest class."

"But you have your remedy against unjustifiable attacks—libels—in the law courts?"

"A company promoter cannot always be in court, although he may win every time. And there is a way of damaging a thing while still keeping within the four corners of the law. These men know it well. But I may say I never paid one penny in blackmail to the provincial Press. I think I ought to state that all the blackmailing papers are confined to London. They are not to be found in the provinces. But I want to confine myself to these remarks. As to my private affairs, I do not wish to add anything to what I have already told the public until my statement is before my creditors."

"So, finally, Mr. Hooley, I take it that your correspondence shows how anxious the public is that the blackmailing system should be exposed?"

"Yes. I only wish a powerful paper would take up the matter. Why should not the Government appoint a commission to investigate it? They have done so in regard to moneylending. I can assure you that if they did so in respect of blackmailing in business, what I have already indicated would be as nothing compared with the revelations that would then be made.

"By the way," added Mr. Hooley, as we closed the conversation before strolling in the well-kept park to the trim cricket-ground and meadows where the cattle were grazing, in which the fallen financier takes such keen delight, "I want to say one word more."

"Yes."

"I shall take it as a favour if the *Daily Telegraph* would permit me to say with what pain I have read the references to the gift made by me to St. Paul's Cathedral. When I offered it I was fully justified in so doing. My means thoroughly warranted it, and I think it perfectly disgusting that any question should be now raised in regard to it. These people may just as well call into question the thousands of pounds I have given in charity and for public objects."

Critical Index to New Investments.

UNITED STATES GOVERNMENT LOAN.

Messrs. Seligman Bros., the fiscal agents for the State Department of the United States of America, are prepared to receive and transmit free of charge applications for the war loan of £40,000,000 at par, New York. The bonds bear 3 per cent. interest and are redeemable in coin after ten years, and are repayable August 1, 1918. This is, of course, not an "issue" on this side, but the offer is made to oblige the many Americans resident in this country, or others who may wish to possess some of the bonds.

THE BRAZILIAN FUNDING SCHEME.

The arrangement for permitting Brazil to make default in the most respectable way possible is now made public. For three years, from July 1 next to June 30, 1901, the interest on the whole of the foreign debt, and the amounts payable annually for railway guarantees will be discharged in 5 per cent. funding bonds, and for this purpose Messrs. N. M. Rothschild & Sons are authorised to issue £10,000,000 of such bonds. For the purpose of future reference we append the loans to be included in the scheme:—The 4½ per cent. loan of 1883, the 4½ per cent. loan of 1888, the 4 per cent. loan of 1889, the 5 per cent. loan of 1895, the Western of Minas Railroad Company 5 per cent. guaranteed loan of 1893, and the internal 4½ per cent. gold loan of 1879. The unfortunate railways who are to have their guarantees paid in funding bonds are set forth in an advertisement in another page. Full advantage is to be, of course, taken to escape from the sinking funds and redemption, and not for thirteen years will they be resumed. The new bonds are to be secured on the Rio de Janeiro Customs revenues, and, if these are insufficient, on the other ports of the Union. These for 1897 at a sevenpenny exchange were £2,683,333, and the total of the Union at the same exchange was £7,116,666.

On and after January 1, 1899, and *pari passu* with the issue of funding bonds, the Government will deposit in Rio de Janeiro in trust with the London and River Plate Bank, the London and Brazilian Bank, and the Brazilianische Bank für Deutschland, the equivalent of the said bonds in current paper money at the exchange of 18d., and the paper money equivalent to the bonds issued from July 1 to December 31, 1898, will be deposited in the same manner during a period of three years commencing January 1, 1899. The paper money deposited will either be withdrawn from circulation and destroyed, or (if and when the exchange is favourable) will be applied in the purchase of bills on London in favour of Messrs. N. M. Rothschild & Sons, to be placed to the credit of a fund towards the future payment in gold of the interest on the loans and railway guarantees. The funding bonds will be free from all Brazilian taxes. Thus again is British capital treated contemptuously by a South American Republic, but we deserve our fate for trusting money in such a quarter.

SMITH, GARRETT, & CO., LIMITED.

Williams Deacon and Manchester and Salford Bank offer £83,170 3¾ per cent. perpetual mortgage debenture stock, being part of a total of £400,000, of which £216,830 has been already issued. Subscription price, 105 per cent.; interest due April and October. The stock is a first mortgage on the undertaking; profits last year were £56,387; and the assets in the last balance-sheet, including £97,000 uncalled capital, amounted to £837,137. Safe, but expensive, the yield being only £3 11s. 4d. per cent.

HALL & WOODHOUSE, LIMITED.

This company takes over the brewery business carried on by Messrs. Hall & Woodhouse at Blandford and Ansty, in Dorset, together with the neighbouring business of Messrs. Godwin Bros., of the Durweston Brewery. Ansty Brewery was established in 1777, and the Blandford Brewery was acquired fifteen years ago, and there are now 115 licensed houses attached to the concern. Share capital is £100,000, which, with £100,000 in cash, is taken by the vendors. The public are invited to subscribe at par for £100,000 4 per cent. first mortgage debenture stock, redeemable from July 1, 1918, at 108 per cent. Breweries, plant, &c., are valued at £188,476, though the Ansty property appears to be only leasehold, while the profits of the two have grown steadily from £7,571 in 1892 to £11,003 in 1897. Taking the three last years, the average is £10,784, which, with £2,500 estimated profits from the Durweston business, will give a total of £13,284, or more than sufficient to pay the debenture interest three times over. Apart from the fact that the issue exceeds in amount the share capital, the debenture stock seems, as brewery things go, safe, and a fair investment.

COBOURG, NORTHUMBERLAND, AND PACIFIC RAILWAY COMPANY.

Issue of £151,200 5 per cent. perpetual first mortgage debentures of £100 each at 102 per cent. They are a first charge on the railway now being constructed from the Port of Cobourg on Lake Ontario to a junction with the Ontario and Quebec section of the Canadian Pacific at the Central Ontario Junction, only forty-nine miles in length, at the rate of £3,086 per mile. The C. P. leases and works the line as part of its system for 999 years, providing rolling stock and equipment and paying rates and taxes, and pays the C. N. and P. Co. 40 per cent. of gross earnings without deduction whatever. Municipal corporations on the route have subscribed a bonus towards construction of the line of £19,238, and with the same object the Canadian Government has given a free grant of £32,261. The line will be largely used for the carriage of coal required by the Canadian Pacific Railway and various industries. It will be shipped from the Pennsylvania fields to Port Charlotte, Lake Ontario, and transferred in barges to the C. N. & P. Railway, thus saving over 100 miles. An estimate is made that the net amount receivable from the C. P. Company will be £13,132, or nearly double the amount required to pay the interest on the debentures. This may have an effect on the Grand Trunk Company's coal traffic, but it cannot prove a serious matter. Estimates of traffic are not often fulfilled, especially by these small lines, and the debentures offered do not seem at all attractive. If the line is to be so profitable, why did not the Canadian Pacific Company build it itself?

BRITISH WALL PAPER COMPANY, LIMITED.

Five firms are to be amalgamated, Mitchell, Arnott, & Co., Limited, of Lancashire, Dublin, and Belfast; W. G. Wilkins & Co., Limited, of Derby; Walker, Carver, & Co., Limited, of Pendleton; David Walker, of Middleton; and the Heywood Paper Staining Company. The land, buildings, machinery, designs, and general stores are valued at £132,343, while stock-in-trade is put at £40,657, and trade marks and goodwill at £65,877, which makes up the purchase price of £238,878, and of this the vendors are content to take £159,253 in cash. All there is to learn about profits is that for the two years ending August, 1897, which is nearly a year ago, they averaged annually £18,456, before deducting interest and directors' salaries. Share capital is £300,000 in £5 shares, half ordinary and half 6 per cent. cumulative preference, with an issue of £100,000 4½ per cent. debenture stock, redeemable after September 1, 1908, at par, or before then at 5 premium. The preference shares and debenture stock are offered at par, and 15,925 of the ordinary are taken by the vendors in part payment. The interest of the prospectus would have been increased had a list of the discounts allowed of late years been given. As it is, we think little of the security for the debenture stock, and do not see any for the preference shares. Without running much risk of losing a promising investment we should let this go by.

ELECTRO-CHEMICAL COMPANY, LIMITED.

This company has a share capital of £200,000, of which £130,000 has been issued as preference shares and paid up. It was formed in 1894, and claims to have been the first to work on an extensive scale the electrolytic decomposition of salt, for the manufacture of caustic soda, bleach, chlorate of potash, and other chlorine products, for the use of paper makers and others. The company now offer at par £28,500 6 per cent. first mortgage debentures, being balance of £40,000, the remaining £11,500 having been allotted to directors and shareholders. They are redeemable at any time at 105, or at par on July 1, 1910. Farebrother, Ellis, & Co. value the property and works at £73,100, but this does not tell much. The point is

that although the works have been in operation for two years the company is unable to show any profits. They may be in course of incubation, but, so far, prospects do not seem encouraging. The trustees for the debenture holders should be independent of the board of directors.

VICTORIA STREET PROPERTIES, LIMITED.

A number of sets of flats, offices, &c., known as Albert Mansions, Victoria-street, Westminster, are to be acquired. They are leasehold, and have seventy-one to eighty-seven years to run at a ground rent of £5,000, and have been valued at £128,000. The share capital is £100,000 in £5 shares, in equal parts of ordinary and 5 per cent. cumulative preference shares. Applications are now invited for an issue of £87,500 4½ per cent. first mortgage debentures at par, part of a total of £120,000. They are redeemable at par by sinking fund before the expiration of the respective leases. Purchase price is not stated, but vendors take £80,000 of the share capital, and it is said that of the debenture issue £7,500 will be working capital, so it may be assumed the cash price is put at the substantial figure of another £80,000. Rents will increase when the unoccupied places are let, but at present the actual rentals are only £7,205, to meet £9,000 for ground rent and interest, to say nothing of expenses, so this can hardly be looked on as a first-class investment.

THE GILL McDOWELL JARRAH COMPANY, LIMITED.

With a capital of £250,000 in £1 shares, equally divided into ordinary and 6 per cent. cumulative preference, of which 83,334 shares of each class are offered for subscription, this venture is brought out to buy a varied assortment of forest estates, timber yard, railway rolling stock, live stock, saw mills, &c. The purchase price is £116,668 in cash and £83,332 in shares, which says much for the sovereigns in preference to the shares. Before long we anticipate that competition will eat considerably into the profits of these Jarrah wood undertakings. For some time past there has been an exceptionally good demand for this wood, and upon the strength of this companies are being formed with capitals three or four times their proper size.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Edward & John Burke, Limited.—The profits of this prosperous concern have been declining of late, and the dividend of 7½ per cent. declared for the year ended April 30 last compares with 8 per cent. for 1896-7, and 9 per cent. for the three years preceding. The profits in the past twelve months were so disappointing that the board had to transgress the canons of good financial management by declaring the final dividend at a less rate than the interim distribution. The amount forward was also reduced by £5,657 to the still substantial total of £15,978. Under these circumstances it might be good policy on the part of the directors to increase the information afforded in the report. As it is, there is no shadow of a profit and loss account, the only payments stated beyond interest and dividends being income-tax and managing director's salary, directors' fees and trustees' fees. The text is no more communicative, the only remark being that "the directors have pleasure in submitting their annual report and balance-sheet," a statement which we should even question so far as "pleasure" is concerned. Still the balance-sheet is a good one, for only £24,396 is owing to trade and other creditors, which is offset by sundry debtors amounting to £26,455. Then come £13,751 of bills receivable, £56,448 of cash, and no less than £120,562 in investments, held principally on account of the reserve of £100,000.

Pestarena United Gold Mining.—The hope of a dividend by the long-suffering stock-holders of this concern has been disappointed by the requirements of the property. Although a profit of £9,707 was claimed after debenture interest had been met, the arrangements for providing adequate machinery to a newly developed mine upon the property had to be taken into account. The directors, therefore, intend to pay off the outstanding £6,750 of debentures, with their bonus of 20 per cent., equal together to £8,100, and issue new debentures to the amount of £15,000, bearing interest at 6½ per cent., and repayable at 105 per cent. by annual instalments of not more than £2,500 a year. The charge will thus be £3,550 per annum, which should leave a fair margin for dividends if profits keep up, but depreciation ought also to be taken into account, a matter apparently unheeded.

Attaree Khat Tea Company.—Another sufferer by the Indian earthquake, this company has come through the ordeal with rather an effort. The crop of 852,250 lb. was 75,750 lb. below the estimate, but only 22,000 lb. below that of last year. The average price of 8¼d. per lb. obtained was, however, 1d. per pound less, so that profits only came to £2,678, as against £4,823 for 1896. The directors wisely reduced their dividend to 5 per cent. as compared with 8 per cent. a year ago, and carried forward £4,113, or only £706 less. As it is, the balance-sheet shows that the board has placed the upkeep of the area under immature plants to capital, which is a vicious principle that, if carried out extensively, will tend to injure the tea industry permanently.

Anglo-Chilian Nitrate and Railway Company.—In spite of the lower tariff, the railway receipts of this company were well maintained, and as working expenses were lower, the net profit on this account last year was £68,359, as against £59,344 in 1896. Trading profits in regard to nitrate and iodine only came to £4,430, as compared with £13,986 in 1896 and £55,638 in 1895. Indeed, this part of the business must have been carried on at a loss if fair deduction were made for depreciation, and it is to be hoped that the railway maintenance is not being starved in order to make profits look better. As it was, after meeting administrative charges, mortgage, and other interest, and £12,500 for "commutation of five-sevenths of the commission payable under the consignment contracts of 1890," the net balance was £20,705. The sum of £12,360 was brought forward, which gave £33,065 available for distribution, and permitted of a dividend of 14s. per share upon the preferred shares, and the carrying forward of £8,565. The Oficina Peregrina was completed last year, and its trial working proved eminently satisfactory. The undertaking is burdened with heavy interest charges, and its balance-sheet is none too satisfactory, but improvement has been effected of late, and it is to be hoped that if the nitrate and iodine profits increase, care will be taken to clear off the unsatisfactory items.

Asbestos and Asbestic Company.—There is a strong Bryant & May flavour about this company, but its start cannot be said to have been propitious. Although the large sum of £446,647 was paid for the undertaking, no less than £37,108 had to be spent last year in new buildings, plant, and other equipment. In doing this it has pretty well used up all its spare resources, for the assets outside the undertaking, less outstanding liabilities, are really very little. On the thirteen months' working, the directors claim that a profit of £2,180 has been earned after setting aside £3,541 for depreciation, but no profit and loss account is supplied, and the affair is very much mixed up with two American companies, which may mean that its finances are peculiar. The promises set forth in the prospectus of course have not been fulfilled, and the company has not been able even to supply contract quantities to the H. W. Johns Company alluded to in the prospectus. The intention of working the mill by water power had to be abandoned, and part of the outlay on capital account was occasioned by the installation of additional plant and machinery to be worked by steam. All this looks as if the board went into the undertaking with very little knowledge about the affair, and the only gleam of comfort is that they will issue a circular in October stating the results of the working of the current half-year.

Frank Jones Brewing Company.—The brewing business in the United States is something altogether different to the brewing trade here. This large company, in spite of efforts in years gone by to increase its sale, has to confess to a diminishing trade. The sales of ale and porter in the last few years have been as follows :—

1893	274,537 barrels.	1896	234,251 barrels.
1894	250,071 „	1897	222,883 „
1895	286,016 „		

Thus, with the exception of 1895, when a peculiar and temporary spurt took place, the sales have steadily declined, and the net trade profits have also diminished, having been £81,016 for 1894 and £50,960 for 1897. The last total only permitted debenture and preference interest to be met, by drawing £3,211 from the balance forward, so that the ordinary shareholders promise to fare badly indeed. Last May the price of beer was reduced $1 per barrel, and since September it is said that sales have steadily increased, but the United States Government is proposing to increase the beer duty by $1 per barrel to $2 per barrel, and this impost will surely affect the trade to a certain extent. The board of this company has done much to improve the balance-sheet, but we are afraid that the over-capitalisation at the start will prove too much for them, and cause the concern to sink into the ooze of disrepute.

St. John del Rey Mining Company.—This company is doing much better, and the returns of gold per month seem lately to have attained an altogether improved position. There is, however, a difficulty looming ahead in the shape of a threatened shortage of water. The rainfall last wet season was only forty-seven inches against an average for the three preceding years of seventy inches. The manager, therefore, fears that during some of the months of the dry season there will be insufficient water for the needs of the mine. To lessen this danger, new engines have been sent out, and arrangements will be made for the water from the Cubango Rego to be brought down to the mine. With 82,761 tons crushed, the yield was 51,101 oz. of gold, and after meeting working expenses, duty and tax on gold, and London charges, the net profit for the year was £53,238. Bond interest took £19,763, and dividends equal to 1s. per share were declared, requiring £22,787, thus leaving £10,688. This sum has been written off establishment and interest charges during construction, the total amount written off to date being £21,134, reducing their total to £41,767. The money so set free, together with £21,295, the amount of bonds converted into shares, has enabled the directors to reduce the bond and debenture indebtedness of the company from £215,000 to £170,000. It still, however, entails a heavy charge, for over £18,000 was paid in interest last year upon the £190,000 of debt, while a Bank loan of £20,000 also exists. If profits improve, every effort should be made to improve the finances, and then the interest charge might be reduced.

Waihi Gold Mining Company.—This company has prospered during the past year, but we do not fancy that the best advantage

is being taken of these higher profits. In the year £144,345 was obtained in the shape of gold, and expenses amounted to £62,023, leaving a net profit of £82,322, to which had to be added £22,751 brought forward. The sum of £3,000 was placed to depreciation, and £11,618 to reserve, and £64,000 was distributed in four dividends of 2s. each, or 40 per cent. on the capital. The balance forward of £20,162 was then £2,580 less than that brought in. To replace the money spent on capital account in opening up the mine, and completing the works at the Victoria Mill, the capital was doubled by the creation of 160,000 new shares of £1 each, which were taken by the shareholders at par. This will put the company in good funds, but we doubt whether the old rate of dividend can be distributed, for that would mean £128,000 per annum, and profits, although they have lately increased, have not increased enough to allow this. Besides, we consider the company does not lay by sufficient out of profits. To increase development and stamping power is only to hasten the decay of the property, and the allowance for depreciation ought therefore to be increased.

The Antofagasta (Chili) and Bolivia Railway Company, Limited.—The report of the directors of this company for the year to December 31 last reads well. Gross traffic receipts were down a little as compared with those of 1896, being $5,389,602, as against $,5439.153; still the company was able, by the help of the net receipts from the waterworks, and of its proportion of the money received from the Chilian Government as payment of compensation for loss during the civil war, to show a net revenue of £186,418, as compared with £184,581 in 1896. It therefore paid the charges on the debenture stock, and the 6 per cent. dividend on capital stock, together with all administration charges, and had £14,718 over to be handed to the Huanchaca Company in reduction of the amount advanced by it in past years to meet the stock dividend. This is much more satisfactory than the agitation started some time ago in Paris, in the interests of Huanchaca shareholders, would have led us to expect. The only drawback appears to be that traffic receipts are still falling off somewhat, perhaps because of a reduction in the business of the Huanchaca mine. That property, however, only provided 43·37 per cent. of the entire traffic last year, so that the basis of the company's business is steadily broadening, and the directors state that the latest report from the Huanchaca mine announces a large output of payable ore from its western workings, so that its portion of traffic should not shrink much more. There is nothing whatever, in short, in the facts as here presented to justify any disturbance in existing arrangements between the railway and the mining company, nor is there anything to induce Antofagasta stockholders to throw away their stock at low prices at the instigation of French "bears." The accounts seem to be straightforward, and give no indication that a floating debt of any description is being piled up, while the company now owes only £73,700 to the Huanchaca Company on account of advances. If there is anything wrong we cannot discover it in the published accounts or report. But we have no reason to believe that anything is wrong.

Alliance Marine and General Assurance Company, Limited.—In the year ended December 31 last the profit made on the underwriting account was £43,325. Adding various other balances, including interest on investments, the amount available at credit of profit and loss was £72,427, out of which a dividend of 30s. and a bonus of 10s., making 40s. per share, or 8 per cent., has been declared, of which 30s. is payable on the first proximo.

The Colonial Mutual Life Assurance Society, Limited, reports that 2,777 policies, insuring £784,870 were accepted last year, yielding an annual revenue of £27,253. Claims have matured by death under 296 policies, on 276 lives, amounting to £102,206, including bonuses. A sum of £40,332 has been paid for endowments matured under 180 policies. By the death of annuitants under eight policies, the society has been relieved of the payment of £378 per annum. The total funds of the society show an increase of £112,369 13s. 1d., and now amount to £2,153,342. The rate of interest yielded by the funds (after deduction of amount to credit of investment fluctuation fund) has been £4 4s. per cent. No further particulars are before us.

The Scottish Amicable Life Assurance Society.—In the year ended December 31 last this company issued 735 new policies, insuring about £516,000, of which £41,000 was reinsured. The total income amounted to £456,377, of which £236,420 came from premiums and £148,440 from interest, &c., while £71,431 was capital received against annuities sold. Claims took £226,146 less than the expected amount, and expenses and commission absorbed £32,977, or 13·95 per cent. of the premium income. As result, therefore, the society's funds were increased by £157,994 in the course of the year, and now amount to £3,830,932. Out of this comfortable total about £1,744,000 is invested abroad, and rather heavily invested, in American railroad bonds and Indian and Colonial municipal securities. The Scotch, however, have a leaning that way, and are more venturesome often than the English in seeking large interest.

Australian Estates and Mortgage Company.—No improvement is shown by the accounts, rather the other way; for a year ago 1 per cent. was paid on the share capital of £1,250,000; now it gets nothing, the drought being put forward as the reason. There has, however, been an improvement in the value of wool, and useful rains have fallen: they generally do when the report of an Australian mortgage company is drawn up. This undertaking has properties and stock and loans on mortgages figuring in the balance-sheet for £3,464,132, and has debenture stock issued to the amount of £2,300,000, so that out of £115,783, being the year's revenue, debenture interest absorbs £109,500 and the reduced balance of £5,366 is carried forward. This is an offshoot of the Union Mortgage and Agency Company of Australia, who are the managing agents. The concern is going from bad to worse, and unless things mend in Australia the debenture interest is threatened.

Grand Junction Waterworks Company.—The company continues to do a steady and progessive business. Total receipts for the half-year ended March 31 were £107,623, against £106,714 in 1897, and £102,949 in 1896. Expenses on maintenance have been larger, whilst special expenditure in connection with the lowering of mains has cost less, but on the whole expenditure absorbed rather more than in the corresponding period, and so does debenture interest. The balance available is £47,536, against £46,592, and the same dividends are therefore declared, of 7½ per cent. per annum on the "A," "B," and "C" shares, and 7 per cent. per annum on the "D" issue.

Callender's Cable and Construction Company.—We gave this company a good word when it was formed in 1894, and we are therefore glad to see that it is turning out so well. The available balance for 1897 is £24,746, of which £4,050 is utilised in paying debenture interest, and £3,000 is appropriated for depreciation of machinery and plant. From the remainder it is proposed to pay a dividend of 10s. per share for the year with a bonus of 2s. 6d. per share, and to carry forward £5,196. This will make a distribution of 12½ per cent., compared with 10 per cent. in former years. The recent expenditure on buildings, plant, and machinery has proved most beneficial to the business, and has enabled the company to produce better and cheaper cables than at any time in the past.

Bank of British West Africa.—A gross profit for last year of £10,289 is not immense, for £7,541 is absorbed in charges; £167 is allowed for depreciation of offices, &c., and £477 is placed to reserve. Fortunately the capital is small, so that the dividend at the rate of 10 per cent. per annum, making 8 per cent. for the year, absorbs only £1,129. Deposits amount to £191,282, while bills and advances represent £128,016.

Bargang Tea Company.—Bargang, the larger garden cultivated by this company, produced considerably less, but this was almost made up by a larger crop from Kettela, the other garden. Unfortunately, the produce of the latter averaged about 1½d. per lb. less, so that income was nearly £8,900 lower, and expenditure was actually £300 more. The net profit of £1,818 was therefore £1,097 below that of 1896, which compelled the board to reduce the dividend from 7½ to 5 per cent., but by doing this they were able to increase the balance forward from £865 to £1,076. This is a wise step, for the company has no reserve, and already owes too much, everything realisable in the balance-sheet being borrowed against.

Read's Drift Land Company.—After an existence of nearly ten years, this company, bounteously endowed with land in South Africa, shows accounts going from bad to worse. No less than 182,000 acres of land are owned by the concern, which was an offshoot of the London and South African Exploration Company, and presumably ought to have had the advice of men experienced in ways South African. Yet for last year the loss on working, after the directors had waived their fees, was no less than £1,520, and compares with a loss of £558 in 1896, and of £948 in 1895. Altogether the debit balance to date is brought up to £5,650, and there does not seem to be any growth in receipts that might lead one to hope for better things in the future. The search for minerals on the land was abandoned a year ago, and the other business of the company does not appear particularly profitable.

Mungledye Tea Company.—This is one of the companies that was most seriously affected by the earthquake last year in Assam. As a consequence, the crop only amounted to 290,194 lb., as against 533,189 lb. in 1896. The price per pound was fairly maintained, but expenses, partly owing to exchange and partly owing to the earthquake, were actually higher, so that the working of the year ended with a loss of £8,091. This poor company has always been in an impecunious condition. Its balance forward, after paying the final dividend for 1896, was £4, and every scrap of liquid assets had been borrowed against, so that the result is further borrowing. Consequently, the agents have had to provide £2,500; the bank, £3,978; and every one else has had to lend a hand, so that the trading liabilities amount to £16,000, as against unsold tea and debtors, amounting to about £5,000. We are afraid that the difference of £11,000 will have to be settled by some issue of capital, and so this poor, unhappy company will become poorer and unhappier. If only a real reserve had been created years ago—not a mere addition to block—the concern might have met this crisis in a more satisfactory manner. And yet there are people going about saying that the strong companies should pull down their reserves in order to maintain dividends at the abnormal level of 1895-6.

Diary of the War.

June 10.—Port Guantanamo, or Port Cumberland, lying some forty miles to the east of Santiago, has been bombarded by Admiral Sampson's fleet, and the forts destroyed. They were abandoned by the Spaniards, as well as the village of Caimamera, though it lies too far up the harbour to have suffered from the United States shells. This is doubtless in preparation for the proposed landing somewhere near Santiago, by destroying the chances of a flank movement on the American troops. But there is no further news as to when these may land. Indeed, it seems doubtful if they have yet left Tampa. There was a bit of a row yesterday in the Madrid Chamber, raised by the receipt of a despatch from the Captain-General of the Philippines appealing urgently for reinforcements, and describing the situation at Manila as desperate. The insurgents had closed round the capital, and the Captain-General evidently considered it hopeless to meet them.

The Madrid deputies got into a somewhat fantastic fury, and blamed the Government for not having sent the necessary reinforcements before. Senor Sagasta recommended calmness and manly fortitude in the presence of disaster, but deputies must have their fling. The leader of the Conservatives offered Government the support of his party, but Senor Romero Robledo, in highly dramatic tones, declared it was not a time to beg for mercy, or intervention, or treaties, but to die, in order that, if all is to perish, the national honour may at least be saved. After such a deliverance, doubtless Senor Robledo enjoyed his dinner. Clearly Don Quixote has left a few descendants in Spain.

June 11.—Admiral Sampson has sent two of his ships, the *Marblehead* and the *Yankee*, to take possession of the outer bay of Guantanamo. The Spanish deputies have become more calm, and yesterday discussed the business of the war estimates in place of "gushing" over the state of Manila, which is still desperate. The rebels may enter into possession of it at any moment. The Captain-General seems to have retired with his troops to the citadel, where he may make a desperate resistance, though scarcely a successful one, for he can hardly depend upon even the troops that still follow him. The "reserve" fleet at Cadiz has not yet sailed, though the Minister of Marine has gone to expedite preparations. It seems destined for Manila; but evidently the fate of that town will be settled before the Cadiz fleet can get half-way to the Philippines. The Washington House of Representives has passed the War Revenue Bill, which provides for the coinage of 1,500,000 silver dollars a month—a veritable Silverite triumph.

June 12.—Little news. Another "test bombardment" is reported —that of Baiquiri, fifteen miles east of Santiago de Cuba. It is to be presumed that all these "test bombardments" are made with a view to decide upon the place at which the military expedition from Tampa will seek a landing, or perhaps to distract the attention of the Spaniards and to puzzle them as to where the landing may be attempted. For it is now hinted that this attempt will not be made first at Santiago, but somewhere else which will greatly surprise the Spaniards, perhaps at Cienfuegos, which, if captured, would paralyse communications between Havana and Santiago, and would serve as a base of supplies for the American forces in the event of a siege of Havana. American plans seem now pretty well matured. We are said to be on the eve of the most important events of the war, but we are in ignorance whether the Tampa expedition has yet sailed. Some say it has, and that big events are due in a day or two. We can only wait and see. A significant fact is recorded as to the small use of the great monitor class of vessels in actual warfare. One of this class, the *Monterey*, was despatched a few days ago from San Francisco for Manila, the harbour of which, it is asserted, it could have defended against a hostile fleet. But it had to take refuge in San Diego, damaged by storm and short of fuel. It is to return to San Francisco because its short experience at sea has shown that the monster cannot safely undertake a voyage of 6,000 miles across the Pacific. If that be so, how many "monitors" of the British navy would prove useless in similar circumstances? Much talk of peace in Madrid journals—talk which seems intended to familiarise the people with the subject, or induce them to ask for a termination of the war, of which, however, there is yet no sign. But there are strange rumours of the mysterious passage of packets and parcels from the Royal Palace at Madrid, as if in preparation for a Royal flight.

June 13.—We have now full confirmation of the occupation by American marines of the harbour of Guantanamo. Even Madrid admits it. The Spanish troops fled with considerable promptitude, leaving even the national flag in a ditch. Thus an excellent landing place and a base for supplies have been secured by the United States fleet; but it is just psssible that the expedition from Tampa may seek to effect a landing at some point nearer Santiago. That expedition, it seems, did leave Tampa on Wednesday, but was ordered back in consequence of a rumour that four Spanish warships were moving mysteriously somewhere in the open sea, and might make an attack on the transport vessels packed with troops and stores. This proceeding was hardly creditable to the judgment of the American authorities; for where were the four Spanish warships to come from? However, the scare is said to be at an end, the expedition has started again, and may possibly reach Cuba tomorrow. Admiral Sampson is in constant communication with the insurgents, has conveyed to them large supplies of arms, and has otherwise arranged for their co-operation in the attack upon Santiago. Maximo Gomez has refused to come to any agreement with General Blanco. More fighting is reported in the Philippines, near Manila, the result of which is not yet known. It is now reported that the scheme submitted to Admiral Dewey by the rebel leader, Aguinaldo, before leaving for the Philippines with the American squadron was to set up a Republic there under a joint American and European Protectorate, a plan which might perhaps avoid international complications. There is still a great deal of discussion at Madrid on the critical situation in the Philippines.

June 14.—The Key West expedition has really sailed. It steamed away at daybreak on Monday, and is expected to reach Cuba on Thursday. Whether it will "pull up" at Santiago is, of course, not known. The small force of marines at Guantanamo has had some severe fighting with a Spanish force that attacked them. The attack began on Saturday afternoon and was continued until Sunday morning. Several of the American marines were killed, and reinforcements have been sent them from the *Marblehead*; but no doubt is entertained as to their ability to maintain their position.

June 15.—The position of the small force of marines at Guantanamo is causing some little anxiety at Washington. They are constantly harassed by the Spaniards, and not a night passes but they have to fight hard and long against their assailants. Slight reinforcements have been sent them, but they cannot be regarded as safe until the arrival of the Key West expedition, about which there is no further definite news. A navy lieutenant, who has somehow been making explorations of the harbour of Santiago—a daring exploit surely—has ascertained that all Admiral Cervera's ships are in that port. As a sample of the sort of news on which Madrid curiosity is fed, it may be noted that there the fact of American troops having been landed at Guantanamo is denied. Practically the whole of the German East Asiatic fleet is now concentrated in the Philippines, and Berlin papers infer that this indicates a determination to intervene in certain eventualities. It has also been suggested by certain ingenious Spaniards that, by granting some advantages to Germany, in the Philippines and elsewhere, it may be possible to secure the services of the Triple Alliance in behalf of Spain! No doubt Germany will be glad of a coaling station in the Philippines if she can get it.

June 16.—The American marines at Guantanamo are evidently in a "tight place," but they hold on tenaciously, though they have to fight nightly for it. As yet the Spanish force sent against them is small; but if a larger is gathered, and were to attack in the night time, when the fleet could be of no use, it would be bad for the marines. They need apparently expect no help from the Tampa expedition for some time yet. The last of it has left, but it seems detained in mid-ocean for some as yet unexplained reason. It is not yet in sight of Cuba; and if the marines at Guantanamo were to be swallowed up by a big Spanish force before the troops reach there, the heather in the States would be on fire with a vengeance. How is it that every movement connected with the American troops is so dilatory? General Augustin, Captain-General at Manila, has sent another despatch to Madrid representing his position as very grave. He does not say he has concentrated his force in the citadel; but it seems practically to amount to that. Manila is closely surrounded by the rebels.

THE PROPERTY MARKET.

Last week turned out to be a very busy one at the Mart, and the sales produced the considerable total of £180,816, or about £66,766 in excess of the corresponding week last year. There seemed small demand for large estates; small class residential properties and ground rents commanded more attention. A piece of building land consisting of nine and three-quarter acres at Southampton was sold at about £800 per acre, a very good price in the circumstances. The freehold ground rent of £232 per annum secured on the premises occupied by Messrs. Doulton & Co. till 1939 was sold by Messrs. Arber, Rutter, & Waghorn for £16,000, the purchasers being the British Empire Mutual Life Assurance Company. This is close upon seventy years' purchase and pays 1¾ per cent. Messrs. Millar, Son, & Co. were the biggest operators on Friday. A freehold ground rent of £25 in St. John's Wood, reversion in thirty-six and a quarter years, was sold by them for £1,220. A freehold residence at Burwash, Sussex, with over nine acres of land, went for £1,750; and Thackhams Farm, comprising fully seventy-three acres, was knocked down at £2,500, or about £45 an acre. Seven copyhold houses in Hampstead, offered by Mr. T. B. Westacott, with a total rental of £175, fetched £1,000. Several Essex farm properties are to be offered to-day at the Mart by Messrs. Humbert & Flint. There will also be offered to-day a fine property at Aldenham, Herts, comprising mansion, well-timbered garden and grounds, and 108 acres of undulating park and pasture land.

Some excellent properties were disposed of at the Mart on Monday, when the total of the day's sales ran up to £88,549. The Compton Steam Brewery, at Little Compton, Warwick, with thirty tied houses, was sold by Messrs. Alfred Thomas, Reger, & Miles for £35,200. Messrs. Hampton and Sons put up three lots, and sold two of them, the freehold of No. 7, George-street, Hanover-square, realising £7,250, and a residential property at Aston, Herts, £2,800. Licensed properties at Newbury, Herts, were put up by three different auctioneers. Messrs. W. R. Nicholas & Co. secured £3,000 for The Broadway, Hunt's Bar, public-house; £2,800 for the Old London Apprentice; and £1,450 for the Gun, on Wash Common. Messrs. Dreweatt & Watson netted £1,500 for the Tiger, Bartholomew-street, and £2,500 for the Black Boy's Hotel; while Mr. E. W. Neate secured £1,000 for the Cross Keys and residence adjoining. Messrs. King & Chasemore submitted a number of lots of land in Sussex, of which a farm of 200 acres at Rudgwick, and several enclosures of about twenty-eight and a quarter acres, at Slinfold, changed hands at £3,000 and £1,125 respectively. Some improved ground rents arising from properties in Orme-court, Bayswater, amounting to £630 per annum net, put up by Messrs. Barker & Neale, made £16,390, or an average of about twenty-six years' purchase, which must be accounted a very high price.

Mr. H. McCalmont, M.P. for East Cambs., has placed his Bishopswood Estate, in the counties of Hereford and Gloucester, in the market, and it will be submitted to auction at the Mart on Thursday, the 23rd inst., by Messrs. Trollope. This important residential and sporting property extends over upwards of 2,000 acres, of which about 600 acres are wood, and is placed in a lovely part of the country, famous for its grand scenery. The mansion is of a picturesque character, and on a moderate scale.

A total of over £75,000 of sales at the Mart on Tuesday, with a very small percentage of the lots offered remaining unsold, indicated large and lively business. Chief among the day's transactions was the sale by Messrs. Driver & Co. of the Welford Estate, in the Pytchley Hunt district of Northamptonshire, comprising about 1,055 acres, with a rent roll of £1,200 a year, which went at the excellent figure of £25,000, or about twenty-four years' purchase. Messrs. Dean, Barnett, & Oldridge disposed of the freehold "Ivy House" public house, at Hoxton, for £5,460.

Messrs. Field and Sons had a formidable list of freehold and leasehold properties, all of which were sold except one; and the large crowd which thronged their rooms during the day was excellent evidence of the popularity of this class of investments. A number of leasehold houses in Lansdowne-gardens, South Lambeth, brought £5,880; two freehold houses in Borough High-street, £5,900; another freehold in the same quarter, £2,020; and three freehold buildings in Anerley, £2,260. A freehold property of forty acres at Arkley, Herts, was sold by Messrs. Harland & Son for rather over £6,000. A leasehold residence in William-street, Lowndes-square, was disposed of by Messrs. Rogers, Chapman, & Thomas, at £3,870. At Masons' Hall Tavern, the freehold of the Rose and Crown public-house and Nos. 15 to 25, odd, Gundulph-street, Lambeth, producing an annual rental of £140, offered by Mr. Matthew Miles, changed hands at £5,560. Messrs. Daniel Watney & Sons announce for the 30th inst. the sale of Nos. 5 and 6, Throgmorton-street and No. 7, Shorter's-court. It is an important property, occupies a fine position adjoining the Stock Exchange and Parr's Bank, and covers an area of 2,000 superficial feet. Two freeholds in Soho are to be offered on Monday next by Messrs. Drew & Son, of Richmond.

The Mart looked deserted on Wednesday and was dull as ditch-water as compared with the lively activity of the two previous days. Nine lots were offered, but only three were sold. The total of the day's sales was £3,580. What had come over the Mart? Ascot may probably help to explain. The only transaction worth noting was the disposal by Messrs. Giddy & Giddy of a residential property at Walton-on-Thames for £2,550.

Mr. Alfred Richards announces a sale of £20,000 5 per cent. perpetual debenture stock of the Crystal Palace District Gas Company at the Mart on Wednesday, June 29.

TRADE AND PRODUCE.

With the Leiter collapse we have dealt at some length in another part of this Review, but we may here state that Mr. Leiter has written a very complacent letter, in which he is good enough to explain that the wheat recently under his control is now "in strong hands and present holders will not lose anything." This would, no doubt, be consoling if true; but, as in Liverpool, for instance, Tuesday's decline in price represented a total loss of £37,000 on the day, the holders there are not likely to be in appreciative sympathy with Mr. Leiter's confidence. Tuesday's decline in Liverpool amounted to 1s. 0½d. per cental. Futures are dealt with in loads, and a decline of 1d. per cental means a loss on a load of £20. Tuesday's record reduction represented a loss of £250 per load; and on 150 loads the total decline for the day represented a value for the day of £37,000. On Wednesday, however, though there was still excitement, there was less of panic feeling. Prices were fluctuating in futures, but there was a loss of 3¼d. in first call on July, a loss which was only partially recovered at the close. But the market had become more quiet in tone. Business in spot wheats was slow, without change in quotations. Liverpool, as will be seen, has been hard hit, but no failures are reported. Mr. Armour has now the control of Mr. Leiter's American cash stocks of wheat, believed to aggregate 6,000,000 bushels. There is some uncertainty about the control of the Continental and English stocks, but apparently, these, too, have now come under the control of Mr. Armour, who is said to have entered on a "big blind pool" with the two Leiters, senior and junior. If so, there will no doubt be further attempts to jockey the markets, but with the splendid crop prospects there can be no increase in prices. "There will," says Mr. Leiter, in the letter to which we refer above, "be no loss on the wheat, either in cash or future options, that was provided for in to-day's settlement. As to the amount of my profits or loss I have nothing to say." As to these the public will not be greatly interested, so long as there is no prospect of these speculators succeeding in raising values. The Leiter wheat boom, it may be remarked, has lasted about a year and six weeks. He himself computed its probable existence at fourteen months, and he modestly estimated his own profits at $3,000,000. The lowest price he paid for wheat was in June, 1867, when he gave 64⅜c. per bushel. The price on May 10 of this year was $1·85. The droop in the English provincial markets has continued, and ranges from 3s. to 5s. per quarter; but white wheat is still quoted at 42s., red at 40s., the quotation in only one case falling so low as 38s.

Of trade generally not much need be said. Copper is still unsettled and declining. Closing values on Wednesday were £50 3s. 9d. cash and £50 8s. 9d., three months. Settlement price, £50 5s. The price has not touched £51 for a week. From all the iron centres we have excellent reports of activity and increasing business. Glasgow expects a contract for 10,000 tons of steel plates for the Australian Government, for which early delivery cannot be promised. Over £6 is in some cases being paid for ship plates and £6 10 for boiler plates, and wages have been increased 5 per cent. Wolverhampton reports business in a healthy state, and the receipt of many orders during the past week; so with Birmingham and Sheffield. In spite of the coal strike, trade in Swansea has been very active—the imports during the last week showing an increase of 5,000 and the exports nearly 25,000 tons, a very vigorous state of affairs indeed.

As the Welsh coal strike seems now to have been prolonged indefinitely, the colliers declaring that they will have none of the sliding scale, and the owners being equally vigorous in insisting that they must have it; as the non-associated colliers who have been working at a 10 per cent. advance in wages are now striking for a further advance of 15 per cent., it is not surprising to hear that in other coal districts the whole talk is of an increase in price. It is believed that current railway and gas contracts will only be renewed at an advance of 6d. per ton on last year's figures. There is an increased demand for household coal for London, the exceptional chilliness of the season having, of course, greatly increased the consumption.

Wool is looking better, but it has a long way to go yet before it can be said to be in a healthy condition. The London market has been a good deal unsettled by recent failures in the "top" trade in Bradford. But Messrs. Charles Balme & Co. take a rather more cheerful view of the state of affairs. An opinion seems to be gaining ground that the recent depression which has clouded the ultimate markets has reached its limit. Stocks are being more firmly held in consequence. Trade in Leeds is reported better than for weeks past; and Leicester shows a further recovery from the extreme depression, though there is little or no speculation. The list for the next wool sales, on the 28th, has been closed, and the total left available for these is stated at 265,000 bales, compared with 282,000 for the corresponding series last year. Messrs. Jacomb, Son, & Co. believe that "the heavy proportionate supply of cross-bred descriptions will probably, in the absence, meanwhile, of any marked improvement in consumption, operate adversely to any rise in prices for these, but an active inquiry for merinos may be confidently looked for." The price of mohair has been sensibly higher during the last few days in consequence of some increased activity in the demand. The tone in the cotton market has rather improved, but the general condition is one of dulness. Little doing in linens.

Transactions in sugar during the week have been unusually limited, and the demand for refined continues unsatisfactory. The statistical position should give more confidence, and there is likely soon to be a further considerable shrinkage in the old supplies. Transactions in cane have also been small.

NEXT WEEK'S MEETINGS.

Monday, June 20.

Assam Company	5, Laurence Pountney Hill, 2 p.m.
Attaree Khat Tea	138, Leadenhall-street, 2.30 p.m.
British Linen Company Bank ...	Edinburgh, 1 p.m.
Matlock Waterworks	Derby, 4 p.m.
Mysore Reefs (Kangundy)	6, Queen-street Place, 11 a.m.
Wallarah Coal...	3, East India Avenue, 11 a.m.
Young's Paraffin	Glasgow, noon.

Tuesday, June 21.

Bank of British W. Africa	Liverpool, 1 p.m.
E. & J. Burke	Dublin, noon.
Espirito Santo and Caravellos Railway	Winchester House, noon.
Frank Jones Brewing	Winchester House, noon.
William Cory & Sons	Cannon-street Hotel, 11 a.m.

Wednesday, June 22.

Alliance Marine and General Assurance...	Capel Court, 12.15 p.m.
Bank of Roumania	7, Great Winchester-street 12.30 p.m.
Montreal Waterworks	49, Chancery-lane, 2.30 p.m.
Pestarena United Gold	6, Queen-street Place, 11.30 a.m.
Royal Exchange Assurance	Royal Exchange, noon.

Thursday, June 23.

African Banking Corporation ...	Cannon-street Hotel, 12.30 p.m.
Chelsea Waterworks...	Commercial-road, 1 p.m.
Metropolitan District Railway ...	Westminster Palace Hotel.
St. John del Rey	Cannon-street Hotel, 2 p.m.

Friday, June 24.

Jokai Assam Tea	St. Mary Axe, 2.30 p.m.

Saturday, June 25.

Harrow and Stanmore Railway ...	1, Southampton-street, noon.

A new station is to be erected on the Metropolitan Railway between King's Cross and Farringdon-street. The intended site is at the point where Farringdon-road and Rosebery-avenue cross each other. It will be in the midst of a crowded population, and should be of great benefit to the locality.

Rumours come from British Honduras of a reduction of the Government establishment, and of cutting down expenses generally, owing to the possible deficit which may occur at the end of the present financial year. We hope the reports are well founded. It is gratifying to find any of our colonies courageously preparing to meet deficits by reductions in expenditure, for which there is probably ample room.

According to the official returns, the imports into France during the first five months of the current year amounted in value to 1,860,165,000 francs, as compared with 1,630,055,000 francs in the corresponding period of last year. The exports amounted to 1,376,612,000 francs, against 1,500,502,000 francs in 1897.

The Emergency Bill for the appropriation of $473,151 to pay the Behring Sea Award to Great Britain passed both Houses at Washington on Tuesday.

UNITED STATES OF BRAZIL FUNDING SCHEME.

The Government of the United States of Brazil, having decided to fund for three years, namely, from the 1st of July, 1898 to the 30th of June, 1901, both inclusive, the Interest on the External Debt, the Interest on the 4½ per cent. Internal Gold Loan of 1879 and also certain amounts payable annually for Railway Guarantees, His Excellency the Minister of Finance, acting in conformity with Laws No. 401 of the 11th of September, 1846, No. 427 of the 9th of December, 1896, No. 428 of the 10th of December, 1896, and No. 489 of the 15th of December, 1897, has authorised Messrs. N. M. Rothschild & Sons to issue an amount not exceeding £10.000.000 nominal Capital, 5 per cent. Funding Bonds specially secured by the Customs Revenues, as hereinafter mentioned.

The following LOANS will be included in the Funding Scheme :—

The 4½ per cent. Loan of 1883.
The 4½ per cent. Loan of 1888.
The 4 per cent. Loan of 1889.
The 5 per cent. Loan of 1895.
The Western of Minas Railroad Company 5 per cent. Guaranteed Loan of 1893.
The Internal 4½ per cent. Gold Loan of 1879 ;

And also the amounts GUARANTEED to the following Railways :—

The Alagoas Railway Company (Linha Principal).
The Alagoas Railway Company (Ramal da Assembléa).
The Great Western of Brazil Railway Company.
The Conde d'Eu Railway Company.
The Central Bahia Railway Company.
The Brazil Great Southern Railway Company.
The Bahia and San Francisco Railway Company (Timbó Branch).
The Donna Theresa Christina Railway Company.
Southern Brazilian Rio Grande do Sul Railway Company.
Companhia Mogyana.
The Minas and Rio Railway Company.
The Natal and Nova Cruz Railway Company.
Compagnie Générale de Chemins de fer Brésiliens (Paranaguá á Curitiba).
Compagnie Générale de Chemins de fer Brésiliens (Prolongamentos e Ramaes).
Compagnie des Chemins de fer Sud-Ouest Brésiliens (Linha de Santa Maria a Cruz Alta).
Compagnie des Chemins de fer Sud-Ouest Brésiliens (Linha de Cruz Alta a Uruguay).
The Bahia and San Francisco Railway Company.
The Recife and San Francisco Railway Company.
Chemin de fer São Paulo and Rio Grande.

The Sinking Funds and Redemption of the Loans will be suspended for thirteen years from the 1st of July, 1898.

The said 5 per cent. Funding Bonds will be specially secured by the Rio de Janeiro Customs Revenues, on which they will be a first charge after provision has been made for the amount required for Interest and repayment of the £2,000,000 five per cent. Treasury Bills issued in January, 1898, which are repayable at the rate of £500 000 every six months, the first amount being due on the 1st of July, 1898. The Bonds will also be secured by the Customs Revenues of the other ports of the Union, should the Rio de Janeiro Customs at any time prove insufficient.

According to the Official Returns the Customs Revenues of the Federal Capital amounted, for the year 1897, to 92,000 Contos of Reis, equivalent, at the Exchange of 7d., to £2,683,333 and at the Exchange of 8d., to £3,066,666.

The total Customs Revenues of the Union, including the above, amounted to 244,000 Contos of Reis, equivalent, at the Exchange of 7d., to £7,116,666, and at the Exchange of 8d., to £8,133,333.

On and after the 1st of January, 1899, and *pari passu* with the issue of Funding Bonds the Government will deposit in Rio de Janeiro in Trust with the London and River Plate Bank, Limited, the London and Brazilian Bank, Limited, and the Brazilianische Bank für Deutschland, the equivalent of the said Bonds in current paper money at the exchange of 18d., and the paper money equivalent to the Bonds issued from the 1st of July to the 31st of December, 1898, will be deposited in the same manner during a period of three years commencing the 1st of January, 1899.

The paper money deposited will either be withdrawn from circulation and destroyed, or, if and when the Exchange is favourable will be applied in the purchase of Bills on London in favour of Messrs. N. M. Rothschild & Sons, to be placed to the credit of a Fund towards the future payment in Gold of the Interest on the Loans and the Railway Guarantees.

The 5 per cent. Funding Bonds will be free from all Brazilian Taxes.

The Bonds will be to bearer in sums of £20, £100, £500, and £1,000 each, with Coupons for Interest at the rate of 5 per cent. per annum payable quarterly, on the 1st of January, the 1st of April, the 1st of July, and the 1st of October, in London, in pounds sterling ; and in Paris, Amsterdam, Brussels, and Hamburg, at the exchange of the day on London.

The Bonds will be redeemed by an Accumulative Sinking Fund of one-half per cent. per annum, to be applied half yearly by purchase of Bonds, when the price is under par, and when at or above par by drawings. The Redemption of the Bonds by means of the Sinking Fund, will commence at the end of ten years from the 30th of June, 1901, but the Government reserves the right to pay off the Loan at par at any time.

This Funding Scheme was formulated with the approval of Dr. Campos Salles, President-Elect of the Republic, who during his recent visit to London was in constant communication with his Government on the subject ; and before his departure His Excellency expressed his satisfaction with the scheme and added his assurance that during his term of office, he would do all in his power to place the finances of Brazil on a sound basis, and to restore the credit of his country.

The following are the conditions to be observed by holders of Bonds of the before enumerated Loans for the funding of their Coupons, which are to be presented as they become due up to the 30th of June, 1901, inclusive.

In exchange for their Coupons, holders will receive a receipt for the amount lodged.

These receipts must be presented in amounts of not less than £20 to be exchanged for Scrip, which will be afterwards exchanged for Bonds of the 5 per cent. Funding Loan.

The smallest denomination of Bond being £20, Certificates will be given for fractional parts of £20, and these fractional Certificates may afterwards be exchanged for Scrip or Bonds in like manner with the Receipts, that is to say, in amounts of not less than £20.

No interest will be paid on the Receipts or fractional Certificates, but the Scrip or Bonds given in exchange for Receipts or Certificates will bear Interest from the due date of the Coupons for which the Receipts were issued.

Receipts and Certificates for Coupons due on different dates must be kept separate when presented for exchange into Scrip. Only Receipts and Certificates for Coupons due on the same date can be used together in making up the amount to be exchanged for Scrip or Bonds.

New Court, E.C., 15th of June, 1898.

MESSRS. SELIGMAN BROS., Fiscal Agents for the State Department of the United States of America, are prepared to receive and transmit to the Treasury, free of charge, applications for the UNITED STATES GOVERNMENT LOAN of TWO HUNDRED MILLION DOLLARS ($200,000,000) at par New York.

The Bonds bear interest at the rate of Three per Cent. per annum from August 1st, 1898, and are redeemable in coin at the pleasure of the Government after ten years, and repayable August 1st, 1918.

Individual applications for 500 dollars or less will probably be allotted in full in order of priority, and must be paid in full on application ; rebate of interest being allowed till August 1st.

On amounts exceeding 500 dollars a deposit of two per cent. is required. Allotment in this case will take place after July 14th ; payments to be made as to twenty per cent. ten days after allotment, balance in four instalments at intervals of forty days, or applicant may anticipate payments.

18, Austin Friars, E.C.
June 14th, 1898.

The Investors' Review.

The Week's Money Market.

Money has remained very plentiful in the Short Loan market, and day to day loans have stood at about ¾ per cent. throughout the week. "Fixtures," too, are quoted ltttle higher, and the India Council only obtains 1¼ per cent. for its advances by extending loans over the end of the half-year. As the end of the month approaches, a little more demand for cash is certain to make itself felt, but there is not likely to be any pressure of importance.

A slightly harder tone has prevailed in the discount market, chiefly owing to the fact that more bills have been about. The breakdown of the wheat "corner" and the issue at last of the United States war loan have both contributed towards this increased offering of bills, while the difficulties in the grain markets have added a slight tinge of anxiety about credit. Only one corn-dealer's failure has so far been announced, and London is supposed to have stood clear from the wretched gamble, but Liverpool is involved to a certain extent, so that a feeling of relief is experienced from the knowledge that the broken-down speculator in the States is still remitting funds. Under these conditions discount rates have hardened to just an appreciable extent so that 1⅜ to 1½ is quoted for 60-day bills, and 1 7/16 to 1½ per cent. for three months' paper, as compared with an easy 1⅜ per cent. all round a week ago. The withdrawal of £767,000 in Japanese yen from the Bank of England also had a strengthening influence late last week, but the Continental demand for gold subsequently weakened, so that over a third of the African arrival was secured by the Bank of England at about 77s. 9½d. per ounce, the balance going to Russia and India. Since then the price has risen to 77s. 10d. on an increased demand for Russia.

This week's Bank return is uninteresting, and need not detain us long. "Other" securities show an increase of £626,000, making this total £33,274,000, and the interence is that the Bank has been investing largely to employ its surplus moneys. The market has certainly not been borrowing. All the loss in gold by export, £519,000, has been covered by the return of coin from circulation, and more, for the total stock of bullion is up £161,000 to £38,156,000. Notes have also come back, so that the reserve of the Banking department is up £303,000 to £27,639,000. Had not tax collecting added £583,000 to the. "Public" deposits, the market would have been in possession of a large additional amount of credit in consequence of these changes. As it is, "Other" deposits are up only £355,000 to £44,909,00c—a quite sufficient total.

SILVER.

For the last seven days Spain has not ostensibly entered the Silver Market as a buyer, and the quotation for bars at one time declined to 26⅜d. per ounce. A slightly firmer tone has prevailed in the last few days, with the result that the price has recovered to 26 7/16d. per ounce. The hope is naturally entertained that Spain will again enter the market, while, as we are past the middle of the month, "bear" operators are becoming desirous to close up their accounts. The "bear" position, however, is not considered to be very heavy. Money is cheaper in India, as is shown by the drop of 2 per cent. in the Bank of Bombay's rate to 10 per cent. and 1 per cent. in that of the Bank of Bengal, to 9 per cent.,

with the result that there is more disposition to buy silver. Much, however, will depend upon the course of exchange, but so far the India Council has been able to maintain its policy of only selling transfers at 1s. 4d. per rupee. It has sold so largely up to the present that it can afford to stand out if necessary for a time, but we have yet to see the effect of the high exchange upon the Indian export trade.

Since the commencement of the financial year on April 1 the India Council has sold Rs.7,36,85,406 realising £4,900,588. As the Budget estimated for £16,000,000 to be drawn in the year, this means that, at 1s. 4d. per rupee, some forty-six lacs must, in future, be sold per week in order to obtain the amount.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, June 15, 1898.

Stock Market Notes and Comments.

It is dreary work trudging round the City just now to find out whether anything is going on. Each man's face is longer than his neighbour's and business of a general kind is very poor indeed. The pockets of the public are empty and their spirits are low. In vain do the jobbers put up prices here and there. Nobody responds and they have to let them tumble back again. When, however, markets in a general way fall into this condition, as they invariably do after each wild orgie of gambling by the public, there are often little spots where something of the old activity can be seen, either real or simulated, and for the past week the idle spectators have been a good deal amused by the revival of the old Chatham and South-Eastern embracing and perpetual love story, with its accompanying spurt in Chatham ordinary and second preference stocks. Intrinsically, Chatham ordinary stock is worthless, and as an investment pure and simple we should consider the second preference very dear at 50.

But that does not matter at all to the gambler when he has set his heart upon driving up prices, so this week he has got second Chatham preference up to 101, and the ordinary up to 23, and he talks glibly of new "pooling" arrangements between the South-Eastern and Chatham, either concluded or just about to be concluded, and favourable, of course, to the smaller company. Prophecies of a possible dividend on the ordinary stock are also diligently circulated, and there is quite a hubbub and bustle in a small way over the matter. It is, we imagine, about the one hundred and fiftieth time in our brief life that we have found the same story trotted out, and have been gently tickled on the bump of covetousness by the same estimates. And the beauty of it is that one never knows when the "fusion" and manufacture of Chatham dividends might come true, especially now that the genial Mr. James Staats Forbes is getting old. He might really wish to do something to distinguish himself by way of winding up his long and rather sterile connection with the Chatham Company.

Looking away from such chances and probabilities to the actual position of this unfortunate concern, the only feeling such market episodes as we have described excites is one of amazement that any human being possessed of enough brains to keep him outside a lunatic asylum could ever dream of buying any of its lower securities, even on a pretence that they might be investments. The low physical condition of the property is notorious. It is probably now the most inefficient and poorly equipped line in England: certainly it is the worst of any of the large companies. The condition of its stations is a disgrace to its management; its rolling stock is old and dirty, and for the most part shockingly lighted, notwithstanding the efforts which have been made lately to improve it out of borrowed money. At a moderate estimate, as we have again and again said, 10 per cent. to 20 per cent. more of the gross receipts of the line ought to be spent every year, for probably the next ten years, to bring it into a state of moderate efficiency, and we do not believe that it could be kept in that state in future years for much less than 60 per cent. of the gross receipts. The public knows, or ought to know, that there is now a million, or nearly, of capital, represented by nothing except obsolete steamboats, which ought to be written off—and so on. What use is there in running over the catalogue, or in warning the public that the net revenue this half-year may not be so tremendous after all, since the company is engaged in patching up and repainting one or two of its suburban stations; a most serious thing to a concern which probably has not spent 5s. on paint for some of these places in the last twenty years? We make this recital simply to warn people who may be ignorant and unsuspecting against having anything to do with the present gamble for the rise in these stocks. It is, in reality, no better than an impudent fraud which men with any pretensions to honesty ought to be ashamed to take any share in. The Chatham and Dover Company is to-day, in all essentials of good finance, an insolvent concern, and the dividends it does pay are not paid squarely out of net income, but evolved through the simple process of starving the up-keep and allowing the property to go to ruin.

Of course the Stock Exchange must have some little excitement or perish altogether in times like these, and it naturally falls back on some home security or other when all else fails, and everything else is failing it at present. The activity of a week ago in American railroad securities has died down considerably this week, because the market soon tired of keeping up the play by itself. It is all very well to run up prices if you know that the man in the street, or in the provinces, is eagerly waiting to buy what you have to sell, but if one jobber merely buys of or sells to another the play soon becomes not only fatiguing but mighty expensive. There is not much inducement to the public to buy American railroad securities just at present, fine "traffics" or no fine "traffics," and we do not believe it will buy much, confronted as it is by the shifty policy of the Washington Government in regard to the currency. The foreign bond market is equally torpid at the present moment, apparently because a large portion of the Paris open market, or *coulisse*, is in process of transference to Brussels. M. Méline, "Father Ruin," as he is well called, has succeeded in more than half strangling the Paris Bourse, and the loss of Paris, in consequence, promises to be the gain of Brussels. A guarantee fund of £4,000,000 is said to have been subscribed by the expatriated *coulissiers*, and arrangements have been entered into whereby the arbitragists in London will transfer part of their business to Brussels. In further preparation for this the two places are being put in communication by telephone. Until the "flitting" has been completed, and the new market in Belgium organised, we cannot expect much activity in foreign Government bonds—unless a revolution breaks out somewhere and one or more bankrupt States tumble openly into default. That might happen any day with Spain or Italy, although the despotic power now trying to rule Italy is going to issue another loan to stave off the inevitable if it can.

Something, though, of the dead calm which hangs over markets is due to a feeling that has entered into men's minds that some catastrophe of a financial kind is

going to happen somewhere. There is a spirit of apprehension and unrest abroad which appears to seek gratification in, if it does not originate through dread of, some credit upheaval. This may be the mere result of want of business, and we must not lay too much stress upon it, but the feeling exists and is in no way conducive to active markets.

The Week's Stock Markets.

On the Stock Exchange investment securities have been firm owing to the abundance of money, but there has been little speculative business. The completing of the settlement occupied the attention of members nearly up to the close of last week, and the attractions of Ascot have thinned the attendance very considerably this week. No support has been forthcoming from the Paris Bourse, the Ministerial crisis, and the arranging for the removal of the *coulisse* to Brussels tending to restrict business. Consols dropped at one time to 111 and then recovered to about last Thursday's level; other gilt-edged securities have hardly moved.

Interest in the Home railway market has again centred in Chatham and South-Eastern stocks. Nothing new has transpired in reference to the alleged "pooling" arrangement between these companies, but a considerable saving in expenses is expected to be the outcome of the present negotiations, "sufficient, in fact, to bring Chatham ordinary in sight of a dividend," while in some quarters an actual amalgamation is thought to be not altogether improbable. The whole thing may be froth, but a substantial rise has taken place in all the stocks of these companies, Chatham second preference touching par. Great Western has made up a little of the ground lost during the past fortnight despite the poor traffic, and the new stock now stands at about 8 premium. North-Western and Hull and Barnsley both benefited by good traffic returns, but a further decline is noticeable in Waterloo City stock. Several of the premier issues have again been marked up from 1 to 3 points.

After one or two brief rallies, the list of United States railroad shares finally exhibits an almost general decline, the most conspicuous fall being in Louisville and Nashville. Fears are now expressed that the expected dividend will not be declared, and the alarming rumours concerning the outbreak of yellow fever in Mississippi brought out a good many selling orders. The collapse of the Leiter wheat corner on Monday was followed by heavy sales of railroad securities by Chicago houses connected with the wheat trade, and Liverpool firms have since been selling heavily. Rumours of German interference in the Philippines was another disturbing element, and considerable sales were made on New York account early in the week to provide funds for taking up the new Government bonds. A little buying on home and Continental account has since been apparent, the good Government crop reports encouraging operators for the rise, but this did not extend far, and the downward trend of prices continued to the close. There has been an almost entire absence of rumours, good, bad, or indifferent.

Another poor traffic knocked the Grand Trunk market to pieces, and the Canadian Pacific Company's return was not over-grand. Consequently, although prices leave off rather above the worst points touched, they still show a considerable decline since last Thursday.

Foreign Government stocks have presented a neglected appearance all the week, and the volume of business has shrunk to small dimensions. Paris operators are still very much upset by the *coulisse* difficulty, and seem disinclined to increase their commitments until some sort of a definite arrangement is arrived at. The settlement of the West African dispute was almost unnoticed, and had no effect on this market. Turkish issues have been in good demand, it being anticipated

that the total extinction of the "A" group at an early date will bring about an improvement in the position of the remaining groups and perhaps their conversion. Trans-

actions in Spanish fours were fewer this week, and the price remains almost unchanged. Chinese bonds are slightly harder, and Ottoman Bank shares show a further advance. Among South American descriptions the Brazilian loans weakened when the funding scheme was published, and Chilian bonds were again pressed for sale, a bad impression having been created by the various explanatory statements relating to the recent issue of Chilian Treasury bills.

In the Foreign railway market Brazil Great Southern 6 per cent. and United of Havana 5 per cent. both mark rises of 3, but losses of from 1 to 2½ have to be recorded in Central Bahia, Cordoba and Rosario preference, ditto 4 per cents., and Santa Fé and Cordoba second debentures. Mexican Railway ordinary and preference have lost about what they gained last week, the traffic return only showing a small increase of $600, and Mexican Central 4 per cents. are likewise rather weaker.

An idle market is the Miscellaneous one just now, but in spite of this fact there has been a further influx of jobbers into it which speaks badly for other markets. Investment business is almost at a standstill, and the few changes of importance that have been registered are due to exceptional circumstances. The second reading of the Electric Lighting Provisional Orders Bill was followed by an all-round fall in the leading electric lighting companies' shares, with the exception of those of the City of London Company, which were inquired for on the prospects of the corporation taking over the property at an early date. A steady advance has been marked in the stocks of Combe, Watney, and Reid's breweries, the three great concerns which are on the point of amalgamating. E. C. Powder ordinary fell sharply when a dividend of 4s. 6d. (compared with 10s. last year) was announced, and Apollinaris issues were weaker, the "carry forward" being smaller than was expected. Dumont Coffee debentures fell 3 as the result of the meeting, but a rapid recovery has nearly wiped out last week's "slump" in Asbestos and Asbestic. London Produce Clearing House shares were sold on the dividend, and Sanitas shares on the proposed increase in the capital of the company. Liebig has risen 2, and Dunlop debentures 2½.

Home railway stocks closed the week with a firm tendency. Notably North Western, North Eastern, and Great Eastern. United States railway shares hardened a little just before the finish, a cessation of selling orders from Liverpool being reported, and at the same time a good many small orders came to hand, so that the latest quotations were well above the worst, and in the case of Denver preferred, a small rise on the week was established. Among foreign Government bonds a recovery in Argentine, Brazilian, and Chilian issues took place quite at the last, but Spanish and Turkish groups were sold from Paris, and Argentine railway stocks left off weak.

Mining and Finance Companies.

The South African market has been stagnant, features there are none, and the changes on balance are altogether too trivial for notice. Professional operators tried to put prices up a little when the Rand output was announced, but the attractions of Ascot have proved much too powerful this week, and with a very thin attendance of members prices naturally drooped. Paris support was conspicuous by its entire absence. Among Western Australian companies, a little mild excitement was caused by the reported "jumping" of the Golden Horse Shoe Mine, and holders rushed to sell, but a partial recovery came about when the rumour was officially denied. No other changes have taken place worthy of mention, and Adelaide orders have not troubled the market much. A sharp fall in Mount Lyell shares is the most prominent feature in the miscellaneous mining market. Vague rumours are afloat to account for the decline, one report being that an expert or two employed by a big London house have been reporting unfavourably on the property, but last month's return was not much liked, and the fall in the price of copper has been another adverse factor. Rio Tinto shares are also slightly weaker, Paris operators having been too much occupied with the *coulisse* problem to give any support even to their favourite counters. Nundydroog shares drooped a little on the new issue of capital, but other Indian companies' emissions are firmer, Mysore especially on a cable from the mine announcing the discovery of a new reef.

Answers to Correspondents.

Questions about public securities, and on all points in company law, as well as on the position of life insurance offices and their promises, will be answered week by week, in the REVIEW, on the following terms and conditions :—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus :—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway ?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

S.E.E.—(*a*) Yes, thoroughly good. (*b*) Yes, quite safely. (*c*) I cannot say that. The price might recede a little in a time of dear money, but so would prices for everything. (*d*) Nothing that I can see would affect the dividend on this stock, which seems to me as safe as anything in the list, although the company is not well managed just now.

MINE.—The company is not a "shady" one, but it was over-capitalised at the start, and its shares are still, to a very large extent, in the hands of the underwriters. This prevents any rise from taking place and sends the price down directly money becomes difficult to borrow. As money is now cheap there is no reason for immediate selling, but I do not look for any substantial improvement.

NOMEN.—Your questions are a little too hypothetical to be easy to answer ; but I do not think (1) that Government or municipal enterprise will hurt the company in the near future. It has fought, coerced, and, I fear, bribed itself into too strong a position. 2. No likelihood of this at all at present. 3. No, not "decidedly risky," so far, at least, as the preference shares are concerned. 4. No, I cannot advise immediate sale. The shares are fairly safe, but I do not look for any appreciable rise in them. Only the present moment is not favourable to selling.

A. J.—You shall have a reply by letter.

LIBERAL.—There is a fair probability of a temporary jump, I think, but only that. A permanent improvement, though, does not at present appear probable, as I do not see how the country is going to raise another loan.

JERMYN.—Fall due to state of affairs in Italy, and to the lower prices now obtainable for the company's products. I think for this year at least, and perhaps for two or three years, dividends may be reduced, but the property is solid enough, and after a time the price of the stock ought to improve. No accounts are published.

The Trustees, Executors, and Securities Insurance Corporation, Limited, publishes the numbers of the bonds of the City of Mexico 5 per cent. loan of 1889 which have been drawn for repayment at par on July 1, 1898. The drawn bonds should be left three clear days for examination.

The English Association of American Bond and Share Holders, Limited, 5, Great Winchester-street, E.C., notify that they are now prepared to purchase (at the current rate of exchange) the coupons due July 1, 1898, on the prior lien bonds of the Mobile and Birmingham Railroad Company.

The National Bank of New Zealand, Limited, will pay the half-year's interest due on 1st prox. on the City of Auckland 5 per cent. loan for £20,000.

The Commercial Bank of Australia, Limited, will pay the interest due July 1 on the Melbourne Tramways Trust 4½ per cent. loans. Coupons must be left three clear days for examination,

The business of the *Spectator* has been converted into a private limited liability company for family reasons.

Mr. Cecil F. Parr, deputy-chairman, has been appointed chairman of Parr's Bank, Limited, in place of the late Lord Playfair.

The London Committee of the shareholders of the Central Pacific Railroad Company announce that a general meeting of the holders of the certificates issued by them will be held in Winchester House, on Tuesday, the 28th inst at 2 o'clock p.m.

At a meeting of the Board of Directors of the Delhi Umballa Kalka Railway Company, Limited, held on 9th inst., Robert Steel, Esq., C.S.I., was elected a director of the company

The quarterly coupons of the Mexican external 6 per cent. loan of 1890, ; the Mexican Government Consolidated External 6 per Cent. Loan of 1888 ; and the United States of Mexico (San Luis Potosi) 6 per cent. loan, and drawn bonds of the latter issue, due July 1, can now be presented for payment on that or any subsequent day at the counting-house of Messrs. Antony Gibbs & Sons, 15, Bishopsgate-street, Within. Coupons and drawn bonds must be left three clear days for examination. The numbers of the bonds of the two first named loans, purchased on the market in accordance with the redemption schemes, will shortly be published.

The Rio Tinto Company, Limited, announce payment of the drawn Bonds and Coupons on their 4 per cent. First Mortgage bonds due 1st prox. They invite holders to present coupons and drawn bonds at once.

Notes on Books.

Le Marché Financier en 1897–1898. Par Arthur Raffalovich, Correspondant de l'Institut. Paris: Librairie Guillaumin et Cie.

This annual volume grows larger with each publication and increases also in value. At present we can merely notice its issue and must reserve analysis of some of the excellent essays it contains until another opportunity. In the meantime, however, we may say that no other book published, so far as we know, gives such full and reliable accounts of the financial position and economic progress of Russia as this does. And the essays on France, Germany, Austria, Spain, and Italy are all most valuable for reference purposes in spite of their occasional optimism. Appended to the chapters dealing specially with various countries of the world, as usual, are interesting monographs on the precious metals and on monetary questions in which statistics relating to the production of gold, monetary circulations in various countries, and so on, are embodied. Altogether Mr. Raffalovich is to be congratulated on the ability, industry, and discretion with which this annual volume is put together.

La Question des Limites Chilo-Argentines. Par Henri S. Delachaux. Paris: Armand Colin et Cie., Editeurs, 5, Rue de Mézières.

This short paper loses somewhat of its interest to us in being the reply to another article we have not seen, by Dr. Steffen. Taken by itself, however, it is an exceedingly clear and able exposition of the nature of the dispute between the Argentine and Chilian Republics over the question of the boundary of their territories. M. Delachaux, who dates his article from La Plata, goes over the history of this long dispute in a very clear and careful manner, showing that it has its origin in the ignorance of the old Spanish viceroys and their officials. When South America from Paraguay on the east and from Panama on the west was Spanish territory, the tide of immigration naturally worked its way inwards from great centres of communication with Europe, such as the Rio de la Plata and the ports of the Pacific. The Chilian population, hemmed in by the Andes, naturally worked their way south much more rapidly than those of Buenos Ayres, which had a vast breadth of territory to spread themselves over, and the Chilians consequently came first in contact with Patagonia, but there was never any delimitation of the boundaries of the two provinces, and when the question came ultimately to be taken up, the data upon which the boundary could be fixed were extremely vague. Out of ignorance of the past the present difficulty has arisen, and dispute has raged around the point whether the boundary was to be fixed by the highest peaks of the Andes, as far as the Andes went south, or by the watershed. M. Delachaux clearly proves that the watershed theory is impracticable, because many streams arise in the Andes and flow eastward for a time only to be driven back towards the Pacific by obstructions created principally through ice action. Towards the south the difficulty was increased by the occupation of the Straits of Magellan by the Chilians. The whole dispute, however, is now in a fair way to be completely settled, and the writer of this interesting essay winds up with the expression of a confident opinion that in the near future the hardy Chilian pioneer will meet the Argentine workman and seal a bond of everlasting friendship at the completely settled boundary of their respective territories. We trust this prophecy will prove accurate, for nothing could be more disastrous to all South America than a dispute leading to blows between these two great Republics.

MINING RETURNS.

Barnato Group.—Outputs for May:—New Primrose, 9,967 oz.; Ginsberg, 3,044 oz.; New Spes Bona, 1,844 oz; Roodepoort, 1,303 oz.; Balmoral Main Reef, 1,633 oz.; Glencairn Main Reef, 8,430 oz; New Rietfontein Estate, 2,161 oz.; Rietfontein "A," 4,316 oz.; Buffelsdoorn Estate, 2,863 oz.; Consolidated Main Reef Mines and Estate, 2,472 oz. from 6,163 tons battery, 1,186 oz. from 4,200 tons cyanide.

Eaglehawk Consolidated.—300 tons, yielding 177 oz. of gold for the last fortnight.

Geldenhuis.—Crushed 17,523 tons; obtained from mill, 6,396 oz.; from concentrates by cyanide, 928 oz.; from tailings, 2,710 oz.; from slimes, 663 oz.

George Goch.—8,844 tons crushed, yielding 1,428 oz. gold, and 1,078 oz. of gold from tailings.

Hannan's Brownhill.—Old Mill, 615 tons sands, and 450 tons slimes treated; 2,600 oz. of gold recovered.

Jumpers.—Results for May:—Crushed 12,000 tons, obtained from mill, 4,028 oz. of gold; obtained from concentrates by cyanide, 603 oz. of gold; obtained from tailings by cyanide, 1,378 oz. of gold.

New Guadalcazar Quicksilver.—The production of quicksilver for the past month amounts to 9,800 lb. = 130⅔ flasks.

Nourse Deep.—Tons crushed by sixty stamps, 7,611; yield in fine gold, 2,209 oz. Tons of sands and concentrates treated by cyanide works, 5,940; yield in fine gold, 1,851 oz.; total yield in bullion ounces, 4,891, equal to 4,060 oz. fine gold.

Paarl Central.—Results for May:—From mill, crushed 6,593 tons; yielding 1,352 oz. of gold. From cyanide: treated 4,505 tons, yielding 920 oz. of gold.

Premier Tati Monarch Reef.—1,650 tons crushed, including 290 tons surface low grade ore; yield of retorted gold, 382 oz. Tailings not treated.

Princess Estate.—Result for May:—Crushed 5,660 tons, producing 1,958 oz.; 4,135 tons treated by cyanide yielded 841 oz.

Village Main Reef.—Total yield from all sources, approximately, 8,728 oz. of gold.

Witwatersrandt Gold (Knights).—Mill ran twenty-six days, crushing 16,450 tons, yielding 4,812 oz. of gold; 12,500 tons cyanide tailings treated yielding 1,699 oz. gold.

Block B Langlaagte.—Mill—ore crushed, 10,680 tons of 2,000 lb.; gold retorted, 2,663 oz. Tailings, cyanide process—tons treated, 6,300; gold recovered, 1,265 oz. Concentrates, cyanide process—tons treated, 176; gold recovered, 375 oz.

Cassel Coal.—Output for May, 20,530 tons.

City and Suburban.—Last month's crushing yielded 11,510 oz.

Crown Reef.—Crushed, 16,181 tons; yield in smelted gold from mill, 6,860 oz. from cyanide works, 3,784 oz.; from slimes works, 496 oz.

Durban-Roodepoort.—Quartz milled, 10,210 tons; recovered, 5,072 oz.; tailings treated, 7,020 tons for 1,218 oz.

Geldenhuis Main Reef.—2,100 tons crushed, yielding 503 oz.; 1,320 tons treated by cyanide, yielding 170 oz.

Langlaagte.—Ore crushed, 24,704 tons of 2,000 lb.; gold retorted, 8,147 oz. Tailings, cyanide process—tons treated, 13,950; gold recovered, 1,968 oz. Concentrates, cyanide process—tons treated, 747; gold recovered, 1,889 oz.

Langlaagte Star.—Ore crushed, 5,274 tons of 2,000 lb.; gold retorted, 1,629 oz. Tailings, cyanide process—tons treated, 4,320; gold recovered, 626 oz. Concentrates, cyanide process—tons treated, 60; gold recovered, 118 oz.

Le Champ d'Or.—Crushed, 5,392 tons, yielding 2,170 oz.; cyanide—3,675 tons treated, yielding 833 oz.; concentrates, 76 oz.

Ottos Kopje.—6,398 loads washed during the week ended June 9, 207 carats won.

New Heriot.—Last month's crushing yielded 4,659 oz.

North Randfontein.—Mill—ore crushed, 4,592 tons of 2,000 lb.; gold retorted, 1,069 oz. Tailings, cyanide process—tons treated, 2,640; gold recovered, 365 oz. Concentrates, cyanide process—tons treated, 70; gold recovered, 150 oz.

Porges Randfontein.—Mill—ore crushed, 7,630 tons of 2,000 lb.; gold retorted, 2,364 oz. Tailings, cyanide process—tons treated, 5,258; gold recovered, 622 oz. Concentrates, cyanide process—tons treated, 118; gold recovered, 407 oz.

Robinson Deep.—8,620 tons yielded 5,389 oz. of gold; 5,000 tons were treated by cyanide, yielding 2,350 oz.

Robinson Randfontein.—Mill—ore crushed, 5,500 tons of 2,000 lb.; gold retorted, 1,948 oz. Tailings, cyanide process—tons treated, 3,960; gold recovered, 564 oz. Concentrates, cyanide process—tons treated, 88; gold recovered, 204 oz.

Simmer and Jack.—Crushed, 35,140 tons; obtained 10,634 oz. of gold from mill; 4,204 oz. of gold from tailings by cyanide, and 726 oz. of gold from slimes.

Treasury.—Output for May, 5,612 tons; yielded 3,574 oz.

West Rand.—Crushed 3,600 tons, yielded 698 oz.; cyanide—treated 2,685 tons, yielded 569 oz.

Windsor.—From mill—crushed, 4,050 tons; obtained 1,271 oz. From cyanide works—obtained, 835 oz.

Diorite King (W. A.)—Clean up for the months of April and May—154 oz. of gold from 100 tons crushed.

Gold Reefs of West Africa.—Crushed during May, 280 tons of ore, which have yielded about 315 oz. of gold. The gold produced for the months of March and April realised £2,613.

Lisbon-Berlyn.—Ore mined, 2,050 tons; ore crushed, 2,150 tons; treated by cyanide, 2,000 tons; fine gold recovered, 640 oz.

Mount Lyell.—From May 5 to June 1, inclusive, a total quantity of 12,300 tons of ore has been treated, 11,602 tons from open cuts assaying before treatment—copper, 3·24 per cent.; silver, 3·75 oz. per ton; gold, ·169 oz. per ton; 698 tons from No. 4 tunnel assaying before treatment—copper, 7·60 per cent.; silver, 8·22 oz. per ton; gold, ·088 oz. per ton. The converters have produced during same period 372 tons of blister copper containing—copper, 367 tons; silver, 44,992 oz.; gold, 2,697 oz.

New Zealand Crown.—During May 1,823 tons mined, and 1,664 tons crushed. Value of bullion, £3,442.

York.—4,594 tons of ore crushed in May, yielding 1,325 oz., while 3,510 tons of tailings gave 692 oz.

Caylloma Silver.—May production, 19,250 oz. in export ores and 500 oz. in bullion.

Frontino and Bolivia.—Produce value £9,525.

Hyderabad Deccan.—The output of coal from the Sinareni Collieries for the four weeks ended May 21 was 32,386 tons.

Lake View Consols.—Crushed, 5,526 tons, yielding 4,867 oz.; by cyanide, 3,370 tons of tailings treated, yielded 2,668 oz.; 2,045 tons of slimes treated yielded 717 oz.; concentrates, 23 tons, value 624 oz. of gold; sulphides shipped, 95 tons, value 293 oz. of gold.

Robinson.—Mill crushed 15,191 tons of ore, yielding in smelted gold 10,049 oz.; from concentrates, by chlorination, 1,198 oz.; from tailings, cyanide process, 3,430 oz.; from slimes, 952 oz.; from concentrates bought, by chlorination, 2,673 oz.

Wentworth Goldfields.—800 tons of ore have been crushed, yielding 1,015 oz., and one ton of rich crude ore has been shipped containing 180 oz.

Mount Charlotte Gold.—Crushed 300 tons yielding 120 oz.

Central Boulder.—Second return—135 tons, 151 oz.

Princess Royal (Cue).—Clean up from 260 tons gave 176 oz.

Nourse Deep.—For three months ending April 30:—Ore developed, 14,324 tons, ore mined, 26,992 tons. Total yield, fine gold 12,125,033 oz. Profit per ton 14s. 0·490d. Capital expenditure, £16,797.

George Goch Gold.—Result for May;—8,844 tons crushed, yielded 1,428 oz. of gold, and 1,078 oz. from tailings.

New Primrose.—9,967 oz.: profit, £14,515.

Ginsberg.—3,044 oz.; profit, £5,937

New Spes Bona.—1,844 oz.

Roodepoort.—1,303 oz.

Balmoral Main Reef.—1,633 oz.

Glencairn Main Reef.—6,430 oz.; profit, £9,317.

New Rietfontein.—2,161 oz.

Rietfontein "A."—4,316 oz.; profit, £6,752.

Buffelsdoorn Estate.—2,863 oz.

Consolidated Main Reef.—2,472 oz. from 6,163 tons, crushed. 1,186 oz. from 4,200 tons cyanide.

Transvaal.—From mill:—Crushed, 9,257 tons; obtained 3,262 oz. of fine gold, equal to 3,559 oz. standard gold. From outside cyanide works:—Treated, 2,150 tons, yielding 883 oz. of fine gold, equal to 963 oz. standard gold. From central cyanide works:—Treated (during last two months), 8,080 tons, yielding 2,600 oz. of fine gold, equal to 2,836 oz. standard gold.

The directors of the English and Scottish Law Life Assurance Association have, on the retirement of Mr. G. F. Hardy, F.I.A., from the position of actuary, appointed Mr. James Douglas Watson to that position, Mr. Hardy continuing his connection with the association as consulting actuary.

The London committee of the shareholders of the Central Pacific Railroad Company announce that a general meeting of the holders of the certificates issued by them will be held in Winchester House, on Tuesday, the 28th inst., at 2 o'clock p m.

The numbers are published of bonds of the State of San Luis Potosi (United States of Mexico) 6 per cent. loan, which have been drawn for payment on July 1 at Messrs. Antony Gibbs & Sons', Bishopsgate-street Within.

a Loss. *b* Exclusive of yield from Concentrates bought—2,913 oz. in March, 2,914 oz. in April, and 2,673 oz. in May.

AFRICAN MINE CRUSHINGS.

The May output of the Witwatersrand again supplies a "record," the total being 344,160 oz., compared with 335,125 oz. in April. In the outside districts the yield was 20,856 ozs. as compared with 18,118 oz. Amongst individual mines much better results were given by the Angelo, Jumpers, Jumpers Deep, Langlaagte Estate Modderfontein, Sheba, Simmer & Jack, Village Main Reefs, Knights and York Companies. But the increased yield is often due to more stamps being in use, for the Langlaagte Company had twenty more stamps at work and the Robinson Randfontein and Langlaagte Star Companies five more each. On the other hand, the Balmoral Company had ten stamps less in use, and the Robinson group of mines again refer to the great scarcity of native workmen at the mines. Among the companies which gave poor results may be mentioned the Balmoral, Glencairn, Jubilee, Langlaagte Star, Heriot, North Randfontein, Rietfontein "A," and Salisbury. The May Company owing to shortness of water appears to have yielded nothing. On the whole, the total output grows slowly, and the improvement, month by month, is due to more stamps being at work or to more companies crushing, and not to richer ore being dealt with. Thus last month's output was larger by 9,035 oz. than the April return, but the Robinson Deep made a return for the first time which accounts for 7,739 oz. of this increase, while the Driefontein Company, which made its first return for April as 1,500 oz., has got into better working form, and increased its output for May to 7,422 oz. So if allowance is made for these two new crushers the returns from the old companies were less instead of showing any increase.

The interest due July 1 next on the Brazilian Government Treasury bills, dated January 1, 1898, also Series A of these bills, due July 1, amounting to £500,000, will be paid by Messrs. N. M. Rothschild & Sons on and after the 1st prox.

The British Bank of South America, Limited, notify to holders of the 5 per cent. debenture bonds of the Cantareira Water Supply and Drainage Company of the City of Sao Paulo that the interest thereon due on the 1st proximo will be paid by them on and after that date, together with the bonds drawn for redemption on the 1st inst.

Messrs. Blake, Boissevain, & Co. are pay, on and after the 1st prox., the sterling coupons of the City of Providence 5 per cent. water loan bonds due on that date. They will also pay the coupons then due on the 5 per cent. collateral trust gold bonds of the Chicago Junction Railways and Union Stockyards Company at the fixed rate of £5 2s. 6d. per coupon of 25 dollars.

Messrs. Rothbarth & Co. have removed from 9, Southwark-street, S.E., to 18, St. Thomas-street, Borough, S.E.

Mr. Robert Steel has been elected a director of the Delhi Umballa Kalka Railway Company, Limited.

Australia United Mining Company, Limited.—Interim dividend of 1s. per share.

Apollinaris and Johannis.—Final dividend on the ordinary shares of 3 per cent., making with the interim dividend a total of 6 per cent. for the year.

London Produce Clearing House.—An interim dividend at the rate of 6 per cent. per annum.

Eastmans.—Dividend of 6 per cent. on the preference shares.

Frontino and Bolivia Gold Mining Company.—A dividend of 2s. per share.

National Mortgage and Agency of New Zealand.—Interim dividend at the rate of 5 per cent. per annum will be paid on July 8.

INSURANCE.

Ocean Marine Company, Limited.—Interim dividend of 2s. 6d. per share, being at the rate of 10 per cent. per annum.

Merchants' Marine Company, Limited.—Interim dividend at the rate of 6 per cent. per annum for the half-year ended June 30.

Reliance Marine Company, Limited.—Interim dividend of 2s. per share, eing at the rate of 10 per cent. per annum.

Maritime Marine Company, Limited.—Interim dividend of 2s. per share.

BREWERIES.

Showell's Stockport, Limited.—Interim dividend for the half-year ended March 30 at the rate of 5 per cent. per annum on the preference shares, and 5 per cent. per annum on the ordinary shares.

RAILWAY TRAFFIC RETURNS.

Algeciras (Gibraltar) Railway.—Traffic for week ended June 4, Ps. 26,790; increase, Ps. 4,503. Aggregate from July 1, Ps. 1,023,704; increase, Ps. 77,099.

West Flanders Railway.—Gross receipts for week ending June 12, £2,037; increase, £164. Total from January 1, £56,267; increase, £2 065.

West of India Portuguese Railway.—Week ending May 21, Rs. 4,325; increase, Rs. 393. Aggregate from January 1, Rs. 97,525; increase, Rs. 27,911.

Villa Maria and Rufino Railway.—Traffic for week ending June 11, £246; increase, £60. Aggregate from January 1, £,8,087,; increase, £1,566.

Bengal Central Railway.—Traffic receipts for week ending May 21, Rs. 14,689; decrease, Rs. 2,023. Aggregate from January 1, Rs. 4,18,737; increase, Rs. 67,573.

Delhi Umballa Kalka Railway.—Receipts for week ended June 11, Rs. 30,600; increase, Rs. 5,700. Aggregate from January 1, Rs. 7,84,300; increase Rs. 1,78,600.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, June 11:—Ps. 12,200; increase Ps. 100. Aggregate from January 1, Ps. 203,200; decrease, Ps. 6,770.

Western of Santa Fe Railways.—Gross receipts for week ending June 11, $22,820; increase, $7,050.

Great Western of Brazil.—Traffic receipts for the week ending May 7, $20,410; increase, $6,614. Aggregate from January 1. $614,904; increase, $80,349.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending May 14, Rs. 8.135; decrease, Rs. 875. Aggregate from January 1, Rs. 1,54,408; increase, Rs. 551.

Assam Bengal Railway.—Traffic receipts for week ending May 14, Rs. 21,747; increase, Rs. 839. Aggregate from January 1, Rs. 4,90,509; increase, Rs. 86,223.

Burma Railways.—Traffic receipts for week ending May 14, Rs. 1,88,590; decrease Rs. 10,391. Aggregate from January 1, Rs. 40,45,441; decrease, Rs. 9,731.

Cleator and Workington.—Gross receipts for the week ending June 11 amounted to £1 129, an increase of £232. Total receipts from January 1, £23,944, a decrease of £438.

Cockermouth and Keswick Railway.—Receipts for the week ending June 11, £1,044; decrease, £83. Aggregate from January 1, £19,963; increase, £1,903.

The owners of the principal match factories in Italy have agreed to an arrangement establishing a practical monopoly. It is approved by the Finance Minister, who anticipates a considerable increase from the tax on matches. The match maker gets his monopoly, and all advantages arising therefrom; but there is no compensating consideration for the poor consumer who pays!

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S. F. Snk. Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D. Stk., *debenture stock*; Pf. Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Inscr., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

NOTICES.

According to certified statistics compiled by the Credit Index Company, Limited the number of failures in the United Kingdom for the week ended June 11 was 193 including nine not yet registered, being an increase of forty-four as compared with the corresponding week in 1897.

The Commissioners of Inland Revenue have entered into an agreement for the composition of the stamp duties payable on transfers of the further issue of £100,000 Metropolitan Police debenture stock, in accordance with the provisions contained in Section 115 of the Stamp Act, 1891.

It is announced that arrangements are being made for amalgamating the brewery firms of Messrs. Combe, Messrs. Watney, and Messrs. Reid, and that at an early date they will all be under one management.

Sir Lionel E. Darell has joined the board of the Capital and Counties Bank, Limited.

Mr. J. Lawson Johnston has accepted the chairmanship of Bovril, Limited, which has been vacated by the death of Lord Playfair. Viscount Duncannon will now occupy the vice-chair.

The coupons falling due on June 15, 1898, on the Greek 5 per cent. loan of 1890 (Piræus-Larissa Railway) bonds should be presented at the office of Messrs. C. J. Hambro & Son, 70, Old Broad-street, for payment of 32 per cent. in gold of their face value, in accordance with Article 2 of the International Greek Law of Control.

The numbers are announced of bonds of the Sivagunga Zemindary sterling loan to the amount of £8,100 which have been drawn for payment at par on July 1.

A branch of the National Bank, Limited, will be opened on the 1st proximo at No. 23, Baker-street, W., under the management of Mr. J. G. K. Wales, formerly manager at Harrow-road branch.

Bonds amounting to £960 of the Chilian International 6 per cent. loan of 1892, drawn in Paris in March last, will be paid on July 1 at the City Bank, Limited, Threadneedle-street.

Messrs. Grindlay & Co. have removed to 54, Parliament-street.

Mr. D. N. Shaw, of 20, Bishopsgate-street Within, has been appointed a director of George Ingham & Co., Limited.

The Conde d'Eu Railway Company publishes the numbers of the 5½ per cent. debenture bonds which have been purchased for redemption and cancelled.

The Indian and General Investment Trust, Limited, publishes the numbers of the first mortgage 6 per cent. gold bonds of the Acadia Pulp and Paper Mills, Limited, which have been drawn for payment at $1,050 per bond on July 1.

The numbers are published of the 5 per cent. mortgage debentures of the Argentine Refinery Company, amounting to £3,800 which have been drawn at the offices of the River Plate Trust Loan and Agency Company for repayment at par on July 1, with accrued interest to June 30.

Messrs. J. Henry Schröder & Co. publish the numbers of twenty-three bonds of £100 each of the issue of £200,000 5½ per cent. bonds of the City of Valparaiso, which have been acquired by purchase and cancelled. The half-yearly interest due July 1 next on the above issue will be paid by Messrs. J. Henry Schröder & Co. on and after that date.

Messrs. Glyn, Mills, Currie, & Co. announce that the fourth half-yearly amortisation of the Uruguay 5 per cent. loan of 1896 will take place by public tender in London on the 21st inst., the amount applicable being £9,614. They are therefore prepared to receive tenders of bonds for redemption, forms for which may be obtained at 67, Lombard-street, E.C.

The directors of the New Comet Gold Mining Company, Limited, recommend that debentures to the extent of £200,000 should be created, of which £175,000 shall be issued at par with the right to convert for a period of two years from the date of issue into shares at £3 10s. It will be necessary to increase the capital from £225,000 to £275,000, so as to create shares for the conversion of the debentures, and an extraordinary general meeting has been convened for July 18 to pass the necessary resolutions.

On and after June 15, the offices of The West of India Portuguese Guaranteed Railway Company, Limited, will be at 4, Coleman-street, E.C.

Mr. Hooley has some time since ceased to have any connection with the undertaking known as Hooley and Dee Lands, and the bankruptcy of Mr. Hooley will not affect the estate of the Dee Estates Company, Limited.

An extraordinary general meeting of the Nundydroog Company, Limited, will be held on June 22 for the purpose of considering a resolution for increasing the capital of the company to £242,000, by the issue of 22,000 shares of £1 each, at a premium of £2 each. It is proposed that these shares be offered to the shareholders *pro rata*—viz., one new share for every ten old shares.

The Eastern Telegraph Company, Limited, notify that the cable between Mozambique and Lorenzo Marquez became interrupted on Tuesday evening. As the cable between San Thome and Loanda has been interrupted off the mouth of the Congo since the 3rd inst., this last interruption cuts off all telegraphic communication with South Africa. The repairing ship has left for Mozambique, and it is hoped that the cable will be restored in four days. Meanwhile all telegrams will be sent on from Mozambique to Lorenzo Marquez by mail leaving on the 17th inst., and will be re-telegraphed from the latter place to destination if the cable is not restored before the mail arrives at Lorenzo Marquez.

A drawing of the debentures of the Municipal Corporation of the Port Louis (Mauritius) 5 per cent. loans will take place at the counting-house of Messrs. Chalmers, Guthrie, & Co. (bankers of the Corporation), of 9, Idle-lane, E.C., on the 30th inst.

Messrs. Lumsden & Myers notify that they have removed from 18, Finch-lane to 29, Cornhill, E.C.

The numbers are published of the 5 per cent. mortgage debentures of the Argentine Refinery Company amounting to £3,800, which have been drawn at the offices of the River Plate Trust Loan and Agency Company for repayment at par on July 1, with accrued interest to June 30.

The first batch of letters of allotment and regret for the issue of 300,000 5 per cent. preference shares of the Goldsmiths' and Silversmiths' Company, Limited, were posted on Wednesday.

The Trustees, Executors, and Securities Insurance Corporation, Limited, publishes the numbers of the bonds of the City of Mexico 5 per cent. loan of 1889, which have been drawn for repayment at par on July 1.

Printed for the Proprietor by Love & Wyman, Ltd., Great Queen Street, London, W.C.; and Published by Clement Wilson

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 25. New Series. FRIDAY, JUNE 24, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

The Speaker,

THE LEADING LIBERAL WEEKLY.

PRICE SIXPENCE.

The Speaker devotes special attention to Literary News and Criticism, great care being taken to keep this department of the journal free from any suspicion of favouritism on the one hand, and of sectarianism or narrow-mindedness on the other.

The Staff of Writers includes many men of established eminence in the World of Letters, as well as specialists, who treat with unquestioned authority the Scientific, Artistic, and Economic Problems of the day.

The Speaker is read in **all quarters of the world,** and is every where recognised as an authority on Political, Social, Literary, and Financial Questions.

Owing to the class amongst which it circulates, **The Speaker,** as an **Advertising Medium,** has a special value. Rates may be obtained on application at the Offices, **115, Fleet Street, London, E.C.**

The Speaker is on sale every Saturday morning at the Railway Bookstalls and principal Newsagents of the United Kingdom. Applications for Copies of **The Speaker,** and subscriptions, should be sent to **The Speaker** Office, **115, Fleet Street, E.C.**

Copies are delivered to Subscribers by post early on Saturday in a parts of the Kingdom.

It is earnestly requested that where any difficulty is experienced in procuring copies, the fact may be communicated to

The Speaker,

115, FLEET STREET, LONDON. E.C.

The Investors' Review.

Is the Stock Exchange Rotten?

Week by week the burden of our tale about the Stock Exchange is "want of business." "We haven't done a bargain for days" some brokers will candidly admit, not once in a way but often. "Only made the cost of the day's wires" is another form in which the scarcity of orders is emphasised, and there is no doubt that, exaggerated as these statements may be, the markets have had for a long time back comparatively little to do. One cause of the absence of a public we have harped on till we are weary: prices are so high that they positively retard business. We had hoped that dear money would last long enough to bring about such a fall as would have induced the public to come in again, and at least buy for investment. It has not lasted long enough, and directly the jobbers on the Stock Exchange saw rates for money begin to fall they put up again the prices which they had lowered to protect themselves against sellers as much as in consequence of actual sales. We are speaking, of course, about good, or believed-in, securities alone, in regard to which the action of the jobbers is often much like that of the shopkeeper who slams his door in the face of his customers. No inducement whatever is held out to investors to come in as buyers of any class of security. The moment credit becomes cheap, prices are lifted above people's reach, until purchases can only be effected at figures which involve a certainty of loss of capital the

moment credit again becomes difficult to obtain on easy, or on any, terms.

To blame the members of the Stock Exchange for this credit-sustained "boycott" of the investor would not be just. They cannot well help themselves. Banks enable them to carry on their business in this way, nay, tempt them to do so, and they merely obey the artificial forces and laws of supply and demand which our system of credit has brought into existence. But we have not covered the whole field in dealing with this particular cause of the want of orders. After all, the chief source of a stock-jobber's or stock-broker's income is not usually investment, but speculation. The Stock Exchange would not have half its present membership were it dependent upon the mere investor, who sells what he had previously bought and delivers the thing sold to the buyer, or who comes with fresh money in his hand to be placed out to advantage. Speculation in all forms, from the mere gamble of the individual who bets in prices for the rise or the fall, who stakes money on "options" as on a horse or a dog or a cricket match, to the more solid operations of the man who buys with his own money, or on his own credit, in expectation that an advance in the price will enable a profit to be secured, constitutes the main business of the Stock Exchange, and it is this which has been so terribly curtailed for more than a year past. Why is it so? The causes are various, and many of them are totally beyond the markets' control, such as the already mentioned price-forcing abundance of money, or the failure of South African mining and other speculations to yield the predicted fat returns. Others, however, appear to us to be the direct offspring of stock market habits of business, and as such they deserve the most careful and anxious attention of the upright members of the Stock Exchange and their committee.

From what we are about to say, it must not be understood that we consider the members of the Stock Exchange as a body so many thieves. On the contrary, we not only believe, but know the great majority of them to be fair and honourable traders, quite as incapable of doing a mean or dishonest action as any similar body of men in the world. We say this absolutely without reserve, and with all the greater emphasis because it is our strong opinion that customs and methods of business are growing more and more prevalent on the Stock Exchange whose effect is to put the honest majority of the members thereof at the mercy of the dishonest and unscrupulous minority. It is the thievish portion of the membership—a very small portion in number, perhaps, but still it is a sensible portion—which is more and more giving the Stock Exchange its character before the world. "We do not originate the swindles that come upon the market," members always argue in self-defence. "Why, then, should we be held responsible? Why can't the public distinguish?" There is cogency in this argument, but it does not cover the whole field, as a moment's reflection should enable even a broker to understand, prejudiced as he naturally is, and must be, in favour of the body to which he belongs.

It is perfectly true that a comparatively small number of the swindles by which the public has been so cruelly victimised, especially since the virulent disease of company mania and premium hunting took possession of it, have originated in the Stock Exchange. Equally true is it, however, that these swindles are nearly all effected by means of the facilities this great market affords, often in defiance of its own rules, to the outside thief. Is it any wonder, therefore, that the people whose pockets have been rifled by "dealings for the coming out," "dealings for the special settlement," "pocket orders," fraudulent simulations of a market demand, &c., &c., for this and the other trash or dishonest concoction, should blame the instrument by which these rascalities are effected far more than the scoundrels who play upon it? We could instance many examples illustrative of the point now insisted upon, and as answer to this question, but the law of libel forbids a too close or detailed adhesion to the truth, for the law of libel is the knave's best and most potent shield. Readers of this Review, however, can have no difficulty in putting two and two together for themselves, and should they not care to do this they need only have a little patience. An abundance of illustrative examples is nearly ready for presentment, and both the bankruptcy and the criminal courts will soon be busy unfolding tales of crime and imposture, all rendered successful, so far as they have been a success hitherto, by the freedom with which the habits and unwritten laws of the Stock Exchange allowed scheming blackguards outside to effect their purpose. When the day of exposure comes, and it is not now far off for some of the carrion, we should not be surprised to see a few members of the Stock Exchange in the criminal dock submitting to sentences of penal servitude, and we have a pretty confident hope that a few of the worst class of company-promoting lawyers will also be there. Take him all round, the City rogue-lawyer is perhaps the basest and most loathsome of all the ghouls in human shape who come there to live by plunder, and batten on ignorance and greed, but his greater infamy cannot exonerate the Stock Exchange from blame, and unless its honest members bestir themselves and compel reforms they will find themselves involved in the obloquy which is about to fall on some of their fellows, whose heads are now held high, and in whose pockets are the wages of crime.

The truth is that any line of conduct approaching to the upright and honest has come to be almost "bad form" on the Stock Exchange. So long as certain outward semblances of respectability are paid deference to, it is open to a member of the Stock Exchange, broker or jobber, to commit almost any crime he has a mind to against the pockets of the outside public. He may join with the lowest kind of thieves outside in making sham prices for the shares of sham companies, he may take "underwriting" commissions and "plant" the shares or stock he has subscribed for on his still trusting clients. When it "suits his book" or the game of his companions in robbery, he may run a price down or run it up. For a fee he can be persuaded to hand in names of sham allottees to the committee of the Stock Exchange, so as to get it to grant a settling day and perhaps a quotation for shares he knows to be not worth the transfer fee Jobbers, also, may buy and sell in a perfect understanding that the bargains they do are in all their essentials shams. The scamps who are "working" or "making" the market—shifting prices about, that is, and generally upward, so as to induce the public to believe that a genuine demand exists—send one broker confederate in to the Exchange to buy and another to sell at prices

arranged beforehand, and the jobber either pockets his "turn on the deal" or, as a partner in the swindle, contracts to do the entire job for a fixed share in the "swag"—the money absorbed from the "gull" public.

But all this and much more goes on under the decent forms of regular and legitimate business. A broker who is a member of the Stock Exchange may take part in foisting a swindle on the public, but he must not advertise his name in the newspapers, except on prospectuses. That is a capital crime, perpetration of which would involve expulsion. Most other rules of the Stock Exchange may be set at defiance, or dodged with impunity, but this one must not be violated, for fear of confounding a most respectable body of men with keepers of "bucket shops." The forms of bargaining, according to prescribed rules, must also be adhered to; that not only promotes discipline, but salves the conscience should the substance of the transaction be a fraud, or a thing on nodding acquaintance with fraud. By the rules of the "House," dealings in letters of allotment are not recognised, but the rule is ignored in practice, and is, indeed, rendered nugatory by that other rule, in virtue of which bargains of any sort cannot be annulled except on proof of fraud or wilful misrepresentation. By the same rule, quotations in the Stock Exchange official list are forbidden to the shares of a company which has not been floated upon a prospectus publicly advertised; yet some of the worst and most brutally callous swindles of the past and of the present day have been perpetrated by the aid of the machinery, and with the active assistance of members of the Stock Exchange in complete contempt of this rule—witness the "boom" and collapse of the Barnato companies. Share lists compiled in derision are taken as genuine, and the rule that two-thirds of the number of shares offered to the public must be genuinely allotted is, by this and other means, made a dead letter. Companies with a foreign domicile which exempts them from British laws, whose share registers cannot be inspected, and whose meetings are held abroad, can be laid before the public here, through the Stock Exchange, with perfect ease.

To add to the facilities in these and other ways given to unscrupulous members of the Stock Exchange—driven perhaps sometimes into dishonest ways by stress of hunger—to bring the institution into disrepute, and injure the honest majority, the utmost care is taken to shield the whole body of its dealings from public criticism, and still more from actions-at-law by wronged "outsiders." The affairs of defaulters are wound up inside the Exchange, without public interference or criticism, and we fear in these proceedings the interests of the public are not unfrequently forgotten. Transactions which might bring scandal; robberies of securities, frauds, participation in plots to defraud, the invasion of the province of the broker by the jobber, and *vice versâ*—all such things are, as much as possible, hushed up for the sake of that "respectability," which is of the essence of the game. And still the honest members go grumbling on, paying their thirty guineas per annum for the "privilege" of belonging to a body so lamentably ill-regulated, and meekly wonder every day of their lives why "business should be so bad." "We have done nothing wrong," they say; "our business is conducted most respectably and regularly; it is these thieves outside who victimise the public and us—not we ourselves who do evil." Unfortunately for them the public is less and less disposed to accept this view, and as its distrust of Stock Exchange methods increases—methods exhibited to it with greatest prominence in the misdeeds of the brigand element in the membership—business will grow worse. Things have already come to such a pass that the individual speculator has almost no chance against the rings, cliques, or syndicates who control prices. At the best of times the chances are, thanks to the regular demands of the market, at least five to one against him. But under modern developments—syndicates, groups, gambling "trusts," and so forth—they may easily be a thousand to one against the isolated operator, and the wealth the market snatches to itself on such odds is shared only by the few who are "in" with the wire pullers. The writer of this article can speak now from a long and varied experience of the City and of Stock Exchange business, and it is his opinion that the plain, ordinary citizen who takes to stock speculation as a means of "making money" courts his own ruin. He himself would as soon think of deliberately putting his hand into the fire as of perpetrating "a time bargain on open account" on the Stock Exchange in any security, so fully persuaded is he that the odds are bound to be against his success. As we said at the outset, we do not blame the Stock Exchange, as a whole or alone, for such a state of things as this implies; but in the judgment impending upon it the innocent will have to bear condemnation with the guilty, unless they take steps so to reform the practices of the institution of which they are members as to give the honest man therein at least an equal chance with the thief. Is the Stock Exchange rotten, then? No, not quite, but it is rotting in places, and the rot must spread, because the one and only effective deterrent to financial crime it furnishes is the initial cost to the criminal. What good can come to an institution which allows its members, if they so choose, to regulate their morals by the size of the fees they exact for the use of their names and services, often in pretty exact ratio to the magnitude of the fraud to be perpetrated?

We must close this already too long article here and leave the discussion of specific reforms to a future day.

Brazil and the Rothschilds.

Default has come, and it has long been foreseen by independent observers. The City has received with comparative indifference the intimation that interest upon the external debt of Brazil will, for the next three years, be paid in paper and that sinking funds are to be suspended for thirteen years. Probably this attitude is due to the fact that there is not an extensive holding of Brazilian Government bonds on the Stock Exchange. Owing to the public's faith in the name of Rothschild there are still considerable amounts of these bonds held throughout the country, and, of course, the capital of the Brazilian guaranteed railways, dealt with in another column, is nearly all held here. There was really, however, no room for any disturbance in the market, because it has for some time been perfectly obvious that the central Government responsible for these loans and guarantees could not possibly continue to pay in cash. It has not squarely paid in cash for many years back. In their letter to the President-elect of the Republic,

published in last Monday's *Times*, Messrs. Rothschild declare that they have "always been proud and content to see Brazil faithfully fulfilling all her engagements." If this is so, the firm's pride must be easily gratified, for it itself has been the one and only sustainer of Brazilian credit. The Brazilian Government has never made the smallest attempt to pay its way.

What have the loans issued during, say, the past ten years been for, if not to keep Brazilian "credit" on its legs? Can Messrs. Rothschild point to any substantial gain that the Brazilian nation has received through the issue of these loans? Has the Western of Minas Railway, for example, ever been built, for which a loan of £3,700,000 nominal was raised in 1893? Surely they cannot have forgotten the scandal which arose in connection with this loan, or have overlooked the remarks made about it by Mr. Frederic Harford, second secretary in her Majesty's Legation at Rio, in his report on the finances of Brazil for the years 1890 to 1893. Perhaps it may be as well to quote his observations here just to remind the public and Messrs. Rothschild how this kind of "credit" maintenance has been manipulated. Mr. Harford's words are at least a curious commentary on that further remark in their letter to Dr. Campos Salles, President-elect of Brazil, to the effect that the credit of a country constitutes, after all, "its greatest power." We can quite imagine a financier believing this to be true, but should be very sorry for England if there were nothing better behind its "credit" than loan emissions such as the following describes :—

The motives which led the Government to raise a loan in the name of the Oeste de Minas Railway are thus explained in the report of the Minister of Finance. More than £1,500,000 having been remitted to London in order to satisfy the charges of the Treasury, amongst which figured the payment (part) of the £1,000,000 borrowed of Messrs. Rothschild in 1892, the Government recognised the necessity of effecting a foreign loan in order to avoid its having to appear as a buyer in the exchange market, which is now more sensitive than ever, and Congress not having authorised the raising of a loan by the Government itself, it was arranged with the above company to float a loan in their name, the product of which was to be placed at the disposal of the Treasury agency in London. A loan of £3,700,000 nominal was accordingly negotiated through the medium of Messrs. Rothschild at 80 per cent. and 5 per cent. interest guaranteed by the Government. This loan produced, at 77 per cent., the sum of £2,849,000 net, and, by arrangement with the company, was taken over by the Brazilian Government at the exchange of 20d., the equivalent of which is 34,188,000 milreis. The difference of 3 per cent. (between 80 and 77 per cent.) is presumably for the commission and expenses connected with the raising of the loan.

The shareholders of the railway company can hardly be congratulated on obtaining a loan on such onerous conditions, which, on the other hand, appears to be very advantageous to the Government, who receive the sum of £2,849,000 in gold bought at 20d. to the milreis, and at the same time only undertakes to pay the company, as they require it, 34,188,000 milreis in currency, which, at the present exchange (end of July) of about 12d. is worth but £1,794,000. Unless, therefore, the exchange in the meantime rises above 20d., the Government secure a double advantage. The consideration received by the company is the guarantee of the interest on the nominal capital, which at 5 per cent. amounts to £185,000 per annum, and their good offices in negotiating the loan. Calculated on what the company will actually receive, they will be paying at the rate of nearly 10 per cent. per annum.

Some excitement was caused in Rio by the announcement that the application for a quotation of the above loan of £3,700,000 had been refused by the committee of the London Stock Exchange, and that a settling day only had been granted. The reason for this unusual step would appear to be in the irregularities alleged to have been discovered in the allotment of scrip to subscribers. Some applicants are said to have received the amount they applied for in full, while others did not take any allotment at all. £7,000,000 was nominally applied for, but only £2,650,000 was apparently actually allotted; and the bonds, which at first were quoted at 82 per cent., or 2 per cent. premium, have lately been quoted at 7½ per cent. discount.

The Budget law for 1893 allotted, as a special credit, the sum of 9,335,000 milreis for the interest and repayment of the loan of £1,000,000 contracted in April, 1892, with Messrs. Rothschild at 97, that firm receiving 3 per cent. commission. But if remitted from Brazil the amount allotted would be largely exceeded, owing to the depreciation of the currency, and no doubt the product of the Oeste de Minas Loan will be partly devoted to this purpose. The sum of £12,500 was payable as interest in September and December, 1892, and March, 1893; and on April 1, 1893, a first instalment of £300,000 was due, the balance of £700,000 being payable in July and October of this year, in order to effect the final amortisation of the loan.

It was reported in June that the Government were buying up the bonds of the 4½ per cent. gold internal loan of 1879, of which only 25,629,500 milreis remained in circulation on March 31, 1893. The reason given was that this would facilitate the floating of the Oeste de Minas Railway loan. In any case, the sum of £300,000 in specie was forwarded to London on June 1. In July the Government bought up a considerable amount of the 6 per cent. loan of 1868, paying up to 2,000 milreis for the bonds, and there is now very little of this loan outstanding.—Foreign Office Reports, No. 1321, 1894, pp. 17-19.

Is there not a moral question behind loan raisings of this, of every, description which has never been properly brought into view? Are we not allowed, in virtue of this, to ask what right Messrs. Rothschild, or any loan-issuing house, has to forge fetters in this manner for communities, without really consulting these communities, and with no apparent object except their own gain? It appears to us that this kind of finance is root and branch, not exactly immoral but non-moral, in precisely the same sense that usurious lending to impecunious individuals is. Nations are bought and sold under the guise of issues of bonds just as slaves used to be, and the only check upon the activity of this buying and selling is in such crises as the one which has now overtaken Brazil. When it is no longer possible to emit loans that the public will buy an enslaved nation gets a chance of release—a breathing time. Brazil, it will be said, gets such a chance under this debt-funding arrangement, but we are not so sure of that. There is not, to our thinking, the slightest probability that the new President will have much more power to introduce economies and reforms in the administration of Brazil than his predecessors, or the late Emperor, had. He will talk sweet words and promise much, but his power to do much is very limited. Therefore Brazil is likely to go on in the old way, making a fancy Budget showing a surplus at the beginning of the year, and voting away and wasting sufficient money during the year to realise a more or less extensive deficit at the end. In three years' time, therefore, the position will be so much worse than it is now by the amount of the freely accumulated further deficits and of the funding bonds issued to pay the interest upon the public debt. The end will thus, in all probability, be complete default, undisguised.

This is not a cheerful prospect, and we venture to think that the interests of what may be called the *morale* of high finance would have been much better served by Messrs. Rothschild, if they had, ten years or more ago, refused to issue any more Brazilian loans. Assuredly they themselves, we take it, would to-day have been the richer, had they adopted that nobler line of policy, for none of the loans since, and including, that of

1889, can have been a market success, profitable to the firm. On the contrary, we should imagine, judging by signs and appearances discernible to those who watch markets as a matter of daily routine, that each of these loans have been left to a greater or less extent upon the hands of its issuers, and that no small amount of money belonging to the great House of Rothschild must now be wrapped up in that Brazilian "credit" the London branch of it is so solicitous to see "restored." But for some such position we can scarcely understand what was to be gained by this three years' suspension of cash payments, modelled on the Argentine plan. There can be no substantial hope in the minds of the devisers of this plan that it will do any good. Brazil drifts along and will, by-and-bye—as we said in 1892, when this REVIEW first gave us the opportunity to say what we thought about such things without fear or favour—drift asunder. Her weakness, indeed, as a federal republic lies in the absence of what may be called prescriptive authority in the central Government. It has little real power and can do little real good. The will to check abuses may be there, but the necessary force is not. Presidents and Ministers must bribe, or wink at bribery and corruption, to be permitted to live; and in matters of taxation the range of the federal powers is much limited by the rights and wants of the individual States. Hence the mainstay of Brazilian national finance has all along been the Customs tariff and paper money, two sources of the means to "pay the way" with about as helpful to the solid development of a nation's wealth as choke-damp is healthy to a miner. Is it not time Messrs. Rothschild recognised the bitter truth in this matter? The *moratorium* they have thrown at bondholders and railway debenture holders, like scraped bones to a Pariah dog, can serve no good end for Brazil, and cannot possibly afford the Rothschilds a chance to sell out—not in England at least—but may be a piece of gross cruelty to the inhabitants of Brazil.

By way of wind up to this homily we append a table of the loans affected by this desperate expedient. There are six loans, it will be seen, and they are all held in Europe, even the so-called "internal" loan of 1879, either by the public or by the issuing house and its allies. On these loans, by which upwards of £38,000,000 was raised or sought to be raised, the depreciation to-day is over £16,500,000. Add the market loss on the railway capital, dealt with in another article, and we arrive at a total loss of nearly £22,000,000. It is an ugly picture :—

Issues Loans.	Outstanding amount.	Value at price of issue.	Present value in market.	Depreciation to date.
	£	£	£	£
Brazilian 4½ per cent. 1883.....	3,382,000	3,009,980	1,758,740	1,251,240
Brazilian 4½ per cent. 1888.....	5,393,100	5,231,307	2,804,412	2 426,895
Brazilian 4 per cent. 1889.....	18,533,300	17,679,970	9,266,650	8,413,320
Brazilian 5 per cent. 1895.....	7,398,000	6,488,300	4,280,840	2,207,460
Brazilian 5 per cent. West of Minas ...	3,710,000	2,968,000	1,966,300	1,001,700
Brazilian 4½ per cent. Internal 1879.....	2,702,925	2,702,925	1,486,595	1,216,330
	41,119,025	38,080,482	21,563,537	16,516,945

The Sources of Press Corruption.

No reply has come from Mr. Hooley to our offer to publish what he is pleased to call his list of blackmailing City journalists. We never expected one, because it did not seem to us possible that a man in Mr. Hooley's position could dare to expose fully the methods by which a promoter's business is more or less generally conducted. The question raised by his splenetic outbursts, however, is one of too great importance to be allowed to rest without comment, and we propose to say some frank and straightforward things upon it which the public may note, or otherwise, as it pleases. Unquestionably, there is a great deal of journalistic corruption in the City, but bad as things are it is not yet possible to "blackmail" an honest man there, although it may be nearly impossible to float a company on honest lines. But the root of the corruption is not in the working journalist. He is merely the instrument, and very often has no chance of being straight and clean even if he would. As a matter of fact, the majority of the humble men who provide "money articles" and financial notes for all sorts and qualities of newspapers are just as honest as any other class in the ranks of the journalistic profession. The most obvious proof that they are so is furnished by their poverty. Rarely indeed do we come across an instance of a man becoming rich by corruptly practising the arts of the decoy in financial journalism. Year in and out the same men trudge the same monotonous round amongst the offices of banks and brokers and financiers in the City, gathering information for the purpose of retailing it again to newspaper readers. They were poor when they began this work, and, being as a rule scantily paid and precariously located, for no City journalist is sure of his position, as even the meanest bank clerk who does his duty can be, they remain poor to the end of the chapter. In the whole of our now somewhat lengthened experience of the City, we cannot call to mind more than two or three men who have risen to affluence, or apparent affluence, through prostituting their pen and such talents as they might possess to the service of corrupt finance. This much it is necessary to say in defence of a hardworking and painstaking class of men, upon whom baffled financiers, like this conceited Hooley, and self-righteous moralists, who know nothing of the City and its ways, would cast the whole obloquy of the financial prostitution in City journalism.

Who, then, are the men principally responsible for the corruption which undoubtedly does prevail to an extent far greater than the public supposes, or than even the outpourings of Mr. Hooley's baffled vanity would lead it to suppose? When we come to analyse the matter, the principal sinner, we imagine, will be found to be this public itself, which poses as the chief sufferer. It does not want, as a rule, to be told the truth, this public; it wants to have something pointed out to it that it can "make money" by dealing in. The simple investor, in other words, counts for very little in City finance, and is seldom or ever thought of. Those who rush to subscribe for shares in this, that, or the other company generally do so because actuated by the greed of the gambler. They wish to get first "in," so as to be in a position to sell at a profit to others less early on the scene than themselves. Such is the motive usually dominant in people who dabble in company shares, apply for allotments and so on, and it is to this spirit that the promoter caters. His endeavour is to manufacture something which will "catch on," and in order to do this with success he has to enlist the Press on his side, so as to get it either to put attractive pic-

tures of wealth to come before a crowd of premium hunters, as unfathomable in its stupidity as it is insatiable in its craving for money made without effort, or to take effective steps to gag it. Were the public of a careful mind, and satisfied to place its savings in good securities, the promoter would have very little scope, and many financial journals neither *raison d'être* nor income. It is just because this spirit of carefulness does not exist—except now and again when some prevailing fashion in swindles has enabled successful schemers to carry away immense masses of the country's savings, leaving the cheated ones in a virtuous fit of the blues—that the company promoter can carry on his sooty trade with such habitual success.

In all essentials the average promoter of joint stock companies is a thief, neither more nor less. Sometimes he is a sneak-thief, sometimes a bold highwayman who robs without mask; but always his object is to get money regardless of morals. He does not take up a business with a view to converting it into a joint stock company on lines which will ensure it solidity and permanence, and give, it may be, steady modest profits to its stockholders, but to see how much he can make out of it. In order to succeed at all he may have to employ accountants base enough to dress up figures as bidden in such a way that a large amount of hidden gain is wrapped up in the capital. "Profits" are to this end habitually "cooked," stocks overvalued, and risks minimised. Naturally, starting on such a basis, the promoter is very sensitive to anything in the nature of criticism, no matter how obscure the quarter from which it comes. It is essential to market success—his own and the inner "ring's" speedy unloading—that no doubt of any kind should be allowed to come between the mind of the public—intent also upon speedy profits through allotments sold to catch the dangled premiums—and the bait, because the slightest breath of suspicion causes the ravening mob to hang back. "What if the premium on the shares disappeared before we get a chance to sell out," it says to itself, this mob. At all costs this kind of fear must be prevented and the truth kept back. So the promoter must lay himself out to "nobble" the newspapers as a first step to success. It is merely a question of money. We are sorry to say that newspaper proprietors of all ranks have become more or less completely the company promoters' and loanmongers' tools and allies, simply because it at present pays them to be these. So much is this the case, and so large has the revenue from the advertising of company prospectuses become of late years, that there are not three daily newspapers in London at the present time whose editors would dare systematically to analyse, in the interests of truth and fair dealing, the adventures so lavishly blazoned in their columns. The editor who did that would find his shrift short, because independent criticism of the kind the public ought to have might curtail revenue. He prefers, then, to hold his hand and let the iniquities pass. Is it any wonder, with this initial combination of promoter and newspaper proprietor—all prevailing and all powerful—against him that the humble working journalist should sometimes hold out his hand for a bribe in passing? Can he be blamed if he does become corrupt and sell his pen when he finds some of the purse-proudest in the land doing the like, and taking the money of the fraudulent or other company promoter with both hands, on the tacit understanding that it shall secure him from anything like effective criticism, above all from criticism timed to be of use to the public? Displays of righteous censure after he has collected the "swag" the promoter seldom cares a straw for. But if the highest class of journals can be silenced in this way, and systematically silenced, so that only now and again is a tribute paid to uprightness by a "slating" bestowed upon some peculiarly atrocious attempt at fleecing the public, payment for the advertisements of which may be doubtful, how is it to be expected that the struggling lower ranks of papers will make any attempt to guide the public? The public, as we have said, mostly does not thank them for guidance. It is far easier, therefore, to go with the stream and far more profitable as well. In fact, the profit is often something infinitely greater than any mere revenue from advertisements ever is to such papers, if the business is only judiciously worked. The *Daily Chronicle* has been making some observations about the prevalence of the habit, quite recent in growth, of inserting reports of company meetings in the news columns of weekly papers as if they were independent and the paper's own, when, as a matter of fact, they are paid for as advertisements, and paid for on a high scale, too. But this is one of the smallest services which an easy-going newspaper proprietor can render to the gentlemen interested in selling companies' shares in bales and at higher prices than their intrinsic quality justifies. Nor is it the best-paid service. It frequently is little more to a paper than a gratuitous help to a fictitious circulation. So many copies of the issue in which a report appears are bought to be sent to the company's shareholders, and there the transaction ends. But this kind of corruption, if corruption it be, scarcely affects the company promoter. He is, more often than not, done with his companies before they get to the half-yearly meeting stage, and the services he requires from the newspaper proprietor are of a different and altogether more artistic kind. It may be necessary for him to pay smartly for the insertion of false price quotations, daily or weekly, in the newspapers in order to mislead the public, or, should a mine be in question, to fee proprietors to insert shaft cablegrams from the region where the "shaft" is supposed to be. Sham assays and so on have also their price in print. We have heard of as much as £100 being paid for the publication of a single lie of the "rich strike" description, not covering two inches of space in the paper that printed it. The story may be false—and it can be true. Not only must sham quotations and telegrams be provided for by hard cash handed over to newspaper proprietors of a certain class, but heavy fees are exacted by them for the insertion of laudatory paragraphs and leaders, or for puffing items that look like news. More insidious still is the practice which has grown up quite within recent years of filling the "answers to correspondents" columns of daily and weekly newspapers that admit such with bogus advice. Non-existent correspondents are recommended "to buy Blowhards: they are going pounds higher," to "sell Gingerbreads: the thing has petered out," to "hold Jujubes for a recovery," and so on, through the whole repertory of the market tout's gibberish. The "pudding-headed" public, rendered swinishly stupid by its lust after the "profits" of dice-throwing—and the dice loaded too—reads these false statements and delusive recommendations and rises to the bait as a fish to the fly.

These are only a few of the ways in which the Press is put at the service of the company promoter, but enough has been said to indicate how difficult it would be for any individual promoter, no matter how lofty his intentions, to turn round upon the people he has subsidised and suborned and expose their practices. Why should he be driven to do such things if his purpose was honest—if he asked nothing more for the companies he had to sell than they were really worth? We are afraid there can be no satisfactory answer to this question of a kind it would be prudent to print. But before leaving this subject for the present it may be well to mention that there is a lower class still of journals in the City, if a lower class be possible, and this is the class which is owned and carried on by some financier or firm of financiers, or company or group of companies, for a definite purpose, that purpose being a systematic puffing of all their own wares, and sometimes an equally systematic abuse of those who cry these wares down, or venture to speak a word of truth about them. There are "bull" organs and "bear" organs of this type sold along the kerbstones round the Stock Exchange—and seldom much elsewhere—whose lives are ephemeral, but which are always provided with the funds necessary to bring them into life and keep them there by some capitalist, or would-be capitalist. Of this class are most of the papers devoted specially to South African and Australian mining finance. Very few of these could live by their own vitality, not having circulation enough or advertisements enough to enable them to pay; but as subsidised frauds, or as blackmailing agencies pure and simple, they come and go, leading a precarious and rather malodorous existence, in the course of which they may have been effective in helping the Barnatos and such like to lighten the purses of the British public of a good many hundreds of thousands of pounds, if not of millions. And they are not all "kerbstone" journals either which flourish, or have flourished by such service.

Wherever we dip beneath the surface in the financial Press of London, and of the greater Press not specially financial which devotes a portion of its space to City affairs, we are sure to find more or less trace of the corrupting power of the financier. We should not call the bulk of this Press a blackmailing Press exactly, although some journals live partly by that most degraded method of obtaining money; it is more a "milking" Press, a Press that exacts toll from the company promoter, in order to purchase its silence, or in order that its columns may be open to say just exactly what the promoter wishes at the time he wishes it, and nothing else. From the high "respectability" of the best papers pressed into the service of the financier in this way to the lowest depth of the worst is only a matter of degree; the moral principle underlying the conduct of the best of them is not essentially different from that animating the veriest gutter imp of journalism. Is there any cure for this state of things? We fancy not, unless the public itself intervenes. When its moral standard becomes higher, the Press which serves it will rise similarly to the height demanded of it, and we shall have some little cleansing of the foul places now cankering the sources of the nation's wealth. With a public supine and indifferent, intent above all things on gambling, this elevation is not to be looked for, and no matter what homilies are read to us—no matter how far the wealth of the people may be consumed by the fraudulent and dishonest financier of the City—corrupt journalism will flourish and fill its pockets; at all events until some great financial crisis comes and sweeps it and its suborners and dupes out of existence together.

Arbitration under the Workmen's Compensation Act.

Under the new Act the power of contracting out of its provisions will be very limited. If the Registrar of Friendly Societies certifies that any scheme of compensation or insurance is on the whole not less favourable to the general body of workmen than the provisions of the Act, then, until the certificate is revoked, the employer may contract with his workmen that the scheme shall be substituted for the relief given by the Act. No scheme is to be so certified which contains an obligation upon the workmen to join it as a condition of their hiring, and before certifying the Registrar is to take steps to ascertain the views of both the employer and employed. It will thus be seen that the Act will apply notwithstanding any contract made to the contrary, except as above stated, and all agreements which are at present subsisting, whereby the workman relinquishes his right to compensation for injuries in the course of his employment, so far as they would relate to rights under this Act, will come to an end as provided for in Section 10. Nothing, however, affects the right to contract out of the rights given by the Common Law or the Employers' Liability Act of 1880, and all existing contracts relating to those rights, or any that may be entered into hereafter, would remain in full force.

Then as to the arbitration which is provided for by the Act in cases where disputes arise. By the second schedule which contains the machinery for settling disputes by means of an arbitrator, there can be five different kinds of this tribunal. Firstly, if a representative committee exists with power of settling matters under this statute which may arise between the employer and employed, if neither party objects the dispute shall be referred to them. Otherwise, if no agreement can be arrived at within three months, there shall be appointed a single arbitrator agreed on between the parties, or in the absence of such agreement, the matter is to go before the County Court judge of the district, who, however, where authorised by the Lord Chancellor, may appoint an arbitrator who shall have all the powers of a County Court judge and shall be paid by the Treasury. The fifth or last kind is only to be appointed where an arbitrator has died, or refused or become unable to act, and in such a case a judge of the High Court in Chambers may appoint. Any question of law which arises during a dispute may be stated by the arbitrator for the decision of the County Court judge, from whom an appeal will lie under conditions to the Court of Appeal.

There seems to be a curious omission in the provisions of the statute. By Section 4 of the schedule the provisions of the Arbitration Act, 1889, are excluded from all arbitrations under this Act. The County Court judge and the arbitrator appointed by him can compel witnesses to attend, and documents to be produced, but the

other three kinds of tribunal have no powers of this kind. Only one explanation can be given of this state of affairs, and that is the intention of the Legislature to practically compel disputes to be referred to these two official kinds of arbitrators. That they would undoubtedly be the better tribunals for both parties is beyond dispute, and it must be presumed that the statute, although giving wide scope for other means of settling disputes, leans more strongly to the forum to which it has given these most necessary powers. The memorandum of award, however, given by the committee or agreed arbitrator can be enforced as a County Court judgment.

Costs incident to the arbitration are to be in the absolute discretion of the arbitrator, and any amount awarded as compensation shall be paid on the receipt of the person to whom it is directly payable, and no solicitor or agent shall have as against such person any claim or lien upon that sum, except it is submitted as to the amount actually awarded by the arbitrator or County Court judge in respect of costs. These latter considerations would, of course, only apply to solicitor and client costs, as those incurred between the parties would, as stated, be in the entire power of the arbitrator.

We have thus attempted to indicate the salient features of the new Act. It is a statute teeming and bristling with difficulties at every point. To what extent it will be a subject of litigation only time can show, but the few points we have stated here and in our issue of last week, which are by no means exhaustive, will amply demonstrate, not only the immense importance to all employers and their workpeople of the Act, but the difficulties surrounding its application. It certainly looks as if it will be "good for the lawyers," whoever else it may benefit.

The Brazilian Railways and the Default.

The fact that the Brazilian Government proposes to pay its railway guarantees for the next three years in funding bonds is a serious matter for the Brazilian guaranteed railways. These lines are in a railway sense most miserable concerns, the only important companies being those that work without a guarantee. Not one of the guaranteed lines earns anything like the interest upon its debenture capital, and the majority of the companies operate at an absolute loss. That is to say, supposing the guarantees were to cease altogether, and the directors were bound to work under prevailing conditions, they would save money by laying up their trains and letting the line go to wrack and ruin. And in this instance we are not dealing with roads built yesterday without developed traffic, and which have been spending money with a view to such development. That was the position of many of the Argentine railways when the storm of 1889-90 fell upon them, and their recrudescence of late years has been, in a measure, the result of the money spent, perhaps too freely, but still in the right direction, just prior to the Argentine default. But every one of the Brazilian guaranteed railways given in our list below was built before 1887, and the majority have been at work for about twenty years. Nor has there been much in the way of extension, for almost without exception the lines have remained as originally projected. Whether it be due to the lack of energy in the boards, the tiresome character of the Government regulations, or the unsettled character of the country, the fact remains that the Brazilian guaranteed railways have been signally unprogressive. Scattered up and down the country, without much connection one with the other, and often without any objective point, their only advantage is that they usually connect a part of the interior with a port on the sea-board. To compare the traffic of one of these lines with a fair-sized Argentine railway is like comparing the Highland Railway with the London and North-Western. Even if comparison is made with the fine system of lines in San Paulo, which has been chiefly built up without Government guarantees, the puerile character of these subsidised roads is distressingly apparent. To show that our remarks on this point are not overstrained, in the following table we give the result of last year's working of the various Brazilian guaranteed companies :—

	Date of Formation.	Duration of Guarantee.	Net Revenue or loss on Working Line.	Received from Government as Guarantee.	Spent in Redemption of Debentures.
		Years.	£	£	£
Alagoas ...	1881	30	90	39,254	4,657

* Loss. † Accounts only up to December, 1896 ; nothing later.

The Mogyana Company is not included, as this line is guaranteed by the Paulista Company, the Government guarantee being its least important safeguard. There is also the Porto Alegre and New Hamburg line, but its guarantee is merely that of one of the States. Roughly speaking, it may be assumed that the railways spend each year the amount received in guarantee upon paying debenture interest, redeeming debenture debt, and paying dividends upon their share capital. The Bahia and San Francisco has no debenture capital, while that of the Recife and San Francisco is insignificant. In the other instances, the debenture debt is very considerable, and there appears to be little chance of its redemption before the end of the concession. Taking the value of the funding bonds to be received at their best value—80 per cent.—it is clear that the companies will receive only four-fifths of their guarantees in the next three years. The debenture capital of the companies will naturally claim to have its interest paid in full, so that the fund for the shareholders will be trenched upon severely, and when these funding bonds come to be realised it may well prove that they will only net 60 to 70 per cent. of their face value. Argentine 4 per cent. Rescission bonds, for instance, are no more than 58, and Argentina, in the eyes of some people, is supposed to have purged its offences.

The boards of the companies will be naturally inclined to fall upon the sinking funds in their time of necessity, and, by suspending these, obtain some measure of financial relief. But here again the short duration of many of the guarantees will raise a serious

obstacle to such a course. The debenture holder can only look for a chance of obtaining his principal back in full by means of these sinking funds, and many of the lines have only seven to twelve years of their guarantee to run. For holders of the debentures to permit the sinking fund to be suspended for three years would diminish the amount repaid, and so a bitter source of dispute exists. How the difficulties of the position will be met it is impossible to say. One condition ought to follow the default of the Government, and that is, that those companies which do earn profits should be allowed to retain them. Under the present system the Government takes all net profits, meantime paying the guarantee in gold. Then the companies ought to have more freedom in working, in regard to tariffs, and in other matters. The raising of the tariff in order to meet the fall in exchange has not proved so efficacious in some cases as had been hoped, but at least the boards of the companies ought to have the right to put this remedy for poor receipts into force to see whether their revenue accounts would not be thereby improved.

Reforms of this character, if permitted, can only bring slight amelioration to the position, and the fact remains that most of the companies are drifting towards the end of their concessions with such a miserable revenue at their command that the cessation of the guarantee must render them bankrupt. The default of the Brazilian Government aggravates an already unsound position, and may lead to awkward disputes. It is not, therefore, surprising to find the prices of Brazilian railway securities running away, and the following table sets forth the depreciation that has fallen on British capital invested in this form in Brazil :—

	Nominal amount of issue.	Value at price of issue.	Value at present market price.	Depreciation at present market price.
	£	£	£	£

* Increase in value.

Three or four of the railways possess issues of deferred shares, but these only represented company-promoters' capital, and they never had a serious market nor can a quotation for them now be found, so we have ignored these issues. Only one issue in the list shows any appreciation in value, and that is simply because the line is not dependent upon its guarantee, but upon an opulent local company—the Paulista.

Economic and Financial Notes and Correspondence.

Worried France.

The Ministerial crisis in France still continues and has left the country for ten days without a government. To outsiders this *impasse* looks much as if the country were ripening for another Dictator, and possibly it is only saved from this fate by the lack of any soldier, or tinsel and feathers godling of an adventurer, capable of playing the part of a Dictator with sufficient *éclat* to please the multitude. We hope the country will continue to lack this kind of saviour, but it seems probable that it will have to go through the turmoil of another general election before it can hope to have a parliamentary party numerous enough and strong enough to establish and maintain a representative government. One after another the men who have been summoned by M. Faure to form a Ministry have had to give up the attempt, because they are unable to get together enough supporters out of the fragments of parties into which the Chamber of Deputies is divided to ensure a majority for three weeks running, nay, even for three days. We must not despair of France on this account, for, as M. Guyot observes, in a very pungent article written by him in the *Siècle* the other day on that pretentious, somewhat stupid, and much over-praised book of Mr. Bodley's on France, it is to the credit of the electorate that M. Méline was unable to count on a majority in the new Chamber. "If," he says, "the electors have not given a majority to Minister Méline, in spite of all the means employed, it is a proof of their independence. They have voted as they wanted to, not as ordered. In some departments they voted for Radicals simply as a protest against the administrative and clerical alliance, which was thrust upon them." Perhaps the next Chamber might be less faction torn, at any rate the experiment will have to be tried. This one, as we have said from the first, will give a reliable majority to no party leader France now has. And the stain of the Dreyfus iniquity damages them all.

The Spanish Debt Coupon.

Nothing could well be more silly than the arrangements the Spanish Government has made for paying the July coupon on the funded debt—unless it be the lies daily concocted and retailed about the war to a population that cannot read. As the Government has really no money of any kind, except bank notes, and must therefore borrow the gold required to meet the coupon, it has decided to economise the payment

by giving domestic creditors paper, and gold to foreign ones alone. Said foreign holders of the 4 per cents. must present them, coupons and all, to financial agents. The bonds thus presented have to be stamped, and the domicile of the owner stated, and all this has to be done before the 30th inst. After that we suppose out-in-the-colds will have to take paper. It is a ridiculous arrangement, but may bring some money into the British Exchequer, because bonds presented here to claim payment of the July coupon in gold will have to be stamped with the English 10s. per cent. duty. And we may be quite sure that many a patriotic Spaniard will be able to procure an English domicile for his bonds in order to avoid fingering Bank of Spain notes. The Government had much better have thrown up the sponge at once.

The Daira Sanieh Properties.

Monday's *Times* announced that the Egyptian Government had effected the sale of these properties for £6,431,500, the actual amount of the Daira debt. Buyers will pay £500,000 in cash on August 1, to remain as guarantee until the contract has been completed, bearing meanwhile 3½ per cent. interest. In July, 1899, a further payment of £2,150,000 becomes due. Annual payments of £310,000 will be made until 1905, when the entire price will be paid off. With each payment an equivalent amount of property will be transferred to the buyers, who are bound to resell within seven years and to give half the net profit to the Government. It is stipulated that this profit shall not be under 20 per cent., and so on. The estates thus handed over to private enterprise as against State control comprise 256,000 acres of excellent land, estimated to be worth £6,850,000; also nine sugar factories, 375 miles of agricultural railroads, and other available properties. To Egypt the benefit of the sale is said to be the payment of £500,000 right off, and the extinction of a costly international administration entirely independent of Government control. Where the purchasers "get the pull" is not yet apparent.

The Baltimore and Ohio Railroad.

The plan under which this property is to be set on its feet again has now been made public, and as far as we can say at present it appears to be a thorough and on the whole equitable plan. There are to be $70,000,000 worth of 3½ per cent. prior lien bonds secured on the main line, $63,000,000 4 per cent. bonds secured by first mortgage on all property not covered by the prior lien bonds, $40,000,000 of preferred stock, and $35,000,000 of common stock, making in all a capitalisation of $208,000,000, or about £42,000,000.

This looks on the whole moderate, and if the reorganisation syndicate is able to effect an exchange of the old bonds for new in a thorough manner the Baltimore and Ohio may once again emerge from the unhappy position which past mismanagement, or worse, placed it in. Messrs. Speyer Brothers will have the business in hand here, and they are backed up by such financial strength both on this side and in America as will insure abundance of capital for carrying out the plan. They have behind them a strong syndicate which has subscribed $30,000,000 on terms that in the circumstances cannot be deemed onerous. The agents of all the loans have agreed to support the scheme, and so should the bondholders.

All the securities of the old company proper are embraced in the scheme and, so far as we can judge, are offered very fair terms. The object of the committee has been to cut down the fixed charges so that they will be well within the earning power of the road in bad years. According to the investigation of Mr. Stephen Little the average net income of the property during a period of seven years and two months has been $7,234,000 per annum, less average taxes amounting to $437,000. The real net revenue, therefore, averaged about $6,800,000, and the fixed charges under the new scheme will amount to $6,252,351 annually, thus leaving a very considerable margin even on the net earnings for the year ended June 30, 1887, which was a poor year and gave only $6,594,000. The estimated earnings for the year ending on the 30th inst., not including taxes, but including miscellaneous income, is about $7,976,000. Therefore the pruning knife has been rigorously applied, and the plan deals, as far as we can judge, with the various classes of bonds quite fairly. All get so much cash, representing arrears of interest, and they are converted into a consolidated prior lien 3½ per cent. mortgage of which they receive either dollar for dollar, or a slight premium, together with small bonuses in the 4 per cent. bonds, and in the new preferred stock. Baltimore and Ohio terminal bonds, and Akron and Chicago bonds do not receive any 3½ per cent. stock, nor do the 4½ per cent. bonds of the Philadelphia branch, but they receive fair treatment, and the two first have allotments of preferred stock given to them. Assessments amounting to $2 per share on the old first preferred stock, and $20 per share each on the second preferred and common stocks, will be levied, and the mortgages are executed for larger amounts of all the bonds than the reorganisation plan actually requires. Thus, on the present issue of prior lien bonds the surplus will be $926,910, and a right is reserved to issue an amount not exceeding $5,000,000 additional of these bonds at a rate not exceeding a million a year, after January 1, 1902. Of the second mortgage bonds there are $7,000,000 worth reserved for the new company, and $6,000,000 are set aside to repay the 5 per cent. bonds of the Baltimore Belt line. Also the company will have $5,000,000 in reserve unissued of the new preferred stock, besides some remainder perhaps of the common stock. It is thus hedged on every side pretty well, and, with upright management, ought to enter upon a career of more assured prosperity than it has enjoyed for many years. An annual audit of accounts is provided for.

More About the Oil Flash Point.

Mr. Jesse Collings, Chairman of the Petroleum Committee, has so far gained his aim that his draft report has been accepted for consideration by the Committee, in preference to that of Mr. Ure, who strongly recommended that the flashing point of petroleum should be raised to 100 degrees. This does not mean that Mr. Collings's report will necessarily be adopted; but we fear it must be taken to indicate that the majority of the Committee do not attach so much importance to a consideration of the flashing point of oil as they ought to do. Mr. Collings thinks that if they raised the flash point they would increase the price of oil, and thus inflict a hardship on the poor people who mostly use it. Even if that were true it might not be wise to insist on cheapening the facilities for killing people; but it is not true, as the Petroleum Committee can easily find out for themselves; for the Russian oil, of which there is an abundant supply, has a flash point of 100 degrees, and costs no more than the coarse refuse called oil of the Standard Oil Trust. This latter, we believe, is a product which Americans themselves decline to use for purposes of illumination; and so the dangerous stream has been turned on this country, and thus far our legislators seem to have been wonderfully attentive to the wishes of the Trust in respect to the flash point and other matters.

For, although Mr. Jesse Collings considers it would be a novelty in English legislation, Sir James Fergusson, who is in a bit of a difficulty just now before another Committee, could tell him that, not so many years ago, the flash point of oil in this country was fixed at 110, and that it was only by a series of very suspicious manœuvres that it was ultimately lowered to 73. Sir James Fergusson then occupied the position Mr. Collings does now as Under-Secretary for the Home Office. Three leading chemists were appointed to consider this question of the flashing point, whether it might be lowered below 110

degrees, to which the Petroleum Association objected. It was agreed that it might be lowered to 100 degrees if an efficient tester were used. But the Petroleum Association disliked this efficient tester, and Sir James Fergusson, assisted by Professor, afterwards Sir F., Abel, sanctioned the use of an inferior one, which Sir F. Abel some time after declared to have proved "untrustworthy, unreliable, and susceptible to manipulation." We cannot go over the whole strange story as told by the *Star;* but the upshot was that, by a process which Sir James Fergusson and the Petroleum Association can best explain, the flash point was reduced to 73 degrees. This was in 1879; and since that time the number of oil fires has steadily increased. Last year there were forty deaths from lamp explosions alone; and these explosions were all attributable to the low flash point, which Mr. Jesse Collings, in his wisdom, wishes to make permanent.

It is mere puerility to say that the loss of life from the low flash point has not been satisfactorily proved, for to our mind nothing has been more clearly established, and the evidence laid before the Petroleum Committee on this point is strong enough to satisfy any person of ordinary intelligence. But Mr. Jesse Collings seems always to have the fear of the Standard Oil Trust before him. If he is anxious not to increase the price of oil—a very foolish anxiety, as we have shown—he has no such scruples in regard to the price of lamps, about which he proposes to lay down a series of regulations which cannot be enforced, and would not, even if enforced, prevent explosions where low-flash oil is used. Mr. Collings professes to make these proposals on the recommendation of the Oil Trade Protection Association, but why does he carefully suppress the fact that that association itself declares that improved lamps will be of little use without the raising of the flashing point? We cannot understand the persistency with which the manifest dangers of the low flash point are ignored by persons in authority. Nor can we understand why, when considering the question of testers and the flash point, Sir James Fergusson listened rather to the advice of the Petroleum Association than to that of the Fire Protection Committee, and the strong representations of such an eminent authority as Professor Attfield. It almost looks as if, behind it all, there was some occult authority exercising an influence prejudicial to the public interest. If the present Petroleum Committee rest content with the 73 deg. flash point, and the House of Commons accept its recommendations, then the long agitation will have to be continued until the labours of this futile committee have been overturned, and the flash point has been increased to at least 100 deg.

Through the *Times* of Wednesday, Mr. Jesse Collings gives what he seems to consider a crushing reply to his critics. There is, he says, no legal flash point for oil as an illuminant; the flash point is merely to fix "the dividing line between petroleum oil and petroleum spirit." This is sad and rather futile quibbling. It is of no consequence what the legal meaning of the flash point may be. What we know is that oil with a flash point of 73 deg. is dangerously explosive; that the use of it as an illuminant has caused a great many deaths in London alone during the last few years; and that Parliament ought to prohibit the use of such oil as an illuminant in order to avoid continued loss of life from the same cause. If, as Mr. Collings says, somebody has made a mistake as to the legal meaning of the flash point, is that any excuse for our permitting the continuance of a state of affairs which we know leads to enormous loss of life? Mr. Jesse Collings was not elected chairman of the Petroleum Committee to give us a legal definition of the flash point; but to find out the best means for avoiding a loss of life which has shocked everybody but the Standard Oil Trust. If Mr. Collings was in the pay of that strange corporation he could hardly serve its ends more zealously than he has recently been doing.

The Great Northern and City Railway.

It is a pity that this company failed to get its capital subscribed, but we are bound to say that it was not put before the public so attractively as it might have been. Professing to be a sort of relief line to the Great Northern, there was yet no Great Northern director on the board, and the money was asked for without any guarantee of interest from the big company whose trains it was to run straight into the City. In these circumstances, it is not to be wondered at that the market abstained from underwriting the share capital, or that the applications made by the public were few in number—less than 900—and small in amount. The line, however, is one which ought to be made, and for which a great suburban traffic should be forthcoming when made. We hope, therefore, that the Great Northern board may see its way to assist, so that the money may be found on favourable terms. Failing it—and we can understand the reluctance of directors, the capital commitments of whose own line are so threateningly large, to have any outside obligation thrust upon them — the Great Northern and City Company might apply to the Midland and see what it can do. It also wants some relief for its Kentish Town Moorgate-street traffic, and might be glad to give assistance to such a line as this was meant to be, particularly with the Sheffield—we beg its pardon, the Great Central Company—about to come into competition.

More Capital for the Chatham Company.

We still wait for the announcement of the fooling arrangement—or should it be "pooling"?—between the South-Eastern and Chatham Companies. The suspense is delicious for the jobbers: the "yea" and "nay," and "to-night" and "to-morrow" rumours give them many little ups and downs whereby money may be made. But we have not had to wait for proof of the Chatham Company's necessities. As we have more than once sadly opined, the extravagance of the directors in repainting and repolishing Camberwell Station, and in making a beginning in Brixton, was sure to have a terrible effect on the capital account, and lo and behold! out came these said directors with a demand for £300,000, to be raised in 3 per cent. debenture stock, offered at 103. And they will get the cash, too, such a merry, easy-going world is it for those who know how to humour it.

The American Treasury Position.

The position of the American Treasury is a matter of interest to us just now. On June 1, the net cash balance was $195,754,815, a decrease in the month of over $20,000,000. The amount of free gold was $171,818,055, a decrease of $9,420,082. The excess of expenditure for the month was nearly $18,000,000, and for the eleven months $24,531,337. The extraordinary expenditure on account of the war, which is made apparent in the Treasurer's statement for May, will show a very large increase from this time forward. The national receipts for May prove to have been $30,074,818, or about $300,000 over the total of the same month of last year; while the expenditure reached $47,849,900, that is to say, nearly $18,000,000 in excess of the revenue. For the eleven months of the fiscal year the incomings have been $371,001,768, against $310,600,020 for the same period of 1896-7. Customs receipts contribute $135,260,000, a decrease of $19,000,000, due, of course, to the Dingley tariff, which is proving a fine revenue reducer; internal revenue $153,260,000, an increase of $20,000,000; and miscellaneous $82,460,000, an increase of nearly $60,000,000 referable to the receipts from the sale of the Pacific railroads. The expenditure has aggregated $395,523,105, an increase over 1897 of $53,000,000. Except Indians and interest on the public debt every item shows an increase. That for the War Department is the largest, amounting to over $36,000,000, the greater part of which was incurred for the army. The increase for the navy was about $18,000,000, and for pensions $5,000,000. It is pointed out that notwithstanding the large expenditures made necessary in the

War and Navy Departments in consequence of the war, the expenditure for pensions, which may be regarded as regular liability, is equal to more than 33 per cent. of the entire disbursements, and after the present war has been terminated we can look for still heavier annual appropriations under this head. The condition of the national debt is as follows:—Interest-bearing debt, $847,367,410; debt on which interest has ceased since maturity, $1,264,850; debt bearing no interest, $384,896,315; total $1,233,528,575. This, however, does not include $563,799,933 in certificates and Treasury notes outstanding, which are off-set by an equal amount of cash in the Treasury. But it is considerable enough, and the new war loan now being floated will increase the interest-bearing portion by 25 per cent.

The Rock Life Insurance Company.

Last week a stupid blunder slipped into our note on this company. Happily it does not affect the essential point raised therein, but none the less must it be set right. We said that the company had bought back half its shares at a price of £7 10s. apiece or something like that, and the context implied that these had cost £1,059,000, which, of course, is an absurdity. The company did buy back its shares in the manner described, but these would only have cost it £750,000 had they all been bought at the price mentioned by us, which was an outside price casually mentioned. As a matter of fact, however, these shares really cost only £546,000, so that their average price must have been much less than £7 10s., and the £1,059,000 which figures in the balance-sheet represents, all but the paid-up capital of £100,000, accumulated profits out of which the share purchase was made. The company, in short, dates from the good old days when insurance business was carried on for the benefit of the insurer not the insured. Hence this immense surplus, and it has been suggested to us that the simplest way to lift the company out of its more or less water-logged position would be for the directors to employ some portion of the balance of this large accumulation of money in purchasing the other half of the share capital, and cancelling it, so as to turn the "Rock" into a mutual company. By doing that, the whole of the profits would then accrue to policy-holders instead of two-thirds, as at present arranged, or, allowing for half of the capital bought in, the profit on which is the policy-holders' property, five-sixths. Do the policy-holders receive this profit in reversion, or in cash?

Sir James Fergusson, the Post Office, and the Telephone Company.

How far do we owe it to Sir James Fergusson, M.P., that the Post Office officials have for the last six years been strengthening the monopoly of the Telephone Company, and doing their utmost to discourage competition in this branch of the public service? The question is one which everybody who reads Sir James's evidence before the Telephone Committee must put to himself. The facts, so far, seem to be these. In 1892 Sir James Fergusson was Postmaster-General. Just before leaving office he presented, on behalf of the Post Office, an agreement contemplating an arrangement of telephonic exchange areas to the chairman of the National Telephone Company for signature. The Chairman at first refused to sign, but subsequently did so on receiving, as alleged, an assurance from Sir James that the revision of the areas would be conducted in a reasonable manner.

This assurance was not embodied in the agreement; but it, or something like it, seems to have become well known to the Post Office officials having charge of this business, and they appear to have adopted the view that they were under some obligation at the request of the company to extend these areas though the agreement said nothing on the subject. In fact, the assurance, understanding, or whatever it was, was looked upon as tending to discourage competition; and so it was acted upon throughout to the great benefit of the Telephone Company, though certainly not to the advantage of the public. How did this extraordinary understanding arise? It must be admitted that Sir James Fergusson was quite frank in giving his evidence. He did not know of such an understanding. He could recollect of no conversation which could have justified it; but he admitted he had a relative on the board of directors of the National Telephone Company when the areas were being revised, and in 1896 he joined the board himself.

Sir James's own view was that competition should not be encouraged if the company did their duty, seeing that they would become delegates of the Post Office; but he had no recollection of anything being said on the subject. Then how could the active belief in this non-competition understanding have arisen? Who instilled it into the minds of the Post Office authorities? The agreement itself expressly excludes monopoly and reserves the right of the Post Office to compete with the company or to license others to do so. Yet the postal officials, in arranging about the areas, went beyond the agreement to an "understanding," the origin of which nobody so far has been able to explain, and in their new arrangements solemnly, in the teeth of the signed agreement, discouraged competition in the interests of the company. We take it for granted that the Telephone Committee will probe this matter to the bottom. It is a duty they cannot escape. As for Sir James Fergusson, we imagine that by this time he is thoroughly convinced that a Minister of the Crown, presiding over a department so commercially important as the Post Office, ought not to enter into dealings with a company on whose board sits a relative of his own; or, if circumstances should compel him to do so, that he should be careful to see that the resulting agreement is alone consulted by the postal officials, to the exclusion of mysterious "understandings," which can be used to set aside definite and precisely worded contracts.

Electric Lighting Shares.

Quite apart from the question whether the Marylebone Vestry obtains its Bill or not, we think the decline in the prices of London electric lighting shares has been overdone. There is too great a tendency at the moment to judge them harshly, as before there was a tendency to overrate their excellence. Take, for instance, the matter of the vendors' shares and their obliteration. Although we have not agreed with all the schemes, and personally detest founders' shares as financial enormities, yet it should not be forgotten that the founders in the case of these companies did far more for them than the drones who usually get hold of such shares do. In the case of the electric lighting companies we believe the founders' rights represented many services and outlays incurred in the promotion of the concerns which the Board of Trade would not permit to be placed to capital account, as would have certainly been done in any other type of company. Then the founders' have in each case had to subscribe for a large amount of capital, with an attendant amount of risk, only making their profit by the premium in the market, when premiums came.

But to go back to the matter of the depreciation we find that the shares of the leading companies have fallen to the following extent this year:—

	Highest Price.	Present Price.	Fall.
Charing Cross and Strand	15	11½	3½
Chelsea	12¼	8	4¼
City of London	30¾	25½	5¼
County of London	16	12½	3½
House to House	11⅞	8⅛	3⅜
Metropolitan	21⅝	14½	7¼
Notting Hill	20½	15½	5
St. James's and Pall Mall	19½	15½	4
Westminster	18¾	14¾	4

Such a decline does not seem in our opinion warranted, even if the Marylebone Vestry carries its Bill without modification, of which we are by no means certain.

For, after all, there are only two other companies working in London besides the Metropolitan—the House to House and Notting Hill—which have their districts to themselves. It would be a very different matter for the local authorities in Westminster, the Strand, or any of those important districts, to apply for power to light the area under their control, when two companies are already working in the same area. For one thing, the mere matter of public convenience must be studied, and then the existing companies cannot be obliterated by a stroke of the pen. The Vestry may, therefore, easily shrink from embarking upon a highly competitive business, when, by waiting quietly, the concerns so working will drop comfortably into its hands at practically break-up value.

Finally, the great cheapening of the electric light which is so near at hand will cause its use to become more general, and it is open to question, quite apart from the point of justice, whether in a district like Marylebone the Vestry and a company will not both find plenty of work for a long time without encroaching too much upon one another's business. It takes a great deal of time to build up a business of this kind, and the local authority, as the premier London Vestry in this matter has found out, is obliged to work cautiously lest it find an ugly deficit in its accounts, which, although it may be filled up by raising the rates does not lead to amicable relations between the ratepayers and their representatives. Holders of electric lighting shares, therefore, should not be too eager to get rid of them, for there is at the least a fair prospect of a remunerative business being obtained, while the competition may not prove so terrible as some imagine.

The Waterloo and City Railway.

Within the last few weeks the stock of this company has fallen from 139 to 116 or so without any apparent reason. Why should holders have all at once begun to discover that this line is not going to be so prosperous as was expected? We are not sure that holders in the ordinary sense did discover this, and rather believe that the selling comes from what we may call the middlemen or intermediaries who have not been successful in feeding out their subscription amounts to the public. If this is the case these people deserve to suffer because there can be no doubt that the price of the stock was driven much too high. Nothing in the South-Western Company's guarantee, nor yet in the prospectus of the line, warranted a price of 139 nor yet of 130 for this stock, and it could never have reached such a height except by manipulation.

The time is at hand when the weakness of the company's position as an immediate dividend earner must become apparent. On the 27th of next month the liberty to pay 3 per cent. interest out of capital comes to an end, that liberty having been granted for five years only, which period expires then. It was, of course, expected that the line would have been in full working order before this date, but its construction has been in places more difficult than was estimated, and, worse than that, the company has been imprudent in its arrangements for obtaining a terminus in the City. It made a contract with the Central of London Railway, now in course of construction, in virtue of which it is to share that company's terminus at the Royal Exchange; but unfortunately this terminus is still a long way from completion, and consequently the Waterloo and City Company finds itself in the position of having a road with no City outlet to it. We believe a temporary station is being hastily constructed, somewhere about Bucklersbury or the Mansion House, but it will be a station without lifts, and therefore one to be avoided by elderly and gouty City gentlemen on their way to and from their offices.

No wonder that the company's stock has gone down amid such circumstances. We believe it will go further down still before it reaches the price at which an investor would be safe to put money into it, for some time must elapse after the line is in full working condition, and years may slip past before the dividend upon the share capital can get much beyond the 3 per cent. guaranteed minimum. It may be well to remind investors that, under the contract with the South-Western Railway Company, this 3 per cent. is a first charge on the gross receipts for all the capital, share and loan, raised by the company, and doubtless in the course of time the 45 per cent. of the gross receipts which the South-Western is bound to pay as a minimum to the Waterloo and City Company will give the ordinary stock more than this 3 per cent., but it is too early yet to counsel investors to purchase on that distant prospect.

The Frank Jones Brewing Company.

At the meeting of the shareholders of this company, held on Tuesday last, an immense amount of virtue was displayed. So great was it that could it be condensed, bottled up, and preserved in ice it would serve any ordinary humdrum company for half-a-dozen years at least; but there was need of it all on this occasion, for the directors had to confess that the company was unable to pay any dividend on its ordinary shares. The gross profits fell to £76,500 for the year, a decrease of £29,000 or so on those of the previous year. But such as it was it was an honest profit, the chairman and other directors repeatedly assured the shareholders. Depreciation had been allowed for to the full and repairs and renewals had even increased £2,155 on the figure for 1896. In all their explanations, however, the directors carefully omitted any mention of the over-capitalisation of the company. It is one of the Trustees, Executors, &c. Corporation's productions, and in a manner did that promoter organisation credit, for, unlike many of its other babies, the Frank Jones Brewing Company has paid dividends on its ordinary shares every year until now. Indeed, for the first five years of the company's life it bravely gave 10 per cent. to the ordinary shareholder, then, in 1893-4, the dividend fell to 7 per cent., and in the following year to 6 per cent., jumping to 8 per cent. in 1895-6 only to fall again to 5 per cent. in 1896-7, and now to zero.

Low prices for beer, incident to greater competition, are assigned as the cause of this decline; anything, in fact, except the true cause, which is that the money asked for the business was at the outset about half a million more than it ought to have been. If the company had been started with a capital of even a million it might have defied competitors, and have held a fair position as an investment through evil times and times prosperous, but with £1,300,000 it has been handicapped against concerus more lightly burdened, and we fear there is no substantial prospect for its shareholders of a speedy return to 10 per cent. The end, in spite of the directors' optimism, is much more likely to be reconstruction. The chairman declared that the additional tax of $1 per barrel, making $2 in all, to be now levied upon beer in the United States is to be universally charged against the consumer. This also is great virtue, but we have not much faith in it. The power of the brewer to do this will be regulated by competition, and it need not surprise the shareholders of this company should they this time next year be told that owing to the pressure of this additional taxation profits have been so much reduced as to put the preference dividend in jeopardy.

The Municipal Trust.

Mr. Auldjo Jamieson has taken the bold course of issuing a circular announcing his resignation from the board of this company, and every one who favours sound finance must cordially endorse the position he takes up. At the time when the reduction in capital was proposed we thought his views were a little strained, but the action of the board since certainly justifies him in his present action. The proposal as to the capital was that £57,540 be written off the preferred stock, and £89,380 off the

deferred stock, thus reducing the aggregate from £511,150 to £364,230. Various difficulties arose that prevented the scheme being carried through before the accounts were made up on February 28 last, and despite this fact the board proceeded to divide the revenue up to the hilt in paying a dividend of 3½ per cent. on the original preferred stock. Yet a considerable amount of depreciation had accrued in the twelve months, which, if allowed for, would have swallowed up more than half the sum distributed in dividend, and the auditor drew attention to the serious matter thus involved. The Trust is ploughing through a world of trouble in connection with its American water and light companies, and this is certainly not the time to weaken its financial standing.

A Touching Lesson on "How not to do it."

Poor Spain! How chivalrous in "honour"; how destitute of foresight! How swift to dance on top of "the golden hours," how slow to think of, slower yet to prepare, for the "rainy day." Yet how perilous the position of a nation whose pointless struggles against a desperate fate only provoke our pity—who wails for peace, and is yet timidly doubtful whether "honour" is sufficiently satisfied to allow her to accept it! Spanish statesmen, with full knowledge of the country's poverty and military and naval unpreparedness, dreaded this war, yet dared not avert or avoid it for fear that revolution would undo them. Even revolutionists, however, hesitate to move; for, if they see how the whirlwind may be let loose, they do not perceive the power that is to restrain or guide it. Events may yet force revolution, probably will; but who is there that can exert the strength to escape from the subsequent maelstrom, and assert the power of ruling the miserable warring elements that may remain? Was ever nation in more desperate case—more paralysed by fear—not the wretched fear of the coward, but the timidity born of the absence of that higher courage which would dare boldly to accept defeat that is inevitable in order to save not honour alone, but some of its worldly possessions and support? Is prudence always cowardly or devoid of honourable feeling? Has Spanish administration been so excellent in the past that she can retrieve her honour only by completing the ruin that her own misgovernment has begun?

Take her relations with the Philippines, for example. What has made them so easy a prey to the American navy and the native rebels? It is pitiable to read the recent accounts of how the rebellious natives have closed round the Spanish troops and driven them into Manila to their last resort in the Citadel—poor soldiers fasting, yet fighting and raging lest they have to submit to those contemned insurrectionary natives! And the home government, when it might have done something for the safety of the Philippines, shirked its responsibilities. A previous governor of the colony has told the Madrid Cortes how he appealed for reinforcements to save the Archipelago, and received no reply to his appeals. An arrangement was then made with Aguinaldo, the rebel leader, by which he quitted the colony, and the revolt was pronounced at an end. But he now insists that certain reforms were promised and have never been executed, and that so he is free in honour to return and fight the question out under more favourable auspices. Sharp questions have been asked in Madrid as to who was responsible for not sending the reinforcements asked for before the war broke out; but they receive no answer. Ministers repudiate the alleged promise of reforms, as if the mere suggestion of reform must be resented as an insult. Spanish honour takes no note of progress and advancement. It is a product of two or three hundred years ago, and feels itself bound to reject whatever has happened since then. The rights of the colonists is a phrase apparently without meaning to Spanish statesmen. They know of no rights but those of the conqueror; and the present war is their Nemesis. They are giving us a touching lesson indeed on "how not to do it." They left the Philippines to their fate; and that fate has been to fall into the hands of the despised natives.

Spaniards in Madrid, however, seem now to have recognised that their army in the Philippines has been beaten. Whether they see yet that the colony is lost to them is doubtful. They have been appealing to Germany to "name her price" and take it, if she would only bring the Triple Alliance to the help of Spain, as if two at least of the members of the Triple Alliance at present had not enough to do to keep themselves afloat to prevent active interference in the affairs of other nations. But appeals of this sort seem to soothe the Spanish imagination. It has a look of doing something. Of course, the world must understand that Spanish honour cannot so far demean itself as to make even a frank and rational proposal to such a foe as the United States. But the "Powers" ought to know the sensitiveness of Spanish punctilio. Why do they not make a movement for saving Spain from humiliation? The Spaniards probably begin to feel aggrieved because the Powers remain stolidly immobile. Unfortunate Spaniards! They are ready to believe anything; they refuse to think of defeat until they cannot longer ignore it; and then only regard it apparently as a temporary discomfiture. It might be amusing if it were not so sad—so infantile. Living apparently in a world of "make believe," of illusion and delusion, they have let the world and its opportunities slip; and now, when action is forced upon them, they seem equally wanting in brains and money to help themselves. Their "honour" pricks them only to stand and be thrashed, because blood-letting is somehow considered necessary for saving that fastidious punctilio of honour which, combined with childish ignorance and careless impotence, has been the plague and the ruin of Spain.

New South Wales Trade Statistics.

The following letter states the case for these statistics fairly enough, but it does not convince us that the figures are true, nor yet that the colonists can afford to spend at the rate the import totals imply. All is, perhaps, really explained by the enormous total of the colony's debt—a total, we venture to think, deserving a much stronger epithet than "regrettable":—

To the Editor.

Sir,—The apparent high rate of imports may be accounted for. New countries lack more than old ones: thus Western Australia imports per head of population are over double those of New South Wales. Colonial wages being probably double those paid in England, the people spend liberally. Private expenditure in New South Wales is estimated at £8 per head higher than the United Kingdom, and £5 per head higher than the United States. Again, the declared value of imports in Sydney, if they cover freight and charges, would be much higher than at the London port of shipment, and this should be discounted in comparing British and Colonial expenditure per head. Regarding the high rate of exports per head, the staple exports, 1896, were wool, ten millions sterling, gold and specie six and a half millions. As wool is a high-priced item, say 9d. per lb., it alone to one and a quarter million of inhabitants gives £8 per head, and if the United States export staples were wool values they would amount to six times more than they do, so that a comparison between the two is not fair. *Re* wool prices being taken at London rates, more than half the wool is competed for at auction by foreign and home buyers, so that the reason is not clear why London prices should be taken; but the charges, I take it, were deducted.

After seasons of drought the colony usually enjoys good seasons, and with the elasticity of youth bad times are soon recovered from. The public debt of New South Wales is sixty-one millions, and its amount is regrettable, as the country, the grand free gift of England, has potentialities for wealth with but moderate borrowing. Thirty-seven millions of the debt is in the State railways, which are worked by the Government, and yield a net profit of one and a quarter millions sterling per annum, or 3¾ per cent. on the capital expended. The Crown lands yield annually over one million sterling for rents and instalments of purchase money, thus lightening the burden of taxation. Enclosing tables New South Wales trade, 1896, also a book on railway system of the colony, I am, Sir, your obedient servant,

Colonist.

St. Leonards, June 21, 1898.

Mr. John Miles (a director of the New River Company) has been elected to the vacant seat on the board of the Gas Light and Coke Company, caused by the death of the Hon. Henry Noel.

Stock Market Notes and Comments.

So much is being said by us elsewhere this week on the Stock Exchange, and on incidents connected therewith, that it would neither be useful nor expedient to make a long discourse under this head. We could not do so if we tried, because week by week the markets grow thinner, less substantial, and more devoid of incident. Going round the City one hears nothing but grumbling, and if experience did not teach one to know better, the feeling created would be that Stock Exchange business was going to wrack and ruin—ending in a knock-out sale. Nothing of the kind is happening or going to happen. All that the grumbling means is that we have a little more dulness, perhaps, than summer usually brings, and that the volatile minds of the market are somewhat more depressed than usual in consequence.

The wonder to us always is that markets keep so firm and steady as they do with so many causes of depression influencing them from every side. So well are prices supported that the victory of the Silver Party in the United States has done nothing to depress American railroad securities, nor yet the collapse of the Leiter wheat corner. Buying here has unquestionably been checked by these incidents, and the latter especially has forced provincial operators for the rise to sell some of their favourite United States stocks, as well as Grand Trunk and Canadian Pacific issues, but there has been no important decline, except in the "Trunk" market, and we see no indication that any serious decline is about to take place. So far as outward appearances go, markets seem likely to drag along in much their present position, one which only gives rise to daily movements out of which it is hardly possible for the smartest jobber to make "a turn" for himself. The Canadian "rate war" seems to have been worked for all it was worth, and when it does come to an end, as we are periodically told it has, there may be no gamblers left to care.

But if American securities can be steady in spite of adverse circumstances, and of a Spanish war which shows no sign of ending, what shall we say of the stocks of France, Italy, and Spain; these surely are not worth their present quotations, for each one of these countries seems to be charged with explosive elements that might burst and work devastation upon their "credit" respectability, of which some of them have little left. Well, for one reason, there is nobody doing much in any of these securities at present. The Paris market is in a state of suspended animation, and we do not expect to see the ejected swarm of its outside brokers, to be organised in Brussels, in full working order before September or October. Dealings being in this way stopped, or nearly, there is not much to influence prices, as we in this country do not possess enough of any of these stocks, except perhaps Italian, to "bang" and "dint" market quotations with. It is well for us that we are not heavily committed to Spanish bonds or Italian Rente, and not bad for us that we possess comparatively little French securities. A storm is unquestionably gathering amongst the democracies of the Continent the effects of which no man can in the least foretell, and we may be thankful if we are able to stand clear while the tempest rages. No matter where the eye is turned on the Continent indications of coming trouble are seen to abound; whether in Russia with its plots, in Germany, with its rapidly triumphing Socialism—a Socialism which means the subversion of empire and of public order—in Austria, storm-tossed by the fragments of races hating each other with a perfect hatred, in France, where no party in the Republic seems able to develop strength enough to take control of its destinies, in Italy, where a crisis has almost been reached that compels the King to choose between absolutism and abdication, and in Spain whose fate needs no description. Clouds and earth tremors are seen and felt everywhere. Yet amid all these indications of approaching disturbance and upheaval stock markets remain calm and prices continue good. It is wonderful, the greatest testimony to the power of credit to defy the elements, so to say, the world has ever witnessed. Should, however, this mighty structure of pure credit be broken down at any one point—it is better perhaps not to go into that just yet. Let us look cheerful and whistle for the next "boom." "But the amount of money some fellows must have lost!" What of it? Let us make believe they haven't.

We have still nothing to say about mine shares. Renewed activity cannot be predicted in them, nor yet another collapse, unless the "New Courtly" and other selling of De Beers means something more than a mud-rush, or the scuttling of the life directors after the fashion set by the Consolidated Goldfields "buy out." The market, though, is dead. People are sitting on what they have, hoping against hope, or, in a few cases, thankful that their investments are still yielding such interest as they do; but confidence and energy are gone and the dreams of wealth are over. It would take a cataclysm, like the discovery that what was left in De Beers was *all* mud, to rouse the "Kaffir Circus" out of its discontented somnolence. Some day that news will doubtless come, since diamonds do not grow on mulberry trees—to use Mr. Cecil Rhodes's favourite simile—but we do not expect it quite yet and De Beers shares may go up again. What we more immediately wait for is the next display of fireworks in the "London and Globe" finance group.

In the miscellaneous market the inflated capitals of so many of the recent companies, Hooley's and others, are gradually sinking to their proper value, and in some instances may go below that value before all is done. We see nothing at all worth buying yet amongst that class of security. Let the underwriters and syndicates bear the burden and the loss, and wait. Opportunity will yet come, where companies have vitality; where they have none it is better for the public not to be in at the death. And deaths will be pretty numerous before long in this region of the promoter's activity.

Critical Index to New Investments.

NOTTINGHAM JOINT STATION STOCK.

The Great Northern and Great Central Railway Acts of 1897 authorised the constitution of the new passenger station at Nottingham as a separate undertaking under the management of a committee appointed by the two companies. Authority was given to raise a separate capital not exceeding £1,000,000, the interest being guaranteed by the two companies jointly. The amounts payable by the two companies will be rent and a working expense taking priority of their interest and dividends. The net earnings of the two companies distributed last year as interest and dividend exceeded three millions sterling. Messrs. Glyn, Mills, & Co. invite subscriptions for £750,000 3 per cent. stock at the price of 107 per cent., interest being payable February and August. Being guaranteed in perpetuity, the stock takes high rank and is a trustee stock. At the price it yields £2 16s. per cent. and will be readily taken. Shareholders in the two railway companies will receive first consideration.

LONDON CHATHAM AND DOVER RAILWAY COMPANY.

Tenders will be received by the board up to 10 a.m. on Wednesday next for £300,000 of this company's 3 per cent. debenture stock, the minimum price being 103 per cent. In 1897 balance of net revenue after deducting all interest accruing on existing debenture stocks and other fixed charges, amounted to upwards of £357,000. Present issue, which will have prior claim on balance of net revenue in future years, is understood to be for the purpose of taking up Lloyds bonds, and will exhaust the company's borrowing powers.

TYNE IMPROVEMENT REDEEMABLE STOCK.

Issue of £500,000 3½ per cent. stock redeemable at par between July, 1918, and July, 1952, inclusive. Messrs. Barclay & Co. are instructed to receive tenders up to 2 p.m. on Thursday next, the minimum being par. The commissioners are authorised to borrow £4,800,000 of which they have borrowed £4,253,631, and of this all but £107,080, which has priority, ranks *pari passu*. The gross revenue of the Tyne Consolidated Fund has grown from £306,505 in 1893 to £346,617 in 1897, and the surplus revenue from £43,167 to £59,427, while as to the trade of the Tyne the imports have steadily increased from 1,697,928 tons in 1882 to 2,015,830 tons last

year, and the exports from 9,770,215 tons to 13,779,830 tons. As an investment the security is sound but does not warrant any fancy premium. The tenders were opened yesterday and amounted to £525,310 at prices varying from the minimum to 110, one tender for £300 being put in at this price. Tenders at £100 received about 94 per cent. and those above in full. The average price obtained was only £100 3s. 2d.

W. BUTLER & CO., LIMITED.

Having a share capital of £450,000 and £100,000 of 4½ per cent. first mortgage debenture stock, redeemable January 5, 1906, at 105 per cent., the directors offer for subscription an issue of £250,000 4 per cent. mortgage debenture stock at 105 per cent. Interest is payable January and July and the stock is redeemable on six months' notice from January 5, 1913, at 110 per cent. Company was registered in 1891 to take over the private partnership of W. Butler & Co., brewers and maltsters, Springfield Brewery, Wolverhampton, and since then the business has grown considerably, the present issue being made to pay off existing loans and to provide for further extension as opportunity offers. Stock is a first mortgage on properties, freehold and leasehold, acquired since May, 1891, and which have cost the company £301,630. Assets of the company are stated at £842,221, of which £547,738 represents freehold breweries and properties. Net profits for past three years were £40,777, £48,810, and £55,228, the average for the last seven years being £43,842 per annum. The business is described as one of the oldest established, and like other brewery properties seems to have been worked up by the continued purchase of public houses at high prices. The present issue of debentures, however, appears to be fairly secured as such things go

YATES'S CASTLE BREWERY, LIMITED.

The existing company was incorporated in 1896, and took over a company doing business in Manchester, Liverpool, Birkenhead, Lancaster, &c. The share capital, fully issued, amounts to £250,000, and there exists £100,000 5 per cent. first mortgage debentures, and £75,000 4½ per cent. mortgage debenture stock, both redeemable in 1902. Company now offers £100,000 4 per cent. irredeemable mortgage debenture stock at par, part of a total of £350,000, of which £175,000 can only be issued to redeem existing debenture stocks. Price of the new stock is par, and interest is payable January and July. It will be secured by a first mortgage on certain freehold and leasehold properties, not covered by the present trust deeds, costing £150,000. Assets in the last balance-sheet were stated at £496'670, and profits for past three years have averaged £26,344, while the interest on the whole of the debenture stock, including that now issued, will require only £12,375. In view of the debentures ranking before this issue being paid off in three and a half years, the stock now offered looks well secured.

J. MARSTON, THOMPSON, & SONS, LIMITED.

From the prospectus it appears that J. Marston & Son, Limited, of Horninglow Brewery, Burton-on-Trent, recently acquired the business of John Thompson & Son, Limited, also of Burton-on-Trent. For the purpose of providing the cash portion of the purchase money, and for paying for other recently acquired properties, there is now issued £160,000 4½ per cent. first mortgage "A" debenture stock at 102 per cent. It is redeemable at 110 from July 1, 1920, on six months' notice. The security seems enough at present. Profits for last year were £32,824, interest on the existing debenture stock and mortgages and on the present issue will require but £11,648, and thirst abides.

DAVEY, PAXMAN, & COMPANY, LIMITED.

The London Trust invite subscriptions for an issue of £100,000 4 per cent. first mortgage debenture stock in this company, at 102 per cent., redeemable at 105 from January 1, 1910, on six months' notice. Interest January and July. The business is that of engineers and boilermakers of Colchester, and a considerable business is done with the Admiralty, War Office, India Office, and with colonial and foreign Governments. It has become necessary to erect new shops, and to provide additional plant and working capital, for which £30,000 of the present issue will be appropriated. Share capital is £250,000 in £10 shares, of which 15,000 are taken by the vendors and the remainder held in reserve. Assets comprise freeholds, works, plant, &c., valued at £77,867 and stock-in-trade, cash, bills receivable, &c., at £67,265. No profits are published, but an accountant certifies that average annual profits, without deducting interest on capital, for the last four years are sufficient to pay debenture stock interest more than four times over. Purchase price is £221,400, of which £71,000 will be cash. In the absence of figures regarding profits it is not possible to judge whether the business is flourishing or declining, but apart from this the debenture stock looks a fair investment.

BAKU RUSSIAN PETROLEUM COMPANY, LIMITED.

This company is formed to purchase and amalgamate as going concerns petroleum properties owned by Messrs. G. M. Arafelloff & Co. and Messrs. Boudagoff Brothers & Co., consisting of 260 acres in Southern Russia. The purchase price is £1,250,000 entirely in cash, and the capital is £1,500,000 in £1 shares in equal parts of ordinary and 5½ per cent. cumulative preference. Sir James Kitson, Bart., is the chairman, and himself and three other members of the board are directors of the Russian Petroleum and Liquid Fuel Company, the shares of which were recently run up so high that they had to be divided. Although the agent in London of the Russian Ministry of Finance is satisfied that the company has now complied with all the requirements of the Russian law, a definite arrangement has not been arrived at. Even if it is, and the fields should turn out to be worth the enormous price asked for them, the venture is highly speculative and should not be touched except by those who care to risk their money.

PRIMITIVA GAS COMPANY OF BUENOS AYRES.

Messrs. James Capel & Co. invite subscriptions for £200,000 5 per cent. first debentures, being part of an authorised total of £300,000, at £101 per debenture. Interest is due June and December, and principal and interest are payable in London in sterling. Debentures are secured by a trust deed whereby they become a first floating charge on the entire undertaking. They will be redeemable by a cumulative sinking fund within twenty years, but they may be purchased and cancelled at or under 105; otherwise will be drawn at this price, at which the company has the option to redeem the whole at any time on six months' notice. The company was formed in 1855, and is said to have an unbroken record of success Share capital $4,000,000, national currency, and the dividend, which was 15 per cent. for 1892, has steadily advanced to 24 per cent. for 1897; in addition to which there are reserves, taken from profits, amounting to $1,100,000. The company has recently gone in for electric lighting, and this has created a floating debt which at the end of last year amounted to £110,000 and the present issue is to provide for this, and also for further extension. We see no valuation of the company's assets given, but the revenue for last year is stated at £77,268, whereas debenture interest and sinking fund will need only £17,000, so that the debentures appear to be a good speculative 5 per cent. investment.

HYDRO-INCANDESCENT GAS LIGHT COMPANY, LIMITED.

Company buys British, Indian, Australasian, South African and Canadian patent rights of this light, and the benefits of a licence from the Welsbach Company, whereby the latter undertakes for five years to manufacture and sell the apparatus for half the gross receipts. It is not very clear what the advantages of the light are, but they are said to be very great, and to more nearly approximate the sun's rays, shades of colour being as readily distinguishable as in the daylight. The capital is £200,000 in £1 shares, all of which are offered, and the purchase price is £180,000 payable in cash, the vendors apparently, like ourselves, having a poor opinion of the shares.

HOTEL AND CLUB INVESTMENT COMPANY, LIMITED.

Investors are offered an issue of £150,000 4½ per cent. first mortgage debentures at par, which is being made for the purpose of redeeming the existing debentures of the company and for other purposes. The debentures are of £50 each and are redeemable after 1908 at £52 10s. on six months' notice. We do not know who holds the existing debentures; none of the £100,000 of share capital is offered, and the purchase price for the concern is not given. We also fail to see any statement of net profits, and the freehold securities, about which so much is made, have apparently to be bought if the debenture money is subscribed. The Brighton surveyor who values the properties, wines, stores, &c., went over the assets, we should imagine, first with the right eye and then with the left and added the two valuations together. This is not by any means an investment.

VENICE HOTELS, LIMITED.

The object of this promotion is to buy various hotels with a view to amalgamation and stop existing competition. The profit statement of three of the hotels needs to be studied to be appreciated. The capital is £200,000 in 28,000 6 per cent. cumulative preference shares of £5 each and 60,000 ordinary shares of £1 each. The

latter are taken by the vendors with £100,000 in cash, and if they make nothing out of the shares they ought to come well out of the deal provided the capital is subscribed. It is said that of the £115,000 now offered £75,000 has been already subscribed in Venice, and we should certainly leave the remaining £40,000 to be found by that beautiful city.

JEREMIAH ROTHERHAM & CO., LIMITED.

This is the well-known and old established business of wholesale and retail drapers and general warehousemen of Shoreditch, which the vendors offer to the public for £500,000, and of this they are willing to accept no less than £316,668 in cash. Before deducting £95,362 for trade liabilities the company takes over property, &c., valued at £595,362, but of this heavy amount as much as £484,058 is represented by stock, book debts, goodwill, fixtures, furniture, plant, horses, vans, harness, and utensils, the freehold premises being valued at only £91,575. The share capital is £400,000 in £1 shares, equally divided into ordinary and 5 per cent. cumulative preference, 133,334 shares of each class being offered. An issue is also made of £150,000 4 per cent. first mortgage debenture stock, of which £100,000 is offered at par. Profits for the three years ended January 15, 1898, are given at £38,093, £35,130, and £40,112. The average shows 7 per cent. on the ordinary shares, and a surplus of £7,779, which is very good, but the security is scarcely adequate for the debenture stock, let alone the preference capital. The shares may be received with favour because the business is well known, but the securities are in our opinion not of the nature in which we care to recommend an investment.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* THE INVESTORS' REVIEW, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

THE MOUNT LYELL MINING AND RAILWAY COMPANY, LIMITED.—We have now received the reports and balance-sheet of this important mine for the six months ended March 31 last. From these we learn that the net profit for the half-year was £84,250, of which £77,185 came from smelting operations and £7,065 from the railway. During the half-year, however, the company paid away £100,000 in the shape of two dividends of 4s. each upon the 250,000 shares issued. This payment in excess of revenue is, no doubt, justified by the fact that a considerable sum in profits had accumulated and been temporarily devoted to capital purposes in the early stages of the company's history. As fresh issues of shares get sold this money is released and is being distributed. Also the company has now six furnaces at work and has ordered another nest of five furnaces, whose aggregate capacity will be equal to that of the present six. The presumption, therefore, is that there will be such an enlarged output of copper as will enable the directors to maintain the present rate of dividend, even should the quality of the ore continue low. Last half-year the average assay of copper per ton was 4·25 per cent., of silver 3·69 oz., and of gold 0·177 oz. on the "wet weight" of the ore. Since smelting began the average value of copper per ton has been 45·1 per cent., of silver 3·92 oz., and of gold 0·185 oz. It is obvious, therefore, that the quality of the ore has somewhat fallen off, and the manager in his very straightforward report upon the ore body as far as discovered does not encourage the expectation that a great improvement can be looked for in future. Pockets of rich ore may be found between the 4th and 5th tunnels, but on the average the yield of metals is not, it would seem, expected to be much better than it is now. Enlarged output alone must be looked to as the reliable source of enlarged revenue, and it is estimated by Mr. Sticht, the manager, that there are about 1,781,300 tons of good paying ore above the No. 4 level, and in addition considerable quantities of poor ore, which may be utilised to some extent in smelting the richer. This is enough to keep a mine going for years to come, but not enough to encourage excessive gambling in its shares. At present, however, a dead set is being made on these shares, in the interests, it is said, of the people engaged in an attempt to monopolise the supply of copper. We can see nothing in the report or accounts to warrant any holder in throwing his shares away at the prompting of the "bears"—of sellers who depress the market in the hope of buying back, or of "loading up" and getting control cheap.

THE GELDENHUIS ESTATE AND G. M. COMPANY (ELANDSFONTEIN No. 1), LIMITED.—This Transvaal limited company has issued its report for the year ended March 31 last, from which it appears that the payment of No. 12 dividend left the profit and loss account with a debit balance of nearly £450. This is a small matter, from one point of view, but the balance-sheet is not particularly clear on the position of the capital account. Apparently large sums are being continually added to the capital expenditure of the mine, but these are not systematically brought out in the accounts, and we cannot say whether the £49,651 the board has deemed it advisable to write off for "depreciation" last year is anything like an adequate amount. This question is the more important, because working costs are being reduced and were only 19s. 2·654d. last year as against 20s. 8·879d. the previous year. Would this current expenditure be so low if revenue were properly charged with every item that ought in well-regulated accounts to go there? On the answer to this question depends the further one—whether or not the revenue is being stretched and strained to pay high dividends. And plainly there is no reserve whatever. More than the last shilling has been paid away, and the "depreciation" item merely goes against new capital outlay.

DISTILLERS COMPANY.—Prudence in the past has brought this company to a very comfortable position. Despite the rise of mushroom distilleries the profits for the year ended May 14 amounted to £210,466, as against £206,482 in the preceding year. After payment of interest and administrative charges, £60,000 was placed to depreciation and reserve, £10,000 to fire insurance, and dividends and bonus amounting to 12½ per cent. for the year were proposed, £15,486 being carried forward, or about the same as a year ago. The sum of £30,000 has been written off the cost of works out of the depreciation and reserve account, and by the persistent following of this policy the land and buildings and plant and utensils are about £75,000 below what they stood at in 1891, although profits have risen by one-third in the period. A prudent step, too, is seen in the reduction by one-half of the stock of spirits, grain, &c., and a consequent increase in the cash.

MAJULI TEA COMPANY.—The season was unfavourable and the crop of 899,411 lb. was about 11,000 lb. below the estimate, but about 24,000 lb. above that of 1896. The average price of 9⅞d. per lb. was ⅞d. per lb. below that of 1896, so that the net profit of £3,574 was £1,202 less than in the previous twelve months. This sum would have provided a fair dividend, for the capital is only £95,970, but the cost of recent extensions and their upkeep has locked up all the floating cash of the concern, and so the directors state that no dividend can be paid until the £8,244 recently spent upon extensions is replaced by a fresh issue of capital. In the present state of the Indian tea industry we should say, "Do not attempt to issue fresh capital," but this saying will seem foolishness to the dividend-declaring director and the impatient shareholder. As it is the board seem to aim at issuing £20,000 of preference capital, and thus to perpetuate the mistake made of extending too freely.

SALAR DEL CARMEN SYNDICATE.—This concern does not open its record very brightly. Last year was devoted chiefly to building its oficina, and £60,729 was spent upon the affair, while as it had paid £105.000 for the oficina "Santa Lucia," the properties stand in its books for £165,959. A profit of £2,342 was made out of a few weeks' working, which was more than swallowed up by debenture interest. Administration expenses took £2,250 more, and "Preliminary expenses, and expenses of issue, and discount on debentures" stand for £11,091, an enormous total. There is a cash item of £7,070, but that is not much, while £20,000 of creditors and bills payable will have to be met, and whether the nitrate trade improves or not, the interest upon the £80,000 of debentures will have to be found. It is altogether a most unsatisfactory statement, and while the board appears to be sitting down quietly to await the re-construction of another combination the liabilities of the concern tend to grow.

EDINBURGH EMPIRE PALACE, LIMITED.—Apparently this company has made a poor venture in regard to the University Hotel but after setting aside £302 as loss upon realisation of furnishings the net profit for the year was £3,972. The board very unwisely maintained the dividend at 10 per cent., so that the balance forward was £228 less than brought in. The reserve, too, is little more than half what it was a few years back, and the goodwill remains at the high figure of £7,000. In spite of the lofty dividend this is the high road to trouble, and no one ought to know that better than Mr. Moss. To pay the final dividend borrowing will have to take place, as the cash in hand is £179, while the dividend requires £2,100.

GLASGOW EMPIRE PALACE.—The accounts of this concern look better than those of the "Palace" in the sister city. Profits last year came to £12,169, and after distribution of dividends amounting to 15 per cent. for the year, the balance forward was increased from £1,472 to £4,685. This in itself is a fair reserve, and in addition £535 was written off the expenditure upon furniture, &c. In spite of this, however, that item tends to grow, and it should be remembered that theatrical decorations and properties are not a lifelong investment.

NATIONAL MODEL DWELLINGS COMPANY.—A derelict of the Liberator smash. The board of this, a small concern, is doing its best to bring matters round. Out of the net profit of £6,503 the sum of £129 was placed to mortgage redemption fund, £50 as a reserve against bad debts, and £698 was written off commissions and charges in connection with the transfer of mortgages. To the balance of £1,819 had to be added £1,621 brought forward, out of which the board took £1,000 to place to mortgage redemption fund, and then declared a dividend of 1¼ per cent., leaving £600 to be carried forward. The directors have paid off £1,000 of mortgage in the year and will pay another £1,000 shortly. The reserve for bad debts ought to be sufficient for its purpose, and there will then only remain £698, the balance of the commissions, &c., upon transfer of mortgages to wipe out in order to clear off the unsatisfactory items in the balance-sheet. The mortgages ought, however, to be reduced still further.

OHLSSON'S CAPE BREWERIES.—The very satisfactory profit of £57,326 was earned by this concern in the year ended March 31. The sum of £20,000 is placed to reserve and dividends and bonus amounting to 18 per cent. for the year were declared, leaving £1,895 to be carried forward. The reserve will now amount to £75,000, and the balance appears to be a strong one, no less than £24,841 being invested, while trading balances are all in favour

of the company. The profit and loss account is very meagre, the amount set aside for depreciation not even being stated.

Tamplin & Son's Brewery, Brighton.—The profits of this concern are maintained at a high figure, the gross profit last year being no less than £52,116. After payment of expenses, including £2,879 for repairs and £3,389 for depreciation, the net balance is £29,501. The sum of £7,000 is placed to reserve, and dividends equal to 10 per cent. for the year are paid upon the ordinary shares, leaving £2,898 to be carried forward. The total reserves of the company amount to about £50,000, as against £375,000 of share and debenture capital. The balance-sheet is good, the company owning no less than £31,718 of investments, while trading balances are very much in its favour.

The Western Mortgage and Investment Company, Limited.—This concern seems to require overhauling. Last year, its year ends on March 31, it made a net loss of £13,157, and the business seems to be most expensively conducted. There are only three directors, one of whom, Mr. Andrew Williamson, just appointed, is a member of the firm of Smith & Williamson that acts as the company's managers—and who therefore is, as a director, where he has no business to be—but directors' fees, office expenses, &c., in London came last year to £4,296. Then "losses on real estate and loans fully realised, including American agent's commission on sales"—a most reprehensible jumble of items which ought to be separated—took another £4,851. Law charges in England, £986, have to be added to this, and as the interest on debentures and deposits took nearly £11,000, while the income amounted to £7,725 only, the loss is easily stated as above. For whose benefit is a wasting business of this sort carried on if not for that of the officials? The shareholders merely pay calls, and behold the debit balance against them swelling in amount year by year. It is now nearly £73,000, allowing for a "profit" credited on purchases of the company's own debentures for extinction. The shareholders ought to come together and organise themselves with a view to ending this state of affairs. All the capital will soon be called up, and dissipated at the rate of "progress" now established if they sit still and do nothing.

Municipal Trust Company.—The income of this concern continues to shrink in a miserable fashion. For the year ended February 28 it was £30,041, and after payment of working charges and debenture interest the net balance of £9,949 was left, which, including £513 brought forward, gave a total of £10,462. This sum was practically absorbed in paying a dividend of 3½ per cent. on the preferred stock, in spite of the statement by the auditor that £9,682 of depreciation upon the value of the investments ought to be debited to revenue account. In the year no less than £5,942 was added to the depreciation from realised losses on bonds sold or cancelled on foreclosure. This amount of money was admittedly lost, and yet this board proceeds to divide up every scrap of the balance it claims to represent net revenue. No wonder Mr. Auldjo Jamieson is compelled to resign his seat, and we consider the payment of the dividend at the rate of 3½ per cent. a grave mistake.

Brooke, Bond, & Co., Limited.—Prosperity continues to bless this company, and the profit of £32,128 was shown for the year ended May 31. Out of this £10,000 was written off goodwill, £5,000 placed to reserve, and the balance permitted of dividends equal to 15 per cent. for the year. The substantial sum of £4,170 was then carried forward, or a little less than the sum brought in. The board continues to make the best use of the accumulation, having redeemed £1,400 of debentures, and invested £8,623 in purchasing the freehold of their warehouse premises. Goodwill and trademarks have been written down from £100,000 to £36,000 in the course of the company's existence, and the reserve now stands at £32,000. There is also an insurance and contingency fund of £932. We are afraid such prudence and foresight is becoming old-fashioned, but only let the Hooleyised Bovril-Welsbach-Appollinaris-British Tea Table concerns run on for a while longer, and then the weight of water is bound to tell its tale.

Diary of the War.

June 17.—News received that Caimamera has again been shelled by American warships, and no doubt the harbour works were further damaged. No more fighting reported at Guantanamo. The expedition from Tampa has not arrived, and, of course, no forward movement is possible until these troops are available. As to German warships at Manila, the German Government protests that it has no intention of deviating from the strict rules of neutrality.

June 18.—Another—the third—bombardment of the outworks of the harbour of Santiago de Cuba took place two days ago. The Americans claim to have dismantled the western batteries, and to have inflicted heavy loss on the Spaniards. The latter declare they only lost three killed and ten wounded. The Spanish position at Manila is described as desperate. The city is surrounded by the insurgents, but they do not, it is said, intend to deliver their final attack until the arrival of the American troops; and they were expected on the 10th. The Cadiz fleet is reported to have really sailed, but, of course, its destination is not known. A hint to Germany. The Washington Government refuses to believe that Germany has any intention of intervening in the Philippines, but that any attempt on her part to take steps with a view to secure a harbour there would "quickly solidify American opinion in favour of taking and keeping all Spanish possessions in Eastern waters."

June 19.—General Shafter's expedition is at sea, but no news of it since its start from Tampa. It may arrive in the neighbourhood of Santiago on Tuesday, and it seems probable that the attempt to land will be made a little to the east or to the west of that harbour. Punta Cabrera, ten miles to the west of Santiago, was bombarded on Friday, the 17th, when it was ascertained that the defences had recently been strengthened, and that the place was held by a considerable body of Spanish troops. There are rumours of dissensions among American military authorities, but nothing that can be regarded as authentic.

June 20.—The capitulation of Manila is only a question of time, The Spanish Captain-General confesses he cannot now prevent it. the native insurgents have so hemmed him in. Indeed, it is probable that the surrender would have taken place ere now had not Admiral Dewey been anxious to postpone it until the arrival of the American troops. He might then exercise a more perfect control of the situation; but if the American expedition is delayed much longer it is possible the rebels may hasten events. The matter is at present virtually in their hands. Nothing known of the Cadiz squadron. Washington does not believe that it will make for the American coast; but who can tell? It would now be useless to make for the Philippines, and certain Madrid critics hint that it has gone for a cruise to amuse the Spanish public, that it has no direct objective, and has no hope of achieving great results. Perhaps so; but it is singular that that should be said in Madrid. Much talk of peace, but no action taken. The Catalan Union of Barcelona published a manifesto urging peace rather than the ruin of the country; but that manifesto has been much more discussed in London than in Madrid.

June 21.—Exchange of prisoners refused by the Cuban Captain-General; so the plucky Lieut. Hobson, who sank the *Merrimac*, will remain in prison with his intrepid colleagues. The American authorities express surprise at this decision after the opinion voluntarily expressed by Admiral Cervera; but the explanation given in Madrid is that these prisoners, without in any way acting as spies, must have seen too much of the harbour and defences of Santiago to make it discreet to liberate them. In that view, no prisoners could ever be given up. The last heard of the Cadiz squadron is that it had reached Cartagena, and was comfortably berthed there, but what for nobody can say. A New York despatch avers that Admiral Camara had left Cartagena for Cadiz, which, if true, would seem to indicate that something has gone wrong with the ships, and that he deems it necessary to consult with the Admiralty at Madrid as to future operations; or, perhaps, as to how he is to go on doing nothing but burning coal? No announcement yet of the arrival of General Shafter's expedition at Santiago.

June 22.—General Shafter, with his military expedition, has arrived off Cuba. He has had a consultation with Admiral Sampson, and preparations will no doubt be made soon for the landing near Santiago. The transports keep well off the coast. It is announced from Havana that General Blanco is to send six battalions of troops to protect the Spanish coast. Manila despatches describe a fight between the native rebels and three thousand mixed troops under General Monet. The fighting extended over three days, the General was killed, the native levies joined the rebels, and about 500 Spanish troops had to surrender. There are reports of the revolt of native troops in other districts. Don Carlos has been unbosoming himself to a newspaper interviewer, and if his statements are to be taken seriously, he will endeavour, when peace comes with the United States, to grind his own axe, and stir up civil war in the Carlist interest. Barcelona papers are strongly urging the immediate conclusion of peace. The Geneva Red Cross Convention has been accepted by both Governments in this war; and America has fitted up a ship called the *Solace* as a floating ambulance. This is said to be the first Government vessel of any nation which has been commissioned under the Red Cross Convention.

June 23.—American troops have landed at Aguadores, near Santiago, under cover of the guns of the American fleet. There was a considerable force of Spaniards, who were attacked in the rear by about 1,000 Cubans; and after the warships had shelled the shore, the American troops landed, driving the Spaniards towards the Cubans. The invading force landed without suffering any loss. There is a strong feeling of indignation in the United States as to the refusal of General Blanco to liberate Lieutenant Hobson and his colleagues in exchange for Spanish prisoners. The Senate has passed a resolution demanding more information on the subject. The Cadiz fleet has not gone back, we are told, and Admiral Camara, we are assured, cannot possibly return to Madrid, because he announced before leaving that he would never return until the flag had been steeped in American blood. To go back before he had attained that distinction, therefore, would be to invite riot in Madrid. Very likely; but the admiral will find little American blood at the Canaries, where, it is said, we shall next here of him. It does look a little as if the Cadiz squadron were on a mere tour for the purpose of beguiling the Spanish people into the notion that something is being done, while all the time nothing is to be attempted. A strange story is told in the *Daily News* as to the practical capitulation of Manila, not to the American fleet, but to the Germans. The latter objected to a bombardment by the Americans, as they had no force to protect the Germans in Manila; so the bombardment was postponed until the arrival of American troops. When, however, General Augustin found himself so hard pressed by the native rebels he appealed to the foreign warships—all except the Americans—to land a force sufficient to protect the lives of the inhabitatants against the insurgents. This, it is asserted, has been done, and the German Admiral Diedrichs is in command of the landing force. The story seems, to say the least, an extremely doubtful one. The landing could not have been effected without the knowledge of Admiral Dewey, and he would certainly, if he had not vetoed the scheme altogether, at any rate have insisted on taking part in the landing. It is hardly conceivable that the other Powers would have acted in this way without consultation with the American admiral, for surely that would have been an act of war. Ex-President Cleveland, in a recent address, declared strongly against a policy of external expansion and annexation.

TRADE AND PRODUCE.

If the Leiter-Armour "big blind poolists" hoped to recover some at least of the losses of the wheat corner, they must have been sadly disappointed by the results of the past week. "The best laid schemes o' mice and men gang aft agley," and the cornerers of wheat must be finding so to their cost. The slump continued in England, and in New York the "bears" have managed to frustrate nearly every attempt at a rally. Rumours current as to damage to growing wheat by rain in some of the South Western States had one day the effect of causing a slight rise, but the reports were not trustworthy, and have been found to be wrong. The exports from America continue as large as ever. They seem, indeed, getting larger. For the week ending June 11, the Atlantic exports, flour included, were 4,206,273, against 1,634,602 last year, an amount probably larger than any week this year. Nor is there the slightest hint as to serious falling off in the supplies. The official reports of the coming harvest are excellent, and the future seems pretty well secured. The average price of wheat in England last week is given as 42s. 4d., as compared with 45s. 4d. for the previous week. We doubt if the average for this week can be above 40s. There has been little business doing in the English markets, but nothing has been done except at a reduction of from 2s. to 4s. per quarter. Flour was 1s. to 2s. cheaper. Futures rule low. Some near dates have been offered at 38s. to 41s., but no transactions reported. August-September, however, can be had at 31s., though September-October is quoted at 38s. 6d. French wants seem now to be satisfied, more of the American and other cargoes now coming to English ports. It is fully understood that the French duties will be reimposed at the date fixed, July 1; but the probability is that the suspension will continue both in Italy and Spain. Neither Government can afford to resume these imposts at present; the discontent caused might be serious. Wednesday's markets showed a tendency to harden, and 6d. advance was demanded in London; but buyers did not respond. They still hold aloof. New York was again dominated by the "bears" for a good part of the session, and prices fluctuated considerably, and closed flat on good crop reports. Nothing seems to indicate the possibility of maintaining increased rates for the present. We are too near the harvest, and old stocks are still too considerable to warrant an advance.

Otherwise our trade reports are not so full of encouragement and confidence as they have been for some time. In Glasgow, though shipbuilding continues abnormally active, and iron and steel manufacture, in spite of the adverse influence of the manipulating iron "ring," is as busy as may be, they are beginning to speculate as to whether they have not reached the crest of the wave of active prosperity. The speculation seems to us premature; at least, there are as yet no signs of a downward tendency. Wool continues very quiet; only in Leicester is an improvement recorded in all the most fashionable descriptions of home and colonial produce, but even there prices continue abnormally low. Cotton continues dull and spiritless; and in linens, though Dundee reports a slight improvement, Belfast records none, and Barnsley is emphatically quiet. There is no activity anywhere, and no sign yet of an early marked improvement.

Copper shows no great sign of revival, yet the visible supplies are considerably lower. The bi-monthly statistics show a decrease in the visible supply of 434 tons, and prices have fallen £2 15s. during the last six weeks. What is the reason of this excessive fall, seeing that consumption is larger than production? There seems some sort of mystery about it. Speculation is absent, say Messrs. Morrison, Kekewich & Co., in their circular, and "it suits dealers to keep down prices until they have secured some large lines of refined which they are in treaty for." That is somewhat oracular; but more follows. "Manufacturers," we are told, "complain that fresh orders are not coming in, but directly the standard market hardens we shall see more activity." We must wait for enlightenment, it seems; but meantime we may note some renewed activity in the market on Wednesday, with a recovery of 3s. 9d. per ton. On first 'Change 700 tons were placed at £49 17s. 6d. and 18s. 9d. cash, and on second 'Change cash purchases ruled much the same, with £50 5s. and 3s. 9d. for three months.

No change in reference to the Welsh strike. There has been a suggestion that peace might be concluded on the basis of a 5s. advance in wages, and a reversion to the sliding scale. Meanwhile, the non-associated owners have granted another 10 per cent. advance to their colliers, making a total of 20 per cent. since the beginning of the strike. As this increase, however, is in most cases to be contributed to the strike fund, this is only encouraging continued resistance. The owners must, however, see it to be for their advantage to grant the increase. The building of ships for the Navy was very much delayed last year by the engineers' strike; and now we have the autumn manœuvres stopped from difficulties as to steam coal caused by the Welsh strike. We are getting on. We may yet have the workmen insisting on stopping actual war until wages had been satisfactorily adjusted. But in that case, if they could but check the war, we should not mind. At present, however, this constant interference with the course of trade is very detrimental, and must tend, in the long run, to lower wages. Of course in the districts unaffected by the strike, coal is still advancing in price. From all the iron centres we have very favourable reports. All the works are busy, orders are coming in fairly well, and there is every prospect of continued activity.

There is, as yet, no revival in the demand for sugar, and consumers, according to Mr. Czarnikow, seem to have this spring contracted larger supplies than was expected. It is difficult to sell even at a moderate reduction. Home consumption is going on satisfactorily; but the excess in imports of foreign refined increases.

Debenture interest coupons of the National Mortgage and Agency Company of New Zealand, due July 1, will be paid at the Bank of Scotland in London.

DIVIDENDS ANNOUNCED.

London and South African Exploration Company.—Dividend of 3s. per share for quarter ending the 30th inst.

Mysore Gold Mining Company.—Interim dividend of 4s. 6d. per share.

Denver and Rio Grande Railroad Company.—Semi-annual dividend of 1½ per cent. on the preferred stock.

John Brown & Company.—Further dividend on the ordinary shares of 12s. 6d. per share, making with the interim dividend paid 6¼ per cent. for the year.

National Mortgage and Agency of New Zealand.—Interim dividend at the rate of 5 per cent. per annum.

William Jones & Sons.—Dividend for the eleven months ended March 31 last at the rate of 8 per cent. per annum.

De Lamar Mining Company.—Dividend of 6d. per share.

East India and Ceylon Tea Company.—Dividend on the ordinary shares at the rate of 3 per cent.

East Indian Railway Company.—Dividend for the half-year at the rate of £1 4s. 6d. per cent. on the deferred annuity capital, and the deferred annuity capital class "D," in addition to the guaranteed interest of £2 per cent. The return of guaranteed interest and dividend for 1897 is at the rate of £6 8s. per cent. on the deferred annuity capital and the deferred annuity capital class "D," as compared with £5 3s. 6d. for 1896.

Great Northern (U.S.) Railway Company.—Quarterly dividend of 1¾ per cent. on the preferred stock, and a quarterly dividend of 1½ per cent. on the St. Paul Minneapolis and Manitoba Railway Company's 6 per cent. guaranteed shares.

Glasgow Empire Palace.—Dividend of 20 per cent.

Distillers Company.—Dividend of 12s. per share, which, with the interim dividend of 8s. per share, makes the usual dividend for the year, 10 per cent.; and a bonus of 5s. per share.

Greenwood & Batley.—Dividend of 7 per cent. on the cumulative preference shares.

Scottish Assam Tea Company.—Dividend of 5 per cent.

Cordoba Central Railway Company.—Dividend £5 per cent. on the 5 per cent. cumulative first preference stock.

Kaffirs Consolidated Investment and Land Company.—Interim dividend of 3d. per share for the month of June.

Brilliant Gold Mining Company.—Dividend of 6d. per share.

Shropshire Brewery Company.—Dividend of 5 per cent per annum on the preference shares, and interest at 4 per cent. per annum on the debenture stock.

New African Company.—Dividend of 12½ per cent.

La Guavia and Caracas Railway.—Dividend at the rate of 5 per cent. per annum.

Assets Realisation Company.—Interim dividend at the rate of 8 per cent. per annum on the ordinary shares.

Bank of New South Wales.—Dividend at the rate of 9 per cent. per annum.

Ohlsson's Cape Breweries.—Final dividend of 6 per cent. on the ordinary shares, making 12 per cent. for the year, and a bonus of 6s. per share.

Messageries Maritimes Company.—Dividend of 25 francs per share of 500 francs.

Dane's Discount Company.—Interim dividend at the rate of 10 per cent. per annum for the three months ending June 30.

Witwatersrandt Gold Mining Company (Knight's).—Interim dividend of 15 per cent.

Glencairn's Main Reef Gold Mining Company.—Interim dividend of 15 per cent.

New Primrose Gold Mining Company.—Half-yearly dividend of 25 per cent.

Ginsberg Gold Mining Company.—Half-yearly dividend of 20 per cent.

Rietfontein "A."—Interim dividend of 15 per cent.

Johannesburg Estate Company.—A dividend of 2½ per cent. for the six months ending June 30.

South African Breweries.—Dividend for the half-year ended March 31 of 7½ per cent. on the ordinary shares, making 12½ per cent. for the year.

Robinson Gold Mining Company.—An interim dividend of 7 per cent. for the half-year ending June 30.

Geldenhuis Deep.—An interim dividend of 30 per cent. for the half-year ending June 30, being at the rate of 60 per cent. per annum.

Victoria Gold Mining Association (Charters Towers).—Dividend of 6d. per share.

Chicago Junction Railways and Union Stock Yards Company.—Dividend of 1¾ per cent. on the preferred, and dividend of 4 per cent. on the common stock.

Electric and General Investment Company.—Further dividend at the rate of 30 per cent. per annum for the six months ended May 31, and a bonus of 10 per cent. for the year, making a total of 35 per cent. for the year upon the capital paid up on the ordinary shares. Dividend of £30 per share and a bonus of £20 per share on the founders' shares, and a further £20 per share out of the proceeds of investments sold and dividends received in respect of the founders' share reserve fund, making a total distribution of £70 per founders' share.

Henry Nourse Gold Mining Company.—Dividend (No. 4) of 75 per cent. (15s. per share).

Chilian National Ammunition Company.—A dividend at the rate of 7½ per cent. per annum.

Sheba Gold Mining Company.—A dividend of 6d. per share.

Johannesburg Waterworks, Estate, and Exploration Company.—A dividend of 7½ per cent.

Nundydroog Company.—An interim dividend of 2s. per share.

Jumper's Gold Mining Company.—A dividend of 30 per cent.

Anglo-Mexican Mining Company.—A dividend of 1s. per share.

Mahor Rani Tea.—A dividend of 2½ per cent. on the ordinary shares.

United Discount and Securities Company.—Interim dividend on the ordinary shares at the rate of 6 per annum.

Eastern Extension, Australasia and China Telegraph Company.—Interim dividend for the quarter ended March 31 last, of 2s. 6d. per share.

Brooke, Bond & Co.—Dividend at the rate of 15 per cent. per annum.

Tamplin & Son's Brewery.—Dividend on the ordinary shares at the rate of 12 per cent. per annum, making with the interim dividend 10 per cent. for the year.

United States Brewing Company.—Final dividend of 5 per cent. on the ordinary shares.

Royal Exchange Assurance Corporation.—Dividend of £10 per cent. for the half-year ending at Midsummer.

Amazon Steam Navigation Company.—Dividend of 2 per cent. making a total dividend for the year of 4 per cent.

Colonial Bank.—Dividend at the rate of 6 per cent. for the half-year ended December 31.

Ferreira Gold Mining Company.—Dividend of 150 per cent.

London and Provincial Marine Insurance Company.—Dividend at the rate of 10 per cent. per annum for the half year ending June 30.

Denver United Breweries.—Final dividend of 8s. per share on the 8 per cent. preference shares.

Stock Conversion and Investment Trust.—Interim dividend of 9d. per share on the ordinary shares.

The trustees for the debenture holders of the Catalinas Warehouses and Mole Company of Buenos Ayres 5 per cent. mortgage debentures for £[illegible] have received funds sufficient to make a distribution of £1 per cent., being balance of interest due October 1, 1893, and the same will be paid by the London and River Plate Bank, Limited, 7, Princes-street, London, E.C., on and after June 30, 1898, on presentation of the certificates of deposit of the outstanding bonds, which must be left three clear days for examination.

The Mount Lyell Mining and Railway Company, Limited.—In consequence of the publicity given to recent rumours of an unfavourable nature in regard to the company's mines and undertaking, the London directors, having cabled to the board in Melbourne for information, have heard in reply that there are no grounds for any unfavourable rumours and that everything is proceeding satisfactorily.

The directors of the Nizam Guaranteed State Railways Company, Limited, have elected Sir Andrew R. Scoble to the seat on the board vacated by the death of the late General Alexander Fraser.

AMERICAN RAILWAY SHARES AND BONDS.

The English Association of American Bond and Shareholders, Limited, Register Shares, Collect Dividends, and Cash Coupons. Shares may be registered either in owners' names or in that of the Association. In the former case Dividends are collected by Powers of Attorney (forms supplied at the Office), and on Shares in Association's name on presentation of the Share Certificates. The Association also issues its own Certificates, good to Bearer or Registerable, countersigned by the London and Westminster Bank against the deposit of the original Shares. These Certificates save great trouble to Executors as they are distributable, avoiding the expense of sending original Shares and certified copies of Wills to America. Particulars and Forms are obtainable at the Association's Offices, 5, Great Winchester St., London, E.C.—JOSEPH PRICE, Managing Director. T. LINDLEY, Sec.

CENTRAL PACIFIC RAILROAD CO.—The London Committee of the Shareholders of this Company HEREBY GIVE NOTICE that a GENERAL MEETING of the Holders of the Certificates issued by them will be held in the Large Hall of Winchester House, 50, Old Broad Street, London, E C., on TUESDAY, the 28th day of June, 1898, at 2 o'clock in the afternoon, when they will report the result of their labours since the Shareholders were invited to deposit their Stock with them.

By order of the Committee,
F. G. BANBURY, Chairman.

Publishing Office: TUDOR STREET, LONDON, E.C.

Notice to Subscribers.

Complaints are continually reaching us that the INVESTORS' REVIEW cannot be obtained at this and the other railway bookstall, that it does not reach Scotch and Irish cities till Monday, and that it is not delivered in the City till Saturday morning.

We publish on Friday in time for the REVIEW to be at all Metropolitan bookstalls by at latest 4 p.m., and we believe that it is there then, having no doubt that Messrs. W. H. Smith & Son do their best, but they have such a mass of papers to handle every day that a fresh one may well look almost like a personal enemy and be kept in short supply unless the reading public shows unmistakably that it is wanted. A little perseverance, therefore, in asking for the INVESTORS' REVIEW is all that should be required to remedy this defect.

All London newsagents can be in a position to distribute the paper on Friday afternoon if they please, and here also the only remedy is for subscribers to insist upon having it as soon as published. Arrangements have been made that all our direct City subscribers shall have their copies before 4 p.m. on Friday. As for the provinces, we can only say that the paper is delivered to the forwarding agents in ample time to be in every English and Scotch town, and in Dublin and Belfast, likewise, early on Saturday morning. Those despatched by post from this office can be delivered by the first London mail on Saturday in every part of the United Kingdom.

ADVERTISEMENTS.

All Advertisements are received subject to approval, and should be sent in not later than 5 p.m. on Thursdays.

The advertisements of American Life Insurance Offices are rigorously excluded from the INVESTORS' REVIEW, and have been so since it commenced as a Quarterly Magazine in 1892.

For tariff and particulars of positions open apply to the Advertisement Manager, Norfolk House, Norfolk-street, W.C.

The Investors' Review.

The Week's Money Market.

Contrary to general experience, money becomes more plentiful as the end of the month approaches. Although we are at the turn of the quarter, day to day loans can be easily obtained at ½ per cent. per annum, while seven day advances command no more than ¾ per cent. Indeed, the India Council only gets 1 per cent. for loans up to July 4, to the eve, that is, of the Government dividend payments. Such rates pretty well represent low water-mark, and yet floating supplies will be added to after July 5.

It has been impossible to maintain discount rates in face of the abundance of money, and the quotation for three months remitted bills slipped back to 1⅛ per cent., in spite of the efforts of the banks, who do not care to do business on this basis with the official minimum at 3 per cent. Sixty-day paper, indeed, has been taken as low as 1¼ per cent., and the absence of a reduction in the Bank rate appears to have little importance to the market. Even the gold demand is sluggish, and while Russia outbid all comers, including the Bank of England, for the Cape gold last week, it is a doubtful point whether it can afford to pay 77s. 10d. for the arrival just upon due. A withdrawal of £102,000 in German coin from the Bank of England took place early this week, but it was not an ordinary exchange operation, and since then the Berlin cheque has moved in our favour. According to present appearances the market should not anticipate the Government dividends to any material extent by borrowings at the Bank, and thus its resources will be added to after the first week in July. The Bank rate will then, we fear, be forced down, whether the directors think the change prudent or not.

Yesterday's Bank return was in all respects humdrum. The reserve has risen £320,000 to £27,959,000 within the week, but none of this money has gone to the credit of the market. "Other" deposits, indeed, have declined £313,000 to £44,596,000 because "Public" deposits, or Government balances, have risen £560,000 to £12,055,000, and because "Other" securities have declined £210,000 to £33,063,000. Gold still flows back from circulation—from Scotland partly—but it will go out again at the end of the month. The total stock of coin and bullion is now £38,490,000 or £334,000 more than it was a week ago, and only £46,000 is due to net imports of the metal from abroad.

SILVER.

Welcome support was given to the market by further Spanish buying. This caused the price of bars for immediate delivery, which had drooped in the interval to 26⅛d. per oz., to at once jump up to 27⅛d. per oz., at which it has remained steady since. The buying is not very persistent but it has been enough to clear off supplies, and keep the market firm. Buying from the East is not pressing, as China has been shipping silver of late, and India seems to require less than it used to do. After July 1 Japanese silver yen will no longer be exchangeable for gold, and it is therefore to be assumed that the Straits Settlements will not require so much silver in the future. The withdrawal of silver yen from those dependencies has led to a persistent demand for silver to be minted into British dollars, but of course the vacuum thus created must in a great measure have been filled, and now that the inducement to ship silver yen to Japan is withdrawn, the vacuum should not

reappear. Meantime the silver yen thus returned to Japan has been promptly defaced and dumped down somewhere is China, so that the shipments from that quarter to India are explained to a certain extent. Money continues to grow easier in India and the Bank of Bombay has reduced its rate by 1 per cent. to 9, thus bringing itself into line with the Bank of Bengal.

Since the commencement of the financial year on April 1 the India Council has sold Rs. 7,36,85,406, realising £5,087,920. As the Budget estimated for £16,000,000 to be drawn in the year, this means that, at 1s. 4d. per rupee, a little less than 41 lacs must, in future, be sold per week in order to obtain the amount.

The Week's Stock Markets.

The general tendency of markets this week has been dull, business simply stagnating, and no improvement is looked for until the present account has dragged to an end. Complaints are heard on all sides of the utter indifference of the general public, the falling off in investment business being most pronounced. The abandonment of the naval manœuvres was viewed with perfect unconcern, and there have been no alarmist reports to disturb markets in the slightest degree.

Among Home Government securities Consols drooped from day to day, and touched 111 1/16, after which the price reacted a little. A sensational drop of about 11 in Bank of England stock was simply due to the fact that a parcel of stock was pressed for sale, and although the amount was not very large, the market, being such a narrow one, allowed the price to give way as stated. A greater part of the fall has, however, since been made up. Another notable move has been in Great Indian Peninsula railway stock, which rose about 9 on the chairman stating at the meeting that the Government intended acquiring the line.

Most of the business in the Home railway market has been in the stocks of the Continental lines. South Eastern deferred was rushed up to over 115, and then as suddenly collapsed, the "bull and bear" struggle going on as merrily as ever. Chatham issues also moved rather erratically, the much-talked-of official announcement still hanging fire. The Chatham directors have, however, taken advantage of the present state of affairs to launch the balance of their unissued debentures, but this had little or no effect on prices. Waterloo and City ordinary has lost a further eight or nine points, some delay in opening the line for traffic being feared, and rumour says the borrowing powers of the company are exhausted, so there seems a possibility of holders having to forego their interest for a time. The failure of the Great Northern and City undertaking was also somewhat of a damper to those interested in similar ventures. Great Central issues are all lower, despite the official announcement that the line will be open for coal traffic on July 25, and Metropolitan ordinary is weaker in sympathy. One of the firmest stocks in the whole list has been Hull and Barnsley, the traffic return showing a substantial increase. The Great Western "take" is again most melancholy reading, and the stock has fallen still more, but the other traffic statements were considered satisfactory, due allowance being made for the inflated figures caused by the Jubilee celebrations last year.

In the market for United States railroad shares there was some inquiry during the earlier part of the week for Chesapeake and Ohio on amalgamation rumours, and Union Pacific on the prospects of a full dividend on the preferred. Other stocks have met with little support, the fall in wheat causing a weak tone to prevail in Wall-street, and a sharp break in Baltimore and Ohio shares, on the publication of the reorganisation scheme, led to a moderate decline in practically the whole of the active list. This does not apply to gold bonds, which have again been inquired for at higher prices.

Canadian Pacific shares started the week by falling about 4, due to heavy sales by Liverpool firms, the traffic return being a great disappointment to every one, while the rumour of a further issue of preferential capital was again freely circulated. Buying orders coming to hand from Montreal put a little better com-

plexion on things, and the old story of the war rate being nearly settled has again been trotted out. Grand Trunk emissions gave way on sales from the North, but afterwards advanced and more than wiped out the earlier losses.

If business has been on a small scale here, Paris operators have done still less, and apart from a sharp fall in Brazilian bonds during the earlier part of the week, most of which has since been made good, there has been little of interest happening. The Brazilian funding scheme has met with a good deal of adverse criticism, and that and a fall in the Rio exchange caused the earlier decline, but some Continental buying helped to put up prices again. Spanish 4 per cents. are weaker after a temporary rise; the latest advices from Madrid taking a less hopeful view of peace prospects, while vague rumours of the Queen Regent's proposed abdication were afloat. Further, the announcement that the coupon will only be paid in gold to foreigners was not much liked, and the price drooped a little more. Turkish groups have also lost ground, trouble in Albania being talked of, and the Ministerial crisis in Italy led to some selling of Italian Rente. Other changes are mostly in the downward direction, due to the weakness of the Paris Bourse on Wednesday, the general impression there now being that the *coulisse* will have ceased to exist by the end of the month. Argentine Government bonds gave way in face of the steady rise in the gold premium at Buenos Ayres.

All the leading Brazilian railway companies' stocks are lower than a week ago, in sympathy with the fall in Government bonds, and most of the other movements in foreign railways have been in an adverse direction. Cordoba Central (Central Northern) income stock fell sharply after the report appeared, but the latest price shows some recovery from the worst point touched.

In the Miscellaneous market the selling of all kinds of electric lighting companies' shares went on apace for several days, but there are now indications that holders do not intend throwing away any longer, and a slightly harder tendency is apparent. Apollinaris issues have given way still more, the principal cause of dissatisfaction with the report being the tiny amount placed to reserve. Ebbw Vale shares fell 1¼, the report just out showing the disastrous results of the coal strike in South Wales, as far as this company is concerned. Cycle shares keep very weak, and there are few buyers for this class of security just now; but a good business has again been transacted in brewery companies' issues. Marshall and Snelgrove debentures have risen steadily, and rises are also marked in Lipton debenture, London Tramways 4½ per cent. "B" debenture (which is 6 higher) and Brunner, Mond. On the other hand Trafford Park debentures have fallen 7, Brentford Gas 10, and Welsbach 3½.

Home railway stocks closed weak, due to realisations in view of the settlement which begins on Monday, and Grank Trunk stocks were pressed for sale, the market looking for a big decrease in the traffic this week. United States railroad shares left off very firm, on both home and Wall-street buying, especially Atchison, New York Central, Northern Pacific, and Southern. Foreign Government bonds were also well supported at the last, notably Brazilian and Italian. In the mining section, there was a slight rally in De Beers diamond shares, but the Mount Lyell group closed flat at about the worst.

Mining and Finance Companies.

The South African market has again presented a lifeless appearance, and the interruption of cable communication with the Cape did not tend to improve matters. A batch of dividend announcements hardly attracted attention, that of the Henry Nourse Company being the only one to cause any inquiry for shares, and changes are again of the usual unimportant type; but a reported "mud-rush" in the mine led to a little selling of De Beers. Among Western Australian ventures some of the higher-priced shares met with support, notably Golden Horse Shoe, a scarcity of stock at the settlement being expected. London and Globe shares have been a weak market, the report being looked for with a certain amount of apprehension. Among Indian companies, Mysore and Nundydroog advanced on the satisfactory dividends, and other kindred concerns were firm. The Mount Lyell group has again exhibited great weakness, and the directors' assurance that "everything is all right at the mine" did not prevent many holders taking fright and throwing their shares on the market.

NEXT WEEK'S MEETINGS.

Monday, June 27.

Moabund Tea Company	138, Leadenhall-street, 2.30 p.m.
Solar del Carmen Nitrate	Winchester House, noon.
Asbestos and Asbestic	Cannon-street Hotel, 3 p.m.
Puerto Cabello and Valencia Railway	60, New Broad-street, 2.30 p.m.
La Guaira and Caracas Railway ...	60, New Broad-street, 2 p.m.

Tuesday, June 28.

Nahor Rani Tea	138, Leadenhall-street, noon.
Ohlsson's Cape Breweries	Winchester House, 3 p.m.
South African Exploring	15, Copthall-avenue, 1 p.m.
Cordoba Central Railway Company	Winchester House, noon.
Electric and General Investment ...	Winchester House, 3 p.m.
John Brown & Co.	Savile-street, East Sheffield, noon.

Wednesday, June 29.

Brooke, Bond, & Co.	Winchester House, noon.
East Indian Railway...	Cannon-street Hotel, noon.
Imperial Ottoman Bank	Winchester House, 1 p.m.
United States Brewing	Winchester House, 11 a.m.
New Options Company	6, Queen-street-place, noon.
Amazon Steam Navigation	Cannon-street Hotel, noon.

Thursday, June 30.

Tamplin & Son's Brewery	Phœnix Brewery, Brighton, 3 p.m.
Marine Insurance	29, Old Broad-street, 1 p.m.
Canada Company	1, East India-avenue, 1.30 p.m.
Rickmansworth and Uxbridge Water	42, Poultry, 12.30.
Tolmia Mining	Winchester House, 12.30 p.m.
Transvaal Gold Mining Estates ...	Cannon-street Hotel, 3.30 p.m.
Western Mortgage and Investment	Institute of Chartered Accountants, Moorgate-place, E.C.

Messrs. J. Lewenz and Hauser Brothers have removed to 5, Great Tower-street, E.C.

Prices of Mine and Mining Finance Companies' Shares.

Shares £1 each, except where otherwise stated.

The coupons falling due on July 1, 1897, of the Greek 5 per cent. loans of 1881 and 1884 should be presented at the office of Messrs. C. J. Hambro & Son for payment of 32 per cent. in gold of their face value, in accordance with Article 2 of the International Greek Law of Control. The coupons falling due on July 1, 1897, of the Greek 4 per cent. Monopoly loan of 1887 should be presented at the office of Messrs. C. J. Hambro & Son for payment of 43 per cent. in gold of their face value, in accordance with Article 2 of the International Greek Law of Control. Messrs. C. J. Hambro & Son also inform the holders of the scrip of the Greek 5 per cent. funding loan of 1893 that it should be presented for payment of 40 per cent. in gold of the interest due July 1, 1898, in accordance with Article 2 of the International Greek Law of Control.

* From January 1. † From April 1, 1898. ‡ From April 25, 1897. § From October 1, 1897.

The Southern Pacific Company will, after July 1 next, against delivery to it at its office in New York of dividend warrants No. 34, appertaining to certificates of stock of the Central Pacific Railroad Company, pay to the persons presenting the same one-half of 1 per cent. of the par value of the stock represented by such certificates respectively.

John Moir & Son, Limited, have taken more commodious offices at Nos. 9 and 10, Great Tower-street, London, E.C.

The numbers are announced of four bonds of £100 each of the Pernambuco Water Company, for redemption on and after July 1, at the offices of Messrs. Knowles & Foster, 48, Moorgate-street, E.C.

Messrs. J. S. Morgan & Co. announce that the coupons due on July 1 next on the bonds issued of the Argentine Government 6 per cent. funding loan of 1891 will be paid at the rate of 5 per cent. on and after that date.

Messrs. Stern Brothers will pay the coupon due on July 1 on the Argentine 3½ per cent. external sterling, 1889, bonds at the rate of 60 per cent. of their nominal value.

Coupon No. 23, due on July 1, on the bonds of the Nicaraguan Railways 6 per cent. loan of 1886, will be paid on and after that date at the City Bank, Limited, Threadneedle-street, E.C., at the reduced rate of 4 per cent. per annum, according to the arrangement of September 12, 1895.

The Bank of New Zealand notifies that the nineteenth annual drawing of debentures, to be paid off on September 30, of the Otago Harbour Board 6 per cent. loan for £250,000 will take place on June 27.

The Union Bank of Australia, Limited, notify that they are prepared to pay, on and after 5th proximo, the half-year's interest due on the debentures of the Canterbury (N. Z.) Church Property Trustees' loan, £50,000.

The Colonial Bank of Australasia, Limited, Melbourne, notifies that the coupons due on July 1 next on loans Nos. 2 and 5 of the Town of Brunswick (near Melbourne), will be paid by its London agents, the London Joint Stock Bank, Limited, 5, Princes-street, E.C.

RAILWAY TRAFFIC RETURNS.

Algeciras (Gibraltar) Railway.—Traffic for week ended June 12, Ps. 25,103; increase, Ps. 658. Aggregate from July 1, Ps. 1,048,807; increase, Ps. 77,757.

West Flanders Railway.—Gross receipts for week ending June 19, £2,072; increase, £37. Total from January 1, £59,340; increase, £2,106.

Quebec Central Railway.—Traffic receipts for fourth week of May, $16,386; increase, $3,350. Aggregate from January 1. $159,442, decrease, $12,186.

Villa Maria and Rufino Railway.—Traffic for week ending June 18, £335; increase, £174. Aggregate from January 1, £8,442, ; increase, £1,610.

Bengal Central Railway.—Traffic receipts for week ending May 28, Rs. 25,982; increase, Rs. 8,585. Aggregate from January 1, Rs. 4,44,719; increase, Rs. 76,157.

Delhi Umballa Kalka Railway.—Receipts for week ended June 18, Rs. 26,400; increase, Rs. 500. Aggregate from January 1, Rs. 8,10,700; increase Rs. 1,79,100.

Alcov and Gandia Railway and Harbour Company.—Traffic for week, June 18, Ps. 11,200; decrease Ps. 3,800. Aggregate from January 1, Ps. 214,400; decrease, Ps. 10,570.

Western of Santa Fe Railways.—Gross receipts for week ending June 18, $12,103; decrease, $1,287.

Burma Railways.—Traffic receipts for week ending May 21, Rs. 1,67,879; decrease Rs. 13,439. Aggregate from January 1, Rs. 42,14,964; decrease, Rs. 21,526.

Cleator and Workington.—Gross receipts for the week ending June 18 amounted to £1,158, an increase of £80. Total receipts from January 1, £25,102, a decrease of £368.

Cockermouth and Keswick Railway.—Receipts for the week ending June 18, £1,044; increase, £116. Aggregate from January 1, £21,008; increase, £2,019.

MINING RETURNS.

St. John Del Rey.—Gold produce, June 1 to 10, £6,900; yield per ton, ·86 of an ounce troy.

Menzies Alpha Leases.—44 tons crushed, yielding 228 oz.

Wassau (Gold Coast) Mining Company. Limited.—May return:—445 oz. gold, from 515 tons ore. April return:—Ore crushed, 530 tons, producing 599½ oz. bar gold, which gave 622 oz. standard gold.

Goldfields of Surinam.—Result of preliminary washing—214 oz. of gold.

Weld Hercules.—Tons crushed, 233; produced 140 oz. of gold; tailings, 3 dwt. per ton.

Great Boulder.—Shipped 3,076 oz. gold; estimated value £12,611.

British Gold Mines of Mexico.—Crushed during May, 680 tons yielding $5,750 U.S.A. Profit $1,420 U.S.A., and, in addition, there has been shipped 33 tons of rich silver lead ore.

Associated Gold Mines of Western Australia.—Ore crushed 2,300 tons, yielding 1.838 oz.

North Boulder.—366 oz. gold from 390 tons crushed.

New Queen Gold Mining Company.—Results for past fortnight, 390 tons crushed, yielding 210 oz. gold.

Fairview.—450 tons crushed during twenty days, yielding $5,000.

Crescent.—500 tons crushed, yielding 85 oz.

Melbourne Democrat.—152 oz. gold from 290 tons ore crushed.

Anglo-Mexican.—Crushed 1,860 tons, $27,550 (U. S. gold); 1,165 tons treated by cyanide $10,650 (U. S. gold).

Florence.—Clean up yielded 131 oz. gold.

Day Dawn P. C.—525 tons crushed, yielding 691 oz.

Mikado.—Clean up for May produced 169 oz. from 536 tons of ore.

Menzies "Crusoe."—80 tons crushed yielded 184 oz.

Frank Smith Diamond Mines.—3,650 loads washed, producing 231 carats.

Great Boulder Proprietary Gold Mines.—Returns for fortnight ended June 20:—Tons of ore crushed, 1,440; yield of gold, 3,025 oz.

Otto's Kopje Diamond Mines.—6,745 loads washed; 169 carats of diamonds won.

Ouro Preto Gold Mines of Brazil.—May return:—6,293 tons of ore produced 1,651 oz. of gold.

Victoria (Charters Towers).—290 tons crushed yielded 466 oz. gold.

Premier.—472 tons crushed for 516 oz.

Victory (Charters Towers).—Crushed 115 tons for 299 oz.

Red Hill (W. A.) Syndicate.—5 cwts. cleaned up; result 550 oz.

Mysore West and Wynaad.—1,500 tons crushed yielded 381 oz.

New Options Company.—Big Gun, 43 ton 86 oz.; Extended, 15 tons 18 oz.; Cannon, 30 tons 26 oz.

Pahang Corporation.—Jeram Lumpong Mill. 1,550 tons of stone crushed, producing 74 tons of black tin; Jeram Batang Mill, 840 tons of stone crushed, producing 12 tons of black tin.

Peak Hill Goldfield.—As the result of treating by battery amalgamation only, 346 tons of kaolin and quartz ore in their natural proportions, 1,258 oz. of smelted gold have been yielded.

Moodie's.—980 tons crushed yielded 615 oz.

Moanatairi.—Crushed 974 tons. Yield over the plates 290 oz. value £794. Concentrates 21 tons value £29.

Mount Zeehan.—50 tons of silver lead ore shipped, containing about 30 tons of lead, and 4,500 oz. of silver.

Zeehan-Montana.—165 tons of silver lead ore shipped, containing about 99 tons of lead, and 14,850 oz. of silver.

The Bank of New Zealand notifies that the twentieth annual drawing of the bonds of the Auckland Harbour 6 per cent. loan of £150,000 will take place at its offices on July 6, and that the bonds then drawn (the numbers of which will be duly advertised) will be paid by it on presentation on January 10, 1899, on which date interest thereon will cease to accrue. The bonds must be left three clear days for examination before payment.

In consequence of the rebuilding of the premises, the offices of the Colonial Bank will, on the 20th inst., he removed to temporary premises at 118 Bishopsgate-street Within, E.C.

Working-Capital Column.—In working-capital column, D stands for *debit*.

* Company formed this year. † Interim dividends are given as actual distribution made. ‡ Interim div. only. § Crop 1896.

NOTICES.

Messrs. Matheson & Co., 3, Lombard-street, will pay on and after July 1 coupon No. 23 on the Hawaiian Government 6 per cent. loan of 1886, due on that date. Coupons must be left three clear days for verification.

The Crédit Lyonnais, 40, Lombard-street, E.C., is prepared to receive for payment on July 1, 1898, the coupon and drawn bonds of the Imperial Chinese 4 per cent. Loan, 1895.

The Crédit Lyonnais, Lombard-street, is prepared to receive for payment coupons due July 1 on the Province of Quebec 4 per cent. loan of 1888.

The coupons of the Long Island Railroad 5 per cent. consolidated mortgage bonds due July 1 in New York will be cashed on and after that date, at the exchange of $4·85 per £, at the counting house of Messrs. Robert Benson & Co., 66, New Broad-street.

The Bank of England informs holders of fully-paid scrip of the Greek Guaranteed £2 10s. per cent. gold loan of 1898 that they may exchange the same for stock free of expense. Holders of bonds which have not been stamped with the English impressed Inland Revenue stamp of 10s. per cent. may effect a like exchange, also free of expense. Holders of bonds stamped with the 10s. stamp must pay 12s. 6d. per cent. (Commutation Stamp Duty) if they wish to exchange the same for stock.

Sir William Dunn, M.P., has resigned his seat on the directorate of Parr's Bank, Limited.

We understand that the business of E. Uzielli & Co., of 123, Bishopsgate-street, and Lloyd's, E.C., insurance brokers, has for family reasons been converted into a company. No shares are or will be issued to the public.

The numbers are announced of bonds of the Wellington, Grey, and Bruce Railway Company, which have been drawn, and will be paid at par, at the offices of the Grand Trunk Railway Company in Montreal, or at Dashwood-house, New Broad-street, on July 1. It is also announced that the estimated earnings of the railway for the half-year ending 30th inst., applicable to meet interest on the company's bonds, will admit of the payment of £1 19s. 6d. on each £100 bond, and that this payment will be applied as follows, viz. :—14s. 7d. in final discharge of Coupon No. 36, due July, 1888; and £1 4s. 11d. on account of Coupon No. 37, due January 1, 1889, and will be made on July 1 next at the agency of the company.

Messrs. Glyn, Mills, Currie, & Co. have received advice by cable from the London and River Plate Bank at Montevideo announcing the despatch by mail of a remittance amounting to £41,400 for the service of the Uruguay 5 per cent. loan of 1896.

Messrs. Robarts, Lubbock, & Co. announce that, in accordance with the Law of Congress of November 16, 1895, the coupon, due the 1st prox., of the External Debt of Paraguay will be paid on and after that date at the rate of 1 per cent. per annum.

The numbers are announced of sixty-eight debentures of £100 each of the Tucuman Sugar Company drawn on June 16, for redemption on July 1 next, at the banking-house of Messrs. Glyn, Mills, Currie, & Co., 67, Lombard-street, E.C.

Baring Brothers & Co., Limited, are instructed by the Portuguese Government to pay the coupons of the Portuguese 3 per cent. exterior bonds, due on July 1, at one-third of their face value. No certificates for the residue will be issued.

The Council of Foreign Bondholders are advised by the London and River Plate Bank that they are this day in receipt of the following cable message from their Montevideo branch dated the 16th inst. :—"We have remitted by to-day's mail to Glyn, Mills, Currie & Co. £36,700 for the service of the Uruguay 3½ per cent. debt."

Mr. Walter James has removed to 13, Fish-street Hill, E.C.

The Sulphide Corporation (Ashcroft's Process, Limited) has removed to Finsbury-house, Blomfield-street, E.C.

Messrs. R. Raphael & Sons announce that the coupons due on July 1 next of the Piræus, Athens, and Peloponnesus Railway 5 per cent. bonds will be paid at the rate of 3 per cent. per annum.

The Taltal Railway Company, Limited, announces that, in connection with the sinking fund for redemption of the company's 5 per cent. debentures, no drawing of bonds will take place this year, the required number having been purchased in the market, as provided by the trust deed.

On and after July 1 the London office of the Witwatersrand Gold Mining Company, Limited (Knight's), will be removed to 96, Gresham-house, Old Broad-street, London, E.C., and Mr. John S. Sheldrick has been appointed London secretary.

Messrs. Clarke & Co., of St. Petersburg, announce that they have decided to close their London branch, conducted under the style of Alexr. Fr Clarke & Co. Mr. Frans Ofverberg, of 8, Crosby-square, will continue to represent them in London.

The numbers are announced of bonds amounting to £40,400 of the Egyptian guaranteed 3 per cent. loan, which have been drawn and will be paid off at par at the offices of Messrs. N. M. Rothschild & Sons on September 1 next.

Messrs. Speyer Brothers announce that the coupon due July 1 on the Central Pacific Railroad (California and Oregon Division) bonds issued by them will be paid on and after that date at their offices.

Baring Brothers & Co., Limited, have received a remittance of £[illegible],567 12s. 7d. in bills on London at ninety days' sight on account of the service of the City of Buenos Ayres 4½ per cent. sterling loan of 1888.

Baring Brothers & Co., Limited, give notice that they are authorised to receive and forward to New York the subscriptions of stockholders to the new issue of preferred stock of the Great Northern Railway Company of Minnesota, U.S.A., and to receive payment therefore as provided in the circular of the company dated New York, June 10, 1898, copies of which may be obtained at their counting house.

The fourth half-yearly amortisation of the bonds of the Oriental Republic of Uruguay 5 per cent. loan, 1896, took place on Tuesday at the banking-house of Messrs. Glyn, Mills, Currie, & Co., by public tender, the amount to be applied being £9,614 5s. Tenders amounted to £74,200, ranging from £55 14s. 6d. to £58 per cent. Tenders of £17,200 at £55 14s. 6d. were accepted.

The Government of the colony of Victoria, Australia, announce that, in connection with the Department of Mines, they have opened an office and museum at 9, Victoria-chambers, Westminster, London, S.W., where all information relating to the mines and minerals of Victoria can be obtained free.

The Stock Conversion and Investment Trust (Limited and Reduced) notifies that the reduction of capital has received the sanction of the Court. The ordinary shares are thus reduced from £5 shares £1 paid to £2 shares with £1 paid and £1 reserve liability.

Mr. G. Auldjo Jamieson has issued a circular to the shareholders of the Municipal Trust Company (Limited and Reduced), stating that he feels obliged to resign his seat on the board, as he believes the course they have determined on as to payment of dividends to be illegal, and also detrimental to the interest of the holders of the company's deferred stock.

* Statement of gross traffic.

Prices Quoted on the London Stock Exchange.

Throughout the INVESTORS' REVIEW middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the INVESTMENT INDEX published quarterly—January, April, July, and October—in connection with this REVIEW, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the REVIEW almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the INVESTORS' REVIEW any subscriber can follow for himself the movements of securities from week to week, and the INVESTMENT INDEX will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk. Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D Stk., *debenture stock*; Pf. Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.

REORGANIZATION

OF

THE BALTIMORE AND OHIO RAILROAD COMPANY.

The undersigned Committee, at the request of holders of a large amount of the securities, has been for a long time past engaged in an examination of the affairs of The Baltimore and Ohio System and the relative value and earning capacity of the various lines comprised therein, with a view to formulating a plan of reorganization therefore which should fairly recognise the rights of all security holders, and at the same time bring the fixed charges of the reorganized Company safely within the net earning capacity of the system. Much time and attention have been devoted to acquiring full and accurate information as to all details, including a careful examination of the Company's accounts for the period of nine years and six months, made by Mr. Stephen Little on behalf of the Committee. The aim of the Committee has been to formulate a plan for the reorganization of the system which should accomplish the following results:

(*a*) The reduction of the fixed charges to a limit safely within the net earning capacity of the reorganised properties;

(*b*) Adequate capital for present and future requirements;

(*c*) The payment of floating debt and provision for existing car-trust obligations;

(*d*) The preservation of the integrity of the system as far as the same can be economically and advantageously accomplished and such control of the reorganized Company as shall secure a satisfactory management of the property for a period of years.

Having these objects in view, a plan has been prepared and Messrs. Speyer & Co., and Messrs. Kuhn, Loeb & Co., of New York, and Messrs. Speyer Brothers, of London, have been selected by the Committee to act as Reorganization Managers to carry out the plan.

Messrs. Louis Fitzgerald, Henry Budge, Edward R. Bacon, and William A. Read, have been appointed an Advisory Committee to continue and complete the work of the Reorganization Committee and to consult and co-operate with the Reorganization Managers. Any vacancy in the Advisory Committee occasioned by death, resignation, or otherwise, may be filled by the joint action of the Reorganization Managers, and of the remaining Members of the Advisory Committee.

The undersigned recommend the prompt acceptance of the plan, believing that its consummation will result to the best interests of all security holders, and will place this important property upon a sound and conservative basis.

NEW YORK, June 22, 1898.

LOUIS FITZGERALD,
AUGUST BELMONT,
EDWARD R. BACON,
HENRY BUDGE,
EUGENE DELANO,
WILLIAM A. READ,
HOWLAND DAVIS,

Reorganization Committee.

To the Holders of the following Bonds, Coupons, and Stocks:

Baltimore and Ohio Railroad Company Bonds, Loan of 1853, Extended to 1935 at Four Per Cent.
Baltimore and Ohio Railroad Company 100-Year Five Per Cent. Consolidated Mortgage Bonds of 1888.
Baltimore and Ohio Railroad Company Sterling Six Per Cent. Loan of 1872, Due March 1, 1902.
Baltimore and Ohio Railroad Company Sterling Six Per Cent. Loan of 1874, Due May 1, 1910.
Baltimore and Ohio Railroad Company Six Per Cent. Loan of 1879, Due April 1, 1919 (Account Parkersburg Branch Railroad Company).
Baltimore and Ohio Railroad Company Five Per Cent. Bonds, Loan of 1885 (Account Pittsburgh and Connellsville Railroad Company).
Baltimore and Ohio Railroad Company Four and One-Half Per Cent. Terminal Mortgage Bonds of 1894.
Baltimore and Ohio Railroad Company Sterling Four and One-Half Per Cent. Loan of 1883, Philadelphia Branch.
Baltimore and Ohio Railroad Company Sterling Five Per Cent. Loan of 1877, Due June 1, 1927 (Account Baltimore and Ohio and Chicago Railroad Company).
Baltimore and Ohio Railroad Company First Preferred Stock.
Baltimore and Ohio Railroad Company Second Preferred Stock.
Baltimore and Ohio Railroad Company Common Stock.
Pittsburgh and Connellsville Railroad Company First Mortgage Bonds, Extended to 1946 at Four Per Cent.
Pittsburgh and Connellsville Railroad Company First Mortgage Seven Per Cent. Bonds, Due July 1, 1898.
Pittsburgh and Connellsville Railroad Company Six Per Cent. Consolidated Mortgage Bonds.
Akron and Chicago Junction Railroad Company First Mortgage Five Per Cent. Bonds.
Akron and Chicago Junction Railroad Company Preferred Stock.
Washington City and Point Lookout Railroad Company Six Per Cent. Bonds.
Matured and Unpaid Coupons, and claims for interest on registered bonds, appertaining to any of the above-named Bonds, except those of the Washington City and Point Lookout Railroad Company may be deposited separate from the Bonds as hereinafter stated.

As stated in the foregoing announcement of the Re-organization Committee, a plan has been prepared, with our joint approval and co-operation, for the re-organization of the Baltimore and Ohio Railroad Company's System; and in conformity with an arrangement with the Committee, the undersigned have undertaken to act as Re-organization Managers to carry out the plan.

The plan provides for the creation of the following new securities:—

FIRST

70,000,000 Dols. PRIOR LIEN THREE AND ONE-HALF PER CENT. GOLD BONDS, DUE 1925.

These bonds will bear interest from July 1, 1898, and are to be secured by a mortgage upon the Main Line and Branches, Parkersburg Branches and Pittsburgh Division when acquired by the New Company, covering about 1,017 miles of first track, and about 964 miles of second, third and fourth tracks and sidings and also all the equipment now owned by the Company of the value of upwards of 20,000,000 dols. or hereafter acquired in any manner except by the use of the 34,000 000 dols. reserved First Mortgage Bonds, as hereinafter stated.

The right will be reserved to issue, after January 1st, 1902, not to exceed 5,000,000 dols. additional of these bonds, at the rate of not exceeding 1,000,000 dols. a year, for the enlargement, betterment or extension of the properties covered by the Prior Lien Mortgage, or for the acquisition of additions thereto.

In case delay should occur in acquiring any of the said lines of railway, the execution of the plan will not for that reason necessarily be postponed, but the existing bonds upon such line deposited under the plan may be pledged under the Prior Lien Mortgage, as security for the bonds issued thereunder, until such line of railway shall be acquired by the New Company and subjected to the lien of said mortgage.

The Prior Lien Bonds are to be applied as follows:—

	Dols.
In partial exchange for existing bonds	60,073,090
Purchased by Syndicate to provide cash requirements of plan ...	9,000,090
	69,073,090
For contingencies (any surplus to New Company)	926,910
	70,000,000

SECOND.

63,000,000 Dols. FIRST MORTGAGE FIFTY-YEAR FOUR PER CENT. GOLD BONDS.

These bonds will bear interest from July 1st, 1898, and are to be secured by a mortgage which will be a first lien on the Philadelphia, Chicago, and Akron divisions and branches, and the Fairmont, Morgantown, and Pittsburgh Railroad, covering about 570 miles of first track, and about 332 miles of second, third and fourth tracks and sidings, and also on the properties now included in the present Baltimore and Ohio Terminal Mortgage of 1894, when said lines and properties are acquired by the New Company: also on the Baltimore Belt Railroad, if and when the same shall be acquired by the New Company; and a lien subject to the Prior Lien Mortgage upon the lines, property and equipment covered by the latter.

The right will be reserved to increase the amount of these bonds to 70,000,000 dols. for the enlargement, betterment, or extension of the railroads and properties covered by the Prior Lien Mortgage and also those covered by the First Mortgage, or for the acquisition of extensions or additions thereto or equipment for use thereon at the rate of not exceeding 1,500,000 dols. a year for the first four years after the organization of the New Company and at the rate of not exceeding 1,000,000 dols. a year thereafter. The right will also be reserved to call in and redeem all or any part of the First Mortgage Bonds after twenty-five years, at 105, and also to issue not to exceed 75,000,000 dols. additional of said bonds or such lesser amount as may be required to retire the Prior Lien bonds when due.

In case delay should occur in acquiring any of the said lines of railway or properties to be included under the First Mortgage as above stated, the execution of the plan will not for that reason necessarily be postponed, but the existing bonds upon such line or property deposited under the plan may be pledged under the First Mortgage, as security for the bonds issued thereunder, until such line or property shall be acquired by the New Company, and subjected to the lien of said First Mortgage.

The First Mortgage Bonds are to be applied as follows:—

	Dollars.
In partial exchange for existing bonds	36,384,535
Purchased by Syndicate to provide cash requirements of plan ...	12,450,000
For contingencies (any surplus to New Company)	1,165,465
	50,000,000
Reserve for New Company	7,000,000
	57,000,000
Reserve to be issued only to retire Baltimore Belt Line 5s. ...	6,000,000
	63,000,000

NOTE.—The properties covered by the Baltimore Belt Line mortgage will be leased at a rental equivalent to interest at 4 per cent. on the existing Belt Line 5 per cent. bonds which is to be in full payment of said interest. The rental agreement will provide that in consideration of the rental the New Company shall have an option to purchase all the said Belt Line 5 per cent. bonds at par and accrued interest at any time within five years on sixty (60) days' notice, and that, in case the Company shall not purchase such bonds within the five years specified, it will at the termination of that period assume the ultimate payment, when due, of the principal of such bonds.

THIRD.

40,000,000 Dols. FOUR PER CENT. NON-CUMULATIVE PREFERRED STOCK.

This stock will be entitled to receive non-cumulative dividends at the rate of 4 per cent. per annum before the payment of any dividend on the Common Stock. This stock will be applied as follows:—

	Dols.
For Reorganization purposes	17,218,700
Purchased by Syndicate to provide cash requirements of plan ...	16,450,000
For adjustment with various outstanding bondholders' and stock-holding interests, contingencies, &c., &c. (any surplus to New Company)	1,331,300
	35,000,000
Reserve for New Company...	5,000,000
	40,000,000

FOURTH.

35,000,000 Dols. COMMON STOCK.

This stock will be applied as follows:—

	Dols.
For Reorganization purposes	31,178,000
For adjustment outstanding securities, contingencies, &c. (any surplus to New Company)	3,822,000
	35,000,000

In order to establish such control of the Reorganized Company as shall secure a satisfactory management of the property for a period of years, both classes of stock of the New Company (except such shares as may be disposed of to qualify directors) shall be vested in the following five Voting Trustees for the period of five years:—William Salomon, Abraham Wolff, J. Kennedy Tod, Louis Fitzgerald, and C. H Coster, although the Voting Trustees in their discretion may deliver their stock at an earlier date as provided in the Trust Agreement. In the meanwhile the Voting Trustees are to deliver their certificates in the usual form.

As stated in the plan, holders of First and Second Preferred and Common Stock of the Baltimore and Ohio Railroad Company may purchase from the Syndicate new preferred and common stock, by depositing their old stocks with the Mercantile Trust Company, or the London and Westminster Bank, Limited, its agency in London, on the following terms: as consideration for shares of the New Company depositors of B. & O. First Preferred Stock must pay 2 dols. per share deposited; depositors of B. & O. Second Preferred Stock must pay 20 dols. per share deposited; and depositors of B. & O. Common Stock must pay 20 dols. per share deposited. Such payments must be made by depositors in not less than three instalments, at least thirty days apart, when and as called for by advertisement published in each instance at least twice a week for two weeks in at least two daily newspapers in New York, Baltimore, and London respectively.

Deposited bonds must carry all coupons and claims for interest on registered bonds maturing on or after July 1, 1898 (except the First Mortgage Six Per Cent. Bonds of the Washington City and Point Lookout Railroad Company, must also carry all matured and unpaid coupons). All matured and unpaid coupons and claims for interest on registered bonds (excepting the unpaid coupons on the First Mortgage Six Per Cent. Bonds of the Washington City and Point Lookout Railroad Company) may be deposited separate from the bonds, and the same will be paid in cash as soon as practicable after the plan is declared operative, with interest on such coupons and claims for interest at the rate of five per cent. per annum from the date of maturity up to the date when the same are finally paid. Interest will also be paid in cash upon the completion of the reorganization on all deposited bonds (excepting the First Mortgage Six per Cent. Bonds of the Washington City and Point Lookout Railroad Company) at the rate provided in the old Bonds up to July 1, 1898, from the coupon date last preceding.

The Syndicate will purchase such coupons and claims for interest on registered bonds matured prior to July 1, 1898, from holders who do not desire to deposit the same under the plan (provided and so soon as the bonds to which the coupons or claims of interest appertain have been deposited) at their face value with interest at the rate of five per cent per annum from the respective dates of maturity of such coupons or claims for interest to date of purchase, provided such coupons and claims for interest shall be presented for sale to the Syndicate at the office of the Mercantile Trust Company in New York or at its London agency above mentioned on or before July 22, 1898.

The basis of exchange of existing bonds and of sale of new stock is shown in the following table :—

EXISTING BONDS AND STOCK TO BE DEPOSITED.	Each 1,000 dols. or £200 Receives					Actual Percentage for Sterling Issues Figured at 4·8666 Dols.		
	*Cash.	New Prior Lien 3½% Bonds.	New First Mtge. 4% Bonds.	New Pfd. Stock Trust Certificates.	New Common Stock Trust Certificates.	New Prior Lien 3½% Bonds.	New First Mtge. 4% Bonds.	New Pfd. Stock Trust Certificates.

* Interest at the rate provided in the old bonds, from the date of the last matured coupon next preceding July 1, 1898, up to the date when the new bonds begin to bear interest, namely, July 1, 1898 (exclusive of previously matured coupons otherwise provided for as stated below).

The Syndicate has agreed to purchase for cash, upon the plan being declared operative, all Baltimore and Ohio Railroad Company One-Hundred-Year Five Per Cent. Consolidated Mortgage Bonds deposited under the plan, whose holders prefer to accept cash rather than to take the new securities, at the price (in New York) of 110 and interest accrued and unpaid since the maturity of the last-paid coupon, provided the depositors of such bonds shall signify their election to receive cash as above stated, by presenting their Certificates of Deposit at the office of the Mercantile Trust Company in New York or at its London agency above specified, within sixty days from the time the plan shall actually be issued, to be stamped as electing to accept such cash payment. Such depositors will thereupon be entitled to receive such cash payment so soon as the plan is declared operative, upon surrender of their Certificates of Deposit so stamped.

	Dols.
The fixed charges of the Company for the year ending June 30, 1897, as reported by the Receivers, were	7,771,111
The annual fixed charges, upon completion of the reorganization and retirement of existing bonds as proposed, it is estimated, will be	6,252,351
Decrease of annual fixed charges	1,518,760

The Compauy, as shown by Mr. Stephen Little's expert examination and report, dated July 11th, 1896, from September 30th, 1888, to November 30th, 1895, a period of seven years and two months, earned, net, including miscellaneous income, a yearly average of 7,234,000 dols., without deduction, however, of average taxes amounting to 437,000 dols.

	Dols.
The net earnings for the year ending June 30th, were including miscellaneous income ... ... (For the fiscal year ending June 30, 1897, equipment of the Company valued on its books at 1,155,829·95, dols. was put out of service and charged, not to operating expenses, but to "Profit and Loss," because it represented the depreciation of a number of years. As against this, however, extraordinary expenses—estimated at not less than 750,000 dols. —for the maintenance of the property generally, were incurred during the year, and charged to operation. For the year 1898, as stated in the annual report of last year, all equipment when put out of service, is replaced with equipment of equal value, as shown on the books of the Company, and the cost thereof charged to "Maintenance of Equipment.")	6,593,990
The net earnings from the property for the present fiscal year (April, May and June approximated) have (notwithstanding liberal charges for maintenance), as compared with the same period of the preceding fiscal year, increased ...	1,443,909
Miscellaneous income decreased	62,114
Net increase	1,381,795
Estimated net earnings for the fiscal year ending June 30, 1898, including miscellaneous income (Taxes not deducted, they being included in fixed charges)	7,975,785

from which, however, will have to be deducted the sum of about 251,000 dols., representing the decrease in the amount of miscellaneous income which will be occasioned by the proposed sale of securities in the treasury and the cancellation of sinking-fund investments under the reorganization. The fixed charges of the new Company will thus be well within the past net income of the property even that of the last fiscal year of extreme depression. The new Company will be relieved from floating debt and the embarrassment of car and wheelage trust payments and will start, not only with a substantial working cash capital, but also with power to provide facilities for the increase of business. The bye-laws of the new Company will provide that its accounts shall be audited annually by accountants of established reputation.

A Syndicate has been formed to furnish the cash required to provide for unpaid interest, existing car trusts, receiver's certificates, floating debt, and other outstanding obligations, improvement, equipment, working capital, and other purposes of the new Company, and also to purchase new securities not taken by holders of certain of the existing bonds.

The Mercantile Trust Company of New York will act as Depositary under the plan, and the London and Westminster Bank, Limited, will act as its agent for the purpose of receiving deposits in London, England. All holders of bonds and stock affected by the plan may deposit their securities, on and after June 30, 1898, either with the Mercantile Trust Company, at its office, No. 120, Broadway, in the City of New York, or at its agency, the London and Westminster Bank, Limited 41, Lothbury, London, England, and will receive reorganization certificates of deposit therefor. Application will be made in due course to list such certificates of deposit upon the New York and London Stock Exchanges.

Participation under the plan of reorganization in any respect whatsoever is dependent upon the deposit of securities as above within such time as may be fixed by the Managers, and the plan will embrace only securities so deposited. Copies of the agreement and plan of reorganization are now ready for distribution, and all security holders are invited to obtain them from the undersigned, or from the Depositary or its London agency, as all depositors are bound thereby, without regard to this circular; and the plan and agreement set forth in detail many features which it is impracticable to condense into this circular, but which are of much importance to security holders.

We believe that the prompt consummation of the plan will result to the best interests of all security holders, and will place the administration of this property on a sound and conservative basis. Any further information connected with the reorganization which may be desired by security holders will be furnished on application at the offices of any of the undersigned, or at the office of the Depositary or its London Agency.

To the Holders of Bonds or Stocks of the following-named Railroad Companies :—
Columbus and Cincinatti Midland Railroad Company.
Central Ohio Railroad Company.
Newark, Somerset and Straitsville Railroad Company.
Sandusky, Mansfield and Newark Railroad Company.
Schuylkill River, East Side Railroad Company.
Winchester and Potomac Railroad Company.
Winchester and Strasburg Railroad Company.

Referring to the plan and agreement for the reorganization of the Baltimore and Ohio Railroad Company, dated June 22, 1898, holders of the securities of the above-named railroads are requested to communicate at once with the undersigned Advisory Committee, giving the amount of their holdings, and stating how the same are held.

In order to deal with the holders of these leased-line securities, it is deemed necessary to consider each case separately and upon its merits. After hearing from the holders of a large proportion of each class of securities, the matter of adjustment will be considered.

CLEMENT WILSON, Norfolk House, Norfolk Street, W.C.

BALTIMORE AND OHIO RAILROAD COMPANY.

SIX PER CENT. STERLING MORTGAGE BONDS, LOAN OF 1874.

London and New York,
22nd June, 1898.

To the Holders of Certificates issued under the Bondholders' Agreement dated 3rd May, 1898.

Referring to our Circular of 3rd May, 1898, in which the holders of the above described bonds were invited to deposit them, so that all necessary steps might be taken for the protection of their interests, we have now to state that a Plan has been issued for the reorganization of the Baltimore and Ohio Railroad Company.

This Plan, in our opinion, fully recognises the rights of the 6 per cent. Sterling Mortgage Bonds of 1874. The terms thereby secured for them are entirely satisfactory to us, and we feel that they should be to you, and that the bonds we represent should be deposited under said Plan.

Pursuant to the Bondholders' Agreement of 3rd May, 1898, under which your bonds are deposited, and especially to Articles Fourth and Fifth (subdivision 6 thereof), it is necessary before we take any further steps in the line indicated that we shall have the Assent of 60 per cent. in amount of the holders of the above-named certificates.

As you will see on examination of the Plan, the offer to the 6 per cent. Sterling Mortgage Bonds of 1874 is, for each £200 Bond—

1,120 dols. in new Prior Lien 3½ per cent. Gold bonds due 1945 (equal at 4·8666 to 115·07 dols. per cent.), bearing interest from 1st July, 1898.
120 dols. in new First Mortgage 4 per cent. Gold bonds due 1948 (equal at 4·8666 to 12·33 dols. per cent.), bearing interest from 1st July, 1898.
160 dols. in new 4 per cent. non-cumulative Preferred Stock Trust Certificates (equal at 4·8666 to 16·44 dols. per cent.).
$91\frac{73}{100}$ dols. in cash, on completion of the reorganization, for interest to 1st July, 1898.

The Coupon on the present Bonds, due 1st May, 1898, namely, £6 per Bond, with interest thereon at 5 per cent. per annum, to be likewise paid in cash as soon as practicable after the Plan is declared operative; or, if the holder so desires, such Coupon will be purchased by a Syndicate for cash as soon as the Bond has been deposited, but not after 22nd July, 1898, at its face value, with interest at 5 per cent. per annum.

If you agree with the views herein expressed, and the offer made is satisfactory to you, will you please sign the "Assent" which may be obtained at the offices of Messrs. J. S. Morgan & Co., 22, Old Broad Street, London, E.C., and return it with the least possible delay to them.

J. S. MORGAN & CO.
J. P. MORGAN & CO.

BALTIMORE AND OHIO RAILROAD COMPANY.

FIVE PER CENT. BONDS DUE 1927, SECURED BY "CHICAGO DIVISION" MORTGAGE OF MAY 29th, 1877.

London and New York,
22nd June, 1898.

To the Holders of Certificates issued under the Bondholders' Agreement dated July 17th, 1897.

Referring to our Circular of July 22nd, 1897, in which the holders of the above described bonds were invited to deposit them, so that all necessary steps might be taken for the protection of their interests, we have now to state that a Plan has been issued for the reorganization of the Baltimore and Ohio Railroad Company.

This Plan, in our opinion, fully recognises the rights of the Baltimore and Ohio "Chicago Division" Bonds. The terms thereby secured for them are entirely satisfactory to us, and we feel that they should be to you, and that the bonds we represent should be deposited under said Plan.

Pursuant to the Bondholders' Agreement of July 17th, 1897, under which your bonds are deposited, and especially to Articles Fourth and Fifth (subdivision 6 thereof), it is necessary before we take any further steps in the line indicated that we shall have the Assent of 60 per cent. in amount of the holders of the above-named certificates.

As you will see on examination of the Plan, the offer to the Baltimore and Ohio "Chicago Division" bondholders is, for each £200 Bond—

100 dols. in new Prior Lien 3½ per cent. Gold bonds due 1925, (equal at 4·8666 to 10·27 dols. per cent.) bearing interest from 1st July, 1898.
1,070 dols. in new First Mortgage 4 per cent. Gold bonds due 1948, (equal at 4·8666 to 109·93 dols. per cent.) bearing interest from 1st July, 1898.
100 dols. in new 4 per cent. non-cumulative Preferred Stock Certificates (equal at 4·8666 to 10·27 dols. per cent.).
$4\frac{98}{100}$ dols. in cash, on completion of the reorganization, for interest to 1st July, 1898

The Coupons on the present Bonds, due 1st December, 1897, and 1st June, 1898, namely, £10 per Bond, with interest thereon at 5 per cent. per annum, to be likewise paid in cash as soon as practicable after the plan is declared operative; or, if the holder so desires, such Coupons will be purchased by a Syndicate for cash as soon as the Bond has been deposited, but not after 22nd July, 1898, at their face value, with interest at 5 per cent. per annum.

If you agree with the views herein expressed, and the offer made is satisfactory to you, will you please sign the "Assent" which may be obtained at the offices of Messrs. J. S. Morgan & Co., 22, Old Broad Street, London, E.C. and return it with the least possible delay to them.

J. S. MORGAN & CO.
J. P. MORGAN & CO.

BALTIMORE AND OHIO RAILROAD COMPANY.

FIVE PER CENT. CONSOLIDATED MORTGAGE BONDS,
Issued under Mortgage dated December 19th, 1887.
(Known as Bonds of 1988.)

New York,
22nd June, 1898.

To the Holders of Certificates issued under the Bondholders' Agreement dated 1st November, 1897.

Referring to our Circular of 1st November, 1897, in which we invited the holders of the above-described bonds to deposit them, so that we might take all necessary steps for the protection of their interests, we have now to state that a Plan has been issued for the reorganization of the Baltimore and Ohio Railroad Company.

This Plan, in our opinion, fully recognises the rights of the Consolidated Bonds. The terms thereby secured for them are entirely satisfactory to us, and we feel that they should be to you, and that the bonds we represent should be deposited under said Plan.

Pursuant to the Bondholders' Agreement of 1st November, 1897, under which your bonds are deposited, and especially to Articles Fourth and Fifth (subdivision 6 thereof), it is necessary before we take any further steps in the line indicated that we shall have the Assent of 75 per cent. in amount of the holders of the above-named certificates.

As you will see on examination of the Plan, the offer to the Consolidated Mortgage bondholders for each present bond of 1,000 dols. with all unpaid coupons or interest is substantially—

1,050 dols. in new Prior Lien 3½ per cent. Gold bonds due 1925, bearing interest from 1st July, 1898.
125 dols. in new First Mortgage 4 per cent. Gold bonds due 1948, bearing interest from 1st July, 1898.
85 dols. in new 4 per cent. non-cumulative Preferred Stock Trust Certificates.
$20\frac{83}{100}$ dols. in Cash, on completion of reorganization, for interest to 1st July, 1898.

or, at the option of depositors (to be signified within 60 days after the Plan shall actually be issued),

1,100 dols. cash for principal, together with cash for all accrued interest to time of payment, such payment to be made upon the Plan being declared operative.

If you agree with the views herein expressed, and the offer made is satisfactory to you, will you please sign the "Assent" which may be obtained at the offices of Messrs. J. P. Morgan & Co., 23, Wall Street, New York, and return it with the least possible delay to them.

Holders of our certificates desiring to accept the cash offer for the principal of the bonds represented thereby, will please so signify at the foot of the Assent. In all other cases we shall understand that they elect to accept the new securities for the principal of the present bonds.

J. P. MORGAN & CO.
BROWN, BROTHERS & CO.
BARING, MAGOUN & CO.

London, 22nd June, 1898.

Having jointly made an issue of the above-described bonds in this market, under date of 15th May, 1888, simultaneously with that made in New York by our respective representatives, who have signed the above Circular, we strongly recommend all holders of certificates for such bonds to assent to the terms proposed for the bonds under the Plan of Reorganization. Signed "Assents" may be sent to Messrs. J. S. Morgan & Co., 22, Old Broad Street, London, E.C.

BROWN, SHIPLEY & CO.
BARING BROTHERS & CO., Limited.

PITTSBURGH AND CONNELLSVILLE RAILROAD COMPANY.

SIX PER CENT. CONSOLIDATED MORTGAGE BONDS DUE 1926, AND GUARANTEED BY THE BALTIMORE AND OHIO RAILROAD COMPANY.

London and New York,
22nd June, 1898.

To the Holders of Certificates issued under the Bondholders' Agreement dated July 15th, 1897.

Referring to our circular of July 22nd, 1897, in which the holders of the above-described bonds were invited to deposit them so that all necessary steps might be taken for the protection of their interests, we have now to state that a Plan has been issued for the reorganization of the Baltimore and Ohio Railroad Company, including the railroad and property of the Pittsburgh & Connellsville Railroad Company.

This Plan, in our opinion, fully recognises the rights of the Pittsburgh and Connellsville Consolidated Bonds. The terms thereby secured for them are entirely satisfactory to us, and we feel that they should be to you, and that the bonds we represent should be deposited under said Plan.

Pursuant to the Bondholders' Agreement of July 22nd, 1897, under which your bonds are deposited, and especially to Articles Fourth and Fifth (subdivision 6 thereof), it is necessary before we take any further steps in the line indicated that we shall have the Assent of 60 per cent. in amount of the holders of the above-named certificates.

As you will see on examination of the Plan, the offer to the Pittsburgh and Connellsville Consolidated Mortgage bondholders is, for each £200 bond—

1,025 dols. in new Prior Lien 3½ per cent. Gold bonds due 1925 (equal at 4·8666 to 105·31 dols. per cent.) bearing interest from 1st July, 1898.
120 dols. in new First Mortgage 4 per cent. Gold bonds due 1948 (equal at 4·8666 to 12·33 dols. per cent.) bearing interest from 1st July, 1898.
200 dols. in new 4 per cent. non-cumulative Preferred Stock Trust Certificates (equal at 4·8666 to 20·56 dols. per cent.)
$29\frac{20}{100}$ dols. in cash, on completion of the reorganization, for interest to 1st July, 1898.

The coupons on the present bonds, due 1st July, 1897, and 1st January, 1898, namely, £12 per bond, with interest thereon at 5 per cent. per annum to be likewise paid in cash as soon as practicable after the Plan is declared operative; or, if the holder so desires, such coupons will be purchased by a Syndicate for cash as soon as the bond has been deposited, but not after 22nd July, 1898, at their face value, with interest at 5 per cent. per annum.

If you agree with the views herein expressed, and the offer made is satisfactory to you, will you please sign the "Assent" which may be obtained at the offices of Messrs. J. S. Morgan & Co., 22, Old Broad Street, London, E.C., and return it with the least possible delay to them.

J. S. MORGAN & CO.
J. P. MORGAN & CO.

To Holders of Receipts issued by the undersigned for

BALTIMORE AND OHIO RAILROAD COMPANY'S FIVE PER CENT. BONDS, LOAN OF 1885.

Pursuant to the Bondholders' Agreement of April 10th, 1896, we the undersigned hereby give notice that a Plan and Agreement for the Re-organization of the Baltimore and Ohio Railroad Company, dated June 22nd, 1898, has been prepared, and has been adopted and approved by us, and we hereby recommend the same for the acceptance of the Bondholders. Copies of the said Plan and Agreement have been duly lodged at the offices of Speyer & Co., New York, and Speyer Brothers, London, for inspection by the holders of our receipts issued under said Bondholders' Agreement of April 10th, 1896.

The plan provides that each 1,000 dols. of the above Bonds will, on the completion of the re-organization, be entitled to receive:—

In New Prior Lien 3½ per Cent. Bonds	1,000	dols.
,, 1st Mortgage 4 per Cent. Bonds	125	,,
,, Preferred Stock Trust Certificates	100	,,
In Cash (representing interest accrued from February 1st, 1898, to July 1st, 1898)	20·83	,,

The New Prior Lien and 1st Mortgage Bonds are to bear interest from July 1st, 1898.

Any receipt-holders who do not assent to such Plan and Agreement of Re-organization may withdraw their bonds and coupons represented by our receipts at any time on or before July 21st, 1898, upon the surrender of such receipts, without expense. All receipt-holders who shall not withdraw their bonds and coupons on or before July 21st, 1898, above stated, shall be conclusively deemed to have assented to said Plan and Agreement of Re-organization, and will be bound thereby, and the undersigned will thereupon deposit thereunder all of such bonds and coupons not so withdrawn, in exchange for Re-organization Certificates of Deposit issued under said Plan and Agreement.

SPEYER & CO.
SPEYER BROTHERS, } Depositaries.

Dated, June 22nd, 1898.

BALTIMORE AND OHIO RAILROAD SIX PER CENT. BONDS OF 1872.

To the Holders of Certificates issued under the Bondholders' Agreement of 16th May, 1898.

A plan having been issued, dated the 22nd June, 1898, for the reorganization of the Baltimore & Ohio Railroad, by which satisfactory provision is in our opinion made for the rights of the above Bonds, we shall deposit under the said plan all Bonds deposited with us under the Bondholders' Agreement of the 16th ultimo, provided that such deposit is assented to, as provided in the said agreement, by the holders of Sixty per Cent. in amount of our Certificates. Any holders of Certificates who wish to dissent must give us written notice within two weeks from the 4th of July next. Forms of assent and copies of the plan may be obtained from us by holders of our Certificates.

BARING BROTHERS & CO., LIMITED,
8, Bishopsgate, Within.

June 22nd, 1898.

Founders Court, London, E.C.,
22nd June, 1898.

To the Holders of our Certificates of Deposit for the

BALTIMORE & OHIO RAILROAD COMPANY'S FIRST MORTGAGE FOUR AND A-HALF PER CENT. STERLING BONDS OF 1883

Issued under the Bondholders' Agreement dated 1st October, 1897.

A proposed Plan and Agreement for the Reorganization of the Baltimore and Ohio Railroad Company, dated 22nd June, 1898, has been most carefully considered by us, under which, each of the above bonds will receive 1,000 dols. New First Mortgage Four per Cent. Gold Bonds, and 265 dols. in New Preferred Stock in exchange for each £200 First Mortgage Four and a half per Cent. Sterling Bond 1883. We recommend the same to you for your prompt acceptance.

Under your Bondholders' Agreement of 1st October, 1897, it is provided that if there shall be proposed to our satisfaction any Scheme of Reorganization or Readjustment, we may, with the assent (to be manifested by express approval, or by a failure within two weeks to express dissent), of the holders of certificates of deposit representing sixty per cent. in amount of the deposited bonds, come in under such reorganization.

The Plan and Agreement is deemed satisfactory by us. We request therefore your assent thereto in writing.

Unless, within two weeks from the date of mailing this notice to you and of the first advertisement of this notice in two London newspapers, you notify us of your dissent, we will presume, conclusively, that you have assented to our deposit of your bonds under said Plan and Agreement of Reorganization.

Your bonds will accordingly be deposited by us, if 60 per cent. of the bonds with us deposited shall assent in writing to the deposit under said Plan and Agreement.

If notified by any depositor within two weeks from the date hereof, in writing of his dissent, we will return him the bonds deposited with us, upon surrender of our Certificates of Deposit, thus ending all future obligation to such dissenting bondholder,

If we are not notified of your dissent within the time named, upon receipt by us in exchange for your bonds of certificates of deposit issued under said Plan and Agreement of Reorganization, we will deliver the same to you, without further charge, upon surrender to us of our own certificates.

We solicit most earnestly a very prompt expression, in writing, of your assent or dissent. Unless notified to the contrary by you, we will deposit all coupons of assenting bonds maturing prior to 1st July, 1898, upon depositing such bonds under the Plan.

Having thus obtained for depositing bondholders the opportunity to secure terms of settlement deemed satisfactory by us, we notify you that after the expiration of two weeks from the mailing of this notice and first advertisement thereof, our only duty under the Bondholders' Agreement of 1st October, 1897, will be either to return their bonds to depositing holders who have theretofore signified their desire to withdraw the same, or to surrender to such depositing bondholders as, within that period, shall have assented either expressly or by a failure to dissent, the certificates of deposit which will be issued under said Plan and Agreement of Reorganization, and if the coupons are ordered to be sold, to pay to them any cash received therefor.

In no event will any certificates be delivered by us, saving upon return to us of own certificates of deposit.

Annexed hereto is a form of written assent to the proposed Plan and Agreement of Reorganization.

It is our desire that all assenting bondholders will deliver at the earliest moment after the certificates have been received by us under the Plan and Agreement, their own certificates of deposit with us for exchange. We will be ready, after such exchange, to accept the certificates of deposit thus to you delivered, to be held, in case the Plan and Agreement shall be declared thereafter inoperative, upon the understanding that we will demand in lieu thereof your bonds deposited under said Plan and Agreement, and shall hold said bonds under the original Agreement of 1st October, 1897.

Yours faithfully,
BROWN, SHIPLEY & CO.

STERLING.

FORM OF ASSENT.

As the owner of Brown, Shipley & Company's Certificate(s) of Deposit for Four and a-Half per Cent. First Mortgage Sterling Bonds of 1883 of the Baltimore & Ohio Railway Company, deposited under an Agreement endorsed thereon, No. (s)..... said Certificate being for £..... bond(s) assent is given to a deposit by Brown, Shipley & Company, Committee of the said First Mortgage Sterling Bonds of 1883, covered by said Certificate, under a proposed Plan and Agreement for the Reorganization of the Baltimore & Ohio Railway Company, in accordance with the terms of said Plan and Agreement, of which a copy has been received.

.....

Founders Court, London, E.C.,
22nd June, 1898.

To the Holders of our certificates of deposit for the

BALTIMORE & OHIO RAILROAD COMPANY'S FIRST MORTGAGE FOUR-AND-A-HALF PER CENT. GOLD TERMINAL BONDS OF 1894

Issued under Bondholders' Agreement, dated 30th September, 1897.

A proposed Plan and Agreement for the Reorganization of the Baltimore and Ohio Railroad Company, dated 22nd June, 1898, has been most carefully considered by us, under which each of the above bonds will receive 1,000 dols. in New First Mortgage 4 per cent. Gold Bonds of the Baltimore and Ohio Railroad Company in exchange for each 1,000 dols. 4½ per cent. Terminal Bonds. We recommend the same to you for your prompt acceptance.

Under your Bondholders' Agreement of September 30th, 1897, it is provided that if there shall be proposed to our satisfaction any Scheme of Reorganization or Readjustment, we may, with the assent (to be manifested by express approval, or by a failure within two weeks to express dissent), of the holders of certificates of deposit representing sixty per cent. in amount of the deposited bonds, come in under such reorganization.

The Plan and Agreement is deemed satisfactory by us. We request therefore your assent thereto in writing.

Unless, within two weeks from the date of mailing this notice to you and of the first advertisement of this notice in two London newspapers, you notify us of your dissent, we will presume, conclusively, that you have assented to our deposit of your bonds under said Plan and Agreement of Reorganization.

Your bonds will accordingly be so deposited by us, if sixty per cent. of the bonds with us deposited, shall assent in writing to the deposit under said Plan and Agreement.

If notified by any depositor within two weeks from the date hereof, in writing of his dissent, we will return him the bonds deposited with us, upon surrender of our Certificates of Deposit, thus ending all future obligation to such dissenting bondholder.

If we are not notified of your dissent within the time named, upon receipt by us in exchange for your bonds, of certificates of deposit issued under said Plan and Agreement of Reorganization, we will deliver the same to you, without further charge, upon surrender to us of our own certificates.

We solicit most earnestly a very prompt expression, in writing, of your assent or dissent. Unless notified to the contrary by you, we will deposit all coupons of assenting bonds maturing prior to first July, 1898, upon depositing such bonds under the Plan.

Having thus obtained for depositing bondholders the opportunity to secure terms of settlement deemed satisfactory by us, we notify you that after the expiration of two weeks from the mailing of this notice and first advertisement thereof, our only duty under the Bondholders' Agreement of 30th September, 1897, will be either to return their bonds to depositing holders who have theretofore signified their desire to withdraw the same, or to surrender to such depositing bondholders as, within that period, shall have assented either expressly or by a failure to dissent, the certificates of deposit which will be issued under said Plan and Agreement of Reorganization, and if the coupons are ordered to be sold, to pay to them any cash received therefor.

In no event will any certificates be delivered by us, saving upon return to us of our own certificates of deposit.

Annexed hereto is a form of written assent to the proposed Plan and Agreement of Reorganization.

It is our desire that all assenting bondholders will deliver at the earliest moment after the certificates have been received by us under the Plan and Agreement, their own certificates of deposit with us for exchange. We will be ready, after such exchange, to accept the certificates of deposit thus to you delivered, to be held, in case the Plan and Agreement shall be declared thereafter inoperative, upon the understanding that we will demand in lieu thereof your bonds deposited under said Plan and Agreement, and shall hold said bonds under the original Agreement of 30th September, 1897.

Yours faithfully,
BROWN, SHIPLEY & CO.

TERMINAL.

FORM OF ASSENT.

As the Owner of Brown, Shipley & Company's Certificate(s) of Deposit for dols.....Four and a-Half per Cent. First Mortgage Terminal Gold Bonds of the Baltimore & Ohio Railroad Company, deposited under an Agreement endorsed thereon No.(s) .....I[we] assent to a deposit by Brown, Shipley & Company, Committee of the said First Mortgage Terminal Gold Bonds covered by said Certificate, under a proposed Plan and Agreement for the Reorganization of the Baltimore & Ohio Railroad Company, in accordance with the terms of said Plan and Agreement of which a copy has been received.

(Signature)

.....

BELT.

Founders Court, London, E.C.,
22nd June, 1898.

To the Holders of our Certificates of Deposit for the

FIRST MORTGAGE FIVE PER CENT. GOLD BONDS OF THE BALTIMORE BELT RAILROAD COMPANY,

Issued under our Bondholders' Agreement, dated 1st November, 1897.

The proposed Plan and Agreement for the Reorganization of the Baltimore and Ohio Railroad Company, dated 22nd June, 1898, has been most carefully considered by us. We recommend the same to you for your prompt acceptance.

Such Plan provides that the property of the Baltimore Belt Railroad Company is to be leased to the New Company to be formed, at a rental sufficient to pay interest at the rate of Four per centum per annum upon the Baltimore Belt Line bonds. The arrangement is to date from July 1st, 1898, and the payment of interest at the rate of Four per centum after that date is to be in full of all interest due and payable upon such bonds thereafter. Interest at the rate of Five per centum per annum will be paid up to July 1st, 1898, with interest upon overdue coupons, upon the completion of the reorganization.

The Plan further provides that in consideration of the agreement to pay such rental, the holders of said Baltimore Belt Line bonds shall agree that the new Company shall have the option for five years from July 1st, 1898, to purchase said Belt Line bonds at par and accrued interest at any time, upon sixty days' notice of their intention to do so, and that if this option be not exercised within the said period, the the new Company will assume the ultimate payment of the principal of said bonds when due. The form of the proposed lease and agreement with the new Company, covering the arrangement, will be subject to the approval of our Counsel. In order to make the arrangement effective, the holders of the Baltimore Belt Line bonds must present the same to be stamped, and the arrangement will not become operative until the holders of all such Baltimore Belt Line bonds outstanding, or such lesser amount as the Reorganization Managers or the new Company shall approve, shall have consented thereto and presented their bonds for stamping accordingly.

Under your Bondholders' Agreement of November 1st, 1897, it is provided that if at any time there should arise an opportunity for arrangement or settlement considered favourable by us, we may, with the assent (to be manifested by express approval or by a failure within two weeks to express dissent) of the holders of our certificates of deposit representing sixty per cent. in amount of the deposited bonds, make such arrangement and settlement.

The Plan and Agreement present an opportunity for a settlement and arrangement of your claims which we deem favourable. We request, therefore, your assent thereto in writing. Unless within two weeks from the date of mailing this notice to you, and of the first advertisement of this notice in two London newspapers, you notify us of your dissent, we shall presume conclusively that you have assented to the proposed arrangement and to the stamping of your bonds as assenting thereto, as provided by the proposed lease and agreement above mentioned.

Your bonds will accordingly be so presented by us for stamping if 60 per cent. of the bonds deposited with us shall assent in writing to the proposed arrangement, and the same shall become operative by the assent of the requisite amount of outstanding bonds as above stated.

If notified by any depositor within two weeks from the date hereof in writing of his dissent, we shall return him the bonds deposited with us upon surrender of our certificates of deposit, thus ending all future obligation to such dissenting bondholder.

We solicit most earnestly a very prompt expression of your assent or dissent.

Having thus obtained for depositing bondholders the opportunity to secure terms of settlement deemed satisfactory by us, we notify you that after the expiration of two weeks from the mailing of this notice and the first advertisement, our only duty under the Bondholders' Agreement of November 1st, 1897, will be either to return their bonds to depositing holders who have theretofore signified their desire to withdraw the same, or to surrender to such depositing bondholders as within that period shall have assented, either expressly or by failure to dissent, the deposited bonds duly stamped as assenting to the proposed arrangement. In no event will any securities be delivered by us save upon the return to us of our own certificates of deposit.

Annexed hereto is a form of written acceptance of the proposed arrangement.

In case the proposed lease and agreement should not become operative, the deposited bonds will not be stamped, and we shall hold the same under the original agreement of November 1st, 1897.

BROWN, SHIPLEY & CO.

BELT.

FORM OF ASSENT.

First Mortgage Five per Cent. Gold Bonds of the Baltimore Belt Railroad Company, dated 16th September, 1890, Bondholders' Agreement, 1st November, 1897.

As the owner(s) of Messrs. Brown, Shipley & Company's Certificate(s) of Deposit for First Mortgage Five per Cent. Gold Bonds of the Baltimore Belt Railroad Company, deposited under an agreement endorsed thereon No.(s)..... said Certificate(s) for dols.....of bonds, assent is given to the arrangement as communicated to me[us] by Messrs. Brown, Shipley & Company proposed in regard to said bonds under the Plan and Agreement for the Reorganization of the Baltimore & Ohio Railroad; and Messrs. Brown, Shipley & Company are authorised to present the First Mortgage Five per Cent. Gold Bonds of the Baltimore Belt Railroad Company covered by said Certificate(s) to be stamped in accordance therewith, and with said Plan and Agreement of Reorganization, copy of which has been received.

The Investors' Review

EDITED BY A. J. WILSON.

Vol. I.—No. 26. New Series. FRIDAY, JULY 1, 1898. [Registered as a Newspaper.] Price 6d. By post, 6½d

PUBLISHED TO-DAY.

No. XIII of the

INVESTMENT INDEX,

A QUARTERLY SUPPLEMENT

TO THE

Investors' Review.

It will contain, in addition to a complete list of the securities quoted on the London Stock Exchange and a selected list of securities quoted on provincial Stock Exchanges, with the return they give to investors at current prices, so classified that the range of interest desired can be picked out at once, notes on the present aspect of money and stock markets, and also suggestions as to how investments may be made with reasonable probability of safety.

In the appendix a commencement will be made with the formation of a *catalogue raisonné* designed to give at a glance the quality of each security dealt with.

Orders should be sent in early, as it is not proposed to supply this supplement except to subscribers.

Price TWO SHILLINGS net per Number,

Or by Post TWO SHILLINGS AND TWOPENCE. Subscription Price, **8/6** per Annum.

CLEMENT WILSON,

NORFOLK HOUSE, NORFOLK STREET, W.C.

THE

LAW GUARANTEE AND TRUST SOCIETY, LIMITED.

Capital Subscribed	£1,000,000
do. Paid-up	£100,000
do. Uncalled	£900,000
Reserve Fund	£70,000

FIDELITY GUARANTEES,
On behalf of Managers, Secretaries, Clerks, Cashiers, Collectors, &c.

DEBENTURE INSURANCE.
The advantages of such Insurance are as follows:—
1. The Debentures being guaranteed by the Society can be placed at a rate less than par, thus saving discount.
2. As well as a reduced rate of interest is willingly accepted.
The Society acting as Trustee for Debenture Holders also adds additional Security.

MORTGAGE INSURANCE.
In connection with

CONTINGENCY INSURANCE,
against Defects in Title, Lost Documents, Missing Beneficiaries, Re-Marriage, Issue and Name and Arms Risks, &c.

LICENSE INSURANCE.
Mortgagees of Licensed Property should always insure in a substantial Insurance Society against loss they may sustain by depreciation in consequence of the license being lost.

TRUSTEESHIPS for Debenture Holders, and under Wills, Marriage Settlements, &c.

The Investors' Review.

Our "Gift" to Egypt.

Unquestionably we have a great inheritance, and we are dissipating it right royally. It is unnecessary to go over here the story of this Soudan conquest—how it was begun without warning and how each statement made regarding it as it went on has been falsified by the event to such an extent that, had deception been deliberately intended, the Government could not have varied further from the truth than it has actually done. We do not accuse her Majesty's Ministers of falsehood aforethought in this matter; they are more probably victims of a policy of drift. Nobody called for this Soudan conquest; it was instigated by Slatin Pasha and commenced in order to give ambitious British officers something to win "laurels" by. And now, as this REVIEW has said from the outset, we have to meet the cost, for, of course, the remission of £798,802 advanced to Egypt to help to pay the bill for this fighting is only the second instalment of our *largesse* to that country. We have always maintained that Egypt could not afford to conquer the Soudan, and could not maintain authority in it when conquered. There cannot be the slightest doubt that this is the true view to take. We have had to give Egypt about £800,000 now, and we shall have, every war year that follows, to present her with similar gifts of greater or less amount. The picture which the Chancellor of the Exchequer drew of Egyptian prosperity is largely a fictitious one, but

had it been true his equally vivid description of the desolation which Mahdist rule has brought upon Dongola, and doubtless on all the rest of the territories cursed by that pestilence, is sufficient to demonstrate to us that there can be no revenue from the Soudan worth reckoning upon for many a day to come. We shall have to pay for conquering it and to pay for garrisoning it. Possibly a few Egyptian officials may get their salaries out of the Cairo Treasury, but that will be about all, unless the development of Egypt, upon which we pride ourselves, not unfairly, is to be arrested, and the country allowed to sink back into barbarism, and its Government into penury. The prospect is not an enticing one, but it is quite in accordance with the anticipations of people who have kept their heads throughout this "Imperialist expansion" mania, which is driving the ship of State on the rocks. Yet only eighty-one members of the Opposition could be mustered to vote against this gift, and once more it was demonstrated that there is no genuine opposition in this Parliament. As a Parliament it is an invertebrate thing, unworthy of respect, and rapidly losing the confidence of thinking men. All it can do, apparently, is to vote away money and entangle us in excessive expenditure of every description. The very same evening on which this £800,000 loan to Egypt—it was a loan a year ago—was remitted, the House cheerfully sanctioned a loan of £10,000,000 to India. Had it been £20,000,000 the voting would have been just the same, the debate just as drivelly and slipshod. The day is coming when the British people will have to treat this kind of liberality also as "gifts" from itself, for the money raised for India will never be paid back. What cares the average M.P. for that? He storks it around Palace-yard, in Society, and plays the great man big with fate, and his scrap of a soul is content to behold him bawling and voting as the crowd bids.

The same number of the *Times* which gave Sir Michael Hicks-Beach's fancy picture of the wonderful prosperity and resources of Egypt—resources which made it out of the question that any further appeal could be made to the overflowing British purse and open British hand—presented, from its Cairo correspondent, a little of the other side of the picture. He writes with reference to freight charges in Egypt, a question brought to the front in an appeal made by the British Chamber of Commerce of Alexandria for relief. There is, it seems, serious mischief to the country and its commerce caused by the heavy tolls levied on boats passing bridges and locks on the Nile and its canals. These charges, this correspondent states, amount in some cases to as much as three-fourths of the obtainable freights, and have caused the almost total disappearance of the large fleet of cargo boats which formerly participated so greatly in the carrying trade of the Delta. It appears that the railways, thanks to this taxation, have stolen the traffic of the boats, and it is now becoming a traffic even railways are totally unable to cope with. Blame for the block of goods is laid upon the strain caused by the Soudan expedition, but that only brought the mischief to a head, and as the correspondent points out, the railway administration has no resources out of which to increase its facilities. It is limited strictly to 43⅜ per cent. of the gross receipts for working expenses, with the addition of another 1⅔ per cent. as a sort of capital reserve. This, the writer justly observes, is a mere derisory provision, when it is remembered that the total of 45 per cent. of the gross receipts thus arrived at has to bear the cost of constructing new lines, bridges, stations, and other works which in other countries would appertain to capital account. So the railway has had to get a dole from the Commission of the Public Debt. It has got £100,000 as a free grant and is allowed to spend on capital account the balance of credits open since 1892 and amounting to £1,514,000 —this, however, is to be repaid with interest. Even so the traffic cannot be provided for. The moral of this tale comes, as it should, at the end. All that the water taxes yield is £100,000 a year, and were they remitted it is roughly estimated that £50,000 more from traffic earnings would be diverted from the railway into the pockets of the boat owners. The water traffic, which is the best and must be the cheapest for heavy goods, would, in short, revive, and blocks in the warehouses and on the lines would be less frequent, if not at an end; but, though the Government recognises the evil of taxation on transport and the injustice of the present system, it cannot afford to grant even this small relief "during the financial pressure caused by the Soudan War." An appropriate and timely exhibition of riches this, is it not? Can it be that our ardent "developers" in Egypt are making the same mistake as our Children of the Mist bureaucrats of Simla—thinking that because they themselves are pretty comfortable, and growing on the whole better off, the people they rule must be. It is a kind of mistake which has often been fatal to empires.

Fire Insurance Companies' Exactions.

Attention was drawn to this subject the other day by the *Daily News*, and, as it punningly remarked, the question is a "burning" one. No large fire occurs in the City of London, and we may say in any densely built city in the Kingdom, without the fire insurance companies seizing the opportunity to raise their rates. In consequence of the Cripplegate fire it seems that these offices have now raised their charges for insuring warehouses in that part of the City to 31s. per cent. A partner in a firm of manufacturers told the *Daily News* that when he first insured thirty years ago the rate was 3s. per cent., and that before the Cripplegate fire it had been raised to 13s. 6d. to 15s. per cent., and now it is 31s. per cent. Naturally there is a strong feeling of indignation excited by this excessively screwed-up tariff, and the opinion appears to prevail that there is no escape from such exactions except by way of municipal insurance. Municipal insurance, however, is perfectly impossible so long as the old City of London proper is governed by an utterly corrupt and altogether irresponsible municipal corporation. Even were that corporation otherwise, it is doubtful whether the County Council, endowed with municipal powers for the whole Metropolitan area, could take the matter up, and deal with it in a satisfactory way, unless it fell heir, as the citizens should, to the property of the Livery companies which are now among the greatest anomalies in these islands. Vested interests of all kinds are so powerful, and the landlord interest above all, that genuine municipal fire insurance seems a thing to dream of, not a thing to be realised.

arrangement.

nder the original
IPLEY & CO.

Again and again attempts are made to cope with the tyranny of the combined fire insurance companies by starting rivals, and within the last few months more than one of these new companies have come into existence, notwithstanding the fact that their predecessors in the same field have invariably proved failures. Either they have collapsed altogether, or they are forced to join the combination. From this point of view also there is absolutely no remedy that we can discover. The old combinations are too powerful, and they possess enormous revenues from invested funds as well as in the shape of insurance premiums on private dwellings, which are rarely burned down. Both these sources of income are almost entirely wanting to a new company. An insurance manager once told the writer that it would pay the companies handsomely to insure the furniture of private houses at 6d. per cent. per annum, instead of the usual 1s. 6d. or 2s., could they do that business by itself alone. Possibly the great extension in the use of low-grade, explosive mineral oils imported from America has in recent years somewhat altered the balance by increasing the number of fires in private dwellings, but it has not yet done so to the extent of 50 per cent. in the amount of the claims, else the companies would either have been howling, or putting up their rates, or both; and we are therefore tolerably safe in saying that at least one-half of the net premiums now exacted from private householders goes to enable the companies to meet the losses created by big fires in warehouses and industrial centres. Possessing, in addition to their investments, such revenue to fall back upon, what chance is there for a new company which can do none of this kind of business, or, at least, none to speak of, for years after it is established? There is none. It has to draw its revenue altogether from the more risky kind of fire insurance, which has to be effected by the owners of factories and warehouses such as are now complaining of the rates levied upon them. And even such risks must be taken by the new competitor absolutely, because one of the most effective means which the old companies have of crushing an upstart rival is to refuse to do any business with it. A new company cannot reinsure any of its risks with the old combination of companies until it charges the "ring" scale of premiums, and thereby becomes one of their number. For such reasons as these the enterprise of founding and establishing a new fire insurance company is almost a hopeless one, and the victims of the monopoly must either grin and bear their burdens or remain uninsured.

One way out, indeed, might be found. We have frequently drawn attention in the pages of this Review to the enormous expenses of fire insurance business. As far as we can recollect, there is not a single fire company which is able to conduct its business at a cost appreciably below one-third of the premium income. In not a few the expenses of management and commissions together exceed 35 per cent. of the premium income. This naturally adds in a most important degree to the cost of insurance, and if merchants and manufacturers could hit upon some method or system of mutual insurance whereby the greater part of this heavy expenditure could be done away with, they might be able not only to cover their risks at a moderate premium, but to force down the rates of the monopolist companies.

Why mutual insurance of fire risks has never been successfully carried out on a large scale is more than we can understand; but possibly one difficulty lies in the fact that a great many of the policies effected with the companies represent over-insurance. Statistics are not available to test this point, but the number of cases of arson which come into Court tend to prove that the habit of over-insurance is much more prevalent than it ought to be under any system of commercial morality capable of facing the light of day. Now, mutual insurance could not possibly hope to succeed unless all the firms who combine and pool their funds to give protection to each other against fire act in perfect honesty. Directly any firm in the combination made an attempt to effect policies at exaggerated values or on unreal assets, true mutuality is undermined and must collapse. Probably enough, the wealthy offices which form the monopoly ring in fire insurance are lax and easy in this matter, and suffer themselves to be imposed upon without too much inquiry so long as they can make the business pay. But if this be the case, then the great advance in the scale of premiums charged is not altogether their fault. Even high premiums may represent, to a considerable percentage, extra risks which have to be incurred owing to the dishonesty of the insurers. This is a point of view which requires further elucidation, and we should be very glad indeed if some insurance manager would enable us to throw light upon it. There must be many cases where dishonesty is suspected by the insurance offices which it is not worth their while to fight, law being such a costly thing, and the verdict of juries so uncertain. Is there no office which keeps a private record of these cases capable of being worked up in statistical form, without names, so as to enable us to judge to what extent an improvement in the probity and conscientiousness of insurers might conduce to moderation in the scale of premiums charged?

State	62,990	32,900	52.2	+ 4.1	39.3	91.5

The above table, extended from that published by the *Standard* last Friday, gives at a glance the position of the revenue and expenditure of the fire companies for the past year. It shows that not one of them works

its business for less than 30 per cent. of the premium income, and very few of them have as much as 10 per cent. of that income left after meeting expenses and losses. The fattest companies are the few which, like the County Fire, possess a business in the best class of domestic risks—private houses and furniture—and do little outside that. Four offices last year paid away more than they received in premiums.

Company Promoters' Flotsam.

Our recent investigations at Somerset House have been more with a view to obtain knowledge about certain companies, in regard to which interest attaches owing to events that have happened after their formation. Much of the information must have been known before, but in view of eventualities it will be helpful to publish details about the principal holdings in some of these concerns.

Cooper, Cooper, & Co., Limited.

Formed in October, 1895, to take over a few tea and coffee selling businesses, the modest capital of £80,000 in £1 shares was issued, of which £20,000 in ordinary shares went to the vendors, and the balance of £60,000 in preference shares was offered to the public. Apparently the company was well received, and although its future is not particularly hopeful little attention would have been attracted to its affairs, had it not been for the ill-advised proposal to amalgamate it with the Ceylon and Oriental Estates. The latter is an old-established concern that has lived through its peck of troubles, and looked as if it might develop into a sound undertaking. The same cannot be said about Cooper, Cooper, & Co., Limited, for it has not been in existence three years, and its tenure of life must still be regarded as of a fragile character. As the proposal seemed to be all in favour of this company, we append its list of leading shareholders :—

	No. of Shares. Preferred.	Ordinary.
T. Meares	858	7,720
C. H. Meares	1	200
J. Wolfe	150	—
E. H. Absolom	—	3,960
A. Wood	1,500	—
Clarke & Philpot	148	—
Whelan & Higginson	2,249	—
J. Young	868	7,920
B. W. Absolom	940	—
A. Absolom	150	—

Messrs. T. Meares, J. Young, and E. H. Absolom figured as vendors in the prospectus, and their large holding of ordinary shares is thus accounted for. Messrs. J. Wolfe and Clarke & Philpot, although appearing as holders of small amounts, did a large amount of transferring, and the remainder of the names seem to be connected with the promoters. For the £20,000 of ordinary shares to be exchanged into shares of a conglomerate concern would be to at once give them a market, and thus enable an asset of problematical value to be turned into hard cash if desired.

New Trinidad Lake Asphalte Company.

We have found the debentures of this concern figuring so frequently in the list of holdings of Trust companies that we have taken the liberty of glancing at a list of its shareholders. It may first be mentioned that the company was brought out in December, 1897, with Panmure Gordon, Hill, & Co., as its brokers, and Ashurst Morris, Crisp, & Co. as its solicitors. The most active of the directors appeared to be also on the board of the vending company, and the prospectus contained some rather remarkable statements. The share capital was fixed at £500,000 in shares of £10 each, which were all taken by the vendor in part payment for the property. The issue of debentures was for £400,000, but as no list of such holders had to be registered at Somerset House, it is impossible to say into whose hands they have all fallen. A large amount we know is in the hands of various Trusts, which points to the possibility of underwriters having had to take up their quotas. The leading shareholders in the company are as follows :—

	£
J. J. Albright	19,250
Mrs. S. F. Albright	1,230
A. L. Barber	150,420
B. L. Barber	30
J. L. Barber	350
D. L. Barber	300
Barber Asphalte Paving Company	17,180
W. E. Barker	4,380
L. F. Benson	4,740
C. P. Benson	120
M. E. Benson	140
A. Brown & Sons	5,160
Mrs. J. E. Carew	4,930
H. A. Greig	19,110
J. G. Douglas	12,350
E. Hayes	10,060
R. R. Hefford	3,760
C. H. Finlayson	13,670
Montgomerie National Bank	4,430
New York and Trinidad Asphalte Company	5,040
J. W. Previté	28,350
L. G. Previté	300
E. J. Previté	120
J. W. McCarthy	3,820
M. Stevens	7,920
E. B. Warren	37,240

Messrs. J. W. Previté and A. L. Barber are directors of the Trinidad Asphalte Company, which was the vending company. Most of the shareholders reside in the United States, and the company has all the appearance of one of those gaseous productions favoured by American financiers.

North Worcestershire Breweries.

This was a queer brewery promotion, the whole of the £200,000 of share capital, excepting the seven shares for the signatories and the qualification for the directors, being issued in part payment of purchase money. Upon this slender basis a debenture debt of £250,000 in 4½ per cent. first mortgage debenture stock was issued in May, 1896, at £103 per cent. Since then the gods have not dealt kindly with the concern and the debenture stock is now quoted at 86 per cent., and prospects look poor. Who are the unfortunate holders of the debenture stock we know not, but it may be of interest to record the list of shareholders, as these, we believe, were in many cases connected with the promoters of the affair. The important holdings were as follows :—

	Ordinary. £	Preference. £
T. H. Myring	3,430	—
A. Yorke	—	1,000
W. H. Simpkiss	—	1,000
M. E. Wingfield	1,310	—
Stanley Boulter	—	98,000

	Ordinary. £	Preference. £
Sir W. H. Humphrey ...	28,500	—
G. Simmons	500	—
H. B. Praed	500	—
R. Cobay	500	—
F. R. Garrard	500	—
T. Taylor	500	—
C. J. Fauvel	500	—
Bankers Investment Trust ...	1,000	—
T. H. Weguelin	20,000	—
A. H. Blundell	2,000	—
S. R. Emerson	1'000	—
Gwelo Exploration and Development	500	—
A. E. Whitaker	30,000	—
H. S. Blaydes	1,500	—
J. W. Brett	500	—
M. B. Praed ... ... H. H. Twining	2,550	—

Messrs. Simmons, H. B. Praed, R. Cobay, F. R. Garrard, and T. Taylor are directors of the unfortunate affair, the latter being apparently the chief vendor. Mr. M. B. Praed is a trustee for the debenture holders, but his holding shown is in connection with his post as joint manager of the Inns of Court Branch of Lloyds Bank, and he evidently enjoys the enviable position of lending upon securities for which he is trustee to the debenture holders. He therefore ought to know all about the company. Mr. C. J. Fauvel is, or was, an important personage in the Gwelo Exploration and Development Company, the investment of whose funds in this brewing company was the subject of much remark. The Bankers' Investment Trust has Mr. H. B. Praed as a director, and Mr. F. Praed as secretary, hence its affection for the investment, which we believe is extended to the debentures. The holding of £98,000 in preference shares by Mr. Stanley Boulter is a little large, although we are afraid the share capital is not of much account. We have no handy moral to rub in, and this must do for the present week.

Chinese Mineral Wealth.

There appears to be some confusion, due, no doubt, to a similarity in the names of two distinct provinces, as to the location of the Chinese coal concession recently granted. Honan and Hunan are the two provinces, and both of them boast of deposits of considerable magnitude, but Honan is the one to be associated with the operations of the Anglo-Italian syndicate. It is the province contiguous to Shansi, which is by far the richest of all Chinese mineral-bearing districts, and the coming scene of the development work of other concessionaires. Honan has been but very imperfectly surveyed, and it is probable from the geological character of the country, that numerous beds will some day be discovered whose existence is at present unsuspected. But there are already several places where mining, on the primitive lines general throughout the Celestial Empire, is carried on, and the principal of these are Lushan and Juchau, in the central portion of the province and Honanfu and Taihang-shan in the north. These last are the localities in which European enterprise and European machinery are to be brought into play for the benefit of China as well as of the foreign syndicate. The kind of fuel yielded by both is anthracite, the seams of which appear to be a continuation of those for which Shansi is famous—at any rate, the quality of the Taihang-shan fuel is equal to that of Eastern Shansi, and is clean, solid, and very lustrous into the bargain. The Chinese have made no systematic attempt to work these or any other of their coal deposits to the full extent, and it is really doubtful if they could do so with their existing rude appliances even if they were so minded. Besides, they have laboured under the disadvantage of not being able to market any very considerable output because of the lack of ready and cheap communication with distant places, especially with the coast. In Taihang-shan alone there are usually about 100 shafts or apologies for shafts in operation, and four or five times that number abandoned. The Chinese way is to penetrate no further into the earth, sometimes vertically and sometimes (as in parts of Shansi) on an inclined plane, than a couple of hundred feet or so ; and then to open up new ground. The beds in the northern prefectures of Honan range in thickness from 3 ft. to 30 ft. or more, and the whole province does not at present turn out more than 300,000 tons in a year—a total that might be increased tenfold with better facilities for production and distribution. These coal beds, it may be mentioned, occur as in Shansi, in close proximity to inexhaustible quantities of iron ore, much of which is of high quality.

The coalfields of Hunan are much more extensive than those of Honan, and compare on this basis with Shansi, though this last province has an advantage in that all its known beds are of good quality, whereas about half the Hunan fuel is scarcely worth marketing at any distance. The coal-bearing area of this particular province covers 21,000 square miles, about one-half of which is workable. It is divided into fairly equal portions—the anthracite seams running along the Lui River, and the bituminous seams of the Siang River neighbourhood. There is a good demand for the former variety, and consignments go as far as Hankow by river boats along the Yang-tse-Kiang ; but the Siang River coal is consumed locally, and, generally speaking, any resident of the district who desires some simply goes to the mines and takes it. The abundance of croppings, and the ease of following a bed down an inclined plane, have caused a great many mines to be opened in succession, and little trouble to be taken to continue operations to any great depth. In the same province are several less important coalfields, the chief of which are those of Sin-chau-fu and Yuen-chau-fu. In Shansi are deposits covering an area of over 14,000 square miles, and it is estimated that the quantity of coal, "equal to the best Pennsylvania," waiting to be mined in this one province alone of the Chinese Empire is 630,000,000,000 tons—enough to last the world at the present rate of consumption for two thousand years to come. Moreover, these deposits are favourably located for working on a plateau about 2,500 ft. above sea level in the south-eastern part of the province ; the seams are mostly from 20 ft. to 30 ft. thick ; and there is an abundance of labour phenomenally cheap.

Furthermore, iron ore occurs in several strata of the coal beds, and there are numerous kinds, though the only one now employed by the natives is one that melts easily without flux, and is a mixture of clay, iron ore, spathic ore, and hematite. The two chief places in which the manufacture is carried on now are Tse-chau-fu and Ping-ting-chau, and the quality of the iron turned out is generally allowed to be excellent in spite of the very

primitive methods employed, and this result is attributable of course to the excellent character of the raw material. Honan also boasts of large deposits of iron ore, which occurs in conjunction with, or in proximity to, the coal measures. The same metal is found in many other parts of the empire—in Shantung, where there are large bodies of black oxide; in Chi-li, where it occurs with the coal; and in Hunan, Shen-se, and Kansu. No efforts have ever been made to gauge the extent of the iron ore deposits of the various provinces, but for those of Shansi and Honan we have the word of Baron von Richthofen, who examined them more exhaustively than any other Western scientist, that they are practically as inexhaustible as the coal measures. That same authority estimated the area of all the known Chinese coalfields investigated by himself alone at 400,000 square miles. But those now about to be worked in Shansi and Honan alone cover 20,000 square miles, with about 900,000,000,000 tons of workable coal; and, pending the opening up of the country, this quantity is enough to be going on with.

Economic and Financial Notes and Correspondence.

The New French Ministry.

At last, after struggling for a fortnight, the dominant Parliamentary groups in the new French Chamber have allowed a Ministry to be constructed under the leadership of the respectable and highly honourable M. Brisson. We hope it will last three weeks, and shall be agreeably surprised if it lasts three months. It is a Ministry of shirking and shunting. No issue really before the country is squarely met in the skeleton programme it has put forth. It is not going to settle the shameful Dreyfus-Esterhazy affair; it is going to allow the corn duties to replace themselves; it is to maintain protection rigorously; constitutional revision is to be temporarily postponed, and the income tax to be proposed will not be upon the sliding scale principle. A Ministry of this kind, without much character, full of contradictory elements, and in essential particulars resting upon dishonesty, cannot endure. It is a Ministry, in the first place, intent upon pleasing the military faction which stands behind all authority in France and compels President and Legislature to bow to its behests. We can augur no good from such a mummery, and the best thing, perhaps, that could happen to it would be speedy disaster. If it lasts as long as M. Méline's administration did—an event in the highest degree improbable—it will have brought France very close to an internal convulsion which might be almost equivalent to revolution, and give the signal all over Europe for the overthrow of the worn-out system of Government it now exists under in restlessness. Meantime, the best we can say of M. Brisson's is that it may be better than no Ministry at all, because the absence of one must, in a very few weeks' time, have brought about some kind of dictatorship. France, we hope, will be spared that scourge, whatever happens; and yet what is to happen there? Things cannot go on as they are now. Shams of all kinds must die—of a violent death or otherwise.

The United States Revenue Bill.

Full details of this measure have now reached this country and prove it to be rather an elaborate affair, full of minute provisions and small taxes whose value may turn out to lie not so much in the amount they yield as in the principle they establish. The tax on tobacco and its manufacturers, for example, is only to be 6d. in the pound and on cigars about 9s. a thousand. Bankers and brokers of various descriptions are to pay licence duties of moderate amount. Theatres, museums, and concert halls are also to pay a licence-tax, and circuses too; in fact, all kinds of places of public entertainment down to billiard rooms and bowling alleys are to be levied upon for the cost of this war. This licence system is extended to dealers in and manufacturers of tobacco also, but in no instance is the tax a very large one; it may be irritating, but it certainly will not be very productive. In addition to this tobacco tax and these licence duties and the extra dollar per thirty-two gallon barrel on beer, a variety of stamp duties are instituted with considerable skill and care, and some of which may be fairly productive. Telegraphic messages, for instance, are to be stamped with a one-cent stamp each. Broker's contract notes must bear a ten-cent, or 5d. stamp. Telephonic messages also come within the sweep of the revenue collector, and a tax is to be levied of one cent for each message or conversation held in this manner. The penny stamp is imposed upon all cheques, drafts, &c., drawn upon bankers, and on inland bills of exchange there is to be a tax of a penny per hundred dollars. On foreign bills of exchange or letters of credit, which interest us more, the stamp is to be double this amount, or 2d. per hundred dollars. The people are also to pay for stamps on patent medicines, perfumery, "chewing gum" or "substitutes thereof," &c., &c., and of course there is to be the populist tax of ¼ of 1 per cent. on the gross receipts of the Standard Oil Trust and the American Sugar Refining Company. We need not go into further details, because the great bulk of these new imposts are of a purely domestic character, and have an interest for us merely as indicating the line by which some far-seeing United States administration may ultimately seek to compensate the Federal Treasury for revenue lost, or apparently lost, by the establishment of lower customs duties, or their abolition.

City Corporation "Purity."

Some people may affect surprise at the revelations in this week's issue of *London*: we cannot. This paper boldly tells the story of how an ex-Lord Mayor, Savory by name, in his zeal for the pure white light of electricity within the bounds of that tiny segment of the great Metropolis over which the turtle and old port band presides, granted a monopoly to the City of London Electric Lighting Company which may last for ever and a day. It is a longish story, and we must refer readers to *London* itself for the details; but briefly it amounts to a charge of conspiracy to defraud the citizens levelled against certain men. Ex-Lord Mayor Savory is accused of taking a leading part. First, there was a "pioneer" company—really a promoting syndicate, which had a nominal capital of £100,000 in £50 shares. Its "chief promoters were Sir Joseph Savory, Lord Mayor and a member of the Streets Committee, and a Mr. Cecil Braithwaite, stockbroker." Six members of the Commission of Sewers are also stated to have been shareholders, and Mr. Nathan Rothschild held £5,000 of the capital.

Within six months this pioneer company had transferred the rights the Corporation had allowed it to acquire to the City of London Company, which started with a capital of £1,300,000. Only half the pioneer company's capital is said to have been paid up, but it received £150,000 from the City Company. The gains of its shareholders need not have ended with this pretty deal, as most of them took shares in the new company, with which they must have done pretty well. It is interesting to note that Mr. W. H. Pannell, chartered accountant, apparently figured in the business in the double capacity of a Commissioner of Sewers and auditor to both the pioneer company and the City of London. What is perhaps worst of all about the transaction is the way in which the absolute monopoly of the City Company is secured to it indefinitely, to the exclusion of all competitors. Nominally the lease is only for twenty-one years, but this term does not commence to run until the company has completed the lighting of the

"side streets" of the City. It will never do that, we may be sure. Well may *London* say that "the whole spirit and letter of legislation on electric lighting has been undermined." It is a fit result of this kind of greasy jobbery that the privileged company should be able to charge, as Mr. Brooke-Hitching states, 12s. 8d. per lamp as against 8s. 5d. by the Metropolitan Company, and 7d. per unit of electricity as compared with 6d. and even 4d. elsewhere. The light could easily be supplied at 3d. per unit, but citizens have the compensation of a Lord Mayor's pageant, and, say, half a million's worth of dinners a year, which a few of them help to eat.

Mr. Hooley's Bankruptcy.

We are pleased to learn that the first meeting of this wonderful man's creditors is to be held at the Bankruptcy-buildings, Carey-street, on the 6th inst. before Mr. H. Brougham, the official receiver appointed by the Court, and, further, that the bankrupt's public examination is to be held on the 27th inst. The latter date is rather far off, but probably it is about the earliest that could be fixed upon owing to the very mixed mass of affairs to be dealt with. We really wish, though, that in the meantime Mr. Hooley would either publish that terrible list of blackmailers and bribe receivers of the Press which he keeps flourishing about, or hold his tongue. His attitude in publishing general charges here and there, without bringing them to the proof, causes the dispassionate observer to set him down as a vain braggart rather than a man of courage really anxious to do the straight thing and expose what is unquestionably a hideous blot on our Press.

He has not even been content with scattering innuendoes and gross charges to all and sundry in this country, absolutely without proof, but must needs publish them in the United States as well. We warn him that he cannot gain any sympathy by this conduct nor any credit for fair play either. As we said last week, there are some honest journalists yet, and Mr. Hooley may depend upon it that, if he continues his present undefinable course, it will not be a lash of woollen cords they will lay upon his back when he gives them the opportunity to strike out. While giving him this unasked advice might we also suggest that it would be somewhat in accordance with the fitness of things if he were to restrain the ardent benevolence of Mrs. Hooley, upon whom he declared he had made no settlements, and who, like himself, we presume, is "without a penny in the world." Her princely gift of £150 to some local hospital or charity the other day excited nasty comments, and if bounties of the kind must be bestowed they had better henceforth be so in secret, not with vulgar advertisement. We say this with no feeling of ill-will to the man, about whom, indeed, we know nothing except what he himself has proclaimed to the world. He has never excited any such feeling in our mind, could not possibly have done so, for his all-too-brief public career has afforded us from time to time a great deal of genuine fun. Beyond challenge he has been the most mirth-provoking company promoter we have ever encountered in all our experience.

The Central Pacific Railroad Company.

The Banbury Committee called a meeting of the British shareholders in this unhappy concern which was duly held last Tuesday. Mr. Banbury himself presided and entered into various interesting and ingenious explanations of the conduct of his committee and its position. We give him every credit for sincerity, and believe that he thinks a great work has been done. None the less was his discourse a very depressing one to those who look for stalwart defence of public morals and private interests at the hands of self-selected or other representatives of invested capital. Mr. Banbury missed the real point at issue between himself and the Shareholders' Protection Committee—usually called the Morshead Committee by way of depreciating its value—and he omitted all reference to the fact brought out in Mr. Bretherton's circular that the dividends now paid to the Central Pacific shareholders by Mr. Huntington, as a sop to keep them quiet, never appear in the Central Pacific accounts at all, but are an advance made to the company by Mr. Huntington for his own purpose, to be claimed from it, with usury, on the first opportunity. This is a small scandal, but an intolerable one of its kind, and even by itself proves the Banbury Committee to be an aggregation of fatuities totally incapable of squarely standing up to the gigantic swindlers who have gutted the Central Pacific for their own profit. Mr. Bretherton, himself a director of the Central Pacific, declares that the "mission" of Sir Rivers Wilson has been an absolute failure, and that to all appearances the line remains as much in Mr. Huntington's hands to-day as it did before. That is, at least, what we take to be the meaning of his statements, and they are most serious, not only for the Banbury Committee, so called, but for all proprietors of American railroads in this country.

In view of such statements and facts it is idle for Mr. Banbury to claim credit for having secured a majority of the shareholders sufficient to enable his committee to turn Mr. Huntington out of the control of the Central Pacific. Even if he has that power, the committee has, by its own chairman's confession, been very dilatory in exercising it, for he was unable to announce to the meeting that the power of attorney by which Mr. Huntington holds the Central Pacific Company's board in the hollow of his hand had yet been revoked. It is to be, he says, and ought to have been ashamed to say it after all these months, after all the light that has been poured upon this Central Pacific infamy by authentic documents proving the fraud by which the Southern Pacific Company of Kentucky has become its destroyer. The true question, indeed, is how long are shareholders here in American railroads of all classes to allow themselves to be supinely defrauded by whatever scamp, or group of scamps, in the States chooses to lay hold of their property? Assuredly as long as misdeeds like those of the Californian group of which this man Huntington is now almost the sole survivor are condoned, as the Banbury Committee would condone them, so long will the British investor be robbed with impunity and without thought of mercifulness. If the shareholders of the Central Pacific Company will absolutely refuse to sanction any patch up of its affairs until the whole iniquity of the Southern Pacific lease and of the frauds in connection with the building of the Southern Pacific with the Central Company's stockholders' money has been exposed and restitution obtained, then a better day will dawn for the British investor in all such securities. It is because we desire to see this better day that we have again and again supported Mr. Morshead, and urged stockholders to rally round him in this matter. We are satisfied that if they made a resolute stand now, and laid their hardships and losses before the Government of Washington, which is, happily, directly interested in the property on account of its debt of nearly $60,000,000 to the Federal Treasury, they would put in motion a power capable of forcing the Stanford-Crocker-Huntington group to refund a portion, at least, of the countless millions stolen from their pockets. If they shirk this admittedly difficult enterprise and allow a white-washing process to be gone through—let bygones be bygones, as the phrase is—then the robbery will continue, and the supine British investor will continue to deserve what he gets.

Unhappy Italy.

There are certainly as yet no signs of improvement in the general condition of Italy. It is seething with discontent, and unfortunately the politicians seem incapable of concentrating attention even on what is best for removing the causes of this discontent. It has been stated as highly creditable to King Humbert that he refused to confer on the Marquis di Rudini the virtual dictatorship for which he at one time asked. We do not suppose the King himself would claim any credit in the matter. Let us hope that he would rather have resented the request as an insult than hesitated about refusing to grant it. But in the matter

of the trial and sentence of the Milanese rioters and others, the King sanctioned proceedings which were undoubtedly more dictatorial than judicial. Why should the rioters have been tried by court-martial at all? Was it so necessary to follow these disorderly scenes with swift punishment to the ringleaders that the trials could not be left to the ordinary judges? And where was the justice of submitting to military officers the nice questions involved in discriminating what writings during the last three or four years may have incited the rioters of a few months ago? Editors of various journals have been sentenced to terms of imprisonment varying from three to six years—the latter with solitary confinement—because articles inciting to disturbance were published in their journals several years back. No complaint had been made of these writings at the time; and now when the writers have been prosecuted their cases were not submitted to trained and experienced civil judges, but to military officers, who would probably sneer at what they regard as the word-spinning and hair-splitting of your judicial luminaries, and delight in the rough and ready justice of the drum-head court-martial. It is a sad come-down for Italy thus to set up the military power even in the seat of Justice. If not fallen to a dictatorship, it is far on the road to one. It almost recalls the times—or, at least, the ways—of King Bomba. It has been a terrible business to form a new Ministry; and now that it has been done, we find a general at its head. What does it mean? It seems as if among the rulers of Italy nothing was thought of but knocking heads down in the interest of "law and order," whilst the greatest dangers to this "law and order" lie in the oppressive taxation and the extravagant expenditure which none among the administrators seems to think of mitigating.

The Raising of the Flash Point.

We may commiserate Mr. Jesse Collings. He has been sadly used by certain members of the Petroleum Committee, who first voted in support of his draft report, and then, on consideration of the clause dealing with the flash point, turned against him. It is somewhat unfortunate that these gentlemen did not at first show a better appreciation of this point; for it is the crux of the whole question, and though Sir Vivian Majendie, who should have known better, threw dust in the eyes of the committee on the subject, yet abundant evidence was placed before them showing the danger that lurks in the deadly 73 deg. flash point. But if the conversion of these two members of the committee has been slow, it seems to have been sure, and we shall now have a report presented to the House of Commons showing frankly the dangers of the low flash point and the simple and easy remedy which in a few weeks may be provided by Parliament for at least a prompt diminution in the number of fatalities caused by oil with a low flash point. Though, therefore, we may commiserate Mr. Collings, in one way, we must congratulate him in another. He has, by the action of these two members of the Petroleum Committee, been saved from himself, and perhaps from the Standard Oil Trust. He was incurring a very grave responsibility from which he has been relieved by the second vote of the committee, and it is to be hoped he will accept his defeat with a good grace, and allow us to discard the low flash point—which experience has shown to be responsible for a yearly increasing number of deaths—in order to try whether the high flash point will not work an improvement. Taking the lowest view of the matter, this is surely worth a trial. In writing this we assumed that there would be no going back upon the decision the committee had come to upon the raising of the flash point. But it would appear that our confidence may turn out to have been misplaced. By what seems a rather discreditable trick, an effort was made at the meeting of the committee on Wednesday to practically reduce the flash point to 85 deg. It was introduced on the storage clauses, and as two of the supporters of the high flash point were absent there was a serious danger of the resolution being carried. The opposition raised, however, was so vigorous that the hour of adjournment had arrived before a division could be taken. The committee resumes its sitting to-day, when it will be seen whether the trick will succeed. In itself the proposal is as ingenious as if drawn up by the Standard Oil Trust.

But we cannot congratulate Mr. Collings on the belated assistance the *Times* has sought to render him in the article on the subject which it published on Monday. That article begs the question from first to last. It disdainfully casts aside as a mere "rhetorical statement" a demonstration that in at least one State of the American Union—that of Iowa—where a high flash point is insisted upon by law, there has not been a single one of our familiar lamp fatalities during the last fourteen or fifteen years. It is easy to dispose of all proofs of anything, if such a stubborn and well-sustained fact as that is to be treated merely as a "rhetorical statement." But the *Times* shows itself equally at sea about the flash point itself. It assumes that the 73 deg., Abel test, is equivalent to 100 deg.; and it further assumes—for it confesses it does not know—that if the 100 deg. flash point is enforced, it will be equivalent to 130 deg. But as the *Times* confesses ignorance on the subject, we may dismiss its assertion as a mere "rhetorical statement," not to be seriously considered without further proof. It is very much on a level with the hints and suggestions thrown out in the "explanations" furnished previously to the *Times* by Mr. Jesse Collings, who has never yet shown that he had any lucid views or conclusions on the subject. He suggests difficulties without attempting proofs. Here again is an awkward fact which the *Times* brushes aside with characteristic ignorance and impetuosity. In Scotland they use oil with a high flash point, and accidents are there very rare indeed—almost unknown. That would seem an irresistible argument in favour of the high flash point. But no. The *Times* has a clear and convincing explanation. The average of intelligence is far higher among the Scottish working-classes than in English towns. That is all. Of course you cannot legislate against mere invincible stupidity; but as Scotch intelligence has whatever advantage may be derived from a high flash point, would it not be prudent, before confessing ourselves baffled by English unintelligence, to try whether it might not be assisted in some measure by the higher flash point?

Marvellous Australian Prosperity.

Really, those Budget framers in New South Wales and Victoria ask us to believe a little too much. New South Wales especially is in a boastful mood. The revenue is going to be greater than the estimate, everything is doing well, and the Treasury abounding in wealth. All this in spite of three years of drought, immense losses of stock on the sheep runs—loss estimated at fifteen to twenty millions of sheep alone—and consequent tremendous reductions in wool freights besides other drawbacks. Is it really possible to credit that a small community, which has been wrestling with the consequences of a great, though smothered, bankruptcy for five years back, the whole of whose capital, with very small exception, is drawn from abroad, and whose public debt is stupendous, should be able to display this elasticity? We candidly say that the picture is too roseate for us to contemplate without the gravest possible suspicion. Much the same may be said of Victoria, where the acting Governor, Chief Justice Sir John Madden, met Parliament with a similar glowing description of the wonderful "progress" and resources of the country. The "economy exercised in past years," he said, "has placed the finances on a sound basis. Revenue was steadily increasing, although there had been no increase in taxation." The moral of it all was—and therein lies our suspicion—that this improvement in revenue warrants "a more liberal expenditure for the future"; therefore a scheme has been prepared for "extensive public works and the

early construction of railways." Thus it will all end in the same way—another loan from John Bull.

Chatham and Dover Debenture Stock.

It was evidently high time that this company came to an agreement with its stronger rival, for it is at the end of its credit tether. This is proved by the announcement that the £300,000 debenture stock offered by it at 103 had not been all sold. Only £167,780 was tendered for or £132,220 less than the sum required, and the highest price offered was 106. This is a change since this time last year, when £150,000 of the same stock was offered at the same minimum and all allotted at an average price of £107 15s. 10d. Evidently the opinion of careful investors has come to be the same as ours, which is something to be thankful for, because this company is essentially in an insolvent position. It must now be in rather an awkward fix also, because it has not obtained enough money by the sale of its debenture stock to pay off the outstanding Lloyds bonds, which amount to £231,375. Also the company has a floating debt of nearly half a million, carried on the security of sundry debentures bearing various rates of interest from 2¾ to 3½. This debt might become very inconvenient if money took a dear fit for any length of time and we are not at all sure that it has not been inconvenient during the last six months. Meekness and a willingness to obliterate himself in these circumstances may well be the only attitude left for Mr. James Staats Forbes to assume. What a melancholy failure this man's career has been!

Punctured "Dunlops."

The report of this company for the year ended March 31 last excites various emotions according to the point from which it is viewed. To a mere outsider it is calculated to afford no small amusement, to a shareholder considerable chagrin. We are perforce obliged to take the amusing view. From the first we looked upon this company as one of the drollest productions of promoters' ingenuity modern times have seen. It represented company inflation of the "Hey, diddle diddle" order, and it is quite laughable to see the way in which the directors, having such a concern to deal with, strive to put a bold face upon it. "We have made £484,000 profit last year," they exclaim, including £20,000 brought forward, and they have proceeded to distribute this with what appears to be a lavish hand—£50,000 to "patent reserve fund," £50,000 to a "special" reserve account —presumably a disguised method of providing for losses on bad investments—and £70,000 to a general reserve account, to say nothing of £23,000 held back to meet unpaid rebates. This looks magnificent until we turn back to the previous exhibit. That, to be sure, covered a period of eighteen months' trading, but if we assume the profit on this period to have been equally distributed, we should still have about £660,000 as the gain for the year ended March 31, 1897, against £484,000 for the past year; so the drop has been nearly £200,000 in one year, and the boast that the company has made "the largest sum, apart from the sale of investments, ever realised by it" in any one year, hardly seems much to the purpose. We do not know, indeed, how this modest profit of £480,000 odd is made up, for the balance-sheet describes it as coming from "royalties, net profit on trading, including dividends on investments received or accrued, &c.," really a droll mixture which we have not the means of analysing. It may be all in hand, this profit, and it may not. We should rather think it is not, because this same balance-sheet mentions an item of £207,062 due to "sundry creditors, including bank over-draft." Why is a bank over-draft required if the company has such a prodigious amount of money in hand as profit? It is all very funny.

Comic in their way also are the appropriations to reserve, and the omission of any assignment of money in reduction of goodwill. In the previous year the directors with a large hand placed £320,000 or thereby aside against goodwill; this year nothing goes there, but £50,000 is set aside to what is called a "patent" reserve, said patents standing in the balance-sheet, along with goodwill, at the globular total of £4,263,000, a delightfully fancy figure which we hope shareholders enjoy the contemplation of. No explanation is given of the mysterious increase of £147,000 in the value of the investments "at cost" now held, the total of which is £407,000; nor do the directors condescend to say why with such a dead weight for goodwill and patents some £14,000 should have been added to the cost of freehold and leasehold premises during the year and some £15,000 net to the cost of machinery and plant. These two items now figure for £125,000, and if we add "sundry debtors" £352,000, and the stocks in hand £165,000, together with the investments, worth, say, at a venture, £200,000, we arrive at something less than £850,000, which, at a liberal estimate, might be taken as the approximate gross value of the entire concern with the water squeezed out. Less than a million all told, in short, is what the swollen-out balance-sheet of nearly £5,500,000 boils down to on examination. That being so, we should hardly consider ourselves worthy the name of prophet in saying that in all probability the deferred shares have seen the last dividend they will ever get. It is only 5 per cent. now, or half what they got a year ago, but holders may be thankful they have got anything at all. Only the most skilful book-keeping could have produced this much for them, and even skill in book-keeping cannot insure a continuance of such bounty. We laugh? Why should we not? The shareholders scouted our advice when earnestly and seriously given to them and preferred to play the fool.

The South Wales Strike.

There is no complaint to be made of the want of moderation in the speeches made in the House of Commons on Friday on the subject of the South Wales strike. It was quite evident that there was a general feeling of anxiety that the dispute should be settled, and that nothing should be said which might tend to retard that settlement. But is there any hope of achieving this result by following any of the suggestions made? We doubt it. Mr. Ritchie somewhat reluctantly indicated his willingness to take steps for naming a conciliator or conciliation board if appealed to by one of the disputants. Such an application has already been made on behalf of the men. But when the conciliator or conciliation board has been appointed, what more can Mr. Ritchie do? Evidently nothing. The strike will then be no nearer an end than now; it may possibly be further from that than ever. The employers have stated with perfect frankness their determination not to submit to outside interference. They reiterated this determination a few days ago when Lord Dunraven suggested the convening of a conference at Dunraven Castle. There is no doubt they will equally resolutely decline to appear before Mr. Ritchie's conciliator or conciliation board. Is it not, therefore, a mere waste of time to insist on action which can lead to nothing? A great deal was said as to whether the dispute could be called a strike or a lock out. It is surely of no consequence which you call it. But there is no doubt the colliers were in this case the first to throw down the challenge. They refused to renew the sliding scale after a certain date; the mine owners retaliated—they could do nothing else—by intimating the termination of all contracts at that date. The men have stated their terms; the employers have rejected these and laid down their own. It is idle for the colliers now to appeal to the House of Commons or the Board of Trade. Can they, after the experience of the engineers, expect thus to coerce the employers into accepting what they have from the first denounced? If that is the expectation of the colliers, they will find themselves greatly mistaken. The question is a very practical one, and will have to be approached in a practical spirit. Some compromise is yet possible; but the workmen must be prepared to discuss its terms with the mine owners, and to trust to their representatives to make the

best bargain they can. Surely the colliers have lost enough themselves to induce them now to listen to reason?

Expansion of German Trade.

While encouraging aquatics—"which steel the nerves and strengthen the character"—at Cuxhaven, the German Emperor has taken the opportunity to confer with merchants of the Hause Towns, who have convinced him of the necessity of "powerfully supporting trans-oceanic trade." "Wherever German commerce goes," he told his hearers, "it can be sure of the protection and vigorous support of the authorities of the Empire." Trade seems to respond to the Imperial encouragement, as some statistics just issued from our Foreign Office concerning the last quarter's business seems conclusively to show. Germany has suffered considerably under the Dingley Tariff, which has, for example, caused a falling off in the exports to the United States of sugar alone of £650,000; but the loss has been largely counterbalanced by the cultivation of markets in the East Indies and in the British colonies. The result is a total increase in the exports for the first quarter of this year of £3,664,300 as compared with the similar quarter of last year. Take the exports of German iron, for example. There was an increase in those to the East Indies of 8,700 tons; to England and the Netherlands of 31,000 tons; and to China and Japan of 5,000 tons. The general result is striking when we compare it with the outcome of English and French trade. In the first quarter of 1898, English exports showed a diminution of about £1,600,000 as compared with the first quarter of last year; while France in the same way indicated a decrease of £625,000. These figures may have but a passing significance; but it is well we should note them. What is there to explain the great rise in German exports for the quarter, as compared with the fall in English exports? We have not the materials yet for arriving at a reasonable conclusion; but the facts are striking, and may give our merchants matter for reflection. Are we losing all that Germany has been gaining in the way of trade with the East Indies and our colonies generally? Or is Germany making business of a risky character, which may one day cause an ugly crash?

Reports on this subject accumulate almost too quickly to overtake; but the tenor of all is the same—that Germany is going ahead with great energy. Sir Charles Oppenheimer, our Consul-General at Frankfort-on-Main, in his report to the Foreign Office expands on the subject with something of the warmth of romance. But he gives England some comfort. He warns us not to take the "remarks of some newspapers" as representing the opinion of the German people. In the main Germans "foster the sincere wish to see the agreeable and lucrative commercial relations with England continue undisturbed." Nay, he knows that "the German even to-day looks upon the English nation with the greatest respect, and never forgets that it has been his tutor in trade, as well as in commerce and politics." Is this not pleasantly encouraging? It is agreeable also to be assured that the Diet will take the same point of view when the new commercial treaty is presented for acceptance. English trade with Germany is still large; that country is, economically speaking, the most important market for England. British goods, we are assured, are willingly bought by the classes that know how to judge, "because they are looked upon as practical, solid, and agreeable." Paris has fallen from her predominance in fashion, and her place has been taken by London. But English manufacturers must push their goods as the Germans do, by the establishment of agencies, with managers familiar with the country's ways, else they may find themselves shut out by the United States, whose manufacturers have of late been showing increased attention to the German markets.

Perhaps, however, the most striking feature in recent reports on German trade is the fierceness with which German traders fight for protective tariffs and the alacrity with which the Government often listen to their demands. There is wool, of which about 170,000 tons are required yearly for the country's wants. Only about 20,000 tons can be produced at home. Yet these home producers sought the Government to protect them from the bloated foreigner who could run up such a quantity as 170,000 tons. Their appeal was not listened to, for a wonder; but the wool combers, on declaring that woollen yarn could be produced of as good quality in Germany as in England, got an immediate prohibition put upon the free importation of foreign woollen yarn in single or more threads. German ironworkers have already secured preferential railway rates to the detriment of English exporters. Every German industry seems putting in a claim for the erection of a wire fence around its little industrial plot. The only person who never seems to assert himself or lift his voice in protest is the consumer. Nobody hesitates about stealing from him, or getting the Government to do it for them; but he submits with the patience of the sheep to be fleeced and robbed. The agricultural party demand the temporary abolition of commercial treaties, and the adoption of "tariff autonomy"—that is, the fixing of customs-rates suitable for all home industries, commercial treaties then to be negotiated at rates considerably above this minimum tariff. More than this, there is still a considerable party anxious for the establishment of a European coalition against America with her Dingley tariff, as if America were not herself suffering about as much as her trade competitors by the action of that wretched system. For the present Germany seems protection mad. Until she has recovered her senses somewhat, her trade expansion can hardly be altogether sound or assured. England can at least look upon the odd struggle with comparative calmness, while she sees her honest admirer, but stern competitor, trying her best to "kill the goose that lays the golden eggs."

The Trade of Hankow and its Lessons.

Mr. Consul R. Warren's report on the trade of Hankow for 1897 vividly illustrates the importance of the battle royal now being fought at Peking on the question of railway concessions. The construction of railways is of course of great importance to China; but, even for China herself the question as to which Power shall construct the lines has become of equal if not more importance. Hankow, for example, is a very important Chinese trade centre. Though its export tea trade, only a few years ago its most considerable in extent and value, has enormously diminished, and is likely practically to vanish altogether, yet the gross value of the trade of Hankow for 1897 was the highest on record. It has thus already more than made up in other exports for the loss on tea. Now a "Belgian" syndicate has been in negotiation with the Chinese Government for the construction of the Peking-Hankow Railway. If it were really a Belgian syndicate who proposed building the railway with Belgian capital, no objection could be raised. But the capital is to be supplied by the Russo-Chinese Bank—that is, by Russia itself—and the Belgian Minister proposes that France should be appointed arbitrator in all disputes that may arise. In truth, Belgium in this matter would be but the cat's-paw of Russia and France — principally the former — who would have control of the railway, and so control the great and growing trade of Hankow. It would gradually cease to be a world's port, and end in being a mere Russian port in the narrowest sense. British trade would immediately suffer; so would the Japanese, as well as that of America and every country but Russia, and perhaps France. In truth, we must always remember that behind this struggle for railway concessions lies the larger and wider and more far-reaching struggle between Protection and Free Trade. We have no fear of the ultimate result; but it is essential that in China, at present, our Foreign Office should show a proper appreciation of the nature of the struggle, and should energetically protest against concessions for railways, at

least within British spheres of influence, coming under the control of rabidly Protectionist countries. That at the present moment is of more importance to Great Britain than is the addition of several big warships to our Navy.

As we have said, the trade of Hankow increased enormously during 1897; but, unfortunately, British trade did not largely participate in the advancement. Our shipping still keeps the lead, and is increasing it, but otherwise, for the most part, British trade shows a decline. In the import of foreign goods, the British share is about 50 per cent. of the total imports. The tea trade is in the hands of Russian merchants. Germany has the best part of the "muck and truck" trade, in which are included hides, tallow, wax, gallnuts, bristles, &c. Her merchants do a large business, and are content with very small profits—perhaps also are not always so particular as they might be as to the stability of their customers. Even in cotton goods and yarns our imports show a falling off, while Japanese imports are increasing. Indeed, Japan is becoming our most formidable trade rival in that part of China; and it is a striking fact that since 1895 the imports of Japanese yarn have jumped from 150 cwt. in that year to no less than 52,636 cwt. in 1897. India also is suffering from Japanese competition; while America has gained somewhat at our expense in cotton goods. We shall have apparently to watch other things as well as railways if we are to keep up our trade position in China.

The Great Boulder Company and its Milling Company.

The elaborate statement issued by the board of the Great Boulder Proprietary Company in regard to the formation and contracts with the Boulder Milling Company suffices by itself to condemn them utterly. According to this, the Great Boulder Company possesses already slimes and tailings valued at £240,000. More of these slimes and tailings must accumulate and their treatment was a matter of importance. Instead of making arrangements in the ordinary manner for their treatment, the board admits that it formed another company, the Boulder Milling Company, which was to work a new process invented by a Mr. Köneman. The vendors of the new company received £3,000 in cash, presumably from the Great Boulder Company, and 19,992 shares out of 20,000 shares forming the total capital of the Boulder Milling Company. Then the Great Boulder Company, or rather its board, agreed to take up £20,000 in debentures of the new company, and had half the 19,992 shares transferred to it. So that the Great Boulder Company provided the whole of the cash to carry the matter through, but only possessed half the shares. Then Mr. Köneman is to receive the substantial salary of £2,000 per annum, and the board of the Milling Company is to take 10 per cent. of its profits.

Upon this foundation the Great Boulder hands over its tailings and slimes to the Milling Company, which is to treat them, and after deducting 3 dwt. of gold per ton for working expenses, the Great Boulder Company receives 60 per cent. of the gold extracted and the Milling Company 40 per cent. So that after providing all the capital, allowing a generous margin for working cost, and a good salary for the patentee, the Great Boulder shareholders will be permitted to take three-fifths of the gold produced out of their own tailings and slimes. A reasonable board would have paid a royalty to Mr. Köneman upon his process—it might by chance turn out a failure—and so have obtained for the shareholders all the profits for themselves, for when the £2,000 to Mr. Köneman, the 3 dwt. of gold for working cost, and the 10 per cent. of profits to the Milling Company's board are added together, it would probably represent all that would have to be paid for the treatment of the tailings and slimes after allowing for a royalty charge. But then, you see, Messrs. A. R. Robertson and Gamble North, directors of the Great Boulder Company, are directors of the Milling Company, together with Mr. Lane, the mining expert of the company. The history of the board does not state what becomes of the half of the capital of the Milling Company not taken by the Great Boulder Company. Presumably it goes to Mr. Köneman and his friends, and *who are his friends?*

American Minerals.

The United States continues to make strikingly rapid progress in the production of minerals, and the value of the output for last year is estimated at $678,966,644. Compared with 1896 this figure represents little more than a nominal advance owing to the low range of prices ruling for coal, iron, and some other contributories; but compared with 1895, we have an increase of 8 per cent. even on the valuation basis, while a very cursory glance at the statistics shows that, if measured by the quantity alone, the progress in the last two years has been very appreciable. The principal item is coal, of which the yield in 1897 was 200,257,243 "short" tons of 2,000 lb., equivalent to 178,801,110 "long" tons of 2,240 lb. The previous best year was 1895, when the output reached 172,426,000 long tons. In the intervening year, 1896, the total fell away to 162,503,570 tons as an inevitable result of the commercial depression which marked the second half. As evidence of the progress made by America in the last fifteen years as a coal producer, we may state that in 1890 the yield was 140,883,000 tons, and in 1883 102,868,000 tons. It is to be noted, however, that prices last year established a record for lowness, the average for all kinds, bituminous, anthracite and cannel being only 4s. 2¾d. per ton against 4s. 9¼d. in 1895, 5s. 2¾d. in 1890, and 6s. 5½d. in 1883. On the basis of quantity produced America still comes next to the United Kingdom, our own output last year having exceeded 203,000,000 tons in spite of the indirect injury occasioned by the engineers' strike. It cannot be said, however, that we have increased our production of coal in the past fifteen years in the same ratio as America, for our total in 1883 was 163,737,327 tons, and it is quite possible that in three or four years more we may have to take second place among the world's coal producers.

Second in value among American minerals last year was iron. The output of ore is not stated, but the pig iron produced was 9,652,680 tons, valued at $92,677,312. This total has been surpassed on one or two previous occasions, the conditions last year not having been altogether favourable to production until the operation of the Dingley tariff. Gold, which ranks third, is credited in the estimates before us at $59,210,795, this being the value of the 2,864,576 fine ounces said to have been obtained. For 1896 the output was 2,568,132 oz., value $53,088,000. These last figures are those of the director of the Mint Bureau at Washington, and may be accepted as approximately accurate. The figures for 1897, however, are subject to revision, and are probably in excess of the actual total. Preliminary estimates of America's gold production have a way of overstating the case, though there is no question that last year saw an improvement on its predecessor. Among the other minerals to which we may refer are copper, of which the yield in the twelve months was 510,190,719 lb., an increase of over 30,000,000 lb.; petroleum, valued at $44,804,962; silver, 56,457,292 troy oz., of a commercial value of $33,755,815, against 58,834,800 oz., commercial value $39,654,655, in 1896; and lead 197,718 tons (an increase of 23,000 tons over 1896), of the value of $11,784,098. It is interesting to note that, on the basis of values the United States has a mineral output twice as large as the United Kingdom.

Dairy Produce in England.

Something has been done for the encouragement of dairy farming in this country, but not enough yet to keep at bay active and vigorous foreign and colonial competitors. More public money might be spent to much better purpose on technical instruction and help for

British farmers than in "relieving" landlords, or in practically bootless efforts to make our navy equal to facing a "world in arms." We are an industrial country, and while a "war insurance" may be necessary, we may easily pay too much for it. The Government of Canada teaches us a most important lesson in this respect. Of course, the "war insurance" question does not worry her as it does the mother country, but by the constant encouragement and instruction she has provided for dairy farming she has become, in several things, our most formidable competitor. In cheese alone, for instance, as we learn from Messrs. W. Weddel & Co.'s review, Canada sent us last year 76,350 tons, or 34,000 tons more than in 1890, the United States coming next with 31,581 tons. The United States used to take the lead in cheese importation, but Canada is rapidly elbowing her out, while the home maker has to struggle on, with but scant encouragement and a big "war insurance" bill, making but an indifferent show among his more fortunate rivals. The last year was a favourable one for the production of milk, with the result that there was a great increase in the home manufacture of butter and cheese, and as the colonial and foreign supply continued undiminished, the season was distinguished from all its predecessors by the unprecedentedly low prices which prevailed. The total imports of butter and cheese showed an increase last year of 9,000 and 17,924 tons respectively, as compared with the previous year. Much of the increase came from our colonies. In butter, for example, the imports from Australia, Canada, and New Zealand amounted to 19,014 tons, against 15,426 tons in 1896. But there has been a marked falling off in the shipments of this article from Germany during the last few years. The supplies from Belgium and France were also diminished; but from Denmark they considerably increased. The home farmer has been fighting valiantly against this competition, but not with success. His rivals have the advantage of him in the wide application of the co-operative principle in farming, and the means they have of saving labour. Take the case of a large butter factory, where a single churn makes 6 cwt. to 10 cwt. of butter. Think of the small amount of labour involved in this operation, as compared with that of the forty to fifty farmers' wives in this country, who, according to Messrs. Weddel, would take half a day to make the same quantity, and then spend another half or whole day in going to the market to sell it. Evidently the British dairy farmer has still somewhat primitive notions. However Government may have neglected him, he has excellent pastures, is close to the markets, and ought not to have allowed himself to be so far beaten as he has been.

It may be worth noting that the *Bulletin de la Société des Agriculteurs* has been taking the Normandy butter-makers very severely to task for the deterioration apparent in the quality of their butter. Nearly 170 samples sent to the recent Paris show from the best farms in the typical districts of Normandy are declared to have shown little uniformity of character. They ranged in quality from very good to very indifferent, and this irregularity is exercising an adverse influence upon the sale of this Normandy product. Normandy has many advantages for dairy farmers; but in butter is being beaten in the French markets by the Charente, Vendée, and Poitou, and in the English markets by Denmark and Norway. Normandy farmers, therefore, like the British, are rated for falling behind the times. In the most successful butter-making districts in France, co-operation in dairy-farming has been adopted, and is extending year by year. These co-operative factories produce the best butter—this seems the universal experience—more uniform in character and quality. Normandy has no such factory, nor, so far as we know, has Great Britain. Is it not time our farmers were bethinking themselves of the desirability of trying the experiment?

A new narrow-gauge railway is to be constructed to join the Engadine with the other valleys of the Canton of Grisons. The Swiss Federal Assembly has approved a grant of 8,000,000 francs for the purpose.

THE REST OF THE INDIAN RAILWAY REPORTS.

With half-a-dozen Indian railway reports we dealt a month ago, and the outcome of the working was shown to be satisfactory. The reports since issued show equally good results, except in the case of the Great Indian Peninsula, which suffered severely from the plague and famine, the company having to bear the full brunt of both in Western India. Traffic as a whole gives evidence of continued expansion, and many of the companies have had a heavy carriage of troops to put against the falling off in passenger traffic:—

	Gross Receipts.	Working Expenses.	Percentage of expenses to receipts.		Net earnings + increase or - decrease.
			Dec. 1897.	Dec. 1896.	
Bengal Dooars	Rs. + 9,604	− 716	41·41	44·26	+ 10,321
Bengal Nagpur.....	Rs. − 40,543	− 170,228	60·00	61·80	+ 129,686
East Indian	Rs. + 2,328,289	− 152,407	28·39	31·39	+ 2,480,696
Great Indian Peninsula	£ − 68,670	+ 79,386	75·09	64·48	− 148,056
Indian Midland ...	Rs. + 136,465	+ 64,519	58·76	59·30	+ 71,956
Nizam's Guaranteed	Rs. + 293,146	+ 77,002	46·99	50·72	+ 216,143

As will be seen below, the East Indian Company is able to increase its dividend substantially, and the Bengal Dooars by ½ per cent. The Nizam's Guaranteed Company also has better net profits, and the Indian Midland Company calls upon the Government for less.

	Surplus Profits.		Available for Dividend.		Dividend for Half-year.	
	1897.	1896.	1897.	1896.	Dec. 1897.	Dec. 1896.

‡ Short of Guaranteed Interest.
* On Deferred Annuity Capital and Annuity Class "D."

The best showing is made by the East Indian Company, which, reckoning the rupee in each year at 1s. 2⅓d., has an increase of £140,000 for the half-year in gross receipts, and a saving of £9,000 in expenses, the increase in net for the six months being £150,000, and for the whole year just upon £300,000. The percentage of expenses to receipts has now been worked down to the remarkably low figure of less than 28½ per cent., which means that of the gross revenue from the 6½ million miles run, nearly three-fourths is secured as net, an excellent thing for the stockholders here, but how about the working staff and the native customers? In coaching traffic there was an increase of 61,000 passengers, and of Rs.579,193 in receipts. Famine and plague were adverse influences affecting this class of traffic, and the improvement shown is entirely due to the carriage of the military to the North West Frontier, which also accounts for Rs.250,000 of the increase from parcels. In goods traffic there was an increase of 86,000 tons, and in minerals of 256,000 tons, the addition to revenue being Rs.1,660,000. Of Indian corn and cotton less was carried, but there were good increases both in quantity and revenue from hides and skins, oils, cotton piece goods, railway, plant, rice, oil seed, and sugar. In wheat there was an increase of 43,852 tons and Rs.432,301 in receipts, which was far above the average for a second half-year, weight and earnings having been only twice exceeded since 1890. Strange, too, is it to learn that the bulk of the traffic was derived from the famine-stricken districts. Stocks were held back for higher prices, but the imports of cheap rice from Burma and the success of the monsoon food crop beat holders, and instead of supplying famine districts they had to find other markets. Altogether the company did so well that it is able to pay £1 4s. 6d. per cent. for the half-year on the deferred annuity capital and the class "D" annuity capital in addition to the guaranteed interest. This will make £6 8s. per cent. for the whole year, compared with £5 3s. 6d. for 1896, and is the best return since 1891, when the surplus dividend and interest reached £6 17s. 3d. per cent.

The Nizam's Guaranteed State Railway continues to do very well, having a large increase in receipts for the past half-year,

of which nearly three-fourths has been saved as net. The company, of course, suffered in passenger traffic through the plague, but the loss was much more than made up from the increase in goods and mineral traffic, and the results of the working are the best the company has ever had. The Government guarantee expires June 25, 1904, by which time the company should be very well able to run alone. Since 1889 gross earnings have risen from Rs.2,334,133 to Rs.3,777,153 in 1897, or fully 60 per cent., whilst the ratio of expenditure has been worked down from 66·15 per cent. to 46·52 per cent., and it is claimed that the full earning power of the railway has not yet been reached. At present the net amount divisable would pay £2 7s. per cent., or only 3s. less than the guaranteed interest. More capital will have to be raised next year, but this is perhaps inevitable in view of the continued building of new lines.

The Indian Midland Company also did very well during the past six months, the gross earnings being the largest on record and exceeded three millions of rupees. The increase was entirely on the main line, coaching traffic yielding Rs.102,540 more, owing to the carriage of troops, while goods traffic increased by Rs.149,027, though this was considerably reduced by decreases on the branch lines. The present position is that the interest charges for the six months amount to Rs.2,102,686, of which the net earnings of the company equal about one-half; but the net earnings are distinctly growing. In the past half-year they were Rs.1,067,914 against Rs.941,798 in 1896, Rs.740,238 in 1895, Rs.973,864 in 1894, and Rs.617,204 in 1893. The company has a good deal of extension work on hand and a capital account already overdrawn.

The Bengal Dooars is only a small concern of thirty-six miles and the company has no guarantee. It is, however, doing fairly well and pays 3½ per cent. for the half-year, or ½ per cent. more than in the corresponding period, in spite of being put to extra expense through the earthquake, and the reserve fund has been raised to £1,500. Little expansion of traffic can be looked for until the 122 miles of line now on hand have been constructed, towards which purpose further capital was recently raised.

The Bengal Nagpur Company enjoys a 4 per cent. guarantee and appears to be a long way off standing on its own legs, being fully a million and a half short of meeting the half-year's guaranteed interest. Some extensions are to be opened, if ready, in 1900, and with a view to building feeder lines some 600 miles have recently been surveyed. Passenger traffic during the past half-year suffered considerably from the plague and famine, and there was a smaller emigration of coolies to the Assam tea gardens, whilst the increase in the goods traffic receipts was slight in spite of a much larger coal traffic.

The Great Indian Peninsula Company, which renders its accounts in sterling, makes an exceptionally bad display, the receipts being £68,670 less and the expenses £79,386 more than in 1896. The decrease in net revenue for the half-year is therefore £148,057, and for the whole year the falling off is as much as £574,878. During the past half-year there was a decrease of £75,372 in coaching traffic, although the carriage of troops and military baggage brought in £14,852 more, while in the goods traffic there was an improvement of £10,639. The falling off in passenger traffic is ascribed to the plague and consequent quarantine regulations. In the expenditure there was a saving of £19,000 under the head of maintenance, but carriage and wagon expenses increased by £68,000; locomotive by £18,000; and traffic and other charges by over £11,000. Train miles run were 339,955 more than in 1896, and of this increase 150,378 miles was due to coaching, it having been found impossible to adjust the train service required under the exceptional circumstances of the half-year, so as to reduce the passenger train mileage in the ratio of receipts. The result of the working is that only Rs.3,045,682 is transferred to Government towards meeting the guaranteed interest compared with Rs.4,556,187. Fortunately the current half-year promises much better results, the increase in receipts to the middle of June being £353,000. It is practically certain that the Government will exercise its right of buying up this railway next year, the terms being a sum equivalent to the average market value of the capital stock in the three preceding years. Of course it is hoped the purchase will be conducted on very much the same lines as in the case of the East Indian Railway, which would be a very good thing for the shareholders, but they cannot make sure of it yet. India itself has no say in the matter.

The failure of the banking firm of Charles Hopkinson & Sons, of 3, Regent-street, S.W., was announced on Tuesday. It is not of very great importance, as the business of the bank, which was established in 1796, was not very large. No authentic statement of its affairs has yet been published, but the deficiency will be considerable.

Critical Index to New Investments.

WOLVERHAMPTON AND DUDLEY BREWERIES, LIMITED.

This company offers £100,000 of 4 per cent. irredeemable "A" mortgage debenture stock at par. Share capital is £150,000, and there is already an issue of £100,000 4½ per cent. first mortgage debentures in existence. The stock now offered is secured upon ninety-three freehold, two copyhold, and one long leasehold licensed houses and certain unlicensed property acquired since the incorporation of the company and valued at £140,485, and it will also be a floating second charge upon the assets which secure the existing debentures. Profits for three years ended September last are given as £15,098, £20,178, and £27,973, the average being £21,083, which, after paying "A" debenture interest would leave £16,580, so that the new stock seems secure as long as brewery property keeps up.

PLYMOUTH BREWERIES, LIMITED.

Having already £175,665 of 4½ per cent. debenture stock against an issued share capital of only £116,547, the directors now offer £60,000 of 4 per cent. mortgage debenture stock (part of a total of £150,000) at par. It will be redeemable at 105 after the end of next year on six months' notice. Of this issue all but £3,278 will be used in paying off certain liabilities and loans incurred in the purchase of new properties, including the Torquay Brewing and Trading Company. The value of the assets securing the present issue is said to be £208,801, while the net profits have grown from £7,872 in 1895 to £8,583 in 1897 after paying debenture interest. The assets seem to have been valued upon a pretty liberal scale, and how much is represented by goodwill ought not to have been hidden up with freehold and leasehold properties. The debenture stock is not by any means a first-class investment.

JOSEPH THORLEY, LIMITED.

Share capital of £200,000, half ordinary and half 5½ per cent. cumulative preference, is taken by the vendor. The public is invited to subscribe for £60,000 4½ per cent. first mortgage debenture stock, part of a total of £80,000, at 105 per cent. It is redeemable on six months' notice after 1911 at 110 per cent. Leasehold property, plant, &c., are valued at £56,065, and the stock, book debts, &c., at £38,390. No figures about profits are supplied, but it is stated that for the last three years they have been sufficient each year to pay interest on the debenture stock now issued "many times over." Thorley's food for cattle we have all heard of and it may be a good business, but the security for the debenture stock seems none too large.

KING & MORTIMER, LIMITED.

For any one who wants a downright speculative venture, this ought to be suitable. The object of the company is to buy businesses in London or elsewhere, and to develop them into stores. For a start the grocery businesses of Robert King in South Kensington and George Mortimer in Fulham-road have been secured, and a lovely profit statement "on the present basis" is supplied. The capital is £160,000 in £16,000 5½ per cent. preference shares of £5 each, and 80,000 ordinary shares of £1 each, of which 50,000 ordinary are allotted to the vendors, with £60,000 in cash, with which to pay for the businesses. There is also an issue of £40,000 4½ per cent. mortgage debenture stock, which, with the preference shares, is offered at par. The directors will not take any fees until the preference dividend has been paid, which speaks well for the preference shares, but surely, if the concern is as good as made out, giving 50,000 ordinary shares just for transferring the businesses to the public is a remarkably liberal price to pay the vendors. If they get much of this sort of work they ought to grow rich; but King and Mortimer are not likely to have undervalued their properties, so what represents the £140,000 of capital beyond what they receive?

SOUTHPORT OPERA HOUSE AND WINTER GARDENS, LIMITED.

The object of this company is to buy the freehold property known as the Southport Winter Gardens, including the opera house, &c. A Manchester firm values the property, when extensions estimated to cost £60,000 are carried out, at £228,039, and the average income for the last three years is said to have been £23,913. The share capital is £150,000 in £1 shares, of which £130,000 is issued in equal parts of ordinary and 5 per cent. cumulative preference shares, and £75,000 of 4 per cent. debenture stock is offered at par, being part of a total of £100,000. Purchase price is £144,200, subject to an existing mortgage and bond. The vendor does not appear to want any of this sum in shares, and if they are not good enough

for him it would be well for the public to leave them alone. To our mind the affair will be crushed by the weight of its capital.

HAMBLET'S BLUE BRICK COMPANY, LIMITED.

Company is formed to acquire from the end of March the old-established brick business of Joseph Hamblet at West Bromwich, known as the Piercy Brick and Tile Works, together with freehold land and premises extending to over 130 acres. The value of the freeholds, mineral rights, plant, and stock is reported to be £133,018, and the profits for three years ended March last are certified at £10,624, £11,793, and £15,526. Share capital is £60,000 in ordinary and £60,000 in 6 per cent. cumulative preference, with an issue of £60,000 4½ per cent. first mortgage debentures redeemable at 105 after June, 1910, on six months' notice. Purchase price is £180,000, which includes all the ordinary and 10,000 preference shares, with £110,000 in cash. Such a high price is not justified and advantage seems to have been taken of the sudden increase of nearly £4,000 in last year's profits to get rid of the business to the public.

WEST'S PATENT POTTERY AND MACHINE COMPANY, LIMITED.

With the object of buying patents to make flower pots, jam pots, jars, basins, &c., of any plastic material, glass, &c., this company is brought out with a capital of £100,000 in £1 shares, of which the vendors take 55,000 shares and £25,000 in cash, leaving £20,000, if subscribed, for working capital. Assets are referred to, though no value is mentioned, but some lofty estimates are indulged in regarding profits and dividends. It may suit some people.

CONTINENTAL SPARKLETS COMPANY, LIMITED.

Formed with a capital of £240,000 in £1 shares, half ordinary and half 7 per cent. non-cumulative preference, the company acquires sole rights in "Aerators" (Système Sterné), in France, Russia, Belgium, Denmark, Norway and Sweden, Spain, and Luxemburg. The "sparklets" are small steel capsules filled with carbonic acid gas, which, used with a certain bottle and stopper costing 3s., will enable consumers to aerate anything at a moment's notice. Ten sparklets will cost about a shilling. The vendors have appointed the directors, and some of them will receive remuneration from the vendors or promoters in consideration of guaranteeing the subscription of a portion of the capital, and applications for shares will be received only on the footing that no objection is taken on the ground of the directors being so appointed or that they do not constitute an independent board. If this clause is the means of keeping a good many people out of the concern its insertion will have justified itself. A dividend of 25 per cent. is spoken of on the ordinary shares, with a surplus of £11,600 carried forward, and only on the realisation of this estimate should we think the purchase price of £170,000 moderate. There seems a deal of aeration already introduced into the capital as well as into the estimate of future profits and the purchase price.

THE DUTCH THREE PER CENT. LOAN.

Its nominal amount in Dutch money is 57,815,000 florins and in English £4,818,000. It is a 3 per cent. loan in bonds, the bearer secured on the revenues of the Kingdom of the Netherlands, and is offered to British investors at 97 per cent. by Messrs. Speyer Bros. and the Union Bank of London. Redemptions by a 1 per cent. sinking fund, which may be increased, take place by drawings at par or by purchase under par. Applications must be sent in before 4 p.m. on Tuesday next. The loan is not particularly cheap, but the security is about as good as any Europe has to offer.

WELDONS, LIMITED.

This company has been formed to buy the businesses of fashion publishers and pattern manufacturers carried on by Messrs. C. E. Weldon & Co. A whole platoon of newspapers is owned by it, the combined circulation of which is stated to exceed ten million copies per annum. Sir George Newnes is to be chairman of the company, and it will have a share capital of £380,000 in 40,000 5 per cent. £5 cumulative preference shares, and 180,000 £1 ordinary shares. All the capital is offered for subscription at par. We should have liked more particulars about the assets. As it is, the mere statement of the accountants, Messrs. Whinney, Smith, & Whinney, that the average profits for the three years ended December 31 last, amounted to £29,621, or nearly £20,000 more than the preference dividend requires, may be good to day and not so good next year. One thing is satisfactory, there is no debt.

We have received from the Agent-General of New South Wales two voluminous publications: "The Wealth and Progress of New South Wales, 1896-7"; and "The New South Wales Statistical Register." Both contain a large amount of interesting and valuable information bearing on the progress and expansion of the colony.

Company Reports and Balance-Sheets.

*** *The Editor will be much obliged to the Secretaries of Joint Stock Companies if they would kindly forward copies of Reports and Balance-Sheets direct to the Office of* The Investors' Review, *Norfolk House, Norfolk-street, W.C., so as to insure prompt notice in these columns.*

Gilroy Sons & Company, Limited.—For the sixth year in succession, the year ended May 31 last, this company has failed to pay any dividend on its ordinary shares, but it meets the preference dividend still and has £3,879 left to be carried forward subject to directors' and auditors' fees. No great detail is afforded in the accounts, but they are clear enough, and we notice that the reserve fund is partly invested. It amounts to £20,000 and the investments stand at £11,312. What the company suffers from is the common complaint of over-capitalisation. It would evidently do very well, even in bad times, were the £175,000 of ordinary share capital out of the way.

Royal Insurance Company.—In its fire branch this company is the largest in the United Kingdom and probably in the world, but we shall not enter into details regarding this part of its business, because the essential features of it are summarised in a table printed on another page. All we need mention here is that after meeting all outgoings £233,343 were left out of the total premium income of over £2,000,000 to be carried to profit and loss account. The life department also did a large business, insuring £1,028,408 within the year, which amount yielded premiums of £45,427. The total income from premiums was £448,039, and the interest from investments, exclusive of the annuity fund, was £189,152. Claims absorbed £385,510. Only a small business was done in annuities, £55,210 being received for new ones granted. After payment of all claims and expenses, the life and annuity funds were increased by £209,366, and amount to £5,539,264. The expenses of the life business came to 12·6 per cent. of the premium income. Out of the profits of the year dividends aggregating 38s. per share, or 63·333 per cent., have been or will be paid. Adding the proprietors' funds, the fire funds, the reserve fund, &c., to the other possessions of the company, its total assets amount to £9,686,582, and they are all stated together in the balance-sheet, the life investments not being separated from those pertaining to other branches of the business or belonging to the proprietors. Out of this large sum £1,747,760 is invested in mortgages within the United Kingdom, and rather more than £2,000,000 has been placed in various United States securities, including no less than £538,705 in freehold buildings. This last seems a very large item, and we are not sure that the £723,000 committed to United States railway mortgage bonds is a perfectly satisfactory feature in the investment account. Assuming it to be so, the money of the company appears to be pretty solidly distributed, and the auditors certify that the present aggregate market value of the real estate and mortgages in the United States and Australia is at present "in excess of the amounts in the balance-sheet." How they arrive at the value of the mortgages we cannot quite guess.

Royal Exchange Assurance Company.—Last year this company did a net new business in the life department amounting to £689,569, or £132,170 more than in 1896, a progressive increase. The net addition this business made to the premium income was about £37,500, and the total premium income was £196,070. Interest earned amounted to £80,744, being £4 1s. 5d. per cent. on the life funds. Expenses and management and commission were 14·9 per cent. of the premium income, and the directors consider this moderate "in view of the high percentage which the new premiums bear to renewals." Sixty-eight new annuities were sold for £6,832. Claims paid took £163,545, an amount considerably less than actuarial expectation. The fire business of the year resulted in a profit of £414,102, including interest and dividends on the fire funds, but we do not go into details. In the marine department, the result was a loss on the year's working, which not only wiped away the £3,881 balance of profit and loss from 1896, but reduced the marine fund from £146,368 to £131,270. Out of the profits of the fire department, however, the profits for 1896 that is to say, those for the past year being carried forward, a dividend of 14 per cent. was paid on the capital stock, leaving the accumulated balance at the credit of profit and loss £702,156, which was about £4,000 less than at the beginning of the year. This company very properly separates its life insurance balance-sheet from the general balance-sheet, and shows a total under that head of £2,091,481. The life fund was increased at the end of the year by £61,000, and now amounts to £2,053,892. This money is invested for the most part within the United Kingdom only, £156,292 appearing in United States first mortgage gold and sterling bonds. The aggregate assets of the company amount to £4,405,712, and the assets of the portions of it not in the life account appear also to be very well and carefully laid out.

Northern Assurance Company.—For the year 1897 this company's new life business amounted to 997 policies, insuring £477,742 net and yielding £17,004 in annual and £1,692 in single premiums. The total premium income of the year was £246,650 and the total income from all sources £361,684. Claims absorbed £186,486 and expenses of management and commissions were kept down to the usual 10 per cent. of the premiums received, thanks to the wealth of the fire branch. At the end of the year the life funds, amounting to £3,362,297, showed an increase of £200,008, but this included the £72,092 received for annuities sold. Although it is a good and steady life business this company does, it is nothing to the fire business, whose premium income last year was £662,097, a large total, although a decrease of £37,909 on the previous year. Details need not be given here either. Profit, after making the usual provisions for current risks, was £83,996, added to which are £60,337 interest on investments not belonging to the life funds, and £65,989, being the balance brought

forward from 1896. This gives a gross disposable balance of £210,322, out of which dividends and bonus aggregating £3 per share or 30 per cent. have been declared, leaving £107,085 to be carried forward. In reality the dividend is 60 per cent. on the capital found by the stock holders, half of the £10 per share paid having been made up out of the profits. This company follows the example of the Royal and does not separate its life funds in the balance-sheet given to the public from its other accounts. According to this balance-sheet, its aggregate assets amounted at the end of the year to £5,324,630, and of this about £800,000 is invested in Indian and colonial government, provincial, and municipal securities, and about £920,000 in the same classes of various foreign securities.

Kent Fire Insurance Company, and United Kent Life Assurance and Annuity Institution or Company, Limited.—This double-barrelled company's fire business is small, and the essential particulars are given elsewhere. At the end of the year the fire fund amounted to £309,678, having been increased by £5,874 within the year. A dividend of 7 per cent. was paid on the shareholders' capital. In the life branch 170 policies were issued, insuring £78,200, and giving £2,854 in premium income. Claims paid took £30,904, and expenses and commission came to £17 1s. 8d. per cent. of the premium income. After paying all claims, annuities, and expenses—the company does a small annuity business—the funds of this branch were increased by £16,981, and now amount to £660,661, or about "50 per cent. of the total sum assured with bonus added." Interest at the rate of £4 2s. per cent. was earned on the invested moneys.

River Plate Fresh Meat Company.—The very satisfactory profit of £33,784 was shown by this company for the year ended April 30. After placing £10,000 to reserve a dividend on the ordinary shares of 6 per cent., as against no dividend a year ago, was declared, and £1,184 is carried forward. The reserves of the company will then amount to £35,000, and although trading credits are necessarily large, balances on the whole appear to be favourable to the company. The reserve, however, is wholly in the business, which is rather a pity, as it is a fluctuating business. The company is about to issue £42,100 more 6 per cent. debentures, raising the total to £100,000, as against £250,000 of share capital.

Moabund Tea Company.—This company has suffered from earthquake, a bad season, and the meretricious attentions of the capital-balloonist. Formerly a strong concern, the capital was increased to £150,000 in 1896, holders of ordinary and preference shares receiving two for one. Owing to the exceptionally bad season the profit amounted to £2,834, which just allowed of the payment of the preference interest, amounting to £2,500, and the carrying forward of a modest balance. The interest on the old preference capital was only £834 per annum, so that the ordinary shareholders will have reason to anathematise the clever gentlemen who induced them to commit the foolhardy conversion of 1896. The balance-sheet is quite in keeping with the conduct of the board, about £34,000 being owed to various creditors against about £18,000 of liquid assets. Further trouble is being prepared for the future by adding £10,514, the cost of upkeep of 1,312 acres of new gardens, to capital account, or just about £8 per acre. Yet the unhappy concern is already too highly capitalised.

United River Plate Telephone Company.—The revenue of this company steadily improves, so that its gross receipts in the year ended March 31 were about £7,000 above those of the preceding year. The company also enjoyed a windfall in the shape of £6,240 refunded by the municipality on account of taxes paid in previous years, and the board therefore increased the dividend from 5 per cent. to 6, placed £3,000 to depreciation fund, and £10,000 to start a reserve, and then carried the substantial balance of £6,955 forward. The balance-sheet shows a very satisfactory position, no less than £44,054 being invested, but an item of £8,209 on account of conversion of debentures should be written off as quickly as possible.

United States Brewing Company.—The profits of this concern have been well maintained, and in the year ended March 31, after allowing £21,250 for repairs and renewals, and £12,465 for depreciation, the net profit was £110,364. Administrative charges and debenture interest required £22,170, and after including £5,065 brought forward, the net balance was £88,194. Preference interest took £28,000, and the 10 per cent. dividend upon the ordinary shares a further £35,000, which allowed £10,000 to be placed to reserve, and £15,194 to be carried forward, or nearly £10,000 more than was brought in. The reserve will then amount to £130,000, and has been employed as capital in the business, with the result that the properties item stands at a less sum than in 1892. The directors carry forward the large balance this year in view of the doubling of the tax upon beer in order to meet the expenses of the war. This company has a far better record than the other American brewing concerns, but there is one thing that might receive attention. No statement is made of the amount allowed for bad debts, which is a very important matter in the American brewing business, and we note the debtors item in the last six years has risen from £136,881 to £219,540, while profits show only a little addition. Mortgages are certainly included in the item, so that the increase may be perfectly natural, but a distinct statement as to the amount set aside each year against bad debts would be an improvement.

Nahor Rain Tea Company.—The poor results of 1897 only left a net profit of £1,095, which allowed payment of the preference interest and a dividend of 2½ per cent. on the ordinary shares, as against 10 per cent. in recent years. The balance-sheet is not strong, but this apparently does not matter, as the shareholders have agreed to sell the company for £85,000, as against a total capital of £40,419. They must be bold people who buy on this basis, but we wonder whether Nahor Rain shareholders will get cash or paper? Some of Mr. Hooley's exploits left shareholders poorer than before he plied his bellows.

The Hudson's Bay Company.—The report and balance-sheet of this company for the year ended May 31 last, which covers the trading in Canada to the end of 1896, can disappoint only those who discounted the future and bought shares some time ago, at prices a three years' gold boom might perhaps justify. As a matter of fact, the business done in the period covered by the report was not particularly flourishing. The general trade was affected adversely by the unfavourable condition of business throughout America, and profits were lower in consequence. Also the company had a smaller quantity of furs to deal with, and a still more diminished supply is looked for in the present year. Prices, however, were better, so that the loss in money was not serious. Land sales show an improvement, no doubt as a result of the gold excitement all over North-Western Canada. The company sold 37,923 acres of farm land at an average of $4 85 per acre, which was slightly cheaper than the price obtained the year before, but only 10,784 acres were sold then. Town lots, on the other hand, went off much less freely. The sum of the matter is that the accounts show a profit of £69,373, to which £21,999 has to be added, brought forward from last year. Out of this a dividend of 13s. per share, or 5 per cent., is paid for the year, leaving £26,373 to be carried forward.

Amazon Steam Navigation Company.—This undertaking is going from bad to worse. Profits for 1896 were £21,846, but for last year they came to only £9,423, yet £20,208 is to be scattered amongst the shareholders as dividend, the difference being made up of £787 less carried forward, and £10,000 taken from the reserve, although this fund is at the same time drawn upon for £12,969 to adjust the value of stores in Brazil upon a sterling basis. The reserve is consequently reduced to £52,000. The fall in the exchange not only caused a loss of over £9,000, but it was necessary to increase wages in order to avoid trouble. Another point was the very low state of the river, the company having at one time seven steamers aground, and these cost £5,000 to refloat. Moreover, some of the voyages included in the Federal contract have become unremunerative, owing to the exchange, and efforts are being made to get them modified. Altogether the company's position is not a happy one, though for all that we do not see any wisdom is paying dividends out of reserve, especially as nothing beyond a few special credits is written off for depreciation of the fleet, and £9,800 of investments in Consols have been sold out. The position is decidedly weaker than it used to be, and it is becoming a question whether the property, if realised, would allow the repayment of capital in full.

Assam Railways and Trading Company.—We are afraid that we shall always be too muddle-headed to understand the working of this company. The railways form the chief asset of the company as they represent half the capital expenditure. So prosperous were these railways that the board had to spend £11,681 in substituting cast-iron sleepers for wooden ones, in order to reduce the net revenue and so obtain the Government subsidy of £7,083. After this curious operation had been carried through, the net revenue from the railways was only £24,561 as against £29,203 in 1896. The line, no doubt, was improved by having better sleepers, but the general revenue account was not. The company spent a large amount upon the petroleum works, and the directors now conclude that the profitable development of the oilfields can best be secured by a separate organisation. They have accordingly taken steps to form a new and independent company. Let us hope that the new company will be a bit stronger than the Makimo Tea Company, which owed its existence to the same initiative, for this wretched concern has paid very little in the way of dividend, and distinguished itself last year by paying nothing at all. Before they have got rid of one source of expenditure, the board entered manfully into another large outlay, having subscribed for 5,000 shares in the Brahmaputra-Sultanpur Branch Railway Company at a cost of about £33,000. Whether the investment will prove lucrative has yet to be seen, but we should imagine it was quite a venture. Coming back to the revenue account we find that profit on general trading was £2,754 less, the Rivers Steam Navigation shares yielded the same revenue, the £20,000 of tea shares produced nothing against £400 in the preceding year, and the investment in the Brahmaputra-Sultanpur Railway produced £86. The total revenue was therefore £58,052 against £66,415 in 1896. The improvement in exchange helped the company considerably, with the result that the net revenue of £51,319 was only £4,088 below that of 1896. This, however, was quite sufficient to compel the board, after paying prior charges, to reduce the distribution on the preference "A" shares to 4½ per cent. for the year as against 6 per cent. for 1896. As the nominal rate upon these shares is 8 per cent. the company drifts deeper and deeper into arrear, so that the total owing on this account is no less than £316,050.

Apollinaris and Johannis, Limited.—When we first read over the report of this company's board for the first year of its existence a certain wonder arose in the mind as to why the sheet should have been withheld so carefully from certain portions of the press. This feeling vanished as we looked closer. To all appearance the new company did first rate last year—its year closes on March 31—seeing that it was able to pay no less than 8 per cent. on its ordinary shares—all wind or aerated water. We candidly, never thought it would get so far towards a show of prosperity and great wealth. But a closer look starts the question. Did it really get thus far? Leave the smooth statement of the report—the delightful gloss of the Hunyadi Janos action, and such like—on one side, and look at such accounts as the board in its graciousness provides, and we find that the profit and loss account does not contain what must have been the heaviest part of the expenses. The dividend

received from the old "Polly" company, and its German parent came to £173,057, and "Johnnies" water yielded £8,808. Add £129 from interest, and we get a total of £181,993 against which only £4,442 is set down as outgoings for directors' and trustees' fees and office expenses. All the cost of advertising the new "Apenta" water was, it seems, paid out of a fund left to the company by the proprietors of the old Apollinaris Company, who must be fellows of an unprincely generosity. And what about the cost of advertising the Apollinaris and Johannis waters? Ah, that was borne by the respective companies. Was it? We really do not know. Things are mixed a bit, and we shall be able to speak more freely a year hence. At present, all we can be quite sure about is that the report and account of this double-springed company does not permit the public or its shareholders to know whether the profits exhibited are genuine or not. We should sell on the no-information were we among the proprietors. Not being so, we smile and wait developments.

Imperial Ottoman Bank.—There were no little financial operations during 1897 to swell profits, and they therefore amounted to only £275,278, or £22,000 less than in 1896. The dividend is consequently again only 5 per cent., compared with 6 per cent. for 1895 and 8 per cent. for 1894, the African mining year. According to the figures of the balance-sheet the note circulation has increased £125,000, and bills payable £253,000, but the fixed deposits are down £850,000, and current accounts nearly £800,000. Stock of cash is considerably larger, while investments are down over a million, thus denoting preparedness when business grows brisker. At the annual meeting the chairman told the shareholders that for the future their bank must look for profits more to the commercial development of the country than to financial operations, so that for some time to come we shall not look for any increase in dividend.

National Bank of New Zealand.—This bank did very well last year, the gross profits reaching £75,015 compared with £69,374 for 1896, the available balance being £29,195 against £26,157. The directors again put £10,000 to reserve, raising it to £40,000, and in addition to the usual dividend of 5 per cent. they are able to pay a bonus of 1 per cent. and to still carry forward a slightly increased balance. The deposits are nearly £70,000 up at £2,208,900, while the increase in bills discounted and advances is £62,000 at £2,383,500.

Union Mortgage and Agency Company of Australia.—The end seems to be within measurable distance. Profit for 1897 came to £35,627 which, added to £13,354 brought forward and £24,607 representing interest received, gives a total of £73,590. All of this except £8,752 goes in expenses and debenture interest, and this balance is carried forward, being £4,600 smaller than the amount brought in. The directors have transferred from reserve £100,000 to provide for ascertained losses and others likely to arise in respect of securities which it may be found expedient to realise. So the shrivelling process goes on. The reserve is now down to £75,000 against a share capital of £933,000 and a debenture debt of £987,000. As usual, Kemp, Ford, & Co. state in their certificate that no valuation has been made of the assets, which stand at the amount shown in the books. This is probably at 50 per cent. above their real value.

Jokai (Assam) Tea Company.—Relatively this company did exceedingly well last year, for the crop was 230,000 lb. larger than 1896, and actually higher than the estimate. The average sale price was only ·27d. per lb. less, while cost of production was actually lower, so that the net profit of 1·83d. per lb. compared with 1·92d. per lb. in 1896. The reduction in expenses was effected, however, by dint of transferring £5,340 from reserve to meet loss upon rice, which is a way of meeting trouble sideways. The net profit, including £1,558 brought forward, amounted to £29,333, but there was more preference capital to pay interest upon, and so the dividend upon the ordinary shares was reduced to 8 per cent., which enabled the amount forward to be increased to £4,300. We are glad to see this reduction in the distribution, for we have had the feeling for some time past that the company had been straining itself in order to maintain the 10 per cent. dividends, and this lower declaration will give its finances a little rest. Such a heavy loss on rice is not likely to occur again, and meantime the reserve benefited by £14,940 in premiums upon new shares, so that its total now stands at £54,600, and is wholly invested outside the business.

Diary of the War.

June 24.—The landing of General Shafter's military force began on Wednesday morning, the 22nd, and by night about 6,000 men were put on shore without a hitch. The coast line and the country for some miles inland were shelled by the fleet before the troops started to land. The Cuban insurgents co-operated with the Americans, who promptly occupied the country for about six miles round. The Spaniards offered no real opposition to the landing. They were obliged, according to the Madrid accounts, to retire to avoid being out-flanked.

June 25.—The American troops on the 24th proceeded by forced marches westwards, and by noon had reached and occupied Juragua, about ten to fifteen miles east of Santiago. The advance was covered by Cuban skirmishers, and the Spaniards, evidently in accordance with instructions, retired almost without firing a shot, though there was a slight skirmish between the flank of a Spanish retreating column and an American reconnoitring party. The Spanish force left Juragua so precipitately that they had no time to burn the town as they intended, but they had done some damage to the railway locomotives and rolling stock. The Spaniards seem to be concentrating at Sevilla, about six miles west of Juragua, and it is expected that they will make their first serious stand there against the American troops. An engagement is not anticipated for some days. The Americans have been somewhat fagged by their forced marches, and they will probably rest at Juragua for some time and have their supplies replenished there. General Lawton is in command of the American force and General Linares of the Spanish. The landing of American troops at Cuba has made a profound impression at Madrid, deepened by the receipt of a despatch from Admiral Cervera at Santiago, describing the situation as critical, and stating that he was preparing for the despatch of as many sailors and marines from his ships as could be spared to take part in the land fighting. It would thus seem that General Blanco has not been able to forward so many battalions as he promised to meet the Americans. It may be doubted, therefore, if the coming fight at Sevilla will be a very severe one. The Spaniards seem to be as badly prepared on land as at sea. The rumours as to the landing of German and other foreign marines at Manila are, as we guessed, now shown to be baseless. The Government at Washington have received satisfactory assurances that Germany had not contemplated any such serious step. The Spanish Minister of Marine has admitted that the destination of the Cadiz squadron is the Philippines. It is sailing thence so leisurely, however, that it seems impossible that it can arrive in time to be of any service. There was some very plain speaking in the Spanish Senate on Thursday. Senor Fernando Gonzales roundly declared in favour of peace, and referred to the chastisement which had fallen upon them as deserved. "For everything that happened now, the whole country, the people, the different parties, the Government, were responsible." The official defence was a bitter attack upon the conduct of the United States in treacherously trying to seize Cuba under the pretext of humanitarianism. It is the pitiful cry of senile pride and conscious impotence. By the way, it is hinted from Washington that, as soon as it is known that the Cadiz squadron has entered the Suez Canal on its voyage to Manila, a few fast cruisers will be detached from Admiral Sampson's fleet, and sent to bombard Spanish ports in the Mediterranean. If so, it would probably do more to hasten peace than anything that has yet happened. If the war is thus brought pretty nearly home to the Madrilese, they may be able to take a rather more practical view of the necessity for concluding peace.

June 26.—Without much rest at Juragua, some portion at least of the American forces have held on westward, and some skirmishing has been reported. The "first battle" indeed is mentioned, in which the Americans lost considerably, but there are no details.

June 27.—The fighting has been almost continuous from Wednesday the 22nd until Saturday the 25th. The Spaniards were steadily driven back upon Santiago; but they undoubtedly fought well, and inflicted severe losses on their enemies. The sharpest fight of all would seem to have been that between the Cubans and Spaniards. The result for long seemed doubtful, though in the end the Cubans prevailed and the Spaniards retired. Another sharp encounter was precipitated by the carelessness of the rough riders—or cowboys—who strode through a narrow part of the wood without throwing out skirmishers or taking the slightest thought of the possibility of an ambuscade. So they incontinently fell into one; and many were killed before they had fully realised the misfortune that had befallen them. Though surprised, however, they quickly rallied, and finally drove back the Spaniards. There was no "battle"—only skirmishing—at Sevilla. The Americans have pretty well closed round Santiago, but the attack upon it cannot take place until the artillery has been brought up, and that is a slow process in consequence of the nature of the roads. The Cadiz squadron has reached Port Said, where it is to "await orders." The British battleship *Illustrious* has been sent to Lisbon to watch over British interests in the Peninsula—a step which is taken to indicate a belief at the Admiralty that the United States may carry out the threat to send cruisers to bombard Spanish ports.

June 28.—The American forces are now within sight of Santiago; but they are resting, partly because they have been taught caution by their experience of the 24th, but mainly because they cannot advance to the assault of the town until the arrival of the artillery. The Spaniards have thrown out entrenchments far in front of Santiago. These seem to be very formidable, and in each case they are defended by barbed wire fencing, which must increase the dangers of an assault. Besides these, the Spaniards have erected block-houses on every hill or eminence commanding the roads to Santiago. Thirty-four of these have been counted. General Shafter is, therefore, very properly making his preparations very cautiously for the assault. It will be a more difficult business than the impulsive rough riders are willing to admit. The Cadiz squadron still at Port Said. The Egyptian Government refuse to supply it with coal, on the protest of the United States Consul. It is officially announced from Washington that a squadron is to be detached from Admiral Sampson's fleet, under the command of Commodore Watson, to bombard Spanish ports in the Mediterranean. These threats of carrying the war home to Spain seem to have made little impression in Madrid. They declare that such bombardment would be a barbarous outrage against international law. The Madrilese are silly folk.

June 29.—Preparations for the assault on Santiago continue, but the date of attack has, it is rumoured, been postponed for a week. A careful examination of the defensive works has convinced General Shafter that the work will be severe, and it is probable he will wait for reinforcements of troops as well perhaps as of artillery. The Americans have advanced to within three miles of Santiago, and the city's water supply is said to have been cut off. Two new blockades have been proclaimed. The first includes all ports on the south coast of Cuba from Cape Frances to Cape Cruz; the second closes San Juan. The Governor-General of the Philippines declares the situation at Manila to be as "grave as ever." Aguinaldo had asked

him to surrender to avoid further loss of life, but he treated the demand with contempt. Some complaint is made that the presence of German warships has prevented the surrender of Manila, which, but for the moral support thus afforded, would have submitted to Admiral Dewey long ere this. The rumour of a possible landing of German marines is renewed, but it is not confirmed. Admiral Camara and his Cadiz squadron seem to have settled down at Port Said, at least for a few days. The ships have not been allowed to take in any coal yet.

June 30.—Preparations for a general advance on Santiago continue, but General Shafter is determined not to hurry matters. He has reported to General Miles that the town might be taken in forty-eight hours, but it would involve considerable loss. The Spanish defences are formidable. General Merritt has sailed from San Francisco to take command of the American military forces in the Philippines. He is to issue a manifesto announcing that he will, as representative of the United States, establish a provisional Government, and that his authority must be respected. Americans are viewing German action at Manila with considerable suspicion. Admiral Camara has entered the Suez Canal with his big warships, but the torpedo boat destroyers he is said to have left behind, as if confessing that his voyage to the Philippines was a mere farce. The Spaniards resent the American threat to bombard Spanish ports in the Mediterranean, and are said to have become more warlike than ever.

TRADE AND PRODUCE.

The Workmen's Compensation Act comes into force to-day; and not a merchant, manufacturer, or trader but who has for months been discussing the probable effect it will have on trade. Most of them have taken rather a serious view of the Act; and coalowners gravely considered whether it might not be necessary to abolish discounts in order to recoup them to some extent for the cost of the measure. But a decision on this question seems to have been postponed for the present. Most of the larger firms have combined in schemes of mutual insurance. Smaller firms have had to deal with insurance companies, which for some time have been showing a disposition to lower premiums for policies of this nature. There will probably be less heard of the Act now for some time. It will no doubt get a fair trial, but if it is found to be as costly as many anticipate, an agitation will certainly arise for some modification of its provisions.

As a rule trade has been fairly good during the past week, with an improving tendency, and some confidence in the outlook, but no exceptional activity. In some branches complaint is heard that new orders are not coming in sufficiently freely to make up for the old being sent out. Wheat is still, for the fifth week, on the down grade. The same story is told at every English market, at the various Continental centres, and in America, where the "corner" manipulators have themselves been "cornered." There has been no rise, and no possibility of a rise. The manipulators have now to take what they can get; and with considerable stocks in hand, and the prospect of the coming crop being about a hundred million bushels better than last year's, the chance of securing enhanced prices has utterly disappeared. In the English markets there has been very little doing even at the reduced figures. Sellers are generally anxious to do business, but buyers as persistently hold aloof. Prices have not yet touched bottom. The average for last week is stated at 40s. 8d. Last year for the same week the average was 27s.; in 1896 it was 24s. 10d.; in 1895, 26s. 1d.; and in 1894, 24s. 1d. How far it may yet fall it would be risky to prophesy. June has not been quite so favourable for the English crops as was hoped; but the crop reports continue at least fairly good. The amount of wheat sown this year is, we believe, considerably larger than last year. The New York market was reported firm on Wednesday, with a slight rise, but it is not at all likely to be maintained.

The fourth series of colonial wool sales opened on Tuesday. The available total—we take the figures from Messrs. Jacomb, Son, & Co.'s circular—was 265,000 bales as compared with 282,000 bales for the corresponding series last year. The biddings were animated, not to say keen, but mainly for best merinos and medium and fine cross-breds, which showed an improvement of nearly 5 per cent. In the coarser grades of cross-breds there was a downward tendency. South African wools—not very plentiful—sold without change. Huddersfield reports a sudden dropping off of the summer trade, the deficit being chiefly in the London and Irish trading. Leeds makes a similar remark. We can scarcely wonder at London purchases being checked, for London can hardly be said to have had a summer trade this year. If the warmth of the last day or two continues, it will take Metropolitan dealers all their time to clear out such stocks as they have on hand. This must have been rather an anxious season for most of them. Reports from manufacturing centres, however, are cheerful in tone, and hold out good prospects. There has been a brisk trade with Canada, an improving business with South America, though comparatively little with Australia. Cotton also is looking up, both here and in America, and Manchester speaks more hopefully of the future. If Calcutta would but improve there would be a prompt access of activity. As it is, prices are well maintained. The linen business continues very quiet without change in rates.

Copper is still subject to considerable fluctuations, and on Tuesday business was done so low as £49 6s. 3d. cash, £49 8s. 9d. for early July, and £49 15s. and 12s. 6d. three months. Prices rose a little at the afternoon session, and on Wednesday sales were effected for cash at £49 11s. 3d., and £49 13s. 9d. up to £50 for July prompts, and £49 16s. 3d. to £50 3s. 9d. for three months. American quotations continue somewhat low, and it is doubtful if we can yet look for that steady upward turn which has been expected for weeks, and which seems so amply justified by visible supplies.

From the iron trade centres reports are, on the whole, satisfactory. Work is generally plentiful, though in Sheffield some complaints are heard that orders are not coming in so rapidly as they did a few months ago; but the tone as a rule is firm, and the cost of raw material is sending prices up in some quarters. Glasgow locomotive builders have secured some important orders for Indian railways, amounting to no fewer than 137 engines. The shops were already busy before these orders arrived, and they are now assured of continuous steady work for months to come. The steel-workers' year, now closing, has been the best ever experienced. Prices have been good throughout, and promise to be better in the year that is approaching. The shipbuilding yards are yet fully employed, and will be so for some time, but new orders have recently become somewhat scarcer. At Wolverhampton and Newcastle equally favourable reports are heard. Prices of raw and manufactured iron are both strong.

No practical change in the coal market, but the probability of a settlement of the Welsh dispute seems rather more hopeful—not so much because Mr. Ritchie has agreed to appoint a conciliator as because the colliers themselves are taking action to have a ballot as to whether the sliding scale as a wage regulator shall be renewed or not. It is believed that the ballot, if taken, will show an overwhelming majority in favour of a sliding scale and a 5 per cent. advance in the wage rate. A stoppage of the Yorkshire pits is now threatened in consequence of strikes among the pit lads and pony drivers, who are asking for a 10 per cent. advance; already 5,000 men are idle.

Answers to Correspondents.

Questions about public securities, and on all points in company law, as well as on the position of life insurance offices and their promises, will be answered week by week, in the Review, on the following terms and conditions:—

A fee of FIVE shillings must be remitted for each question put, provided they are questions about separate securities. Should a private letter be required, then an extra fee of FIVE shillings must be sent to cover the cost of such letter, the fee then being TEN shillings for one query only, and FIVE shillings for every subsequent one in the same letter. While making this concession the EDITOR will feel obliged if private replies are as much as possible dispensed with. It is wholly impossible to answer letters sent merely "with a stamped envelope enclosed for reply."

Correspondents will further greatly oblige by so framing their questions as to obviate the necessity to name securities in the replies. They should *number* the questions, keeping a copy for reference, thus:—"(1) Please inform me about the present position of the Rowenzori Development Co. (2) Is a dividend likely to be paid soon on the capital stock of the Congo-Sudan Railway?

Answers to be given to all such questions by simply quoting the numbers 1, 2, 3, and so on. The EDITOR has a rooted objection to such forms of reply as—"I think your Timbuctoo Consols will go up," or "Sell your Slowcoach and Draggem Bonds," because this kind of thing is open to all sorts of abuses. By the plan suggested, and by using a fancy name to be replied to, each query can be kept absolutely private to the inquirer, and no scope whatever be given to market manipulations. Avoid, as names to be replied to, common words, like "investor," "inquirer," and so on, as also "bear" or "bull." Detached syllables of the inquirer's name, or initials reversed, will frequently do as well as anything, so long as the answer can be identified by the inquirer.

The EDITOR further respectfully requests that merely speculative questions should as far as possible be avoided. He by no means sets himself up as a market prophet, and can only undertake to provide the latest information regarding the securities asked about. This he will do faithfully and without bias.

Replies cannot be guaranteed in the same week if the letters demanding them reach the office of the INVESTORS' REVIEW, Norfolk House, Norfolk-street, W.C., later than the first post on Wednesday mornings.

LUSK.—Not at the present price. Pounds lower they may still be a good investment, because the threatened opposition cannot come to much for years, and may never do so. Just now buying cannot be recommended in that particular share.

SAMOHT.—The shares you name are very good, but dear at the price. You must remember that the dividends on the ordinary shares have fluctuated sharply, and once, lately, disappeared altogether. That being so, a preference share at 45 per cent. premium is not tempting, and certainly could not be guaranteed to keep its price for the next ten years. Nothing on earth could, though.

What is his Majesty the King of the Belgians really aiming at? He is credited, though not on specially high authority, with having a mission at Peking trying to obtain a supply of Chinese coolie labourers for the Congo State. We thought labourers were plentiful on the Congo. In return for coolies, however, the King offers to send 10,000 negroes from the Congo country, who, it is urged, could be formed into a valuable fighting force under Belgian officers. Is Belgium anxious to undertake the task of reorganising the Chinese army?

KINGDOM OF THE NETHERLANDS.

ISSUE OF 57,815,000 FLORINS THREE PER CENT. DUTCH GOVERNMENT LOAN,
Authorised by the Law of June 9th, 1898.

MESSRS. SPEYER BROTHERS
AND
THE UNION BANK OF LONDON, LIMITED,

are authorised by His Excellency the Dutch Minister of Finance to receive Subscriptions for the above Loan, bearing Interest from September 1st, 1898.

The price of issue in London is 97 per cent., equal to £97 per Fl. 1,200 (£100 nominal), payable as follows:

£5 per Fl. 1,200 on Application.
20 " " " " Allotment.
35 " " " " August 29th, 1898.
37 " " " " October 3rd, 1898.

£97 per Fl. 1,200 (£100 nominal).

Payment in full may be made on Allotment or on August 29th, under discount at the rate of 3 per cent. per annum. In default of payment of any instalment, the amount previously paid will be subject to forfeiture.

Scrip Certificates "to bearer" will be issued in exchange for the Letter of Allotment. These Certificates, when fully paid, will be exchanged as soon as possible after September 1st against definitive Bonds.

The bonds will be "to bearer" in amounts of Fl. 1,000, Fl. 500, and Fl. 100 each, with half-yearly Coupons due March 1st and September 1st, payable in Amsterdam, and also at the Union Bank of London, Limited, at the exchange of the day. The Bonds may be exchanged in Amsterdam at any time for a like amount of 3 per Cent. Inscribed Government Stock.

The Law of June 9th, 1898, declares that a sum equal to the present Loan shall be provided for by an annual accumulative sinking fund of 1 per cent., commencing in 1899, and that this Fund shall from time to time be applied either by purchases or by drawings at par of any part of the then outstanding 3 per Cent. Dutch Loan. The Government reserves to itself the right to increase the Sinking Fund at any time.

The same law provides that the interest on Bonds drawn ceases from the day they are payable, and such drawn Bonds, if not presented for payment within ten years from their due date, will be forfeited.

These Bonds are similar in every respect to those now officially quoted in London, Amsterdam, Paris, and Frankfort-on-Maine.

The Subscription will be opened simultaneously in Amsterdam and Brussels.

The Subscription in London will be opened on Tuesday, July 5th, 1898, and close at or before 4 o'clock on the same day.

Applications for the Bonds must be made on the annexed form, either to Messrs. Speyer Brothers, 7, Lothbury, London, E.C., or to The Union Bank of London, Limited, 2, Princes Street, London, E.C.

The allotment of the Loan will be made as early as possible after the subscription is closed.

A translation of the Law of June 9th, 1898, may be inspected at the office of Messrs. Freshfields & Williams, 31, Old Jewry, E.C.

London, E.C., June 30th, 1898.

KINGDOM OF THE NETHERLANDS.

ISSUE OF 57,815,000 FLORINS THREE PER CENT. DUTCH GOVERNMENT LOAN.

To Messrs. Speyer Brothers and The Union Bank of London, Limited, London.

.....request that you will allot... .....Fl..... .. ..in the above Loan, on which.....enclose the required deposit of £5 per Fl. 1,200, viz., £ ....., in accordance with the Prospectus issued by you, dated June 30th, 1898, and..... engage to accept the said Bonds, or any smaller amount you may allot....., and to make the payments thereon in accordance with the Prospectus.

The Investors' Review.

The Week's Money Market.

Bank Rate 2½ per Cent.

After having been at about ½ per cent. for the greater part of the week, the rate for short loans has moved up to 1 to 2 per cent. The firmness, of course, is simply due to the end of the half-year when the London banks have to make up their balances all on one day, instead of taking various dates over a period of ten days, as is done at the end of each intermediate month in the half-year, on the "patent safety" Lidderdale plan. The demand for short loans was so strong that a few borrowers went to the Bank of England and paid 3 or 2½ per cent. for advances just into July. Probably the sum thus borrowed did not exceed the amount withdrawn by the India Council, which has been taking its balances off the market for the last few days. The discount houses have decided not to follow the Bank, as their allowances for deposits were already down to 1 to 1¼ per cent. but the joint banks have reduced their interest upon deposits by ½ per cent. to 1, and now feel more comfortable. It is not nice at any time in business to give 150 per cent. more than one can trust to receive.

The reduction in the Bank rate had little effect, discount rates having steadily declined throughout the week until the rate for three months remitted paper is now no better than 1⅛ per cent. as compared with 1¼ to 1⅜ per cent. a week ago. It is evident now that the July dividends will be anticipated to only a very slight extent by borrowings at the Bank, and consequently the market must look to having two to four millions more cash than usual at its disposal during the dead summer months. A further reduction in the Bank rate must result, and renewed weakness in outside rates may ensue, but consideration for the chances of the autumn will prevent the latter movement being carried to an extremity. The gold demand appears to be just strong enough to prevent gold from going to the Bank, both India and Russia competing at about 77s. 10d. per ounce—the figure at which the outside market must bid in order to take the metal from the Bank. An Indian sterling loan is likely to be introduced soon, and the market is wondering whether it will take the form of a 2½ per cent. or 3 per cent. stock. It is argued that a 3 per cent. issue at about 103 would be preferable to inviting tenders for a 2½ per cent. one at—at what? 90? 88? Assuredly not more than 90 could be obtained for the latter, as the existing 2½ per cents. enjoy no market favour and flop in price at a wink, while a minimum of 103 for a 3 per cent. loan might perhaps bring applications above the figure. We know so little of India that we love and trust it immensely.

A decrease of £888,000 is displayed by the Reserve of the Banking Department in this week's return, and the total is therefore now down to £27,071,000. Why, then, did the Bank rate go down? Because this decrease is only an incident by the way, because the market is flush of funds, £809,000 having been added within the week to the "Other" deposits, making them £45,405,000, and because there is no gold demand on foreign account strong enough to pull large amounts out of the Bank's stock. The truth of the matter also is that the Government has been writing cheques so fast that its balances have run down £1,975,000 within the week, and now amount to only £10,080,000. It is swamping the market, in fact, and that market has in consequence been able to pay £281,000 off "Other" securities while still augmenting its till money. In these circumstances the increase of £933,000 in the note circulation counts

for nothing any more than the fall in the proportion of reserve to liabilities from 49¼ per cent. to 48⅝ per cent. The absence of any end-of-the-half-year borrowings at the Bank was itself enough to convince the directors that it was quite useless to keep their nominal discount rate at 3 per cent. They might as well have gone to 2 per cent. when they were about it, but conservatism is a good thing in usury.

THURSDAY NIGHT.—Since the above story of the week was written we learn that the Bank had to be applied to yesterday afternoon for considerable sums of money in the aggregate to help the market over the end-of-the-half-year balance-sheet show. The loans were granted till Monday for the most part and at 2½ per cent. In the open market the same rate was bid for money over-night, but the "squeege" will be at an end to-day.

SILVER.

Buying on account of Spain has continued at intervals throughout the week, and the price of bars for immediate delivery has improved to 27 5/16d. per ounce. There has also been a moderate amount of purchasing by "bears," while India has been buying for a few weeks ahead. A further decline of 1 per cent. to 8 is notified by both the Banks of Bombay and Bengal, as a result of the improvement in their cash balances this week. The relaxation in the pressure for money—the result rather of the wet season than of any improvement in the position—has caused the exchange to fall to 1s. 3 3/32d., but the ease is not expected to last for any length of time.

Since the commencement of the financial year on April 1 the India Council has sold Rs.8,22,63·110, realising £5,464,961. As the Budget estimated for £16,000,000 to be drawn in the year, this means that, at 1s. 4d. per rupee, about 40½ lacs must, in future, be sold per week in order to obtain the amount.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7 and 8 Vict., cap. 32, for the Week ending on Wednesday, June 29, 1898.

ISSUE DEPARTMENT.

Stock Market Notes and Comments.

We have got the settlement of a long account over. It has been a tiny affair, for nobody who could help it did any business during its progress. That is often the way with nineteen-day accounts, either that or people take a fit of madness in them and pile up liabilities which end in a mess. Now that the account is behind the market, and the half-year as well, we expect to see more activity, in some of the departments at all events. There will be large sums of dividend money seeking investment, and throughout July this alone should give a good deal more work to many brokers and jobbers. Speculation will also wake up slightly, is showing signs of doing so now under the forcing influence of extremely cheap money. No great passion or fancy of the public in any one direction appears likely to be developed, but there will be little gambles here and there.

We have still, for example, the Chatham gamble with us, and it is fortified by an "official" statement that the "principles" of a working agreement between the Chatham and South-Eastern Companies have been agreed upon. In virtue of this preliminary, the former company alone is straight away going to save £100,000 a year in working expenses. Fiddle-de-dee! The betrothal may end in a wedding—though we have seen the two as near it before and cry off—and still such saving cannot be, if the Chatham line is to be brought into efficiency. As we have never ceased to insist, it is the most disgraceful line in the three kingdoms of any size or pretension to respectability. If money is saved on train mileage by the cessation of useless competition, more than all the Chatham Company's share of the saving will be required to put the line in order and to pay the staff properly. At present it is a staff kept in a position of semi-starvation. Never a man of it gets hurt or dies but what the hat is sent round amongst passengers in order to raise a little money for his widow and family. The company cannot afford superannuation funds, is as near bankruptcy as any line could be short of actually going over the abyss. It carries millions of dead capital and will require a million, at least, to put it in proper physical condition. All this is probably well enough known to the gamblers themselves, but they have run up Chatham second preference to 109½, and may carry the ordinary stock pounds higher than it is now, and see money in the spin. Sensible people will let them have the game to themselves. In several other directions the price of Home railway securities are getting what the market would call "topish." "Heavy" stocks, especially, seem to us rather dear. Great Western has not suffered much in price as yet by the disorganisation of labour in South Wales, nor have Great Northern, Midland, or North Western stocks in any degree felt the influence of the approaching competition of the new Sheffield line into London. That will not be in full swing for some months yet, but it is near enough to be taken into account in any speculation dealing with these securities. They are too dear for investment, all of them, and will be subjected to a more or less severe depression when money becomes dear again. Should they go up now through speculation engendered by cheap money, many possessors ought to sell, sure of being able to buy back again on a favourable market long before 1898 has run its course.

As regards American railroad shares the same counsel seems to be apposite; not but that the gamble in them may carry prices higher than they are now, but they are high enough to make purchases by the unsophisticated public full of risk. The great crop "boom" has been worked for all it is worth in Milwaukee, Great Northern, Northern Pacific, Canadian Pacific, and we may say also in Grand Trunk securities. Moreover, should the volume of traffic fall short of the sanguine estimates, we may be sure rate cutting next autumn and winter will spread rather than diminish. That is a disease certain to remain always with us as long as those railroads are controlled by irresponsible despots, very few of whom appear to have been educated in the principles of common honesty. Some among them of the straighter class have already been warning speculators not to expect too much this coming autumn, and we on this side, at least, will be wise not to neglect these warnings, but to maintain a sceptical mind in regard to the prophecies of great dividends to come on discredited securities. Bonds are, perhaps, in a different category, but speaking in a general way we are inclined to say that most of the speculative class of bonds are also already dear enough from the investor's point of view. It is rarely that such bonds are worth buying for investment above par.

The market for foreign Government stocks has dwindled away almost to vanishing point, and a great blow has been given to it by the latest move of the Spanish Government in the direction of complete default. Spanish Governments may be trusted always to do the wrong thing in a business affair, and in the present instance the narrowness of view characteristic of all Spanish officials has been strikingly illustrated in the decree with reference to the payment, if any, of

future coupons on the public debt. Money seems to have been borrowed somewhere to meet this July coupon in gold, both in Spain and abroad, but for the future bonds held in Spain are to get their coupons paid in paper, and only those held abroad will be paid in gold. As we pointed out last week this kills the international market for Spanish bonds, and it is perhaps just as well; but that was not the aim of the Ministry at Madrid. What it was striking at was the Spanish seller. Apparently weeks before anything was publicly known the intention of the Government to partial default leaked out and holders of Spanish bonds in Spain made all haste to sell, "tipping the wink" to their friends here to buy to make their market better. "We must stop this," cried the Ministers, "else we shall have to pay all the coupons in gold in future." And so they launched the decree commented on last week, ordering all bonds in the hands of foreign owners to be sent in for registration by June 30. This forced the price up a pound or two on the London and Paris markets, because that date effectually prevented the Bourse of Barcelona, in particular, from being able to deliver within the time the bonds it had sold abroad. Protests were made at Madrid as to the loss this cunning stroke would cause and the bat-eyed Ministry, whose days are numbered—and the numbering is short—extended the time to the 10th inst. So its purpose in uttering the decree came to nought, but the greater mischief it had not eyes to see remains. It has not only destroyed the international market for Spanish bonds, but has also struck a fatal blow at Spanish credit. How Paris will stand up under this blow we cannot even estimate, but the loss there, actual and impending, must be very great. Here also there will be considerable loss, because the "early information" judiciously sent us caused much buying of these bonds by sanguine people—buying we commented on a fortnight ago as a mystery—who will now have to stick to what they have bought with slender chance of selling again except at a loss. Probably enough the mere payment of stamps in Paris will make bonds held here marketable there and *vice versâ*, but Paris is already enormously overloaded and does not want any more of such stuff; so altogether there is a nice little confusion in this particular foreign security. As for the others there is neither excitement nor business in them. The Brazilian default has hardly excited a ripple of interest, and has produced very little selling. The market for "Brazils," besides, is propped, and will continue to be. By inside influences, prices for the bonds have been kept up, and the exertion required to do so has not been stupendous because of the want of selling. In Italian Rente, again, the "bears" here have been caught, the Continental "bull" operators being too strong for them, and Italy having failed thus far to justify "bear" expectations in the matter of going into default. Bankrupts never do "chuck it" when they ought to. The event is coming all right in Italy, but it won't come in time for those who have been paying "backwardations" account after account; and seeing the price always hoisted against them, they have had to buy back, and Italian has been firm. Argentine securities have weltered about in their own special pool, sometimes up, sometimes down, with no special reason why they should be up or down this week or month more than last. Of the others no mention need be made at present.

The mining market may be almost passed by unnoticed. Prices have been improving a little in South African descriptions, but that is said to be because the Barnato and Consolidated Goldfields groups have to get their balance-sheets ready, the bold fellows they are. We hardly thought the Barnatos at least need have troubled themselves about that. However, they can put prices up if they like, for the sulky public apparently seems to have made up its mind not to sell. Buy it cannot. In the Australian market we are still waiting for some bubbles to burst and may have to wait a few weeks yet: money is so cheap. The public had best wait with us, and whistle, if it likes, to keep its spirits up—something in D flat.

The Week's Stock Markets.

The settlement took up a certain amount of time this week, but although it was the last one of the half-year, it was not a difficult one to arrange, rates again being lighter. Plenty of time was left to devote to new business, if there had been any forthcoming, but apart from a moderate amount of activity in Home railway stocks and in the market for United States railroad shares, there was little or nothing doing, the slight wake up in South African shares soon dying away, and the attendance of members is again very thin. Consols were singularly weak until the "carry over" on Wednesday, when the price rose a little, the rate being only about 1 per cent. Local loans, the Indian sterling loans, and the 2½ per cents. are all slightly weaker, and Home Corporation and Colonial Government stocks have met with little support.

Prices in the Home railway market suffered somewhat during the closing hours of last week, sales being affected in view of the settlement, but since then with business a little more active there has been a moderate all-round advance. Considerable dealings have again taken place in the Chatham and South-Eastern Companies' issues, the joint committee having agreed upon the principles contained in the draft agreement for a united working of the two systems. A "clear saving of at least £100,000" a year is considered likely under the new arrangement, and upon the strength of this the price of Chatham second preference has been hoisted a few points higher, but the new issue of debenture stock was badly received, only about half the amount being subscribed.

Waterloo and City ordinary marks a further recovery, and the line is really to be formally opened on July 11. An increased demand for the stocks of the Scottish companies was due to the statement that additional Government contracts were to be placed at the Clyde yards. All the heavy lines mark substantial gains, North-Western again reaching 200, and "underground" stocks moved up a little on more "electric traction rumours." Hull and Barnsley now stands at about the highest point of the year, the good traffic returns encouraging holders to look for an increased dividend. Continuation rates at the settlement ruled light, the only exception being North-Western, on which nearly ½ per cent. was charged, and on Great Eastern a small contango was paid this time.

In the market for United States railroad shares the most prominent feature has been the introduction of the new securities of the Baltimore and Ohio. This company's common stock quickly fell away when the reorganisation scheme was published, many holders seeing no inducement to pay the assessment at the present price. There was, however, a lot of support forthcoming for the new securities, chiefly on Amsterdam account, and the various gold bonds have risen sharply. Generally speaking, this market has been a dull one, for while the successful landing of troops in Cuba was regarded with satisfaction, and caused a slight advance in prices, rumours of German interference at Manila were again circulated, and another adverse factor was the reported outbreak of yellow fever in Cuba. The new war tax is also expected to act rather as a deterrent to speculative business, and the weakness of the wheat market has also tended to depress prices. Milwaukee and Louisville and Nashville shares have been prominently weak, the former on the decreased earnings for May, and Northern Pacific issues are also lower. Rates of continuation were easier than last time, the general rate being about 3 to 3½ per cent., except that "Milwaukees" were carried over at "even" to 2 per cent. Canadian Pacific shares have exhibited a drooping tendency, the traffic being poor, and the May statement was not a very encouraging one, but Grand Trunk stocks have gone down much more rapidly, the second preference taking the lead, provincial operators apparently taking fright and throwing their stock on a market already overloaded.

46⅜	40	44½	Uruguay 3½ p.c. Bonds	44½	—

Prices are very little changed in the Foreign market, and business has been confined within narrow limits. Spanish 4 per cents. were rushed up to 35 owing to some hurried buying by operators for the fall, who did not seem to know quite what the market value of the bonds unstamped by June 30 was. The extension of time to July 10 for bondholders to present their bonds for stamping put a stop to the rush of buyers, and the price was soon back again at the old level. Nothing much has happened on the Paris Bourse, the repeated failures to form a Cabinet being given as the reason why things were so dull, but the announcement of the formation of a Ministry by M. Brisson when it was at last made produced little or no effect, and the tendency was weak throughout. Argentine bonds leave off flat, the gold premium being much higher, due, it was thought, to the wheat crop, having been much over-estimated, and a new issue of Treasury bills is also talked of. Brazilian stocks show but little change, but are, if anything, also rather lower, and Chilian bonds close weak. Turkish groups have hardly been mentioned, but the Chinese 1896 loan has met with support, and the Mexican issues are higher. The rise in the latter case was started by the discovery at the settlement that the bonds were scarce, "even" to a small "back" being quoted. Other rates ranged round about 3 per cent, although Spanish and Italian were continued at charges rather less onerous.

Among Foreign railways all the leading Brazilian companies' securities have been sold freely, but some of the principal Argentine descriptions are higher. Mexican railway issues advanced during the earlier part of the week, until a disappointing traffic return caused a set back.

As far as investment business is concerned, the Miscellaneous market has done little, but a few of the leading speculate-counters have attracted some attention. Brewery stocks have been quieter of late, about the only noticeable move being a rise of 4 in Guinness preference. A further slight recovery is to be recorded in electric lighting companies' shares, but operators are waiting the course of events before launching out again over this class of security. Anglo-Argentine Tramways debenture is 5 higher, and British Electric Traction and Apollinaris shares are slightly firmer. On the other hand, E. & J. Burke debentures dropped 20, the ordinary and preference shares about 2 each, Anglo-Ceylon Estates 5, London Tramways "B" debentures 3, and Jorehaut Tea 5½, these being some of the more important losses. The Assam Railway and Trading Company's various issues also declined on the appearance of the report, and a 5 per cent. dividend on Dunlop deferred failed to do much more than keep the price steady. The Hudson's Bay report was about up to expectations, and hardly affected the price, and holders of Goldsbrough mortgage debentures viewed with equanimity the passing of the "B" debenture interest. East and West India Dock preference is again quoted lower.

Markets closed firm on the whole, without any increase in the volume of business, but the fall in the Bank rate and Lord Salisbury's pacific speech tended to harden the tone generally. Among Home railway stocks Chatham second preference finally closed about ten higher on the week at 109½, but the ordinary left off below the best on profit taking. South Eastern deferred and North Western closed firm, but Great

Eastern and Hull and Barnsley were put lower on some reported trouble in the Yorkshire coalfields. Grand Trunk stocks rallied before the close, and United States shares were also rather firmer, notably Illinois Central, New York Central, and Union Pacific. Spanish 4 per cents. advanced a little on Continental buying, Argentine and Chilian bonds closing dull. Most of the leading Western Australian mining shares picked up rather remarkably just before the finish, and the Mount Lyell group also recovered somewhat sharply.

Mining and Finance Companies.

Professional operators, tired of doing nothing, have tried to impart a little life into the South African market, and the result is that, compared with a week ago, there is quite a long list of rises of ¼ or so. Paris operators supported East Rand and De Beers shares to a limited extent, and German buying was also reported, but also only to a limited extent, while De Beers were bought on home account in anticipation of the dividend just announced, and close firm. Among Western Australian ventures Hainault advanced on a cable reporting a new discovery, but Golden Horse Shoe and Hannan's Brown Hill are weaker, the continuation rates, for one thing, proving rather more onerous than had been anticipated. Very little has happened in the general mining market. Mount Lyell shares, after being dull, suddenly recovered, and there was a small "back" on the shares at the settlement; Rio Tinto has hardly moved, and Indian shares keep very steady.

THE COUNTERVAIL *VERSUS* SUGAR BOUNTIES.

The International Sugar Bounties Conference, whose sittings have been suspended for some time, looking to the diversity of principles and interests, apart from possible complications, can hardly yield tangible results. A manifesto issued by "The Anti-Bounty League" gives the consumption of sugar per head of the populations as follows: "England, 86 lb.; United States, 65 lb.; Denmark, 44 lb.; France 28 lb.; Germany, 27 lb.; Belgium, 22 lb.; Austria, 17 lb.; and Russia, 11 lb." These figures were presented by "The French Commission of Senate on the Sugar Bill of 1896," and they have generally been accepted as accurate. The sugar question is one closely allied with the principles and policy of Free Trade. The exponents of the legislation sought to be established in defence of English and colonial interests contend that the sugar bounties paid by Continental Governments are ruining the West Indian colonies, which should be protected by the Mother Country, and that this Protection should take the form of countervailing duties. Now the total annual production of sugar by the West Indies is about 270,000 tons, England (after deducting re-exports) taking for home consumption 50,000 tons, and the United States the bulk of the crop. To the extent, therefore, of fully 200,000 tons, the West Indies are protected by the United States, as under the Tariff Law of July, 1897, "the States levy special countervailing duties on bounty-fed sugar."

When simmered down to a residuum, the "vexed question" in the discussion now absorbing a large measure of public attention and upon which no little perplexity is felt is this: Who are the recipients of the benefit derived from the bounties? A little volume, published by Messrs. Cassell, under the title of "Popular Fallacies, being the *Sophismes Economiques* of Bastiat adapted to the Present Time," answers that question thus: "The latest demand has been for countervailing (of course not *protective*) duties to hinder the importation of bounty-fed sugar. Foreign Governments, said the Anti-Bounty League (of 1888), give bounties on refining, and these bounties stimulate the export of refined sugar to this country. True; but the bounties given by foreign countries upon refining were really received by English sugar consumers, who profited by the low price of the commodity, which was the direct result of the bounties. What France, Germany, and others paid to promote refining and to encourage exportation we received. They, in fact, paid tribute to us, and we should receive it gladly." In this explanation of the ultimate destination of the bounties there is no ambiguity. It is clear, explicit, and true.

Advocates of the imposition of the countervail disregard, or at least discreetly keep in the background, the cardinal point that since the cultivation of the beet was entered upon by Continental countries it has become a permanent national industry with all of them. The rental of land in Germany, for example, as a typical case, has risen from 18s. to 54s. an acre, while the refuse beet, or pulp, for cattle feeding yields a revenue of close upon £2,000,000 a year. It is claimed also by experts that the beet-root grower attaches more value to the pulp than to the money he receives for the sugar Germany—and herein lies the danger—if countervailing duties were imposed, might, and probably would, retaliate by a further increase of the bounties, and we, in defence of our new national policy, would have to follow suit, and countervail still more till we are on a parity not only with Germany, but with all other bounty-giving nations. These reprisals and counter reprisals might be unceasing, and would be equivalent to playing the old-fashioned game of "beggar my neighbour" again. There are many openings through which Germany, in order to adjust the balance, might work. She might, for instance, abolish the land tax, or even give a drawback, a term synonymous with bounty, on her imports of nitrate, a manure of which the beet growing countries on the Continent take nearly ten tons to our one. That form of retaliation might strike the impoverished British farmer rather hard. One salient fact is not open to dispute. Home consumers of sugar, it is estimated, would lose at least £2,000,000 a year, if thus deprived of the cheap sugar they now enjoy. If once the reprisal element is let loose between this country and the Continent, the Englishman, instead of commanding and consuming his allowance of 86 lb. of sugar a year, might perforce be reduced to "short commons," measured by the Frenchman's 28 lb., the German's 27 lb., and the Russian's 11 lb.

But after all said and done, it is necessary to inquire in what does the *rationale* of this compulsory sacrifice of national interests consist? Of our total import of 1,500,000 tons of sugar, 25 per cent. only of cane sugar from all parts of the world (of which not 10 per cent. reaches us from the West Indies) would be directly affected by the projected retaliation. A crucial question on this point, and one rarely considered, is this—what would be the capital expenditure required to restore the "pristine vigour" of the West Indies as sugar producers as it was before these colonies had to face competition with the European Continent? Putting the inquiry in another form, what would be the *cost* of regenerating the sugar industry of the West Indies to a standard approaching that which it had attained in 1874, when protection to colonial grown sugar was abandoned, and when, according to eminent testimony, the plant and appliances of the sugar estates were antiquated, and hastening to the last stage of disintegration and decay? Another pertinent question might be, would it be worth the cost? Of one thing we may be sure—that to enter upon a war of retaliation would tend rather to confirm than shake the faith of Continental Governments in the efficacy of bounties. These Governments are paying heavily for their experience, and it is evident, from the perfunctory nature of the discussions at the International Brussels Conference, that they have not even yet learned their lesson, nor appreciated the tremendous cost of it. But they would not be taught the lesson any more rapidly were we to resort to countervailing duties. That would be but transferring a considerable portion of the expense to our side of the account. Continental Governments will, no doubt, in time see the waste and folly of bounties; but the production of beet sugar is a permanent industry which will now go on with or without them. It is not a matter on which Continental Governments can be forced; and to impose countervailing duties would be but to resort to a kind of force. Why waste time in its discussion? The aims of the countervailers are entirely visionary. They cannot succeed, and even if success were possible, it would be nothing short of a national calamity, for it would mean at least the partial destruction of our free trade policy, by which alone our commerce and industry can be properly developed.

Notice is given to the registered holders of Sultanate of Zanzibar first mortgage bonds, Nos. 1 to 350, for £35,000, that these bonds will be redeemed on January 1, 1899, by payment of the principal sum secured thereon, *plus* a premium of £1 per cent.

Mr. Henry Gerard Philip Hoare, of Messrs. Hoare & Co., bankers, Fleet-street, has been appointed a director of the Provident Clerks' Mutual Life Assurance Association.

The Swiss Bankverein, Switzerland, announce the opening, on July 1, of a branch of their bank in London at 40, Threadneedle-street, E.C., under the style of Swiss Bankverein.

The offices of the Golden Horse Shoe Gold Mining Company, Limited, have been removed to No. 3, Great Winchester-street, E.C.

We are informed that warrants were yesterday posted for the interest on the 4 per cent. consolidated first mortgage debentures of John Passey White & Brothers, Limited, for the six months ended yesterday, and that cheques have also been posted for the thirty-two debentures of £100 each which were drawn for repayment at this date, at a premium of £10 per cent.

The firm of Duff, Bridges, & Watts, of 5, Nicholas-lane, Lombard-street, from July 1 prox. will be carried on as Duff, Watts, & Co.

The London Tramways Company, Limited, will redeem, on December 31 next its mortgage debenture stock for £180,000 issued in pursuance of the resolution passed at a general meeting of the company, held on April 29, 1880. Payment will be made at the registered offices of the company, and all certificates should be lodged at least ten days before December 31.

Sir Charles Turner, K.C.I.E., has been elected chairman of the Rohilkund and Kumaon Railway Company, Limited, in the place of the late General Alexander Fraser, C.B., R.E., Sir George Allen, K.C.I.E., having declined the office. Colonel T. Gracey, C.S.I., R.E., late Director-General of Railways, and Secretary of the Railway Department of the Government of India, has joined the board of the Rohilkund and Kumaon Railway Company, Limited.

WEST AUSTRALIAN MINES.

The total output of gold by the mines of Western Australia—that is to say, "gold, the produce of the colony, entered for export"—continues to grow in bulk, the quantity for May being 83,346 oz., for April 84,083 oz., for March 75,380 oz., for February 53,739 oz., and for January 93,395 oz., but the last total included 12,515 oz. from ore smelted outside the colony. The growth will be better seen from the fact that for the first five months of this year the output was 389,944 oz., as compared with 211,981 oz. for the same five months in 1897, 84,396 oz. in 1896, and 92,151 oz. in 1895. This increase may be attributed entirely to the larger number of companies at work, and the greater mass of ore dealt with. It is of course a fine thing for the colony, but of little benefit to shareholders on this side. As to the fifty or sixty English companies, or companies in which English investors are interested, and which make monthly crushing returns, it is clear that, with a few exceptions, they are a very poor lot, and, as will be seen below, their yield of gold from the ore crushed has been steadily on the down grade for the past year :—

1897.	Tons.	Oz.	Yield per ton. oz.	dwt.
July	24,277	38,711	1	12
August	26,214	45,390	1	14
September... ...	31,033	51,860	1	13
October	33,719	51,892	1	11
November	33,147	48,794	1	10
December	36,465	51,166	1	8
1898.				
January	41,208	49,867	1	4
February	39,765	42,919	1	2
March	43,233	52,871	1	4
April	40,153	48,001	1	4
May...	42,849	48,354	1	3

Even from the Great Boulder, which has been the most successful of the English companies, the yield is still getting smaller and smaller. The average from 16,729 tons in 1896 was 3·6 oz. per ton, and from 29,463 tons in 1897 it was 2·16 oz., but it has since fallen gradually to 2·3 oz. The Boulder Perseverance yield keeps up very well, but the Boulder Main Reef, the Ivanhoe, the Lake View, North Boulder, the Associated, Burbank's Birthday Gift, and many other smaller undertakings are all giving poorer returns than the average either of 1897 or 1896. Dividends are also getting scarcer, which, with falling yields and high working charges, is not to be wondered at. The shares of those companies which earn anything for their shareholders stand at greatly inflated prices, and offer no inducement to the speculative investor because he cannot be certain how much more gold there may be in the mine, and also because the price of the shares is so high that in the event of the rich gold giving out in two or three years' time he would stand the chance of losing so much of his capital. Allowing for the companies already defunct and those which are continuing their miserable existence, English investors in West Australian mines have lost more than they have gained, as we said they would do when the speculation was first started. It is the market men and promoters who have derived all the benefit.

NEXT WEEK'S MEETINGS.

MONDAY, JULY 4.

Derby Tea	28, Fenchurch-street, 11 a.m.
Edinburgh Eastern Cemetery ...	Edinburgh, 2 p.m.
Jorehaut Tea	138, Leadenhall-street, 1 p.m.

TUESDAY, JULY 5.

Great Eastern Railway	Liverpool-street Station, noon.
Johns, Son, & Watts	Guildhall Tavern, 3 p.m.
Lancashire and Yorkshire Bank ...	Manchester, noon.
National Bank of New Zealand ...	Winchester House, 12.30 p.m.
United River Plate Telephone ...	Winchester House, noon.

WEDNESDAY, JULY 6.

Alabama Coal and Iron	Winchester House, noon.
Assam Railways and Trading ...	Winchester House, 2.30 p.m.
Mysore West	Winchester House, 3 p.m.
Mysore Wynaad Cons.	Winchester House, 3.30 p.m
Nerbudda Iron and Coal	Winchester House, noon.

THURSDAY, JULY 7.

Colonial Bank...	Winchester House, 2 p.m.
River Plate Fresh Meat	Cannon-street Hotel, 11 a.m.

Mr. Luis Camacho announces the numbers of 180 bonds of the Mexican 6 per cent. consolidated external loan of 1888, and the numbers of fifty-eight bonds of the Mexican 6 per cent. consolidated external loan of 1890, which have been purchased and cancelled.

The statement that the Beira Railway Company, Limited, would postpone interest on Series C coupons till January, 1900, should read that the company are prepared to fund the interest and issue bonds in payment as heretofore.

The Deutsche Bank (Berlin) London agency announce that they are in receipt of the necessary remittance for the service of the 4 per cent. external debt of Guatemala, due 30th inst.

Vice-Admiral George Digby Morant has been elected a director of the Fairfield Shipbuilding and Engineering Company, Limited.

Mr. Edward Birks has resigned his position as manager of the Sheffield Banking Company, Limited, after fifty-two years' service. Mr. William Douthwaite, lately joint manager, has been appointed sole manager.

The registered offices of the Achilles Gold Mines, Limited, have been removed to 6 and 7, Queen-street-place, London, E.C., and Mr. W. F. Garland has been appointed secretary to the company.

The liquidators of the Union Debenture Company, Limited, announce a fourth return to the shareholders of 5s. per share, payable at the offices of Mr. Sydney Cronk, 43 and 44, Lombard-street, E.C., on and after the 30th inst.

The English Association of American Bond and Shareholders, Limited, is prepared to cash coupon No. 19, due January 1, 1898, of the first mortgage bonds of the Muskegon Division of the Grand Rapids and Indiana Railway

MINING RETURNS.

Broken Hill Proprietary Company.—21,357 tons of ore treated, including product from ores purchased; output from the refinery, 1,898 oz. gold (estimated), 427,865 oz. silver, 2,545 tons of lead, and 35 tons antimonial lead (estimated); the copper matte containing 17 tons of copper (estimated), and 22,616 oz. silver (estimated).

May Consolidated Gold Mining Company.—Yield 3,518 oz.; cyanide, 2,272 oz., inclusive of clean up.

Ottos Kopje Diamond Mines.—4,751 loads washed, 200 carats of diamonds won.

St. John Del Rey.—Gold produced June 11 to 20, £7,600. Yield per ton ·92 of an oz. troy.

Bayley's United Gold Mines.—Cyanide plant treated 890 tons tailings, yielding 946 oz. of gold.

Brilliant Block Gold Mining Company.—1,072 tons for 736 oz. of gold.

Frank Smith Diamond Mines.—3,600 loads washed producing 211 carats.

Aladdin's Lamp Gold Mining Company.—440 tons of ore crushed, yielding 250 oz., and 9 tons of concentrates, containing 313 oz.

Alaska Treadwell.—Bullion shipment, $64 455; ore milled, 22,766 tons; sulphurets treated, 412 tons; bullion from sulphurets, $21,959.

Mount Usher.—68 tons of ore crushed, yielded 140 oz. gold.

Myall's United.—Crushed 2,200 tons, yielding 451 oz. gold; tailings treated by cyanide yielded 417 oz.

Hannan's Cresus.—52 tons crushed, yielded 53 oz.

Hauraki.—Crushed 150 tons, yielding 440 oz.

Bellevue Proprietary.—493 tons crushed, yielding 872 oz.

Brilliant Block.—1,072 tons crushed for 736 oz.

Queen Cross Reef.—265 tons crushed, yielding 327 oz.

Mount David.—Crushed 404 tons, yielded 670 oz.

Victoria and Queen.—280 tons crushed for 588 oz.

Lachlan Goldfields.—Crushed 387 tons second class ore, yielding 102 oz.

Sugarloaf ("25 Mile").—53 tons crushed, yielded 155 oz. of retorted gold.

Mammoth Collins.—3,000 tons crushed, yielded $10,750.

Queensland Menzies.—Crushed 230 tons, yielding 577 oz.

Brock's Goldfields of the Northern Territories of Australia.—Clean up after first crushing of 100 tons for 117 oz. of gold.

Day Dawn Block and Wyndham Gold Mining Company.—Tons crushed, 1,400; yield of gold, 1,782 oz., including tailings.

Eaglehawk Consolidated Gold Mining Company.—Crushed, 230 tons, yielding 141 oz. gold.

New Australian Broken Hill Consols.—2 tons 13 cwt., containing 4,300 oz of silver.

Highland Chief.—150 tons crushed, yielding 46 oz.

Lady Shenton.—Crushed 626 tons, yielding 1,890 oz., including 250 oz. from plates.

Howell's Consolidated Gold Mines.—1,661 tons of ore crushed for 1,085 oz. of gold.

Frank Smith Diamond Mines.—3,800 loads washed, producing 200 carats.

Webster's Find.—58 oz. gold from 45 tons crushed.

RAILWAY TRAFFIC RETURNS.

Algeciras (Gibraltar) Railway.—Traffic for week ended June 18, Ps. 18,920; increase, Ps. 990. Aggregate from July 1, Ps. 1,067,727; increase, Ps. 78,747.

West Flanders Railway.—Gross receipts for week ending June 26, £2,507; increase, £476. Total from January 1, £61,807; increase, £2,580.

Villa Maria and Rufino Railway.—Traffic for week ending June 25, £311.; increase, £30. Aggregate from January 1, £8,753,; increase, £1,640.

Bengal Central Railway.—Traffic receipts for week ending June 4, Rs. 16,433; decrease, Rs. 1,296. Aggregate from January 1, Rs. 4,60,372; increase, Rs. 74,081.

Alcoy and Gandia Railway and Harbour Company.—Traffic for week, June 25, Ps. 9,900; decrease Ps. 200. Aggregate from January 1, Ps. 224,300; decrease, Ps. 10,770.

Western of Santa Fe Railways.—Gross receipts for week ending June 18, $12,103; decrease, $1,287.

Burma Railways.—Traffic receipts for week ending May 28, Rs. 1,62,619; decrease Rs. 27,536. Aggregate from January 1, Rs. 43,77,583; decrease, Rs. 52,269.

Rohilkund and Kumaon Railway.—Traffic receipts for week ending May 28, Rs. 9,939; increase, Rs. 1,699. Aggregate from January 1, Rs. 1,76,889; increase, Rs. 5,896.

Western of Santa Fe Railway.—Traffic receipts for week ending June 25, $9,081; decrease, $3,070.

Cleator and Workington.—Gross receipts for the week ending June 25 amounted to £1,007, an increase of £136. Total receipts from January 1, £26,109, a decrease of £222.

Cockermouth and Keswick Railway.—Receipts for the week ending June 25, £1,205; increase, £242. Aggregate from January 1, £22,213; increase, £2,261.

Great Western of Brazil.—Traffic receipts for the week ending May 21, $14,375; decrease, $2,679. Aggregate from January 1, $646,699; increase, $81,094.

The numbers are announced of three bonds of £100 each, Series A, and twenty bonds of £20 each, Series B, of the issue of £1,890,000 5 per cent. first mortgage debentures of the Royal Trans-African Railway Company, drawn for redemption, which will be paid on July 1 at the Capital and Counties Bank, Limited, 39, Threadneedle-street, E.C., or at the company's agents in Amsterdam and Brussels, or at the offices of the company in Oporto or Lisbon, but the same will not be payable in Paris as heretofore.

Mr. Joseph Pyke has accepted a seat on the board of the New Tivoli, Limited.

The Southern Pacific Company will, after July 1, against delivery of dividend warrants No. 34 appertaining to certificates of stock of the Central Pacific Railroad Company, pay half of 1 per cent. of the par value of the stock. Holders of the London committee's certificates in England can obtain the amount referred to on presentation of their certificate at Messrs. Glyn, Mills, Currie, & Co.'s, 67, Lombard-street, London, E.C.

Natal and Nova Cruz (Brazilian) Railway, Limited. The registered office of the company is now at 10, Finsbury-circus, London, E.C.

* Statement of gross traffic.

Prices Quoted on the London Stock Exchange.

Throughout the Investors' Review middle prices alone are quoted, the object being to give the public the approximate current quotations of every security of any consequence in existence. On the markets the buying and selling prices are both given, and are often wide apart where stocks are seldom dealt in. Other particulars will be found in the Investment Index published quarterly—January, April, July, and October—in connection with this Review, price 2s., by post 2s. 2d. Where dividends are paid only once a year, an *italic* type is used to distinguish them. The London Stock Exchange Official List is quoted in the Review almost entire, only very insignificant issues, or bonds falling due within the next two or three years, being omitted. But the list is subdivided into the leading, or active, stocks, and those less frequently dealt in. The former will be found under the head of "Stock Markets," and with more details than it is possible to give for the bulk of securities. By retaining the file of the Investors' Review any subscriber can follow for himself the movements of securities from week to week, and the Investment Index will from time to time help to fill up deficiencies in the information.

Tea Companies and Mines and Mining Finance Stocks are placed in special lists.

Among the abbreviations used are the following:—S.F. Snk.Fd. *sinking fund*; Certs., *certificates*; Debs. or Dbs., *debentures*; Db. or D.Stk., *debenture stock*; Pf. Prf., or Pref., *preference*; Prefd. or Pfd., *preferred*; Dfd., *deferred*; L. or Ltd., *limited*; Sh., *share*; Ans., *annuities*; Cu. or Cm., *cumulative*; Gu or Guar., *guaranteed*; Bds., *bonds*; S., Sr., or Ser., *series*; In., Ins., Insc., *inscribed*; Dr., Drgs., Drwgs., *drawings*; Stg., Strlg., *sterling*; Lia., *liable to*; Sp., Surp., *surplus*; Per., Perp., *perpetual*; Ln. *lien*; Lo. *loan*.

The dates following the names of securities are the years of issue or of redemption. Where shares are not fully paid up, their nominal amount is given with the name so that investors may know the liability upon them.
